## INTRODUCTION

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with the petrochemical industry, is the twenty-ninth guide in the series of *UNIDO Guides to Information Sources* (UNIDO/LIB/SER.D). A list of the guides published to date appears at the end of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

The petrochemical industry has in the recent past shown a very high rate of growth in the world economy. It is a dynamic industry, which supplies intermediate products for a number of other industries and provides substitutes for traditional materials, such as steel, wood, paper, natural fibres and soap. Because of the diversity of its products the petrochemical industry is a desirable prospect for many developing countries, even for those without indigenous petroleum and natural gas resources, and ranks highly in their development plans. UNIDO assists developing countries in establishing, improving and expanding petrochemical industries.

## INTRODUCTION

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne l'industrie pétrochimique, est le vingt-neuvième de la série des *Guides des sources d'information* (UNIDO/LIB/SER.D). On trouvera en fin de volume la liste des guides déjà parus. D'autres sont prévus.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche, mais de simples guides des sources d'information considérées comme présentant un intérêt pratique pour les utilisateurs. Les données sont présentées de manière à permettre à ceux-ci de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir les publications auxquelles ils s'intéressent.

Au cours des dernières années, l'industrie pétrochimique a connu un taux de croissance très élevé dans l'économie mondiale. Il s'agit d'une industrie dynamique, qui fabrique des produits intermédiaires pour plusieurs autres industries et fournit des produits de remplacement pour l'acier, le bois, le papier, les fibres naturelles, le savon, etc. La diversité de sa production fait de l'industrie pétrochimique une possibilité intéressante pour de nombreux pays en développement, fussent-ils dénués de ressources en pétrole et en gaz naturel, et la place en bon rang dans leurs plans de développement. L'ONUDI fournit une assistance aux pays en développement pour la création, le perfectionnement et l'expansion de leurs industries dans ce secteur.

## ВВЕДЕНИЕ

Организация ООН по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах путем предоставления руководящих рекомендаций в деле улучшения работы местных служб информации. В качестве одного из средств такого содействия ЮНИДО составляет справочники и руководства по отдельным источникам информации применительно к отраслям промышленности, в первостепенном развитии которых заинтересованы развивающиеся страны. Настоящее руководство, касающееся нефтехимической промышленности, является двадцать девятым в серии руководств ЮНИДО по источникам информации *UNIDO Guides to Information Sources (UNIDO/LIB/SER. D)*. Список ранее опубликованных руководств помещен в конце данного руководства; планируется выпуск других руководств.

Справочники и руководства не ставят целью дать исчерпывающую информацию и не являются средством исследования; информация в них подобрана таким образом, чтобы помочь быстрому установлению контактов с организациями, на которые имеются ссылки, и облегчить приобретение перечисленных изданий.

Нефтехимическая промышленность последнее время развивается весьма быстрыми темпами. Это весьма динамичная отрасль промышленности, снабжающая промежуточными продуктами много других отраслей промышленности. Она предоставляет заменители для таких традиционных материалов, как сталь, дерево, бумага, натуральное волокно и мыло. Поскольку она производит много разнообразных видов продукции, ее развитие желательно для многих развивающихся стран, даже для тех, которые не имеют собственной нефти или натурального газа, и ей уделяется важное внимание в планах развития. ЮНИДО помогает развивающимся странам в создании, модернизации и расширении нефтехимических предприятий.

## INTRODUCCION

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Entre los medios de que se vale la ONUDI para este fin, figura la compilación de repertorios y guías de fuentes de información seleccionadas sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía, consagrada a la industria petroquímica, es la vigésimo novena dentro de la serie titulada *Guías de Fuentes de Información* (UNIDO/LIB/SER.D). Al final de esta guía puede verse una lista de las publicadas hasta la fecha; se prevé la publicación de otras de la misma serie.

Los repertorios y las guías no pretenden ser exhaustivos ni están destinados a servir de instrumentos de investigación, sino que presentan fuentes consideradas de valor práctico para los usuarios. Los datos se han recopilado de manera que proporcionen un acceso rápido a las entidades mencionadas y faciliten la adquisición de las publicaciones que se indican.

La industria petroquímica ha mostrado, en los últimos tiempos, una tasa de crecimiento muy elevada en la economía mundial. Se trata de una industria dinámica, que aporta productos intermedios para diversas otras industrias y proporciona sustitutos de materiales tradicionales, tales como acero, madera, papel, fibras naturales y jabón. Debido a la diversidad de sus productos, la industria petroquímica ofrece una perspectiva deseable para muchos países en desarrollo, incluso para aquellos que carecen de recursos propios de petróleo y gas natural, y ocupa un elevado lugar en sus planes de desarrollo. La ONUDI presta asistencia a los países en desarrollo para establecer, perfeccionar y ampliar sus industrias petroquímicas.
