II. Regular and operational budgets, 2024–2025

A. Regular budget

2. Allotments in the amount of ϵ 60.2 million were released at the outset of 2024, against which, by 31 March 2024, regular budget expenditures amounted to ϵ 21.1 million. This amount corresponds to 26.3 per cent of the total gross approved appropriations for 2024.

B. Operational budget

- 3. Allotments in the amount of $\in 17.9$ million were released at the beginning of 2024, against which, by 31 March 2024, operational budget net expenditures amounted to $\in 4.8$ million. This amount corresponds to 20.5 per cent of the total gross approved appropriations for 2024.
- 4. Technical cooperation activities at the end of March 2024 reached \$87.1 million, including commitments, which is \$12.2 million higher than the 2023 amount. Income from programme support costs for the first quarter of 2024 amounted to \$7.9 million.

C. Buildings management

- 5. Allotments of €33.8 million were issued at the start of 2024, corresponding to 92.8 per cent of the approved budget. The buildings management budget is being implemented in accordance with the prevailing workplan.
- 6. Expenditures as at 31 March 2024 amounted to €17.5 million, which represents 48.0 per cent of the buildings management gross approved budget.

III. Prioritizations, efficiency gains, digitalization and full cost recovery

- 7. The General Conference, through decision GC.20/Dec.15, paragraph (h) (ii), requested the Director General to "report to the next two sessions of the Programme and Budget Committee on efficiencies and savings between sessions, with the understanding that the search for efficiencies and savings must be a continuous management process, without hampering the core functions of the Organization".
- 8. From 2022 to 2024, UNIDO launched several initiatives aimed at technical cooperation (TC) efficiency increase, including the full cost recovery (FCR) and TC scale-up and optimization initiatives. The work is broadly structured around the recommendations identified in a joint report with KPMG and extensive internal consultations and workshops held towards the end of 2023 and beginning of 2024. The work is ongoing, and significant progress has been made, e.g. in reviewing and consolidating the TC project portfolio as well as introducing a new time recording system, controlling mechanisms such as prompt project closure, better forecasting and strategic portfolio management. The new TC Guidelines are also being prepared.
- 9. A digital transformation initiative is in place to streamline and automate key processes, including the ones in finance, travel management, procurement and human resources. Progress has been made in this context, where costs are avoided as a result of the introduction of robotic processing automation for incoming payments reconciliation, vendor bank master data entry and travel payment processing. A cost saving of €0.2 million has already been realized in the past reporting period as a result of a global banking project, which includes the consolidated use of banks by the Treasury, the harmonization of banking methods and software, and the reduction of transactional costs. The work to streamline and automate key administrative processes is ongoing, with the use of artificial intelligence, robotics and other frontier technologies being scaled up.
- 10. To increase organizational efficiency and effectiveness, UNIDO is strengthening its collaboration with external and implementing partners. This collaboration is expected to have major impacts on TC delivery and project implementation, while supporting UNIDO's strategic priorities, fostering innovation by employing best practices and know-how in project and grant management, leveraging the Organization's partners' field presence to promote UNIDO's impact and strengthening its back-office operations.
- 11. The FCR methodology is currently being finalized, including an analysis of the results of the expanded time recording system. The FCR methodology will be fully consistent with United Nations General Assembly resolution 67/226 and best practices from the United Nations system and funding partners. It will also be aligned with previous requests by Member States for a fair, transparent and equitable accounting of project costs, as well as the recommendations made by the External Auditor in their report on the accounts of UNIDO for the financial year 2020. The work programme of the informal working group on Programme and Budget Committee-related issues includes an agenda item on FCR and progress made in this area.
- 12. In practical terms, the FCR targets have been included in the programme and budgets for the 2024–2025 biennium. The main objective of FCR is to minimize the

V.24-07489 3/10

impact of TC projects on regular budget resources and to facilitate the scale-up of TC delivery by improving internal operations through the recovery of all costs directly associated with TC projects.
