## INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with the glass industry, is the sixteenth in the series of UNIDO Guides to Information Sources (UNIDO/LIB/SER.D). A list of the guides published to date appears inside the back cover of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

The manufacture of glass articles, such as sheet glass, bottles and containers, domestic glassware and glass fibres, has a great potential as a new industry in developing countries. The demand for glass products is rapidly increasing and in those countries where no glass industry has been established is now being met by imports. However, the basic raw materials for the industry, namely silica sand, soda ash and limestone, are available in many developing countries, and considerable foreign-exchange savings could be achieved through their industrial exploitation. UNIDO has assisted developing countries in establishing glass industries and has also, in a number of cases, advised existing glass-works on the expansion or diversification of their production.

In view of the basic differences in raw materials and technology between the glass industry and the ceramic industry, the latter will be treated in a separate issue of Guides to Information Sources to which interested readers are referred.

## EXPLANATORY NOTES

The designations employed and the presentation of the material in this guide do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country or its authorities, or concerning the delimitation of its frontiers.

Publications listed in this guide have been selected mainly from literature in the official languages of the United Nations; when appropriate, publications in other languages have also been included.

The names of organizations and publications are given in their original languages, wherever available; for those listed in languages other than the official languages of the United Nations, a translation of the title into English is included.

Where available, the date and the number of pages of the most recent known edition are indicated as well as the address of the issuing organization or publisher.

United Nations sales publications should be ordered by sales number. They are available through authorized distributors or may be ordered from:

## INTRODUCTION

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en voie de développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne l'industrie du verre, est le seizième de la série des Guides des sources d'information (UNIDO/LIB/SER.D). On trouvera à la page 3 de la couverture la liste des guides déjà parus. D'autres sont prévus.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche, mais de simples guides des sources d'information considérées comme présentant un intérêt pratique pour les utilisateurs. Les données sont présentées de manière à permettre à ceux-ci de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir les publications auxquelles ils s'intéressent.

La manufacture des articles en verre, notamment du verre plat, des bouteilles et flacons, de la verrerie de ménage et des fibres de verre, offre, en tant qu'industrie nouvelle, des perspectives prometteuses dans les pays en voie de développement. La demande de produits en verre augmente rapidement et les pays qui n'en fabriquent pas ont actuellement recours aux importations. Cependant, de nombreux pays en voie de développement possèdent les matières premières de base qu'utilise l'industrie, c'est-à-dire des sables quartzés, des cendres de soude et de la pierre calcaire, dont l'exploitation industrielle permettrait de réaliser des économies de devises considérables. L'ONUDI a aidé des pays en voie de développement à créer des industries du verre et a en outre, dans certains cas, donné à des verriers des conseils sur le développement et la diversification de leur production.

En raison des différences fondamentales - quant aux matières premières et à la technologie - qui existent entre l'industrie du verre et l'industrie de la céramique, cette dernière fera l'objet d'un numéro distinct des guides des sources d'information auquel nous renvoyons les lecteurs que cette question intéresse.

## NOTES EXPLICATIVES

Les appellations employées dans la présente publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique de tel ou tel pays ou territoire ou de ses autorités, ni quant au tracé de ses frontières.

Les publications énumérées dans le présent volume sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés dans d'autres langues ont aussi été mentionnés.

Les noms des organisations et les titres des publications sont donnés le plus souvent possible dans la langue originale; les noms des organisations et les titres des publications libellés dans des langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

Nous avons, aussi souvent qu'il était possible, précisé la date et le nombre de pages de l'édition la plus récente ainsi que l'adresse de l'éditeur ou de l'organisation qui a publié le document.

On peut se procurer les publications des Nations Unies auprès des distributeurs autorisés ou les commander à l'une des adresses suivantes, en mentionnant le numéro de vente :

## ВВЕДЕНИЕ

Организация Объединенных Наций по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах путем осуществления руководства в деле улучшения местных средств информации. Одним из средств содействия развитию является составление в ЮНИДО справочников и руководств к отдельным источникам информации по отраслям промышленности, имеющим первостепенное значение для развивающихся стран. Настоящее руководство по стекольной промышленности является шестнадцатым в серии UNIDO Guides to Information Sources (UNIDO/LIB/SER.D). Перечень руководств, выпущенных до настоящего времени, приводится на третьей странице обложки настоящего руководства; по этой серии планируется выпуск еще целого ряда руководств.

Такие справочники и руководства не ставят своей целью быть исчерпывающими или служить в качестве средств исследования; в них скорее представлены источники, которые рассматриваются как имеющие практическую ценность для тех, кто ими пользуется. Данные в этих справочниках подобраны таким образом, чтобы облегчить как доступ к получению информации в тех организациях, на которые имеется ссылка, так и приобретение перечисленных изданий.

Производство изделий из стекла таких, как листовое стекло, бутылки и стеклянные сосуды, бытовые стеклянные изделия и стекловолокно в качестве новой отрасли промышленности открывает для развивающихся стран большие возможности. Спрос на изделия из стекла быстро растет, и в странах, не имеющих стекольной промышленности, он обеспечивается в настоящее время за счет импорта. Однако основные виды сырьевых материалов для данной отрасли промышленности, такие, как кремниевый песок, кальцинированная сода и известняк, имеются во многих развивающихся странах, и при их промышленном использовании можно сделать значительные накопления иностранной валюты. ЮНИДО продолжает оказывать развивающимся странам помощь в создании стекольных предприятий, а также в ряде случаев предоставляет консультации имеющимся стекольным заводам по вопросам расширения или диверсификации их продукции.

Ввиду того, что существуют значительные различия в использовании сырьевых материалов и в технологии в стекольной и в керамической промышленности, последняя будет рассматриваться в отдельном выпуске Guides to Information Sources, к которому мы отсылаем всех заинтересованных читателей.

## ПОЯСНИТЕЛЬНЫЕ ЗАМЕЧАНИЯ

Используемые обозначения и распределение материала в настоящем руководстве не означают, что Секретариат Организации Объединенных Наций выражает какое-либо мнение относительно юридического статуса той или иной страны или ее органов власти, или относительно определения ее границ.

Публикации, перечисленные в данном руководстве, отобраны в основном из литературы, изданной на официальных языках Организации Объединенных Наций; там, где это необходимо, включены публикации на других языках.

Названия организаций и изданий приводятся на языке оригинала в тех случаях, когда они известны; названия, которые даны на языках, не являющихся официальными языками Организации Объединенных Наций, переведены на английский язык.

В зависимости от наличия указываются дата и количество страниц самого последнего известного издания, а также адрес организации, выпускающей публикацию, или издателя.

Предназначенные для продажи издания Организации Объединенных Наций следует заказывать по соответствующему номеру в продаже. Их можно приобрести через официальные издательства или заказать в:

## INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUUDI) promueve la utilización de información industrial en los países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Uno de los medios de promoción que emplea la ONUUDI consiste en compilar guías de fuentes seleccionadas de información sobre ramas de la industria de especial interés para los países en desarrollo. La presente guía, que trata de la industria del vidrio, es la decimosexta de la serie de Guías de Fuentes de Información (UNIDO/LIB/SER.D) que publica la ONUDI. La lista de las publicadas hasta la fecha figura en el anverso de la contratapa de la presente guía; se prevé la publicación de otras en esta misma serie.

Estas guías no pretenden ser exhaustivas ni están destinadas a servir de instrumentos de investigación; presentan, más bien, fuentes que se consideran de valor práctico para los usuarios. Los datos se han recopilado de modo tal que faciliten el rápido acceso a las entidades mencionadas y la adquisición de las publicaciones que se indican.

La fabricación de artículos de vidrio, tales como hojas de vidrio, botellas y frascos, artículos de uso doméstico y fibras de vidrio, ofrece grandes posibilidades como nueva industria en los países en desarrollo. La demanda de productos de vidrio aumenta rápidamente, y en los países que no tienen industrias del vidrio se satisface actualmente mediante las importaciones. Sin embargo, en muchos países en desarrollo se dispone de las materias primas básicas necesarias para esta industria, tales como arenas cuarzosas, cenizas de sosa y piedra caliza, y se conseguiría un notable ahorro de divisas mediante su aprovechamiento industrial. La ONUDI ha prestado asistencia a países en desarrollo para el establecimiento de industrias del vidrio, y ha asesorado también en varios casos a industrias del vidrio ya existentes para la expansión o diversificación de su producción.

En vista de las diferencias básicas que existen, en cuanto a materias primas y tecnología, entre la industria del vidrio y la industria cerámica, esta última se tratará en un número aparte de estas Guías de Fuentes de Información, al que se remite a los lectores interesados.

## NOTAS EXPLICATIVAS

Las denominaciones empleadas en esta guía y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países o territorios citados o de sus autoridades, ni respecto de la delimitación de sus fronteras.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones y publicaciones aparecen en su idioma original cuando así constan; cuando se dan en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se incluye la traducción del título correspondiente al inglés.

Se indican la fecha y el número de páginas de la edición más reciente que se conoce, así como la dirección de la organización que la publica o de la casa editora.

Los pedidos de publicaciones de las Naciones Unidas han de hacerse por número de venta. Dichas publicaciones se pueden obtener por conducto de distribuidores autorizados, o haciendo un pedido a:
