INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with the clothing industry, is the twelfth in the series of UNIDO Guides to Information Sources (UNIDO/LIB/SER.D). A list of the guides published to date appears inside the back cover of this guide; many more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended as research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

The manufacture of garments has great industrial potential for developing countries. Through effective utilisation of their abundant labour and raw material resources, these countries could produce garments for both domestic and export markets instead of exporting grey goods and importing expensive apparel, as they do at present. Moreover, even a country lacking extensive resources of raw fibre or an established textiles industry could embark upon clothing manufacture based on imported fabrics, as evidenced by the successful establishment of such industries in several countries, with the use of UNIDO technical assistance.

EXPLANATORY NOTES

The designations employed and the presentation of the material in this guide do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country or its authorities, or concerning the delimitation of its frontiers.

Publications listed in this guide have been selected mainly from literature in the official languages of the United Nations; when appropriate, publications in other languages have also been included.

The names of organizations listed in section I are given in their original languages, wherever available; for organizations listed in languages other than the official languages of the United Nations, a translation of the title into English is included.

Where available, the date and the number of pages of the most recent known edition are indicated, as well as the address of the issuing organization or publisher.

United Nations sales publications should be ordered by sales number. They are available through authorized distributors or may be ordered from:

INTRODUCTION

L'Organisation des Nations Unies pour le développement industriel (ONUDI) encourage l'exploitation de l'information industrielle dans les pays en voie de développement en donnant des conseils pour l'amélioration des sources d'information locales et, notamment, en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent un intérêt majeur pour les pays en voie de développement. Le présent guide, consacré à l'industrie de la confection, est le deuxième de la série des Guides des sources d'information (UNIDO/LIB/SER.D). On trouvera à la page 3 de la couverture la liste des guides déjà parus. On prévoit d'en publier de nombreux autres.

Les ouvrages de cette série ne prétendent pas être exhaustifs; on ne sont pas non plus des instruments de recherche, mais de simples guides pratiques des sources d'information qui visent à répondre aux besoins immédiats des utilisateurs. Les données sont présentées de façon à leur permettre de se mettre rapidement en rapport avec les organismes cités et à leur faciliter l'acquisition des publications mentionnées.

La fabrication de vêtements ouvre aux pays en voie de développement des perspectives prometteuses. Grâce à l'utilisation efficace d'une main-d'œuvre et de matières premières abondantes, ces pays pourraient produire des vêtements à la fois pour les marchés intérieur et extérieur au lieu, comme actuellement, d'exporter des produits écorés et d'importer à grand frais des articles d'habillement. En outre, même ceux qui ne disposent pas d'abondantes matières premières ou ne possèdent pas d'industrie textile pourraient se lancer dans la production de vêtements en important les tissus nécessaires, à l'instar de plusieurs pays qui, en recourant à l'aide de l'ONUDI, ont créé avec succès des fabriques de vêtements.

NOTES EXPLICATIVES

Les appellations employées dans la présente publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique de tel ou tel pays ou territoire, ou de ses autorités, ni quant au tracé de ses frontières.

Les publications énumérées dans le présent volume sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés en d'autres langues ont aussi été mentionnés.

Les noms des organisations énumérées à la section I sont donnés le plus souvent dans la langue originale. Les noms des organisations libellés en des langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

Nous avons, aussi souvent qu'il était possible, précisé la date et le nombre de pages de l'édition la plus récente ainsi que l'adresse de l'éditeur ou de l'organisation qui a publié le document.

On peut se procurer les publications des Nations Unies auprès des distributeurs autorisés ou les commander à l'une des adresses suivantes, en mentionnant le numéro de vente :

ВВЕДЕНИЕ

Организация Объединенных Наций по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах путем предоставления консультаций в деле улучшения методов местного обмена информацией. Одной из важных мер такого содействия является составление в ЮНИДО справочников и руководств в отношении отдельных источников информации по отраслям промышленности, имеющие первостепенное значение для развивающихся стран. Настоящее руководство, относящееся к промышленности, изготавливающей одежду, является двенадцатым в серии ЮНИДО Guides to Information Sources (руководств/справочников). Список руководств, опубликованных до настоящего времени, приводится на третьей странице обложки данного руководства; для этой серии планируется публикация еще целого ряда руководств.

