INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with the packaging industry, is the twenty-seventh in the series of *UNIDO Guides to Information Sources* (UNIDO/LIB/SER.D). A list of the guides published to date appears at the end of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; the data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

Developments in the packaging industry are determined by the growth in trade and world industrial output and by the diversity of manufactured goods. With prices increasing rapidly and raw materials becoming scarce, more effort needs to be concentrated on using materials most advantageously in order to reduce packaging costs, which make up a large part of the total cost of products. This need is particularly acute in developing countries, since savings in packaging would enable these countries to improve their competitive position in the world market.

UNIDO assists developing countries in selecting packaging methods, materials and equipment suited to local conditions and in establishing packaging facilities. It also supports applied research and assists packaging development institutions.

EXPLANATORY NOTES

The designations employed and the presentation of the material in this guide do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country or its authorities, or concerning the delimitation of its frontiers.

Publications listed in this guide have been selected mainly from literature in the official languages of the United Nations; when appropriate, publications in other languages have also been included.

The names of organizations and publications are given in their original languages, wherever available; for those listed in languages other than the official languages of the United Nations, a translation of the title into English is included.

Where available, the date and the number of pages of the most recent known edition are indicated as well as the address of the issuing organization or publisher.

United Nations sales publications should be ordered by sales number. They are available through authorized distributors or may be ordered from:

Sales Section
Publishing Service

INTRODUCTION

Pour faciliter l'utilisation de l'information industrielle dans les pays en développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne l'industrie du conditionnement, est le vingt-septième de la série des *Guides des sources d'information* (UNIDO/LIB/SER.D). On trouvera à la fin de cette publication la liste des guides déjà parus. D'autres sont prévus.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche. Les données sont présentées de manière à permettre aux utilisateurs de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir des publications auxquelles ils s'intéressent.

L'évolution de l'industrie du conditionnement est liée à l'expansion du commerce et de la production industrielle mondiale, ainsi qu'à la diversité des produits manufacturés. Du fait de l'escalade des prix et de la raréfaction des matières premières, il est de plus en plus nécessaire d'utiliser ces matériaux de façon rationnelle afin de réduire les dépenses d'emballage qui représentent une fraction importante du coût total des produits. Cela s'impose d'autant plus dans les pays en développement, que les économies de conditionnement leur permettront d'améliorer leur position concurrentielle sur le marché mondial.

L'ONUDI aide les pays en développement à choisir les méthodes, les matériaux et l'équipement de conditionnement adaptés à leur situation particulière, et à créer des installations correspondantes. Elle favorise également la recherche appliquée et fournit une assistance aux centres chargés de promouvoir les techniques de conditionnement.

NOTES EXPLICATIVES

Les appellations employées dans la présente publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique de tel ou tel pays ou territoire ou de ses autorités, ni quant au tracé de ses frontières.

Les publications énumérées dans le présent volume sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés dans d'autres langues ont aussi été mentionnés.

Les noms des organisations et les titres des publications sont donnés le plus souvent possible dans la langue originale; les noms des organisations et les titres des publications libellés dans des langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

Nous avons, aussi souvent qu'il était possible, précisé la date et le nombre de pages de l'édition la plus récente ainsi que l'adresse de l'éditeur ou de l'organisation qui a publié le document.

On peut se procurer les publications des Nations Unies auprès des distributeurs autorisés ou les commander à l'une des adresses suivantes, en mentionnant le numéro de vente :

ВВЕДЕНИЕ

Организация Объединенных Наций по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах путем предоставления руководящих рекомендаций в деле улучшения работы местных служб информации. Одним из средств содействия такому виду деятельности ЮНИДО являются справочники и руководства по отдельным источникам информации применительно к отраслям промышленности, которые имеют первостепенное значение для развивающихся стран. Настоящее руководство, касающееся упаковочной промышленности, является двадцать седьмым в серии руководств ЮНИДО по источникам информации *UNIDO Guides to Information Sources (UNIDO/LIB/SER.D)*. Список руководств, опубликованных к настоящему времени, приведен в конце данного руководства; планируется выпуск других руководств.

Справочники и руководства не ставят своей целью быть исчерпывающими и не являются средствами исследования; данные подобраны таким образом, чтобы содействовать быстрому установлению связи с организациями, на которые имеется ссылка, и облегчить приобретение перечисленных изданий.

Развитие упаковочной промышленности определяется расширением торговли и мирового промышленного производства, а также разнообразием готовых изделий. Учитывая быстрый рост цен и растущую нехватку сырьевых материалов, необходимо концентрировать все большие усилия на более эффективном использовании материалов для сокращения расходов на упаковку, которые составляют крупную часть общих расходов по производству продукции. Эта необходимость особо остро ощущается в развивающихся странах, поскольку экономия на упаковке позволит этим странам улучшить свою конкурентоспособную позицию на мировом рынке.

ЮНИДО помогает развивающимся странам в выборе упаковочных методов, материалов и оборудования, отвечающих местным условиям, и в создании предприятий по производству упаковки. Она также поддерживает прикладные исследования и помогает учреждениям, занимающимся разработкой упаковки.

ПОЯСНИТЕЛЬНЫЕ ЗАМЕЧАНИЯ

Используемые обозначения и распределение материалов в настоящем руководстве не означают, что Секретариат Организации Объединенных Наций выражает какое-либо мнение относительно юридического статуса той или иной страны, или ее органов власти, или относительно начертания ее границ.

Перечисленные в настоящем руководстве публикации отобраны главным образом из литературы, изданной на официальных языках Организации Объединенных Наций; в соответствующих случаях были включены также публикации, изданные на других языках.

Названия организаций и публикаций даны на языке оригинала в тех случаях, когда они имелись в наличии; названия, представленные на языках, не являющихся официальными языками Организации Объединенных Наций, включены в перечень в переводе на английский язык.

В зависимости от наличия указаны год издания и количество страниц самого последнего из известных изданий, а также адрес организации, выпускающей публикацию, или издателя.

Предназначенные для продажи публикации Организации Объединенных Наций следует заказывать по соответствующему номеру, под которым они продаются. Их можно приобрести через должным образом уполномоченных агентов по продаже или заказать в:

Sales Section
Publishing Service
United Nations
New York, New York 10017
United States of America

или

INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Entre los medios de que se vale la ONUDI para este fin, figura la compilación de repertorios y guías de fuentes de información seleccionadas sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía, consagrada a la industria del embalaje, es la vigesimoséptima de la serie titulada *Guías de Fuentes de Información* (UNIDO/LIB/SER.D). Al final de esta guía puede verse una lista de las publicadas hasta la fecha; se prevé la publicación de otras de la misma serie.

Los repertorios y las guías no pretenden ser exhaustivos ni están destinados a servir de instrumento de investigación; los datos se han recopilado de manera que proporcionen un rápido acceso a las entidades mencionadas y faciliten la adquisición de las publicaciones que se indican.

La evolución de la industria del embalaje está determinada por el crecimiento del comercio y de la producción industrial mundial y por la diversidad de los productos manufacturados. Debido al rápido aumento de los precios y a la creciente escasez de las materias primas, se hace necesario concentrar mayores esfuerzos en la utilización más ventajosa de los materiales a fin de reducir los gastos de embalaje, los cuales constituyen una gran parte del costo total de los productos. Esta necesidad se hace sentir muy particularmente en los países en desarrollo, ya que el ahorro en el embalaje les permitiría mejorar su posición competitiva en el mercado mundial.

La ONUDI ayuda a los países en desarrollo a seleccionar métodos, materiales y equipo de embalaje que se adapten a las condiciones locales y a establecer instalaciones de embalaje. Apoya también la investigación aplicada y presta asistencia a las instituciones de desarrollo tecnológico del embalaje.

NOTAS EXPLICATIVAS

Las denominaciones empleadas en esta guía y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países o territorios citados o de sus autoridades, ni respecto de la delimitación de sus fronteras.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones y publicaciones aparecen en su idioma original, cuando así constan; cuando se dan en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se incluye la traducción al inglés del título correspondiente.

Se indican la fecha y el número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen.

Los pedidos de publicaciones de las Naciones Unidas han de hacerse por número de venta. Dichas publicaciones se pueden obtener por conducto de distribuidores autorizados, o haciendo un pedido a:
