INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with the soap and detergent industry, is the twenty-fourth in the series of *UNIDO Guides to Information Sources* (UNIDO/LIB/SER.D). A list of the guides published to date appears inside the back cover of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

Consumption of soap and detergents in a country can be an indication of its level of development. The various methods used in manufacturing these products are relatively simple, requiring uncomplicated equipment and technology. Since soap and detergents are necessary commodities in daily use among the people, it is foreseen that these industries must expand in order to meet the needs of larger population and higher economic development.

UNIDO has undertaken a number of projects in this field in developing countries and has the aim of expanding its assistance.

INTRODUCTION

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne l'industrie du savon et des détergents, est le vingt-quatrième de la série des *Guides des sources d'information* (UNIDO/LIB/SER.D). On trouvera à la page 3 de la couverture la liste des guides déjà parus. D'autres sont prévus.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche, mais de simples guides des sources d'information considérées comme présentant un intérêt pratique pour les utilisateurs. Les données sont présentées de manière à permettre à ceux-ci de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir les publications auxquelles ils s'intéressent.

La consommation de savon et de détergents est un des indices du degré de développement d'un pays. Les méthodes employées pour fabriquer ces produits sont relativement simples, le matériel et les procédés mis en œuvre peu compliqués. Le savon et les détergents étant des produits indispensables à la vie quotidienne, on prévoit que ces industries ne manqueront pas de se développer pour répondre aux besoins d'une population toujours plus nombreuse et aux exigences du progrès économique.

L'ONUDI a entrepris de nombreux projets dans ce domaine dans les pays en développement et se propose d'intensifier son aide.

ВВЕДЕНИЕ

Организация Объединенных Наций по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах посредством обеспечения руководства в совершенствовании местных средств информации. Одним из средств такого содействия является составление в ЮНИДО справочников и руководств по отдельным источникам информации, касающимся тех отраслей промышленности, которые имеют первостепенное значение для развивающихся стран. Настоящее руководство по вопросам производства мыла и моющих средств является двадцать четвертым в серии ЮНИДО *Guides to Information Sources* (UNIDO/LIB/SER. D). Перечень опубликованных до настоящего времени справочников приводится на внутренней стороне задней обложки настоящего выпуска; в этой серии планируется также выпуск еще целого ряда справочников.

Такие руководства и справочники не ставят своей целью быть исчерпывающими или служить в качестве средства исследования; в них скорее представлены источники, которые, как полагают, имеют практическую ценность для тех, кто ими пользуется. Данные в этих справочниках подобраны таким образом, чтобы облегчить быстрый доступ к организациям, на которые имеется ссылка, и приобретение перечисленных изданий.

Потребление мыла и моющих средств в стране может служить показателем уровня ее развития. Различные методы, используемые для производства этих предметов, являются относительно простыми и требующими несложного оборудования и технологии. Поскольку мыло и моющие средства являются необходимыми предметами ежедневного пользования населения, необходимо развивать эти отрасли, с тем чтобы удовлетворить потребности все большего числа людей и обеспечить более высокий уровень экономического развития.

ЮНИДО осуществила в развивающихся странах ряд проектов в этой области и намерена расширять свое содействие.

INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUUDI) promueve la utilización de información industrial en países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Entre los medios de que se vale la ONUUDI para realizar esa labor figura la compilación de repertorios y guías de fuentes de información seleccionadas sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía, consagrada a la industria de jabones y detergentes, es la vigésima cuarta de la serie titulada *Guía de Fuentes de Información* (UNIDO/LIB/SER.D). En el interior de la contracubierta de esta guía puede verse una lista de las publicadas hasta la fecha; se prevé la publicación de otras de la misma serie.

Los repertorios y las guías no pretenden ser exhaustivos ni están destinados a servir de instrumento de investigación, sino que presentan fuentes consideradas de valor práctico para los usuarios. Los datos se han recopilado de manera que proporcionen un rápido acceso a las entidades mencionadas y faciliten la adquisición de las publicaciones que se indican.

El consumo de jabón y detergentes de un país puede ser un indicador de su nivel de desarrollo. Los diversos métodos empleados en la fabricación de estos productos son relativamente sencillos y requieren equipo y tecnología poco complicados. Puesto que el jabón y los detergentes son productos básicos necesarios que la población utiliza a diario, se prevé que estas industrias deberán ampliarse a fin de atender a las necesidades de una población más numerosa y de un nivel más alto de desarrollo económico.

La ONUUDI ha emprendido varios proyectos en esta esfera en países en desarrollo y tiene el propósito de ampliar sus actividades de asistencia.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones y publicaciones aparecen en su idioma original, cuando así constan; cuando se dan en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se incluye la traducción al inglés del título correspondiente.

Se indican la fecha y el número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen.
