INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with the cement and concrete industry, is a revised and updated version of the second guide in the series of UNIDO *Guides to Information Sources* (UNIDO/LIB/SER.D). A list of guides published to date appears at the end of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

The cement and concrete industry, like other building materials industries, is unique in that its employment potential is twice that of many other industries. Not only are people employed in the production of basic materials and components, but the activities based on these items often engage ten times as many people as the production. The cement and concrete industry can therefore set the pace for social and economic development.

UNIDO has assisted developing countries to establish building materials industries and has advised on the expansion and improvement of production in existing cement and concrete industries.

EXPLANATORY NOTES

The designations employed and the presentation of the material in this guide do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country or its authorities, or concerning the delimitation of its frontiers.

Publications listed in this guide have been selected mainly from literature in the official languages of the United Nations; when appropriate, publications in other languages have also been included.

The names of organizations and publications are given in their original languages, wherever available; for those listed in languages other than the official languages of the United Nations, a translation of the title into English is included.

Where available, the date and the number of pages of the most recent known edition are indicated as well as the address of the issuing organization or publisher.

United Nations sales publications should be ordered by sales number. They are available through authorized distributors or may be ordered from:

Sales Section
Publishing Service
United Nations
New York, New York 10017
United States of America

or

INTRODUCTION

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne l'industrie du ciment et du béton, est une édition revue et mise à jour du deuxième ouvrage de la série des Guides des sources d'information publiée par l'ONUDI (UNIDO/LIB/SER.D). On trouvera à la fin de cette publication la liste des guides déjà parus. D'autres sont prévus.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche, mais de simples guides des sources d'information considérées comme présentant un intérêt pratique pour les utilisateurs. Les données sont présentées de manière à permettre à ceux-ci de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir les publications auxquelles ils s'intéressent.

L'industrie du ciment et du béton, comme les autres industries des matériaux de construction, a ceci de particulier qu'elle offre deux fois plus de possibilités d'emploi que de nombreuses autres industries. Non seulement la production des matériaux de base et des composants nécessite une main-d'oeuvre importante mais les activités qui en découlent occupent souvent un personnel dix fois plus nombreux. L'industrie du ciment et du béton est donc un facteur de progrès économique et social.

L'ONUDI aide les pays en développement à créer des industries de matériaux de construction et les conseille quant aux moyens d'intensifier et d'améliorer la production des entreprises existantes.

NOTES EXPLICATIVES

Les appellations employées dans la présente publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique de tel ou tel pays ou territoire ou de ses autorités, ni quant au tracé de ses frontières.

Les publications énumérées dans le présent volume sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés dans d'autres langues ont aussi été mentionnés.

Les noms des organisations et les titres des publications sont donnés le plus souvent possible dans la langue originale; les noms des organisations et les titres des publications libellés dans des langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

Nous avons, aussi souvent qu'il était possible, précisé la date et le nombre de pages de l'édition la plus récente ainsi que l'adresse de l'éditeur ou de l'organisation qui a publié le document.

On peut se procurer les publications des Nations Unies auprès des distributeurs autorisés ou les commander à l'une des adresses suivantes, en mentionnant le numéro de vente :

ВВЕДЕНИЕ

Организация Объединенных Наций по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах посредством обеспечения руководства в совершенствовании местных средств информации. Одним из средств такого содействия является составление в ЮНИДО справочников и руководств по отдельным источникам информации, касающимся тех отраслей промышленности, которые имеют первостепенное значение для развивающихся стран. Настоящее руководство по вопросам цементной и бетонной промышленности является исправленным и дополненным вариантом второго руководства в серии ЮНИДО: „Справочники по источникам информации“ (*Guides to Information Sources (UNIDO/LIB/SER. D)*). Перечень опубликованных до настоящего времени руководств приводится в конце настоящего руководства; в этой серии планируется выпуск еще целого ряда справочников.

Такие руководства и справочники не ставят своей целью быть исчерпывающими или служить в качестве инструмента исследования; в них скорее представлены источники, которые, как полагают, имеют практическую ценность для тех, кто ими пользуется. Данные в этих справочниках подобраны таким образом, чтобы облегчить быстрый доступ к организациям, на которые имеется ссылка, и приобретение перечисленных изданий.

