PREFACE

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion, UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with industrial maintenance and repair, is the thirty-sixth guide in the series of UNIDO *Guides to Information Sources* (UNIDO/LIB/SER.D). A list of the guides published to date appears at the end of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

Maintenance and repair is an integral part of any constructional or engineering industry. Heavy investment on building and machinery and the increasing complexity of machinery and equipment in the industrial sectors have led to the parallel development of maintenance and repair activities.

UNIDO gives special attention to improving maintenance management and to creating consciousness of the need for maintenance at all levels. It has organized in-plant training programmes, courses, workshops and symposia in this field, providing advisory services to enterprises in developing countries. The Industrial Information Section offers its users a wide range of information on engineering aspects of maintenance and repair through the Inquiry Service.

PREFACE

Pour faciliter la diffusion et l'utilisation de l'information industrielle dans les pays en développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne l'entretien et les réparations dans l'industrie, est le trente-sixième de la série des Guides des sources d'information (UNIDO/LIB/SER.D). On trouvera à la page 3 de la couverture la liste des guides déjà parus. D'autres sont prévus.

Les ouvrages de cette série ne prétendent pas être exhaustifs, ce ne sont pas non plus des instruments de recherche, mais de simples guides des sources d'information considérées comme présentant un intérêt pratique pour les utilisateurs. Les données sont présentées de manière à permettre à ceux-ci de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir les publications auxquelles ils s'intéressent.

L'entretien et les réparations font partie intégrante de toute activité industrielle de construction, mécanique ou autre. L'ampleur des investissements consacrés au bâtiment et aux machines ainsi que la complexité croissante du matériel utilisé dans les diverses branches d'industrie ont entraîné le développement des activités d'entretien et de réparation.

L'ONUDI s'emploie à améliorer la gestion de l'entretien et à faire mieux percevoir la nécessité de l'entretien à tous les niveaux. Elle a organisé divers stages de formation en entreprise, cours, journées d'études et colloques dans ce domaine, et fournit des services consultatifs aux entreprises des pays en développement. Par l'intermédiaire de son service de renseignements industriels, la section de l'information industrielle met à la disposition des intéressés une vaste gamme d'informations sur les aspects techniques de l'entretien et des réparations.

Les publications énumérées dans le présent volume sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés dans d'autres langues ont aussi été mentionnés.

Les noms des organisations et les titres des publications sont donnés le plus souvent possible dans la langue originale; les noms des organisations et les titres des publications libellés dans les langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

ПРЕДИСЛОВИЕ

Организация ООН по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах путем предоставления рекомендаций в деле совершенствования работы местных информационных служб. Одним из средств такого содействия являются справочники и руководства, которые ЮНИДО составляет по отдельным источникам информации применительно к отраслям промышленности, имеющим первостепенное значение для развивающихся стран. Настоящее руководство по промышленному обслуживанию и ремонту является тридцать шестым в серии руководств ЮНИДО по источникам информации *Guides to Information Sources* (UNIDO/LIB/SER.D). Список опубликованных до настоящего времени руководств помещен в конце данного руководства; планируется выпуск других руководств этой серии.

Справочники и руководства не ставят своей целью дать исчерпывающую информацию и не являются средством исследования; они скорее представляют собой источники, которые могут иметь практическую ценность для потребителей. Информация подобрана таким образом, чтобы помочь быстрому установлению контактов с упоминаемыми организациями и облегчить приобретение перечисленных изданий.

Обслуживание и ремонт являются неотъемлемой частью любой строительной отрасли промышленности или машиностроения. Крупные капиталовложения в строительство и машиностроение и растущая сложность машин и оборудования в промышленных секторах привели к параллельному развитию деятельности по обслуживанию и ремонту.

ЮНИДО уделяет особое внимание организации деятельности по обслуживанию и осознанию необходимости обслуживания на всех уровнях. Она проводит программы подготовки кадров на предприятиях, курсы, семинары и симпозиумы в этой области, предоставляя консультативные услуги предприятиям в развивающихся странах. Секция промышленной информации через службу запросов предлагает своим пользователям широкий выбор информации по техническим аспектам обслуживания и ремонта.

PREFACIO

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Entre los medios de que se vale la ONUDI para este fin figura la compilación de repertorios y guías de fuentes de información seleccionadas sobre ramas industriales de interés primordial para los países en desarrollo. La presente guía, consagrada a las actividades de mantenimiento y reparación industrial, es la trigésimo sexta de la serie titulada "*Guías de Fuentes de Información*" (UNIDO/LIB/SER.D). Al final de esta guía puede verse una lista de las publicadas hasta la fecha; se prevé la publicación de otras de la misma serie.

Los repertorios y las guías no pretenden ser exhaustivos ni están destinados a servir de instrumento de investigación, sino que presentan fuentes consideradas de valor práctico para los usuarios. Los datos se han recopilado de manera que proporcionen un acceso rápido a las entidades mencionadas y faciliten la adquisición de las publicaciones que se indican.

Las actividades de mantenimiento y reparación forman parte integrante de toda industria mecánica o de construcción. La magnitud de las inversiones efectuadas en la construcción y en maquinaria, y la creciente complejidad de la maquinaria y el equipo utilizados en los sectores industriales han dado lugar a un desarrollo paralelo de las actividades de mantenimiento y reparación.

La ONUDI presta particular atención a las actividades encaminadas a mejorar la gestión del mantenimiento y al desarrollo de una mayor conciencia de la necesidad del mantenimiento a todos los niveles. Ha organizado programas de capacitación en el trabajo, cursos teóricos y prácticos y simposios en esta esfera, y presta servicios de asesoramiento a empresas de países en desarrollo. La Sección de Información Industrial ofrece a sus usuarios, a través de su Servicio de Consultas, una amplia gama de información sobre aspectos tecnológicos de las actividades de mantenimiento y reparación.

NOTAS EXPLICATIVAS

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o zonas citados o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones y publicaciones aparecen en su idioma original, cuando así constan; cuando se dan en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se incluye la traducción al inglés del título correspondiente.

Se indican la fecha y el número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen. En el número de venta de las publicaciones de las Naciones Unidas destinadas a la venta se indica el año de su publicación.

Los documentos no destinados a la venta, publicados por las Naciones Unidas y organismos conexos, deben pedirse directamente a la organización respectiva. Los pedidos de publicaciones destinadas a la venta han de hacerse, indicando el número de venta, por conducto de distribuidores autorizados, o haciendo un pedido a:
