INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance for the improvement of local information facilities to organizations involved in industrial development. One important measure for such development is the compilation of directories and guides to basic information sources.

The UNIDO work programmes for 1972-1974 called for the compilation of a series of such directories and guides, listing selected information sources on branches of industry of primary concern to developing countries. The present guide is the seventh in the series, entitled Guides to Information Sources (UNIDO/LIB/SER.D). A list of the guides published to date appears on the inside of the back cover. Many more guides are planned for this series.

These directories and guides are not intended to be exhaustive nor are they intended as research tools, but rather present a selection of sources considered to be of practical value to the immediate needs of users. To assist these users, the data have been compiled to give as much information as possible for rapid access to bodies referred to, and to facilitate acquisition of the publications listed.

Oil-seed products, covered in the present issue, are the basis of an industrial branch producing a wide variety of vegetable oils, both edible and industrial, and vegetable protein products that have become basic commodities. An efficient vegetable oil industry has been set up in developed countries using modern, up-to-date production methods. Most oil-bearing seeds and fruits are grown, however, in tropical and subtropical areas, and therefore form the natural, raw material basis for a vegetable oil processing industry in developing countries themselves. The products of this industry would add considerably to the basic food supply of the population and could be an important earner of foreign exchange if exported. UNIDO actively sponsors the further development of all facets of the vegetable oil industry in developing countries.

As many information sources may not have been included in this directory, suggestions for the inclusion of additional information in a future, revised version will be welcome.

EXPLANATORY NOTES

Publications have been selected mainly from literature in the official languages of the United Nations; when appropriate, publications in other languages have also been included.

The names of organizations listed in section I are given in their original language wherever available; names of organizations in other than the official languages of the United Nations have been translated into English.

Where available, the date and number of pages of the most recent known edition are indicated as well as the address of the issuing organization or publisher.

United Nations sales publications should be ordered by sales number. They are available through authorized distributors or may be ordered from:

Sales Section		Sales Section
Publishing Service		United Nations Office
United Nations	or	Palais des Nations
New York, New York 10017		1211 Geneva 10, Switzerland

Requests for documents issued by United Nations bodies (those bearing only document symbols and no sales numbers) should be made direct to the issuing body.

The following abbreviations have been used in this issue:

dist.	=	distributor
publ.	=	publisher
FAO	=	Food and Agriculture Organization of the United Nations
UNCTAD	=	United Nations Conference on Trade and Development

INTRODUCTION

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en voie de développement, l'Organisation des Nations Unies pour le développement industriel conseille les organismes qui s'occupent de l'industrialisation et les aide à améliorer les moyens d'information locaux, notamment en établissant des répertoires et des guides des principales sources d'information.

Les programmes de travail de l'ONUDI pour 1972-1974 prévoyaient l'établissement d'une série de répertoires et de guides de sources d'information sur les secteurs industriels qui présentent un intérêt majeur pour les pays en voie de développement. Le présent répertoire est le septième de la série intitulée : Guides des sources d'information (UNIDO/LIB/SER.D). On trouvera à la page 3 de la couverture la liste des guides déjà parus. De nombreux autres seront publiés par la suite.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas des instruments de recherche, mais de simples guides pratiques des sources d'information, visant à répondre aux besoins immédiats des utilisateurs. Toutes les précisions utiles ont été autant que possible données pour permettre à ceux-ci de se mettre directement en rapport avec les sources d'informations mentionnées et d'obtenir rapidement les publications auxquelles ils s'intéressent.

Le présent volume est consacré aux oléagineux, matière première d'une industrie produisant une grande variété d'huiles végétales, tant comestibles qu'industrielles, ainsi que des produits riches en protéines végétales, qui font maintenant partie des produits de base. Il existe dans les pays développés une industrie des huiles végétales efficace, utilisant des méthodes de production modernes. Etant donné cependant que la plupart des oléagineux, qu'il s'agisse de graines ou de fruits, sont cultivés dans les zones tropicales et subtropicales, il paraît tout indiqué pour les pays en voie de développement d'exploiter eux-mêmes ces matières premières en se dotant d'une industrie des huiles végétales. Les produits de cette industrie permettraient d'améliorer considérablement l'alimentation de base de la population et pourraient, s'ils étaient exportés, constituer une importante source de devises. L'ONUDI s'emploie donc activement à encourager le développement de l'industrie des huiles végétales, sous tous les aspects, dans les pays en voie de développement.

De nombreuses sources d'information ayant pu être omises, toute suggestion d'insertion de renseignements complémentaires sera volontiers accueillie. Il en sera tenu compte pour la préparation d'une future édition révisée.

NOTES EXPLICATIVES

Les publications énumérées sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés en d'autres langues ont aussi été mentionnés.

Les noms des organisations énumérées à la Section I sont donnés le plus souvent dans la langue originale. Les noms des organisations libellés en des langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

Nous avons, aussi souvent que nous l'avons pu, précisé la date et le nombre de pages de l'édition la plus récente ainsi que l'adresse de l'éditeur ou de l'organisation qui a publié le document.

On peut se procurer les publications des Nations Unies auprès des distributeurs autorisés ou les commander à l'une des adresses suivantes, en mentionnant le numéro de vente :

Les documents des Nations Unies qui ne portent pas de numéro de vente mais simplement une cote doivent être demandés directement à l'Organisation qui les a publiés.

Les abréviations suivantes ont été utilisées dans le présent volume :

dist. = distributeur
publ. = publié par
FAO = Organisation des Nations Unies pour l'alimentation et l'agriculture
UNCTAD = Conférence des Nations Unies sur le commerce et le développement (CNUCED)

ВВЕДЕНИЕ

Организация Объединенных Наций по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах путем предоставления руководящих указаний в области улучшения местной службы информации организациям, занимающимся вопросами промышленного развития. Одной из важных мер такого рода деятельности является составление справочников и руководств по основным источникам информации.

Программа деятельности ЮНИДО на 1972-1974 гг. предусматривала составление целого ряда таких справочников и руководств, в которых перечисляются отдельные источники информации по отраслям промышленности, имеющим первостепенное значение для развивающихся стран. Настоящее руководство является седьмым в серии, которая называется *Guides to Information Sources (UNIDO/LIB/SER.D)*. Перечень руководств, выпущенных до настоящего времени, приводится на внутренней стороне задней части обложки. Для этой серии планируется выпуск еще целого ряда руководств.

Эти справочники и руководства не ставят своей целью быть исчерпывающими и не являются средствами исследования, а представляют собой скорее источники, которые, видимо, могут представить практическую ценность для удовлетворения непосредственных нужд потребителей информации. Для облегчения пользования этими справочниками данные подобраны таким образом, чтобы дать как можно больше информации для быстрой связи с организациями, на которые имеется ссылка, и облегчить приобретение перечисленных изданий.

Продукция масличных семян, охваченная в настоящем выпуске, является основой для работы отрасли промышленности, производящей широкий ассортимент растительных масел, как пищевых, так и промышленных, а также продуктов, содержащих растительные белки, которые стали основной товарной группой. В развитых странах создана эффективно работающая промышленность по производству растительного масла с использованием современных по последнему слову техники производственных методов. Однако большинство масличных семян и культур произрастает в тропических и субтропических районах и тем самым обеспечивает естественную сырьевую базу для развития промышленности по переработке растительного масла в самих развивающихся странах. Продукты этой отрасли промышленности могли бы внести существенный вклад в дело обеспечения населения основными продуктами питания и могли бы служить одной из важных статей получения иностранной валюты в случае их экспорта. ЮНИДО активно содействует дальнейшему развитию всех отраслей промышленности по производству растительного масла в развивающихся странах.

Поскольку не представляется возможным включить многие источники информации в настоящий справочник, предложения по включению дополнительной информации в пересмотренный вариант в будущем будут всячески приветствоваться.

ПОДСНИТЕЛЬНЫЕ ЗАМЕЧАНИЯ

Публикации отобраны в основном из литературы, изданной на официальных языках Организации Объединенных Наций; там, где это необходимо, включены публикации на других языках.

Названия организаций, перечисленных в разделе I, приводятся на языке оригинала в тех случаях, когда они имеются в наличии; названия организаций на языках, не являющихся официальными языками Организации Объединенных Наций, переведены на английский язык.

В зависимости от наличия указываются дата и количество страниц самого последнего известного издания, а также адрес организации, осуществляющей публикацию, или издателя.

Предназначенные для продажи публикации Организации Объединенных Наций следует заказывать по соответствующему номеру. Их можно приобрести через официальные издательства или заказать в:

INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en los países en desarrollo, proporcionando orientación para el mejoramiento de los servicios locales de información a las organizaciones que se ocupan del desarrollo industrial. Una medida importante para realizar esta labor es la compilación de guías de fuentes básicas de información.

Los programas de trabajo de la ONUDI para 1972-1974 incluyen la compilación de una serie de guías de ese tipo, en que se registren determinadas fuentes de información sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía es la séptima de la serie titulada Guías de Fuentes de Información (UNIDO/LIB/SER.D). En el interior de la contraportada figura una lista de las guías publicadas hasta la fecha. Se prevé la publicación de muchas guías más en esta serie.

Estas guías no pretenden ser exhaustivas ni están destinadas a servir de instrumentos de investigación, sino que constituyen más bien una selección de fuentes que se consideran de valor práctico para satisfacer las necesidades inmediatas de los usuarios. Con el objeto de facilitar la labor de éstos, se han recopilado los datos de manera que proporcionen toda la información posible para permitir un rápido acceso a las entidades mencionadas, y para facilitar la adquisición de las publicaciones que se indica.

Los productos de semillas oleaginosas, a los que se refiere este número, constituyen la base de una rama industrial que entrega una amplia variedad de aceites vegetales, tanto comestibles como industriales, y de productos de proteínas vegetales que han llegado a ser artículos básicos. Los países desarrollados cuentan con una eficaz industria de aceite vegetal, que emplea modernos métodos de producción. La mayoría de las semillas y frutos oleaginosos se cultivan, sin embargo, en las zonas tropicales y subtropicales, por lo que representan la base natural de materias primas para una industria elaboradora de aceite vegetal de los propios países en desarrollo. Los productos de esta industria podrían contribuir de manera considerable al suministro de alimentos básicos a la población, y constituir una importante fuente de divisas, en el caso de que se exportaran. La ONUDI está patrocinando de manera activa el desarrollo ulterior de todas las facetas de la industria del aceite vegetal en los países en desarrollo.

Como han podido omitirse muchas fuentes de información en la presente guía, se agradecerá el envío de sugerencias para la inclusión de información adicional en una futura versión revisada.

NOTAS EXPLICATIVAS

Las publicaciones se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones mencionadas en la sección I aparecen en su idioma original cuando así constan; los nombres de organizaciones que están en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, han sido traducidos al inglés.

Se indican la fecha y número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen.

Los pedidos de publicaciones de las Naciones Unidas han de hacerse por número de venta. Dichas publicaciones se pueden obtener por conducto de distribuidores autorizados, o haciendo un pedido a:

Los documentos de organizaciones del sistema de las Naciones Unidas (los que llevan sólo una signatura y no un número de venta) deben solicitarse directamente a la organización respectiva.

En el presente número se emplean las siguientes abreviaturas:

distr.	=	distribuidor
publ.	=	casa editorial
FAO	=	Organización de las Naciones Unidas para la Agricultura y la Alimentación
UNCTAD	=	Conferencia de las Naciones Unidas sobre Comercio y Desarrollo