Цементная и бетонная промышленность, как и другие отрасли промышленности по производству строительных материалов, является уникальной отраслью промышленности в том смысле, что по своим возможностям обеспечения занятости она вдвое превосходит многие другие отрасли промышленности. Речь идет не только о рабочей силе, занятой на производстве основных материалов и компонентов, но также о том, что виды деятельности, связанные с этими материалами, нередко привлекают рабочую силу, численность которой превосходит в пять раз ту, которая занята на производстве. Поэтому цементная и бетонная промышленность открывает возможности для социального и экономического развития.

ЮНИДО оказала содействие развивающимся странам в создании отраслей промышленности по производству строительных материалов и предоставила консультации по вопросам развития и улучшения производства в существующих отраслях цементной и бетонной промышленности.

ПОЯСНИТЕЛЬНЫЕ ЗАМЕЧАНИЯ

Используемые обозначения и распределение материалов в настоящем руководстве не означают, что Секретариат Организации Объединенных Наций выражает какое-либо мнение относительно юридического статуса той или иной страны, или ее органов власти, или относительно начертания ее границ.

Перечисленные в настоящем руководстве публикации отображены главным образом из литературы, изданной на официальных языках Организации Объединенных Наций; в соответствующих случаях были включены также публикации, изданные на других языках.

Названия организаций и публикаций даны на языке оригинала в тех случаях, когда они имелись в наличии; названия, представленные на языках, не являющихся официальными языками Организации Объединенных Наций, включены в перечень в переводе на английский язык.

В зависимости от наличия указаны год издания и количество страниц самого последнего из известных изданий, а также адрес организации, выпускающей публикацию, или издателя.

Предназначенные для продажи публикации Организации Объединенных Наций следует заказывать по соответствующему номеру, под которым они продаются. Их можно приобрести через должным образом уполномоченных агентов по продаже или заказать в:

INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Entre los medios de que se vale la ONUDI para realizar esa labor figura la compilación de repertorios y guías de fuentes de información seleccionadas sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía, consagrada a las industrias del cemento y del hormigón, es una versión revisada y actualizada de la segunda guía de la serie titulada *Guías de Fuentes de Información* (UNIDO/LIB/SER.D). Al final de esta guía puede verse una lista de las publicadas hasta la fecha; se prevé la publicación de otras de la misma serie.

Los repertorios y las guías no pretenden ser exhaustivos ni están destinados a servir de instrumento de investigación, sino que presentan fuentes consideradas de valor práctico para los usuarios. Los datos se han recopilado de manera que proporcionen un rápido acceso a las entidades mencionadas y faciliten la adquisición de las publicaciones que se indican.

La industria del cemento y del hormigón, al igual que otras industrias de los materiales de construcción, es única en el sentido de que su potencial generador de empleo es el doble del de muchas otras industrias. Aparte del personal empleado en la producción de componentes y materiales básicos, las actividades basadas en estos productos suelen dar empleo a un número de personas diez veces mayor que el utilizado en la producción de los mismos. Por tanto, la industria del cemento y del hormigón puede marcar la pauta del desarrollo social y económico.

La ONUDI viene prestando asistencia a los países en desarrollo en el establecimiento de industrias de materiales de construcción y asesorándolos sobre la manera de aumentar y mejorar la producción de la industria del cemento y del hormigón ya existente.

NOTAS EXPLICATIVAS

Las denominaciones empleadas en esta guía y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países o territorios citados o de sus autoridades, ni respecto de la delimitación de sus fronteras.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones y publicaciones aparecen en su idioma original, cuando así constan; cuando se dan en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se incluye la traducción al inglés del título correspondiente.

Se indican la fecha y el número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen.

Los pedidos de publicaciones de las Naciones Unidas han de hacerse por número de venta. Dichas publicaciones se pueden obtener por conducto de distribuidores autorizados, o haciendo un pedido a:

FILMS AND FILM CATALOGUES

A. Films*

A selection of industrial films suitable for training and for illustrating technological processes

604. **UN BETON A GRANULOMETRIE DISCONTINUE**
14 minutes.
Distr.: Centre audiovisuel de l'entreprise
21, rue Clément Marot
75008 PARIS, France
605. **BUILDING CONSTRUCTION SERIES FILMSTRIPS**
Produced by the Brixton School of Building. 1958.
The manufacture of cement and lime. 34 frames. (Filmstrip 2)
Mortar and concrete. 36 frames. (Filmstrip 3)
Distr.: National Audiovisual Aids Library
Paxton Place, Gypsy Road
LONDON SE27 9SR, England
606. **CEMENT AND TIMBER: RESEARCH ON MATERIALS USED IN CONSTRUCTION**
1969. Colour, 16 minutes. With the help of research done by the Building Research Liaison Service of the Commonwealth Department of Works, structural designers in Australia are learning more about properties of cement and timber and how to use them more efficiently and economically.
Distr.: Australian Scientific Liaison Office
Africa House, Kingsway
LONDON WC2, England
607. **CONCRETE PRACTICE: BATCHING**
1971. Colour, 9 minutes. Describes the material and equipment used in carrying out on-site batching operations.
Distr.: Cement and Concrete Association
52 Grosvenor Gardens
LONDON SW 1W 0AQ, England

*Films are sound, black and white and 16 mm unless otherwise indicated. Films sponsored by private companies may promote special product lines which are not necessarily endorsed by the United Nations. Films are usually for purchase or rent, but are sometimes available on a free loan basis from the distributors listed. In some cases films for purchase can be previewed.

608. **CONCRETE PRACTICE: FAIR FACED BLOCKWORK**
 1971. Colour, 9 minutes. Points out the importance of the consistency and composition of the mortar in laying fair-faced blocks.
 Distr.: Cement and Concrete Association (see entry 607)
609. **CONCRETE PRACTICE: GROUND FLOOR CONSTRUCTION**
 1974. Colour, 16 minutes. Shows techniques of strip construction and direct finishing developed for constructing concrete floors.
 Distr.: Cement and Concrete Association (see entry 607)
610. **CONCRETE PRACTICE: MIXING**
 1971. Colour, 9 minutes. Illustrates the operation of various types of mixers.
 Distr.: Cement and Concrete Association (see entry 607)
611. **CONCRETE PRACTICE: PLACING AND COMPACTING**
 1971. Colour, 10 minutes. How concrete should be placed to avoid damage. Stresses the importance of efficient compaction.
 Distr.: Cement and Concrete Association (see entry 607)
612. **CONCRETE PRACTICE: TESTING CONCRETE**
 1971. Colour, 13 minutes. How a worker on the site can check the workability of fresh concrete using the slump test and prepare cubes for laboratory testing.
 Distr.: Cement and Concrete Association (see entry 607)
613. **DUST-UP AT NORTHFLEET**
 1972. Colour, 27 minutes. About dust pollution from cement works at Northfleet, Kent.
 Distr.: Granada Television Film Library
 Granada TV Network Ltd Television Centre
 Quay Street
 MANCHESTER M60 9EA, England
614. **GATESHEAD HIGHWAY**
 1972. Colour, 22 minutes. Describes the design and construction of the Gateshead highway, a two-level pre-stressed concrete road.
 Distr.: Cement and Concrete Association (see entry 607)
615. **HYDRAULICALLY PRESSED CONCRETE**
 1969. Colour, 10 minutes. Three types of slab and kerb presses shown in operation in a concrete works.
 Distr.: Fielding and Platt Ltd
 P.O. Box 10
 Atlas Works
 GLOUCESTER GL1 5RF, England
616. **AN INTRODUCTION TO PRE-STRESSED CONCRETE**
 Colour, 19 minutes. Explains, with the use of diagrams and laboratory experiments, the principles of pre-stressed concrete.
 Distr.: Cement and Concrete Association (see entry 607)

617. **MUR EN QUATRE HEURES**
13 minutes. Points out the advantages of using prefabricated concrete walls rather than conventional building methods.
Distr.: Compagnie de distribution cinématographique
13, rue Washington
75008 PARIS, France
618. **PAVING THE WAY**
1973. Colour, 18 minutes. Reviews the range of plants and techniques available for constructing concrete roads to current specifications.
Distr.: Cement and Concrete Association (see entry 607)
619. **PRECAST CONCRETE**
1960. Colour, 27 minutes. Shows production and handling of pre-cast structural concrete components and their assembly on the building site.
Distr.: Concrete Ltd
16 Northumberland Avenue
LONDON WC2, England
620. **PRESTRESSED CONCRETE TANKS CONSTRUCTION**
1971. Colour, 20 minutes. Shows construction of a water storage tank, giving details of framework, concrete construction etc.
Distr.: Preload Ltd
332 Clapham Road
LONDON SW9 9AJ, England
621. **PROEVNING AV TILSLAG, BETONG OG ARMERING ETTER NORSK STANDARD 427A: BETONG ARBEIDER (Testing of aggregate, concrete and reinforcement according to Norwegian standard No. 427A: concrete work)**
1962. Colour, 30 minutes. A detailed review of the procedures used in Norway for sampling and testing concrete.
Distr.: Norsk Cementforening
