## PREFACE

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with industrial quality control, is a revised and updated version of the sixth guide in the series of *UNIDO Guides to Information Sources* (UNIDO/LIB/SER.D). A list of the guides published to date appears at the end of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

Industrial quality control, which ensures uniformity of the characteristics of products and their functional reliability, often in conformity with accepted standards, is most helpful in promoting industrial progress. As a company and national policy, it is an important factor in developing and maintaining domestic and export markets.

UNIDO has organized workshops and training programmes on quality control for participants from developing countries and provides advisory services. The Industrial Information Section, through its Inquiry Service, offers the users access to a wide range of information in this field.

## EXPLANATORY NOTES

The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Publications listed in this guide have been selected mainly from literature in the official languages of the United Nations; when appropriate, publications in other languages have also been included.

The names of organizations and publications are given in their original languages, wherever available; for those listed in languages other than the official languages of the United Nations, a translation of the title into English is included.

Where available, the date and the number of pages of the most recent known edition are given as well as the address of the issuing organization or publisher. In the case of United Nations sales publications the year of publication is indicated as part of the sales number.

Requests for non-sales items that are issued by the United Nations and related bodies should be made direct to the issuing bodies. Sales publications should be ordered by sales number from an authorized distributor or from:

## PREFACE

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne le contrôle de la qualité dans l'industrie, est une version révisée et mise à jour du sixième de la série des *Guides des sources d'information* (UNIDO/LIB/SER.D). On trouvera à la fin de cette publication la liste des guides déjà parus. D'autres sont prévus.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche, mais de simples guides des sources d'information présentant un intérêt pratique pour les utilisateurs. Les données sont présentées de manière à permettre à ceux-ci de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir les publications auxquelles ils s'intéressent.

En permettant d'assurer l'uniformité des caractéristiques des produits et leur fiabilité fonctionnelle, souvent en conformité avec des normes acceptées, le contrôle de la qualité dans l'industrie contribue fortement au progrès industriel. Appliqué systématiquement à l'échelon de l'entreprise et à l'échelon du pays, il est un facteur important de la création et du maintien des débouchés, tant intérieurs qu'à l'exportation.

L'ONUDI organise des journées d'étude et des programmes de formation sur le contrôle de la qualité à l'intention de participants de pays en développement et elle fournit aussi des services consultatifs dans ce domaine. Par l'intermédiaire de son Service de renseignements industriels, la Section de l'information industrielle met à la disposition des utilisateurs intéressés une grande variété d'informations sur cette question.

## NOTES EXPLICATIVES

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Les publications énumérées dans le présent volume sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés dans d'autres langues ont aussi été mentionnés.

Les noms des organisations et les titres des publications sont donnés le plus souvent possible dans la langue originale; les noms des organisations et les titres des publications libellés dans les langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

Nous avons, aussi souvent qu'il était possible, précisé la date et le nombre de pages de l'édition la plus récente ainsi que l'adresse de l'éditeur ou de l'organisation qui a publié le document. Lorsqu'il s'agit de documents de l'Organisation des Nations Unies, l'année de publication est indiquée avec le numéro de vente.

Les documents de l'Organisation des Nations Unies et des organismes qui lui sont rattachés qui ne portent pas de numéro de vente doivent être demandés directement à l'organisation qui les a publiés. Ceux qui portent un numéro de vente peuvent être commandés à un distributeur autorisé ou à l'une des adresses suivantes, en mentionnant le numéro :

## ВВЕДЕНИЕ

Организация ООН по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах, предоставляя рекомендации, направленные на усовершенствование местных средств информации. Одним из средств такого содействия является составление ЮНИДО справочников и руководств по отдельным источникам информации по отраслям промышленности, имеющих первостепенное значение для развивающихся стран. Настоящее руководство по вопросам контроля качества в промышленности является пересмотренным и обновленным изданием шестого руководства серии UNIDO Guides to Information Sources (UNIDO/LIB/SER. D). Перечень руководств, изданных до настоящего времени, приводится в конце настоящего руководства; в рамках этой серии планируется издание еще целого ряда руководств.

Эти справочники и руководства не ставят своей целью дать исчерпывающую информацию, как не являются они и инструментом исследований; они служат скорее источниками, обладающими практической ценностью для пользователей. Материал настоящего руководства подобран таким образом, чтобы облегчить быстрый доступ к упоминаемым органам и приобретение перечисленных изданий.

Контроль качества в промышленности, обеспечивающий единообразие характеристик продукции и их эксплуатационную надежность, зачастую в соответствии с принятыми стандартами, является весьма полезным средством содействия промышленному прогрессу. Как элемент политики в рамках компаний и на национальном уровне контроль качества является важным фактором освоения и использования отечественных и экспортных рынков.

В рамках ЮНИДО для участников из развивающихся стран организуются семинары и программы подготовки специалистов по контролю качества, а также предоставляются консультативные услуги. Секция промышленной информации через свою Службу запросов открывает пользователям доступ к обширной информации в этой области.

## ПОЯСНИТЕЛЬНЫЕ ЗАМЕЧАНИЯ

Обозначения и изложение материала в настоящей публикации ни в коей мере не являются выражением точки зрения Секретариата Организации Объединенных Наций относительно правового статуса какой-либо страны, территории, города или области или их властей, а также относительно прохождения их границ или пределов.

Перечисленные в настоящем руководстве публикации отобраны главным образом из литературы, изданной на официальных языках Организации Объединенных Наций; в соответствующих случаях были включены также публикации, изданные на других языках.

Названия организаций и публикаций даны на языке оригинала в тех случаях, когда они имелись в наличии; названия, представленные на языках, не являющихся официальными языками Организации Объединенных Наций, включены в перечень в переводе на английский язык.

В зависимости от наличия указаны год издания и количество страниц самого последнего из известных изданий, а также адрес организации, издающей публикацию, или издателя. Если публикации Организации Объединенных Наций предназначены для продажи, год издания указывается как часть номера, под которым они продаются.

Заказы на публикации, не предназначенные для продажи, издаваемые Организацией Объединенных Наций и связанными с ней учреждениями, должны направляться непосредственно в учреждения, выпускающие эти публикации. Предназначенные для продажи публикации следует заказывать по соответствующему номеру, под которым они продаются, у должным образом уполномоченных агентов по продаже или в:

Sales Section  
Publishing Service  
United Nations  
New York, New York 10017  
United States of America

или

## PREFACIO

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en los países en desarrollo proporcionando orientación sobre la forma de mejorar los servicios locales de información. Uno de los medios de promoción empleados por la ONUDI es la compilación de guías de fuentes seleccionadas de información sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía, que trata del control de calidad en la industria, es una versión revisada y actualizada de la sexta guía de la serie *Guías de Fuentes de Información de la ONUDI (UNIDO/LIB/SER.D)*. Al final de esta guía, aparece una lista de las publicadas hasta la fecha; se proyecta ampliar la serie con otras.

Estas guías no pretenden ser exhaustivas, ni están destinadas a servir de instrumentos de investigación, sino que tienen por objeto dar a conocer las fuentes que se consideran de valor práctico para los usuarios. Los datos se han recopilado con el fin de facilitar el acceso a las entidades aludidas, así como la adquisición de las publicaciones indicadas.

El control de calidad en la industria, que asegura la uniformidad de las características de los productos y la fiabilidad funcional de éstos —a menudo con arreglo a normas aceptadas—, es sumamente útil para promover el progreso industrial. Como política de empresa y nacional, es un factor importante para el desarrollo y mantenimiento de mercados interiores y de exportación.

La ONUDI ha organizado cursos prácticos y programas de capacitación sobre control de calidad para participantes de países en desarrollo, y proporciona servicios de asesoramiento. La Sección de Información Industrial, a través de su Servicio de Consultas, ofrece a los usuarios acceso a una gran variedad de informaciones sobre la materia.

## NOTAS EXPLICATIVAS

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o zonas citados o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones y publicaciones aparecen en su idioma original, cuando así constan; cuando se dan en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se incluye la traducción al inglés del título correspondiente.

Se indican la fecha y el número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen. En el número de venta de las publicaciones de las Naciones Unidas destinadas a la venta se indica el año de su publicación.

Los documentos no destinados a la venta, publicados por las Naciones Unidas y organismos conexos, deben pedirse directamente a la organización respectiva. Los pedidos de publicaciones destinadas a la venta han de hacerse, indicando el número de venta, por conducto de distribuidores autorizados, o haciendo un pedido a:
