OCCASION

This publication has been made available to the public on the occasion of the 50th anniversary of the United Nations Industrial Development Organisation.

TOGETHER
for a sustainable future

DISCLAIMER

This document has been produced without formal United Nations editing. The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations Industrial Development Organization (UNIDO) concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries, or its economic system or degree of development. Designations such as “developed”, “industrialized” and “developing” are intended for statistical convenience and do not necessarily express a judgment about the stage reached by a particular country or area in the development process. Mention of firm names or commercial products does not constitute an endorsement by UNIDO.

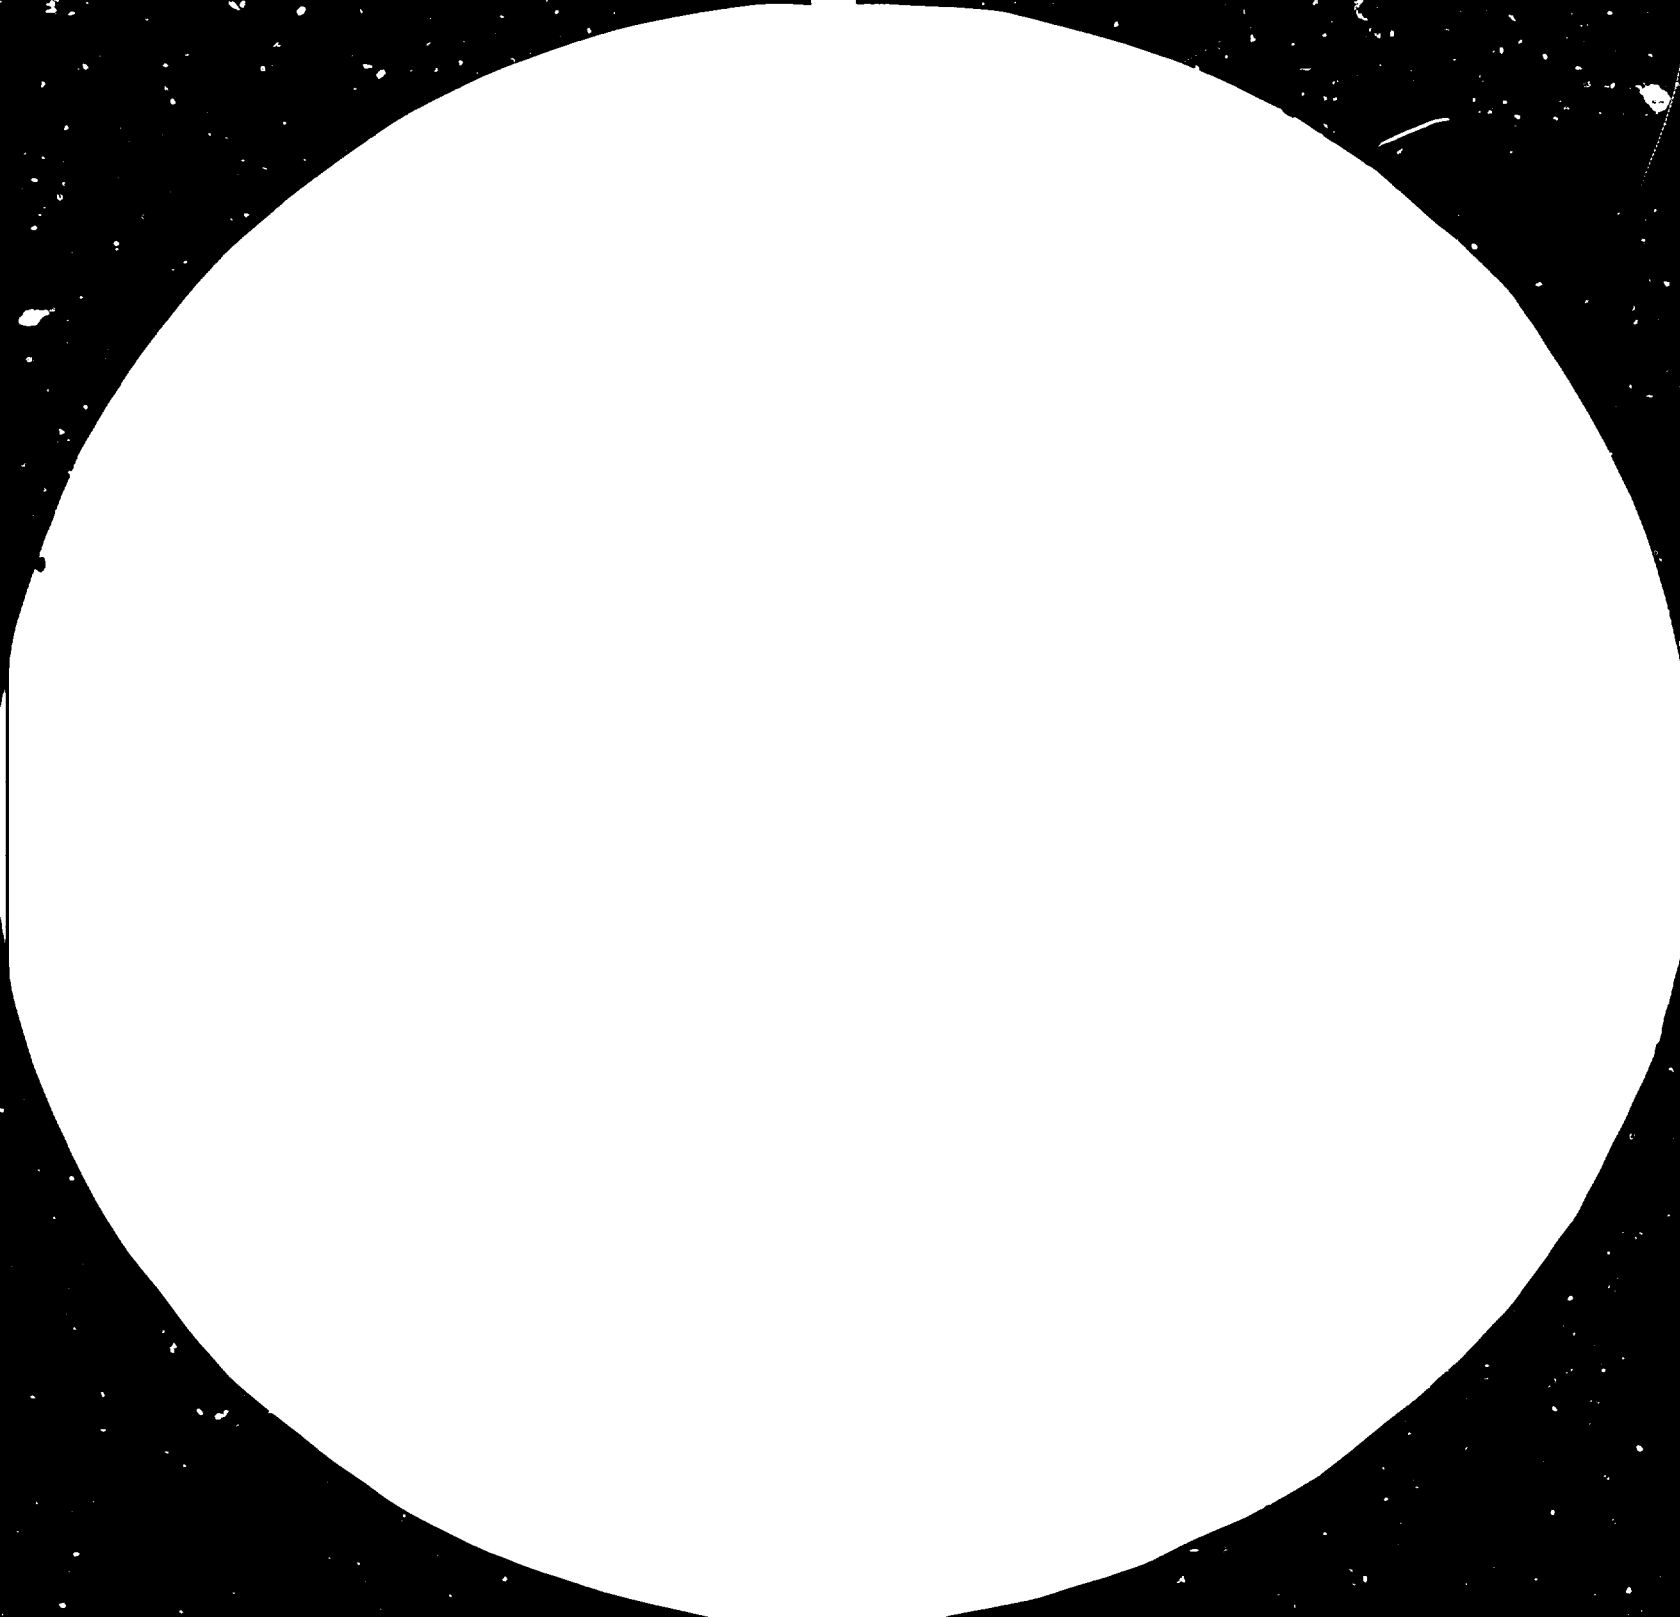

FAIR USE POLICY

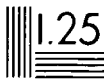

Any part of this publication may be quoted and referenced for educational and research purposes without additional permission from UNIDO. However, those who make use of quoting and referencing this publication are requested to follow the Fair Use Policy of giving due credit to UNIDO.

CONTACT

Please contact publications@unido.org for further information concerning UNIDO publications.

INTRODUCTION

Developing nations have come to recognize that industrial and technological information is a key element in accelerating the process of industrialisation. In recent years, an increasing number of industrial and technological information centres have been established in developing countries. The types of services they perform and the subjects on which they provide information are varied. Their clientele may range from the small-scale entrepreneur to the decision-maker at governmental level. In all cases their success depends on their ability to provide the right information in the right form and the right time.

UNIDO has been involved in the establishment or strengthening of such industrial and technological information facilities in developing countries and in the training of industrial information officers. Its own Industrial Inquiry Service as well as the Industrial and Technological Information Bank (INTIB) are intended to service and support such facilities through the creation and maintenance of effective linkages with them.

The aim of this revised Directory is to make more widely known and to promote the full use of existing industrial and technological information facilities in the developing countries. Furthermore, as a contribution to the programme of technical co-operation among developing countries (TCDC), it is intended as a "networking instrument" which should help those institutions interested in developing their own linkages at the national, regional and international level.

We express our thanks to all those institutions (and persons) who have contributed information to the Directory. While a great deal of careful work has gone into the preparation of the Directory, we recognize that errors and omissions may remain. Suggestions for changes or for the inclusion of additional material in a future revised edition should be addressed to:

United Nations Industrial Development Organization
Industrial Information Section
P.O. Box 300
A-1400 Vienna, Austria

EXPLANATORY NOTES

This Revision to the Directory of Industrial Information Services and Systems in Developing Countries, published in 1961, is based on responses to a questionnaire sent to 790 institutions in Asia, Africa, the Middle East, Central and South America, of which 345 responded and were incorporated in this Revision.

The data contained in the questionnaires was indexed and stored in the data base of the Industrial Information Section. This Revision has been produced as a computer print out, which accounts for a number of spelling simplifications.

The main section of the Revision is arranged in alphabetical order by country according to the United Nations country terminology in English. Within each country institutions and services are listed alphabetically in the language(s) used by respondents. For names in other than English, French or Spanish, translations into English have been included in parentheses, whenever provided by the respondents.

The full description of an information service includes:

- The reference number
- The name of the information service, its acronym (translation where applicable)
- Address
- Telephone number, cable and telex address

Languages: working languages of the institution (abbreviated to 4 letters)

Type of activity: the categories chosen correspond to those adopted by the United Nations Inter-Organization Board for Information Systems (IOB) for the Directory of United Nations Information Systems, 1960.

Services provided: describes the services regularly performed by the institution. Again the categories are the same as those in the IOB Directory.

Subject coverage: the information contained in the questionnaires was indexed using descriptors from the UNIDO Thesaurus of Industrial Development Terms (ID/172/Rev.1). These descriptors are the basis of the subject index.

Publications: periodicals are listed with periodicity and language(s) when available and not implied in the title.
Abbreviations used are:

2 per w. = twice a week
w. = weekly
2 per m. = twice a month
m. = monthly
bi-m. = every other month
q. = quarterly
2 per y. = half yearly
y. = annual
bi-y. = every other year
irr. = irregular

Other recent publications are also listed.

Classification system(s): thesauri, classification schemes, cataloguing rules, etc. are listed. The most commonly used have been abbreviated as follows:

AACR: Anglo American Cataloguing Rules
ASM: Thesaurus of Metallurgical Terms (American Society for Metals)
DDC: Dewey Decimal Classification
EJC: Engineers' Joint Council Thesaurus
IDRC: International Development Research Centre Thesaurus
IPC: International Patent Classification
ISIC: International Standard Industrial Classification
LC: Library of Congress Classification and/or subject headings
OECD: Macrothesaurus
SITC: Standard International Trade Classification
UDC: Universal Decimal Classification
UNIDO: Thesaurus of Industrial Development Terms

Finally, a note may be added indicating special features of the information service such as participation in a national or regional network, recent changes in status, etc.

Subject, acronym and institution name indexes are provided to facilitate location of specific information in the main section of the Revision.

The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of frontiers or boundaries.

INTRODUCTION

Les pays en développement ont pris conscience de l'importance primordiale de l'information industrielle et technologique pour l'accélération de l'industrialisation. Depuis quelques années, le nombre des centres d'informations industrielles et technologiques mis en place dans ces pays ne cesse de croître. Ces centres offrent des services de différents types et fournissent des informations sur les sujets les plus divers. Leur clientèle va du chef d'une petite entreprise au responsable gouvernemental. Le succès de ces centres dépend toujours de leur capacité à fournir l'information recherchée sous la forme voulue et au moment voulu.

L'ONUDI a participé à la création ou au renforcement de centres d'informations industrielles et technologiques dans les pays en développement ainsi qu'à la formation de spécialistes de l'information industrielle. Son Service de renseignements industriels et sa Banque d'informations industrielles et technologiques (INTIB) ont pour mission d'aider ces centres et de leur apporter l'appui nécessaire en établissant et en maintenant avec eux des liens efficaces.

La présente version remaniée du Répertoire a pour objet de mieux faire connaître les moyens d'information industrielle et technologique existant dans les pays en développement et de permettre d'en tirer pleinement parti. Le Répertoire devrait en outre, dans le cadre du programme de coopération technique entre pays en développement (CTPD) favoriser la constitution de "réseaux", c'est-à-dire, aider les institutions intéressées à nouer elles-mêmes des liens aux niveaux national, régional ou international.

Nous remercions toutes les institutions (et toutes les personnes) qui ont communiqué des renseignements pour le Répertoire. Bien que ce Répertoire ait été établi avec le plus grand soin, nous sommes conscients qu'il peut subsister des erreurs et des omissions. Toutes les suggestions concernant des modifications ou additions à apporter dans une prochaine version remaniée du Répertoire doivent être envoyées à l'adresse suivante :

Organisation des Nations Unies pour le développement industriel
Section de l'information industrielle
Boîte postale 300
A-1100 Vienne (Autriche)

NOTES EXPLICATIVES

La présente version remaniée du Répertoire des services et systèmes d'information industrielle dans les pays en développement, publiée en 1981, a été établie à partir des réponses à un questionnaire envoyé à 790 institutions d'Asie, d'Afrique, du Moyen-Orient, d'Amérique centrale et d'Amérique du Sud. 345 de ces institutions ont répondu au questionnaire et ont été incorporées dans la présente publication.

Les données contenues dans les questionnaires ont été indexées et stockées dans la base de données de la Section de l'information industrielle. La version remaniée du Répertoire a été publiée sous la forme d'un imprimé d'ordinateur, ce qui a entraîné un certain nombre de simplifications orthographiques.

Dans la partie principale de la version remaniée du Répertoire, on a suivi l'ordre alphabétique anglais des noms de pays, en respectant la terminologie adoptée par les Nations Unies. Dans chaque pays, les institutions et les services sont énumérés par ordre alphabétique dans la ou les langues utilisées par les recensés. Lorsque les noms sont dans d'autres langues que l'anglais, l'espagnol ou le français, on trouvera entre parenthèses la traduction anglaise lorsqu'elle a été fournie par les intéressés.

La description complète d'un service d'information comprend :

- Le numéro de référence
- Le nom du service d'information et son sigle (avec traduction, le cas échéant)
- L'adresse
- Le numéro de téléphone, l'adresse télégraphique et le numéro de télex.

Langues : Langues de travail de l'institution (abrégées en quatre lettres).

Type d'activité : Les catégories choisies correspondent à celles qui ont été adoptées par le Bureau interorganisations pour les systèmes d'information et les activités connexes (BIO) pour le Répertoire des systèmes d'information des Nations Unies, 1980.

Services fournis : Description des services qu'assure normalement l'institution. Mêmes catégories que celles du Répertoire du BIO.

Sujets traités : Les informations contenues dans les questionnaires ont été indexées à l'aide des descripteurs utilisés pour le Thésaurus du langage du développement industriel de l'ONUDI (ID/172/Rev.1). Ces descripteurs ont servi à établir l'index des matières.

Publications :

Liste des publications périodiques avec indication de leur périodicité et de la ou des langues dans lesquelles elles sont disponibles si cela n'apparaît pas dans le titre. Les abréviations utilisées sont les suivantes :

2 per w. = bihebdomadaire
w. = hebdomadaire
2 per m. = bimensuel
m. = mensuel
bi-m. = bimestriel
q. = trimestriel
2 per y. = semestriel
y. = annuel
bi-y. = bisannuel
irr. = irrégulier

Dans cette rubrique sont également énumérées d'autres publications récentes.

Système(s) de classification :

Thésaurus, principes de classification, règles de catalogage, etc., utilisés. Les noms de ceux auxquels on a recouru le plus souvent sont abrégés comme suit :

AACR : Anglo American Cataloguing Rules
ASM : Thesaurus of Metallurgical Terms (American Society for Metals)
DDC : Dewey Decimal Classification
EJC : Engineers' Joint Council Thesaurus
IDRC : Thésaurus du Centre de recherche pour le développement international
IPC : Classification internationale des brevets
SITC : Classification type pour le commerce international
LC : Library of Congress Classification and/or subject headings
OECD : Macrothésaurus
ISIC : Classification internationale type par industrie
UDC : Classification décimale universelle
UNIDO : Thésaurus du langage du développement industriel.

Enfin, on indique parfois dans une note certaines caractéristiques du service d'information considéré : par exemple, appartenance à un réseau national ou régional, modifications récentes de son statut, etc.

Les index des matières, des sigles et des noms des institutions permettent de retrouver plus facilement telle ou telle information dans la partie principale de la version remaniée du Répertoire.

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique de tel ou tel pays, territoire, ville ou région, ou de ses autorités, ni quant au tracé de ses frontières ou limites.

INTRODUCCION

Los países en desarrollo han llegado al convencimiento de que la información industrial y tecnológica es un elemento clave para acelerar el proceso de industrialización. En los últimos años, se han establecido en países en desarrollo un creciente número de centros de información industrial y tecnológica. Los tipos de servicios que prestan y los temas sobre los que proporcionan información son variados. Entre su clientela puede figurar desde el pequeño empresario hasta la persona encargada de tomar decisiones a nivel gubernamental. En todos los casos el éxito de dichos centros depende de su habilidad para proporcionar la información acertada en forma adecuada y en el momento preciso.

La ONUDI ha participado en el establecimiento o fortalecimiento de ese tipo de instalaciones de información industrial y tecnológica en países en desarrollo, así como en la capacitación de oficiales de información industrial. Su propio Servicio de Consultas Industriales y el Banco de Información Industrial y Tecnológica (INTIB) están destinados a prestar servicio y apoyo a tales instalaciones mediante la creación y el mantenimiento de vínculos efectivos con éstas.

La finalidad del presente Directorio revisado es dar a conocer de una manera más amplia, a los países en desarrollo, la existencia de instalaciones de información industrial y tecnológica y fomentar su plena utilización en esos países. Además, como contribución al programa de cooperación técnica entre países en desarrollo (CTPD), está destinado a cumplir la función de un "instrumento para el establecimiento de redes" que ayude a las instituciones interesadas en desarrollar sus propios vínculos a nivel nacional, regional o internacional.

Manifestamos nuestro reconocimiento a todas aquellas instituciones (y personas) que han proporcionado información para el Directorio. Si bien es cierto que se ha dedicado una gran cantidad de trabajo minucioso a la preparación del Directorio, reconocemos, sin embargo, que pueden subsistir errores y omisiones. Las sugerencias para la introducción de cambios o para la inclusión de datos adicionales en una futura edición revisada deberán dirigirse a:

Organización de las Naciones Unidas para el Desarrollo Industrial
Sección de Información Industrial
P.O. Box 300
A-1400 Viena (Austria)

NOTAS EXPLICATIVAS

La presente edición revisada del Directory of Industrial Information Services and Systems in Developing Countries (Directorio de servicios y sistemas de información industrial en países en desarrollo) que se había publicado en 1981, se basa en las respuestas a un cuestionario enviado a 790 instituciones de Asia, África, el Oriente Medio y América Central y del Sur, 345 de las cuales respondieron y cuyos datos se incorporaron a la presente edición revisada.

La información proporcionada en los cuestionarios fue clasificada y almacenada en la base de datos de la Sección de Información Industrial. El Directorio revisado ha sido producido como salida impresa de computadora, lo que explica las simplificaciones de la ortografía.

La sección principal del Directorio revisado está dispuesta en orden alfabético por países, de conformidad con la lista alfabética de países en inglés de las Naciones Unidas. Dentro de cada país, las instituciones y servicios figuran por orden alfabético en la(s) lengua(s) utilizada(s) por los que respondieron al cuestionario. Los nombres que figuran en otra lengua distinta al inglés, francés o español, figuran también en inglés, entre paréntesis, en los casos en que así aparecía en la respuesta al cuestionario.

La descripción total de un servicio de información incluye:

- El número de referencia.
- El nombre del servicio de información, su sigla (traducción en los casos en que procede).
- Dirección postal.
- Número de teléfono y dirección telegráfica y de télex.

Idiomas:	idiomas de trabajo de la institución (indicados abreviadamente en cuatro letras).
Tipo de actividad:	las categorías escogidas corresponden a aquellas aprobadas por la Junta Interorganizacional para Sistemas de Información (JISI) para el <u>Directorio de Sistemas y Servicios de Información de las Naciones Unidas, 1980</u> .
Servicios proporcionados:	describe los servicios prestados periódicamente por la institución. Aquí también las categorías son las mismas que las que figuran en el Directorio de la JISI.
Temas abarcados:	la información que figura en los cuestionarios fue clasificada utilizando descriptores del <u>UNIDO Thesaurus of Industrial Development Terms (ID/172/Rev.1)</u> . Estos descriptores constituyen la base del índice de temas.

Abreviaturas:

Las publicaciones periódicas figuran con su respectiva periodicidad y lengua(s) cuando se dispone de este dato y cuando el título no lo indica. Las abreviaturas utilizadas son:

2 per w. = dos veces por semana
w. = semanal
2 per m. = dos veces al mes
m. = mensual
bi-m. = cada dos meses
q. = trimestral
2 per y. = semestral
y. = anual
bi-y. = bienal
irr. = irregular

También se enumeran otras publicaciones recientes.

Sistema de clasificación:

se enumeran los tesauros, los sistemas de clasificación, las reglas de catalogación, etc. Los más comúnmente utilizados han sido abreviados de la siguiente manera:

AACR:	Anglo American Cataloguing Rules
ACM:	Thesaurus of Metallurgical Terms (American Society for Metals)
DDC:	Dewey Decimal Classification
EJC:	Engineers' Joint Council Thesaurus
IDRC:	International Development Research Centre Thesaurus
IPC:	International Patent Classification (Clasificación Internacional de Patentes, CIP)
ISIC:	International Standard Industrial Classification (Clasificación Industrial Internacional Uniforme, CIIU)
LC:	Library of Congress Classification and/or subject headings
MACD:	Macrothesaurus (Macrothesaurus, OCDE)
SITC:	Standard International Trade Classification (Clasificación Uniforme para el Comercio Internacional, CUCI)
UDC:	Universal Decimal Classification (Clasificación Decimal Universal)
UNIDO:	Thesaurus of Industrial Development Terms

Finalmente, es posible que se añada una nota que indique las características especiales del servicio de información, tales como la participación en una red nacional o regional, cambios recientes de la situación, etc.

Con el fin de facilitar la localización de una información específica en la sección principal del Directorio revisado se proporcionan índices de temas, de siglas y de instituciones.

Las denominaciones empleadas en la presente publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o zonas citados o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.