Такие справочники и руководства не ставят своей целью быть исчерпывающими и не предназначены для исследовательских целей, а скорее представляют собой источники, которые имеют практическую ценность для тех, кто ими пользуется. В этих справочниках данные подобраны и представлены таким образом, чтобы облегчить как доступ к получению информации в тех организациях, на которые имеется ссылка, так и приобретение перечисленных изданий.

Производство одежды открывает большие потенциальные возможности для промышленности развивающихся стран. Эффективно используя имеющуюся в избытке рабочую силу и ресурсы сырья, эти страны могли бы производить одежду как для внутреннего, так и для внешнего рынков сбыта вместо того, чтобы экспортировать сырые ткани и импортировать дорогостоящую одежду, как они это делают в настоящее время. Более того, страна, не располагающая значительными ресурсами хлопка-сырца или в которой отсутствует текстильная промышленность, могла бы приступить к производству одежды на основе импортируемых тканей, с чем содействует успешное создание подобных отраслей промышленности в нескольких странах при использовании технической помощи со стороны ЮНИДО.

ПОЯСНИТЕЛЬНЫЕ ЗАМЕЧАНИЯ

Используемые обозначения, представление и распределение материалов в настоящем руководстве не означают, что Секретариат Организации Объединенных Наций выражает какое-либо мнение относительно юридического статуса той или иной страны, или ее органов власти, или относительно определения ее границ.

Публикации, перечисленные в данном справочнике, отобраны в основном из литературы, изданной на официальном языке Организации Объединенных Наций там, где это необходимо, включены публикации на другие языки.

Названия организаций, перечисленных в разделе Y, приводятся на языке оригинала в том случае, когда они известны названиями организаций, представленными на языке, не являющемся официальным языком Организации Объединенных Наций, переведены на английский язык.

В зависимости от наличия указывается дата и количество страниц своего последнего известного издания, а также адрес организации, выпускающей публикацию, или издателя.

Предназначенные для продажи публикации Организации Объединенных Наций следует заказывать по соответствующему номеру для продажи. Их можно приобрести через официальные издательства или заказать в:

INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en los países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Uno de los medios de promoción que emplea la ONUDI consiste en compilar repertorios y guías de determinadas fuentes de información sobre ramas de la industria de especial interés para los países en desarrollo. La presente guía, que trata de la industria del vestuario, es la duodécima de la serie Guides to Information Sources (UNIDO/LIB/SER.D) que publica la ONUDI. La lista de las guías publicadas hasta la fecha figura en el anverso de la contraporta de la presente guía; se prevé la publicación de muchas guías más en esta serie.

Las guías no pretenden ser exhaustivas ni están destinadas a servir de instrumentos de investigación; presentan, más bien, una selección de fuentes que se consideran de valor práctico para los usuarios. Los datos se han recopilado de modo tal que faciliten el rápido acceso a las entidades mencionadas y la adquisición de las publicaciones que se indican.

La confección de prendas de vestir ofrece grandes posibilidades a la industria de los países en desarrollo. Utilizando eficientemente sus abundantes recursos de mano de obra y de materias primas, estos países pueden fabricar ropa destinada tanto al mercado interno como al de exportación, en vez de exportar géneros crudos e importar costosas prendas de vestir, como hacen actualmente. Es más: incluso los países que carecen de abundantes recursos de fibras crudas o de una industria textil arraigada podrían lanzarse a la confección de vestuario a base de tejidos importados, si se toma como ejemplo los satisfactorios resultados alcanzados por industrias de ese tipo establecidas en varios países con la asistencia técnica de la ONUDI.

NOTAS EXPLICATIVAS

Las denominaciones empleadas en esta guía y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países citados o de sus autoridades, ni respecto de la delimitación de sus fronteras.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones mencionadas en la sección I aparecen en su idioma original cuando así constan; en los casos de organizaciones cuyos nombres están en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se ha dado el título correspondiente en inglés.

Se indican la fecha y el número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen.

Los pedidos de publicaciones de las Naciones Unidas han de hacerse por número de venta. Dichas publicaciones se pueden obtener por conducto de distribuidores autorizados, o haciendo un pedido a:
