INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. One of the means of achieving this is the compilation of directories and guides to basic information sources.

The UNIDO work programmes for 1972-1974 include the compilation of a series of directories and guides, listing selected information sources on branches of industry of primary concern to developing countries. The present guide is the tenth in the series of UNIDO Guides to Information Sources (UNIDO/LIB/SER.D). A list of the guides published to date appears inside the back cover of this guide; many more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended as research tools; rather, they present a selection of sources that are considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

Pesticides, the subject of the present issue, are vitally important agricultural inputs for developing countries. They are especially important for protecting the investment made in introducing new varieties of high-yielding crops and increasing the use of water resources and fertilizers. The formulation of pesticides, a relatively simple process, requires only a modest capital investment and provides a highly beneficial way of exploiting local raw materials, such as clays and other mineral carriers. Savings in foreign exchange and transportation costs as high as 50 per cent can be achieved by formulating pesticides locally. UNIDO assists developing countries in setting up facilities for formulating and distributing pesticides.

INTRODUCTION

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en voie de développement, l'Organisation des Nations Unies pour le développement industriel conseille les organismes qui s'occupent de l'industrialisation et les aide à améliorer les moyens d'information locaux, notamment en établissant des répertoires et des guides des principales sources d'information.

Les programmes de travail de l'ONUDI pour 1972-1974 prévoient l'établissement d'une série de répertoires et de guides de sources d'information sur les secteurs industriels qui présentent un intérêt majeur pour les pays en voie de développement. Le présent guide est le dixième de la série des Guides des sources d'information (UNIDO/LIB/SER.D). On trouvera à la page 3 de la couverture la liste des guides déjà parus. On prévoit d'en publier de nombreux autres.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche, mais de simples guides pratiques des sources d'information qui visent à répondre aux besoins immédiats des utilisateurs. Toutes les précisions utiles ont été autant que possible données pour permettre à ceux-ci de se mettre directement en rapport avec les sources d'information mentionnées et d'obtenir rapidement les publications auxquelles ils s'intéressent.

Le présent volume est consacré aux pesticides, produits indispensables à l'agriculture des pays en voie de développement. Ils jouent un rôle particulièrement important en protégeant les investissements faits pour introduire de nouvelles variétés à haut rendement et développer l'irrigation et la consommation d'engraiss. La formulation des pesticides est un processus relativement simple qui n'exige pas de gros investissements et permet d'exploiter de façon très rentable des matières premières locales telles que des argiles et d'autres matériaux riches en éléments minéraux. En formulant les pesticides sur place, on peut économiser jusqu'à 50 % des dépenses en devises ou des frais de transport. L'ONUDI aide les pays en voie de développement à se doter des moyens nécessaires pour formuler et commercialiser les pesticides.

Организация общедоступных фондов по промышленному развитию ЮНИДО поддерживает использование информационной инфраструктуры в развивающихся странах путем представления руководства и услуг при местной службе информации. Одним из средств для достижения этого является составление справочников и руководств по основным источникам информации.

Программа деятельности ЮНИДО за период 1972-1974 гг. предусматривает составление серии справочников и руководств, в которых и расширяются уже имеющиеся источники информации по отрасли промышленности, имеющим первостепенное значение для развивающихся стран. Настоящее руководство является десятым в серии Guides to Information Sources "Руководство к источникам информации" (UNIDO/LIB/SER.1), подготовленные ЮНИДО. Перечень руководств, выпущенный до настоящего времени, приводится на этой странице обложки данного руководства; намечен выпуск еще ряда руководств для этой серии.

Не ставится цель давать исчерпывающие сведения в этих справочниках и руководствах, они не предназначены также для исследовательских целей; они скорее представляют собой подборку источников, которые, видимо, могут представлять практическую ценность для тех, кто ими пользуется. Для облегчения пользования этими справочниками данные подобраны таким образом, чтобы можно было быстро найти организацию, на которую имеется ссылка, и приобрести указанное издание.

Ядохимикаты, основная тема настоящего выпуска, являются жизненно важным компонентом для сельского хозяйства развивающихся стран. Они особенно важны для отхождения капиталоложений, сделанных в процессе внедрения новых разновидностей высокурожайных культур и повышения эффективности использования земельных ресурсов и удобрений. Развитость ядохимикатов является сравнительно простым процессом, требующим лишь умеренных капиталовложений и обеспечивающим весьма эффективную эксплуатацию местных сырьевых материалов, таких, как глина и другие вещества, содержащие минералы. При местной разработке ядохимикатов можно добиться экономии иностранной валюты и стоимости транспортных перевозок до 50 процентов. ЮНИДО оказывает помощь развивающимся странам в создании предприятий для разработки и распределения ядохимикатов.

INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en los países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Uno de los medios de lograrlo es la compilación de guías de fuentes básicas de información.

Los programas de trabajo de la ONUDI para 1972-1974 comprenden la compilación de una serie de guías, en que se registran determinadas fuentes de información sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía es la sexta de la serie Guides to Information Sources (UNIDO/LIB/SER.D) que publica la ONUDI. La lista de las guías publicadas hasta la fecha figura en el anverso de la contratapa de la presente guía; se prevé la publicación de muchas guías más en esta serie.

Estas guías no pretenden ser exhaustivas ni están destinadas a servir de instrumentos de investigación; presentan, más bien, una selección de fuentes que se consideran de valor práctico para los usuarios. Los datos se han recopilado de modo tal que faciliten el rápido acceso a las entidades mencionadas y la adquisición de las publicaciones que se indican.

Los plaguicidas, objeto de la presente publicación, constituyen insumos agrícolas de vital importancia para los países en desarrollo. Son especialmente valiosos para proteger las inversiones efectuadas al introducir nuevas variedades de cultivos de alto rendimiento y para aumentar el rendimiento de los recursos hidráulicos y los fertilizantes. La formulación de plaguicidas, proceso relativamente sencillo, requiere tan sólo una modesta inversión de capital y constituye un medio sumamente beneficioso de aprovechar ciertas materias primas locales, como arcillas y otros materiales portadores de minerales. Mediante la formulación local de plaguicidas se pueden obtener ahorros hasta del 50% en divisas y gastos de transporte. La ONUDI presta asistencia a los países en desarrollo para el establecimiento de instalaciones destinadas a la formulación y distribución de plaguicidas.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones mencionadas en la sección I aparecen en su idioma original cuando así consta; en los casos de organizaciones cuyos nombres están en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se ha dado el título correspondiente en inglés.

Se indican la fecha y número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editorial, cuando tales datos se conocen.

En el presente número se emplean las siguientes abreviaturas:
