## FRANCE

**Supplier of information:**

Institut national de la statistique et des études économiques (INSEE), Paris.  
Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

National accounts compilations.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All establishments.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Yes

**Concepts and definitions of variables:**

Number of employees refers to the average number of employees throughout the year. Both full- and part-time employees are included.

Output is gross output in basic values.

Value added, also in basic values, is calculated as gross output, less the cost of materials, fuels and other supplies; contract, commission, repair and maintenance work done by others; goods shipped in the same condition as received; and electricity purchased. Inputs are calculated on the basis of amount consumed.

Gross fixed capital formation is the value of acquisitions of fixed capital (plus own-account construction) less the value of sales of own account construction. Fixed assets covered are those with a productive life of more than one year and include assets made by a unit's labour force for its own use; additions, alterations, improvements, and repairs; new assets not yet in use and used assets. Valuation for new assets is the full cost incurred, including delivered price and installation charges, but excluding fees and taxes. Assets produced by the unit are valued at the cost of work put in progress, while for sales of used assets, the actual amount realized is taken.

**Related national publications:**

Système élargi de comptabilité nationale; Sources et méthodes d'élaboration des comptes nationaux, both published by Institut national de la statistique et des études économiques (INSEE), Paris.

## GERMANY, WESTERN PART

### Supplier of information:

Federal Statistical Office (Statistisches Bundesamt), Wiesbaden.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

### Basic source of data:

Monthly inquiry.

### Major deviations from current version of ISIC:

The data have been converted from the national classification (Systematik für die Statistik im Produzierenden Gewerbe - SYPRO) to ISIC, in so far as details permit. However it should be noted that: Prefabricated building materials, publishing (ISIC 342) and manufacture of natural stone products (ISIC 369) are not covered; manufacture of mattresses (ISIC 332) is included in ISIC 321; manufacture of umbrellas (ISIC 390) in ISIC 322; manufacture of fur wearing apparel (ISIC 322) in ISIC 323; bookbinding (ISIC 342) in ISIC 341; manufacture of mixed lubricating oils and greases (ISIC 353, 354) in ISIC 351 and 352 combined; manufacture of unprocessed plastic pipes and tubes (ISIC 351) in ISIC 356; surface refinement and hardening plants (ISIC 381) in ISIC 371; manufacture of drawn steel wire and forged steel chains (ISIC 371), washing machines (ISIC 382) and assembly and repair of ventilation, heating and sanitary systems (ISIC major division 5) in ISIC 381; manufacture of lighting glassware (ISIC 362), recording of master tapes and records (ISIC major division 9) and manufacture of electric and electronic measuring instruments and meters (ISIC 385) in ISIC 383. Quarrying is included in ISIC 369, erection of structural steel is included in ISIC 381 and the difference in respect of assembly and repair of ventilation, heating and sanitary systems has been adjusted.

### Reference period (if not calendar year):

### Scope:

Local units belonging to enterprises with 20 or more persons engaged including production handicrafts and the industrial units of non-industrial establishments.

### Method of enumeration:

Complete enumeration.

### Adjusted for non-response:

Not reported.

### Concepts and definitions of variables:

Number of persons engaged refers to annual averages of all persons engaged at month's end. Included are working proprietors, active business partners, unpaid family workers, provided they are working for at least one third of the usual working time. Part-time and temporary employees are covered as well as apprentices. Homeworkers are excluded.

Wages and salaries paid to employees covers gross wages and salaries paid excluding employer's contributions to social security. Notably all payments for interim employed persons are included, and contributions to company old-age pensions institutions are excluded.

Output relates to turnover from own production based on invoice values. It includes proceeds from goods sold as purchased and from the sale of waste, power and similar items. Proceeds from non-industrial activities (e.g., interest payments, rentals, dividends) are excluded. The value of shipments also excludes value added or turnover taxes but includes excise duties, costs for freight packing, postage and other charges.

Value added uses the census concept. It is output less the cost of materials, fuels and other supplies, contract and commission work done by others, repair and maintenance work done by others, goods shipped in the same condition as received and electricity purchased. The cost of non-industrial services is excluded while receipts therefrom are included. Input estimates are on a received basis and adjustments have been made for changes in stocks of materials, fuels and other supplies. Valuation is in producers' prices including all direct taxes (excluding turnover tax) and excluding all subsidies.

Gross fixed capital formation is defined as the value of purchases of new and used fixed assets including own-account construction of assets and work in progress. Valuation is at full cost incurred including fees and taxes. Advance payments for investment goods not yet supplied are excluded.

### Related national publications:

Fachserie 4, Reihe 4.1.1., Beschäftigung, Umsatz und Energieversorgung der Unternehmen und Betriebe im Bergbau und im Verarbeitenden Gewerbe, published by Statistisches Bundesamt, Wiesbaden.

a/ 322 includes made-up textile goods except wearing apparel

c/ 355 includes asbestos products

e/ Total manufacturing includes activities that are not adequately defined and therefore not classified at the industry level

b/ 353 includes 354

d/ 369 includes stone quarrying, clay and sand pits

## GHANA

**Supplier of information:**

Statistical Service, Accra.

**Basic source of data:**

Industrial report

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All establishments.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Persons engaged refers to paid and unpaid staff.

**Related national publications:**

Industrial Statistics 1985-1986; Ghana Industrial Census 1987, Part II Report Background and Results, both published by Statistical Service, Accra.

## GREECE

**Supplier of information:**

National Statistical Service of Greece, Athens.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Manufacturing establishments with 10 or more persons engaged, excluding government establishments.

**Method of enumeration:**

Complete enumeration of establishments with 20 or more persons engaged and a stratified random sample of establishments with 10 to 19 persons.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of persons engaged relates to national averages based on enumerations in every other month in the year. Unpaid family workers are included if they work three hours a day or more.

Wages and salaries paid to employees covers wages, salaries, payments for overtime work and regular leave, bonuses, allowances, dismissal compensation and the value of receipts in kind.

Output comprises the value of finished goods produced, receipts from contract work done for others, receipts from repair work, receipts from the sale of goods sold in the same condition as purchased, sales of self-produced steam, electric energy, processing waste, and subsidies and reimbursements for re-export of products. Value is at ex-factory selling price, excluding indirect taxes.

Value added is the value of the output less the cost of materials and supplies, purchased fuels and electricity consumed, the purchase value of goods sold in the same condition as purchased, and payments for contract and repair work.

Gross fixed capital formation represents current expenditure on new and used fixed assets less sales and write-offs due to obsolescence. Own-account construction of fixed assets is included.

**Related national publications:**

Annual Industrial Survey; Statistical Yearbook; Monthly Statistical Bulletin, all published by the National Statistical Service of Greece, Athens.

a/ Excluding magnesite roasting

## GUATEMALA

**Supplier of information:**

Instituto Nacional de Estadística, Ministerio de Economía, Guatemala.

**Basic source of data:**

Annual survey of manufacturing industries.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

**Scope:**

Establishments with 5 or more persons engaged.

**Method of enumeration:**

Sampling methods.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees does not include homeworkers.

Wages and salaries is all payments to employees, in cash and in kind. It includes bonuses, cost-of-living allowances, wages and salaries paid during regular leave, dismissal compensations, taxes and employees' contributions to social insurance and other funds.

Output comprises the value of (a) goods produced, (b) work performed for others, (c) goods sold without transformation, (d) electricity sold and (e) other receipts.

**Related national publications:**

Encuesta Industrial (annual), published by the Instituto Nacional de Estadística, Guatemala.

Boletín Estadístico (quarterly), published by the Banco de Guatemala, Guatemala.

## HONDURAS

**Supplier of information:**

Dirección General de Estadística y Censos, Tegucigalpa.  
The index numbers of industrial production are compiled by the Departamento de Investigaciones Industriales, Banco Central de Honduras.

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC.

**Reference period (if not calendar year):****Scope:**

Registered establishments with 5 or more persons engaged.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Persons engaged refers to total number of persons engaged including homeworkers.

Output refers to gross output and is not adjusted for the cost of purchases of goods for resale without further processing.

Value added refers to total value added and is net of non-industrial costs.

Gross fixed capital formation excludes land and land improvements.

**Related national publications:**

Investigación Industrial (annual), published by the Dirección General de Estadística y Censos, Tegucigalpa.

## HONG KONG

**Supplier of information:**

Census and Statistics Department, Hong Kong.

**Basic source of data:**

Annual survey.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

For establishments that do not have data available for the calendar year data may be supplied for any 12 month period between 1 January of the reference year and 31 March of the following year.

**Scope:**

All establishments listed in a comprehensive and up-to-date register maintained by the Census and Statistics Department of Hong Kong.

**Method of enumeration:**

Questionnaires are mailed to a sample of establishments for completion. Staff of the Census and Statistics Department visit these establishments to collect completed questionnaires or to assist with their completion.

**Adjusted for non-response:**

Yes

**Concepts and definitions of variables:**

Wages and salaries relates to cash payments only. It excludes payments in kind and includes severance and termination pay;

Value added refers to total value added, i.e. the contribution to gross domestic product.

... denotes data suppressed because of confidentiality rules, except for ISIC 353 and 354 in 1991.

**Related national publications:**

Report on the Survey of Industrial Production (annual); Hong Kong Monthly Digest of Statistics; Hong Kong Annual Digest of Statistics, all published by the Census and Statistics Department, Hong Kong.

## HUNGARY

**Supplier of information:**

Hungarian Central Statistical Office, Budapest.

**Basic source of data:**

Annual industrial inquiry.

**Major deviations from current version of ISIC:**

Publishing is not covered; repair services for the general public are included in related manufacturing industries.

**Reference period (if not calendar year):****Scope:**

The figures given prior to 1991 relate to the industrial enterprises possessing legal entities only. As of 1991 the figures relate to all industrial enterprises possessing legal entities, as well as non-legal entities (private unincorporated companies) and individual entrepreneurs having double or single entry book-keeping.

Indices of industrial production cover all establishments possessing legal entities.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries excludes gratuities, certain subsidies, family allowances, and housing allowances.

Output does not include goods shipped in the same condition as received. Valuation is net of turnover taxes and includes price supplements granted by the State on individual products.

Gross fixed capital formation relates to actual expenditure on new fixed assets. The corresponding value of sales is not covered.

**Related national publications:**

Statisztikai Evkönyv (Statistical Yearbook), published by the Hungarian Central Statistical Office, Budapest.

a/ 311/2 includes 313 and 314

c/ Including repair services for the general public

b/ 355 includes 356

## ICELAND

**Supplier of information:**

National Economic Institute of Iceland, Reykjavik.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Sample drawn from tax records.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All establishments.

**Method of enumeration:**

The sample covers around 50% of the total wage bill in various industries. For production and value added the stratified samples drawn are "blown up" to the total size according to the proportion between the total wage bill and the sample wage bill. Employment figures are based on information obtained from all establishments.

**Adjusted for non-response:**

Not reported

**Concepts and definitions of variables:**

Number of employees is calculated as the number of work years, based on the number of insured weeks of work provided by a register-based tax-source.

Wages and salaries paid to employees comprises all payments, whether in cash or in kind, made to employees during the year, including bonuses, compensations, etc.

Output is valued in producers' prices, excluding all subsidies and including indirect taxes. Value of all products is taken, allowing for net changes of work in progress.

Value added uses the national accounting concept. It is calculated as the value of output excluding the cost of materials, fuels and other supplies; contract and commission work done by others; repair and maintenance work done by others; and electricity purchased. It includes receipts for non-industrial services but excludes costs of non-industrial services. Input estimates are on a consumed basis. Valuation is in producers' prices.

**Related national publications:**

Atvinnuvegaskýrslur (Industrial Statistics), published by the National Economic Institute of Iceland, Reykjavik.

## INDIA

**Supplier of information:**

Department of Statistics, Ministry of Planning and Programme Implementation, New Delhi.  
The indices of industrial production are compiled by the Central Statistical Organisation.

**Basic source of data:**

Annual Survey of Industries.

**Major deviations from current version of ISIC:**

The Indian industrial classification system is based on the preceding version of the ISIC, but data have been adjusted to fit the current version of the ISIC, with three exceptions: the manufacture of inedible oils (part of ISIC 3115) is included in ISIC 352; the manufacture of prime movers, boilers, etc. (part of ISIC 3813) is included in ISIC 382 and the manufacture of electronic computers (part of ISIC 3825) is included in ISIC 383.

**Reference period (if not calendar year):**

From 1 April of the year indicated to 31 March of the following year. However, individual factory returns for an accounting year ending on any day during the reference period, are accepted.

**Scope:**

Factories using power employing 10 or more workers on any day of the reference period and those employing 20 or more workers, but not using power.  
The indices of industrial production for some industries cover only establishments employing plant and machinery worth two million rupees or more.

**Method of enumeration:**

Factories employing 100 and more workers are completely enumerated. For factories with less than 100 workers, a stratified unistage sampling is adopted.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Persons engaged is derived by dividing the person days (paid or unpaid) by the number of days in which the factory was either in operation or in which repair, maintenance and construction activity was carried out. The number of person days for each category is obtained by summing up the number of persons attending each shift over every shift worked on all days (working and non-working).

Wages and salaries is compensation of employees including payments to contract labourers, and excluding payments in kind.

Output is gross output and is not adjusted for cost of goods sold without further processing.

Value added is net of depreciation.

**Related national publications:**

Annual Survey of Industries - Summary Results for Factory Sector; Supplement to Annual Survey of Industries - Summary Results for Factory Sector by State Industry, all published by Central Statistical Organisation, Department of Statistics, Ministry of Planning and Programme Implementation, New Delhi.

## INDONESIA

**Supplier of information:**

Central Bureau of Statistics, Jakarta.

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

The survey covers large establishments (with 100 and more persons engaged) and medium scale establishments (with 20-99 persons engaged). The survey does not cover petroleum manufacturing activities (ISIC 353 and 354) nor manufacturing activities on agricultural estates of tea, tobacco and rubber.

**Method of enumeration:**

Complete enumeration. For provinces where establishments are concentrated the enquiry is carried out by field enumerators through direct interviews, elsewhere it is carried out by mail.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries represents employment costs, which include employers' contributions to pension and health insurance schemes.

Output comprises: (a) value of all products of the establishment; (b) net change in the value of semi-finished goods and work in progress during the year; (c) receipts from industrial and non-industrial services rendered to others; (d) value of goods shipped in the same condition as received; and (e) the value of electricity sold.

Value added is output less the cost of the following inputs: raw materials, auxiliary materials, packing materials, oils, fuels, gas and electricity consumed and industrial and non-industrial services rendered by others.

Gross fixed capital formation represents the value of acquisitions of new and used fixed assets; sales are not taken into account.

## IRAN (ISLAMIC REPUBLIC OF)

**Supplier of information:**

Statistical Centre of Iran, Plan and Budget Organization, Teheran.  
The index numbers of industrial production are compiled by the Statistics Division, Ministry of Industry and Mines, Teheran.

**Basic source of data:**

Annual survey of industrial establishments.

**Major deviations from current version of ISIC:**

None reported except the indices of industrial production, which are compiled with regard to the preceding version of the ISIC. Wherever possible, adjustments have been incorporated to convert them to the present version.

**Reference period (if not calendar year):**

Iranian year beginning 21 March of the year indicated.

**Scope:**

Establishments with 10 or more persons engaged.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

No, reported.

**Concepts and definitions of variables:**

Number of employees is an average of the quarterly numbers.

Wages and salaries includes employers' contributions to social insurance schemes and also the establishments' 20 per cent special net profit which is distributed among workers.

Output is the sum of the value of products, electricity and water sold, contract work done for others, goods shipped in the same condition as received, work in progress and own-account construction.

Value added is the difference between the value of output and the cost of materials and supplies, fuels, electricity, water, contract and repair work done by others and goods purchased for resale without transformation.

Gross fixed capital formation represents the value of purchases of new and used fixed assets, capital repairs and own-account construction during the year less the value of corresponding sales and disposals. It does not cover new establishments not yet in operation during the reference year and also does not include progress payments made for fixed assets on order but not yet completed at the end of the reference year.

**Related national publications:**

Large-scale Industrial Establishments (annual), available only in the national language, published by the Statistical Centre of Iran, Teheran.

## IRAQ

**Supplier of information:**

Central Statistical Organization, Ministry of Planning, Baghdad.

**Basic source of data:**

Quarterly industrial survey.

**Major deviations from current version of ISIC:**

The estimates are based on the previous version of the ISIC.

Establishments specializing in repair work are classified in manufacturing industries according to the type of product repaired.

**Reference period (if not calendar year):****Scope:**

Establishments in the public and private sectors employing 30 or more persons and with a capital of 100,000 dinars or more.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of establishments and number of employees relate to averages of the quarterly numbers, and cover establishments which are actually in operation.

**Related national publications:**

Annual Abstract of Statistics; Results of the Industrial Survey (annual), both published by the Central Statistical Organization, Ministry of Planning, Baghdad.

## IRELAND

**Supplier of information:**

Irish Central Statistics Office, Dublin.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to NIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual census of industrial establishments.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All establishments engaged in industrial activity which have on average three or more persons engaged during the year. The majority of the industrial establishments covered are individual factories. However, where two or more distinct activities are conducted at the same location each is distinguished, in principle, as a separate establishment. The extent to which separate returns are obtained for each individual establishment, however, depends on the scale of the different activities involved and the availability of separate records in the business for the different establishments. Any sizeable non-industrial activity is excluded.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Establishment is defined as a single economic activity conducted at a particular location. Number of establishments includes all the separate production locations of multi-location enterprises even if separate details are not provided by the respondent.

Number of employees refers to number of persons who are paid a fixed wage or salary. Persons at work or temporarily absent because of illness, holidays, strikes, etc. are included, as are part-time workers. Homeworkers are excluded. The numbers given for each year refer to a week in September.

Output represents the net selling value of all goods manufactured in the year, whether sold or not, and the value of work done. In general, for establishments working on commission on materials supplied to them by other firms, only the payments received by them for the work done are included. Operating subsidies related to the production or sales of the output are included in the value of output; excise duty and VAT are excluded.

Value added is the difference between the value of output and industrial inputs. Industrial inputs consists of the industrial materials, industrial services, fuel and power used in the production of the output. Industrial materials and services comprise materials for processing and ancillary goods and services, i.e. packing materials, repairs and the cost of contract work done by other firms on materials supplied by the establishment. Valuation is exclusive of deductible VAT.

Gross fixed capital formation is the difference between acquisitions and sales of capital assets. Capital assets (land, buildings, plant and equipment) are defined as goods with an expected useful life of more than one year intended for use by the establishment itself. Acquisitions include purchases from other establishments and production by the establishment itself of capital goods for its own use. Major alterations, improvements and repairs that extend the useful life of an asset or increase its productivity are included. The value of work put in place during the year is included whether or not completed. Acquisitions are valued at total cost including installation charges and fees or duties but excluding deductible VAT and financial costs. Sales are valued at the actual price received excluding VAT.

**Related national publications:**

## ISRAEL

**Supplier of information:**

Central Bureau of Statistics, Jerusalem.

**Basic source of data:**

Annual industry and crafts survey.

The data for 1989 and 1991 are obtained from a monthly sample survey of industrial production.

**Major deviations from current version of ISIC:**

The national classification follows in principle the present version of ISIC. However, it should be noted that: (a) manufacture of knitted goods, except fabrics (part of ISIC 321) is included in ISIC 322 and, for the estimates other than those obtained from the industry and crafts survey, ISIC 3513 is included in ISIC 321 and (b) the diamond industry (part of ISIC 390) is excluded from the scope of inquiry of the special nature of the establishments in the industry.

**Reference period (if not calendar year):****Scope:**

All establishments operating during any part of the survey year, with 5 or more persons engaged, except (a) non-profit establishments (such as workshops for training or rehabilitation purposes), (b) auxiliary industrial units in kibbutz establishments where the bulk of production is consumed by the kibbutz itself and (c) establishments which are being set-up or run-in throughout the survey year and do not currently contribute to the output. The establishments covered account for about 95 per cent of all employees in industry. For 1989 and 1991, the data cover establishments with one or more persons engaged.

The indices of industrial production cover all industrial establishments and workshops with at least one employee.

**Method of enumeration:**

Sampling methods.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees refers to annual averages of four selected months of the reference year. For 1989 and 1991 the estimates are averages of 12 monthly figures.

Wages and salaries covers all payments appearing on the pay-roll on which income tax is due, including basic salary, cost-of-living and other allowances (except child allowance), premiums, bonuses, payments for overtime, leave, sickness etc., bus fare, professional literature, thirteenth month salary, maintenance of vehicles, telephone, clothing, lodging and payments in kind (meals, presents, housing etc.). The estimates for 1990 also include labour expenses which do not appear on payrolls, such as payments for national insurance, pension fund etc.

Output does not take into account goods for resale without further processing. Output refers to census output and value added to census value added.

Gross fixed capital formation excludes land and is not adjusted for sales. Progress payments made for fixed assets on order but not yet completed are excluded. Fixed capital formation in new establishments not yet in operation is also excluded.

**Related national publications:**

Industry and Crafts Survey (annual); Statistical Abstract of Israel (annual); Monthly Bulletin of Statistics, all published by the Central Bureau of Statistics, Jerusalem.

a/ Twelve months beginning 1 April of the year indicated  
 c/ 322 includes 324  
 e/ 351 includes 353 and 354  
 g/ 355 includes 356  
 i/ 371 includes 372

b/ 311/2 includes 313 and 314  
 d/ 331 includes 332  
 f/ 351 includes 352, 353 and 354  
 h/ 361 includes 362 and 369

## ITALY

**Supplier of information:**

Istituto Nazionale di Statistica (National Institute of Statistics), Rome.  
Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual surveys of gross output and capital investments of the industrial sector.

**Major deviations from current version of ISIC:**

The national classification system is not fully convertible to the current version of the ISIC. The following differences should be noted: manufacture of olive oil, margarine, etc. (part of ISIC 311/2) is included in ISIC 351-352 combined; asbestos spinning and weaving (part of ISIC 369) in ISIC 321; made-up textile goods, except wearing apparel (part of ISIC 321) in ISIC 322; repair of footwear in ISIC 324; industrial furnaces and ovens, cooking ranges and ovens, tanks, small arms, ordnance and artillery (part of ISIC 382), invalid and baby carriages (part of ISIC 384), and laboratory equipment (part of ISIC 385) in ISIC 381; aircraft engines (part of ISIC 384) in ISIC 382; typewriters, calculators, cash registers and scales (part of ISIC 382) and jewellery and related articles (part of ISIC 390) in ISIC 385; electric lamps and tubes (part of ISIC 383) in ISIC 390.

**Reference period (if not calendar year):****Scope:**

All enterprises with 20 or more persons engaged. The enterprise, classified by kind of activity, is the basic reference unit. Multi-unit enterprises with more than 250 persons engaged are required to furnish data separately for each unit.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees refers to the average number over the year.

Wages and salaries relates to gross earnings of employees and includes basic wages and salaries, cost-of-living allowances, overtime and vacation pay, bonuses and payments in kind. Output, net of indirect taxes and subsidies and calculated on a shipment basis, relates to gross output. It covers the values of goods produced, receipts for work done for others, fixed assets produced for own use, sales of goods purchased and resold without further processing, and receipts for non-industrial services rendered.

Value added is the value of gross output less the cost of the following inputs: materials and supplies purchased (adjusted for the net change in the value of their stocks), products bought and shipped without further processing, and industrial work done by others.

Gross fixed capital formation represents the value of the acquisition of new and used fixed assets with an expected productive life of one year or more, including own-account construction. Also included are investments of a social nature and costs of major repairs and other expenditures on fixed assets. Sales of fixed assets are not deducted.

**Related national publications:**

Fatturato, prodotto lordo e investimenti delle imprese industriali: supplements to Bollettino Mensile di Statistica, published by the Central Institute of Statistics, Rome.

## JAMAICA

**Supplier of information:**

Statistical Institute of Jamaica, Kingston.

**Basic source of data:**

Quarterly surveys carried out by the Factories Inspectorate, Ministry of Labour and Employment.

**Major deviations from current version of ISIC:**

Repair services for the general public (part of ISIC major division 9) are included in manufacturing according to the type of products.

**Reference period (if not calendar year):****Scope:**

The data cover establishments with 10 or more persons engaged.

**Method of enumeration:**

All establishments with 50 or more persons engaged are enumerated. A 20 per cent sampling was done for establishments with 10-49 persons engaged.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries relates to compensation of employees.

Output refers to gross output and is derived from national accounts estimates.

Value added is the contribution of each branch to gross domestic product.

**Related national publications:**

Statistical Abstract; Statistical Yearbook; National Income and Product; Employment, Earnings and Hours worked in Large Establishments, all published by the Statistical Institute of Jamaica, Kingston.

## JAPAN

**Supplier of information:**

Ministry of International Trade and Industry (MITI), Tokyo.  
Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual census of manufactures.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All establishments classified under manufacturing except those belonging to the government and public service corporations. Since 1981 surveys cover all such establishments only in years where the last digit is 0, 3, 5 or 8. In all other years, the survey is limited to those establishments with four or more employees. Investment figures cover establishments with 30 or more persons engaged.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Persons engaged refers to the number at the end of the year, full- or part-time. Persons engaged comprises employees (including apprentices and temporary workers, meeting minimum time requirements) and working proprietors. Unpaid family workers, temporary and daily workers are excluded, though their remuneration is included in wages and salaries.

Wages and salaries paid to employees relates to total cash payments, including basic wages, bonuses and other premiums, allowances and employees' retirement and termination allowances. Output represents the value of shipments of finished goods, adjusted for changes in stocks of finished goods and work in progress. Receipts for contract and repair and maintenance work are included. The value of goods shipped in the same condition as received is excluded.

Value added is output less the cost of materials and fuels consumed, electricity purchases, contract work and indirect taxes, depreciation, and purchases of non-industrial services. Receipts for non-industrial services performed for others are excluded. Input estimates are made on a received basis, not allowing for changes in stock levels.

Gross fixed capital formation is defined as the value of purchases of fixed assets, including own account construction, less the value of sales. Fixed assets covered are those with a productive life of more than one year and include repairs to existing assets, new assets whether not yet in use, unused, or previously used abroad, and used assets. Valuation is at full cost incurred, including delivered price, cost of installation and fees and taxes. For own-produced assets, the cost of work put in progress covers labour costs, materials and supplies and includes an allocation for overheads. The amount realized is taken for sales of used assets.

**Related national publications:**

Census of Manufactures (annual), published by MITI, Tokyo.

## JORDAN

**Supplier of information:**

Department of Statistics, Amman.

**Basic source of data:**

Annual survey of establishments on manufacturing.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC. It should be noted that: prior to the year 1989 ISIC 390 includes establishments specializing in repair services for the general public, bakeries located in rural areas and establishments engaging in both manufacturing and repair activities (mainly observed in the case of ISIC 322, 381 and 383) and to other manufacturing industries.

**Reference period (if not calendar year):****Scope:**

All establishments.

Data relate to the East Bank.

**Method of enumeration:**

The survey is conducted on the basis of sampling of establishments with less than 20 persons engaged and of a complete enumeration of all establishments with 20 or more persons engaged. Since 1991, sampling methods are also used for establishments with 20 or more persons engaged.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of establishments relates to the establishments in operation during the year.

Number of employees refers to the number at the end of June of the reference year.

Output is the sum of the value of goods produced, value of goods sold in the same condition as purchased and receipts for industrial services rendered to others.

Value added is the difference between the value of output and the cost of materials, supplies, fuels, water and electricity consumed, cost of work done by others and cost of non-industrial services purchased.

**Related national publications:**

Industry Survey (annual); Statistical Yearbook, both published by the Department of Statistics, Amman.

f/ 381 includes 382

h/ Including repair services for the general public

## KENYA

**Supplier of information:**

Central Bureau of Statistics, Ministry of Planning and National Development, Nairobi.

**Basic source of data:**

Annual survey of industrial production and a census of industrial production, conducted every 5 years.

**Major deviations from current version of ISIC:**

Manufacture of metal furniture and fixtures (part of ISIC 381) is classified under ISIC 332 and the estimates for ISIC 384 include repair of motor vehicles (part of ISIC major division 9).

**Reference period (if not calendar year):****Scope:**

All establishments with 20 or more persons engaged.

**Method of enumeration:**

The survey covers establishments with 20-49 persons engaged based on 25 percent sample and total coverage of establishments with 50 or more persons engaged.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees refers to the average of the numbers at the beginning and end of the year. Wages and salaries includes employers' contributions to pension, health and other similar schemes.

Output refers to gross output in factor values. It is not adjusted for the cost of goods sold in the same condition as received.

Value added is also in factor values.

**Related national publications:**

Statistical Abstract (annual), published by the Central Bureau of Statistics, Ministry of Economic Planning and Development, Nairobi.

## KUWAIT

**Supplier of information:**

Central Statistical Office, Ministry of Planning, Safat.

**Basic source of data:**

Annual industrial surveys.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

The period of reference is the calendar year. Where data are available only on the basis of an accounting year different from the calendar year, the data are incorporated in the calendar year in which the major part of the accounting year falls. For establishments in the petroleum sector, estimates for the calendar year are made on the basis of the average of the two fiscal years.

**Scope:**

All industrial establishments in the private and public sectors, including joint (private and public) ownership.

**Method of enumeration:**

Establishments are covered on a census-cum-sample basis as follows: a) census coverage of all establishments with 10 or more employees as well as establishments in those activities (as defined by a 5-digit code based on ISIC) containing less than 20 establishments; b) sample coverage of all establishments not covered by the census. These establishments are divided into two groups according to employment levels 1-4 and 5-9 and samples are taken from both groups.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Output comprises (a) the value of all products of the establishments, (b) receipts for industrial work done for, or services rendered to, others, (c) the value of goods shipped in the same condition as received, less the cost of these goods, (d) the value of fixed assets produced by the establishment for its own use and (e) changes in stocks of finished goods.

Value added is estimated by subtracting the cost of materials, fuels, electricity and water consumed and the cost of industrial services rendered by others from the value of output.

**Related national publications:**

Annual Survey of Industries and Statistical Abstract (annual), both published by the Central Statistical Office, Ministry of Planning, Safat.

a/ Sum of available data

## KYRGYZSTAN

**Supplier of information:**

Kyrgyzstan State Committee on Statistics, Bishkek

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to achieve the best possible correspondence with the current version of the ISIC. Lack of detail in national data, however, results in several cases where correspondence with the ISIC cannot be achieved.

The industrial sectors 'Metalworking Industries' and 'Engineering', as defined in the national classification, are included in ISIC major groups 381 to 385 combined.

**Reference period (if not calendar year):**

**Scope:**

All enterprises operating under an 'independent regime' and enterprises operating under a 'non-industrial organization regime'.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Data refer to all surveyed enterprises.

**Concepts and definitions of variables:**

Wages and salaries is computed by UNIDO from reported wages and salaries per employee. Output, originally reported as output per person engaged, is generated by UNIDO.

**Related national publications:**

## LATVIA

**Supplier of information:**

State Committee for Statistics of the Republic of Latvia, Riga.

**Basic source of data:**

Annual survey of all enterprises with industrial activity.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Not reported.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

**Number of establishments:** Prior to 1992 enterprises with industry as their principal activity are counted as one unit, but each of the non-industrial units (i.e., enterprises with industry as their secondary line of activity) are counted as one establishment and classified accordingly. Beginning 1992 all industrial activities of a non-industrial enterprise are classified as belonging to the single industrial branch that accounts for the largest share of such activities.

**Wages and salaries** is computed by UNIDO from reported wages and salaries per employee.

**Related national publications:**

## LESOTHO

**Supplier of information:**

Bureau of Statistics, Maseru.

**Basic source of data:**

Prior to 1992, annual survey of industrial production covering establishments with 5 or more persons engaged. Beginning 1992, quarterly survey of enterprises with 40 or more employees.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

Fiscal year, beginning 1 April of the year indicated.

**Scope:**

Prior to 1992, establishments with 5 or more persons engaged; beginning 1992, establishments with 40 or more persons engaged.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

No

**Concepts and definitions of variables:**

Wages and salaries includes employer's contribution to pension, medical and similar schemes.

**Related national publications:**

Census of Industrial Production; Statistical Reports; all published by the Bureau of Statistics, Maseru.

a/ Number of persons engaged.  
c/ 321 includes 322, 323 and 324.  
e/ 323 includes 324.  
g/ Sum of available data

b/ 311/2 includes 313.  
d/ 321 includes 322.  
f/ Including manufacturing activities other than those for which separate data are shown.

## MACAU

**Supplier of information:**

Direcção de Serviços de Estatística e Censos, Macau.

**Basic source of data:**

Annual industrial census.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All legal establishments.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of employees relates to quarterly averages.

Output and value added are both measured according to the census concept.

**Related national publications:**

Inquerito Industrial (annual), published by the Direcção de Serviços de Estatística e Censos, Macau.

## MALAYSIA

**Supplier of information:**

Jabatan Perangkaan (Department of Statistics), Kuala Lumpur.

**Basic source of data:**

Annual Survey of Manufacturing Industries.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC.

**Reference period (if not calendar year):**

Basically, the calendar year. Some establishments, however, report for accounting years not coinciding with the calendar year.

**Scope:**

All establishments registered under the Industrial Coordination Act (I.C.A.) 1975.

**Method of enumeration:**

The annual survey is reviewed after each census to ensure that it covers about the same percentage of manufacturing output, value added and employment in each year. The annual survey is based on a complete enumeration by mail and field contacts.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees refers to full-time and part-time paid employees. Persons employed through labour contractors are also included.

Wages and salaries represents all payments made during the year to all persons engaged other than working proprietors and unpaid family workers. Employers' contributions to provident funds and payments to homeworkers are excluded.

Output refers to the value of products manufactured by the establishment, plus receipts from industrial services rendered to others, the net change in stocks of finished and semi-finished goods and the value of goods sold in the same condition as purchased.

Value added is derived as the difference between the value of output and the costs of materials, supplies and fuels consumed, electricity purchased, work done by others and goods sold in the same condition as purchased.

Gross fixed capital formation represents the value of purchases of new and used fixed assets and construction of fixed assets for own use less the value of sales of fixed assets

**Related national publications:**

Survey of Manufacturing Industries (annual); Industrial Surveys, Malaysia (annual); Annual Statistical Bulletin, Malaysia; Monthly Statistical Bulletin, all published by the Jabatan Perangkaan (Department of Statistics), Kuala Lumpur.

## MALTA

**Supplier of information:**

Central Office of Statistics, Valletta.

**Basic source of data:**

Annual census of production.

Data for 1989 and 1990 are from the Annual Abstract of Statistics, 1991.

**Major deviations from current version of ISIC:**

Data concerning ship-repairing activities are excluded because of disclosure rules.

**Reference period (if not calendar year):**

**Scope:**

All manufacturing establishments.

**Method of enumeration:**

Questionnaires distributed by mail.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees is the average number on the pay-roll during the last week of each month of the year.

Wages and salaries covers cash earnings of employees, including overtime payments, bonuses and commissions whether paid regularly or not and excludes employees insurance contributions. Employers' contributions to the national insurance scheme are included.

Output represents the value of sales and the net change between the beginning and the end of the year in value of stocks of goods produced. Valuation is at establishment price, excluding any discounts, commissions or rebates, but including charges for delivery.

Value added is the difference between the value of output and the cost of materials and fuels used, transport expenses, payments to homeworkers and the value of work given out. The estimates of output and value added exclude goods shipped in the same condition as received.

Gross fixed capital formation refers to acquisitions less disposals of land, buildings, plant, machinery and vehicles valued before the addition of legal charges, stamp duties, agent's fees, etc.

**Related national publications:**

Census of Industrial Production Report; Annual Abstract of Statistics, both published by the Central Office of Statistics, Valletta.

b/ 361 includes 362 and 369

## MAURITIUS

**Supplier of information:**

Central Statistical Office, Port-Louis.

**Basic source of data:**

Annual census of industrial production.

**Major deviations from current version of ISIC:**

Repair services for the general public (part of ISIC major division 9) are included in manufacturing according to the type of product repaired.

**Reference period (if not calendar year):**

**Scope:**

Establishments with 10 or more persons engaged as well as establishments with less than 10 persons engaged but whose production is more than one million rupees.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Wages and salaries includes contributions payable by the employer to insurance and pension schemes. For sugar factories, wages and salaries covers those that are directly attributable to the manufacturing operation, as far as the apportionment of expenses between the plantation and the factory is possible.

Output is defined as the total value of sales and work done for others during the year, adjusted for net changes in stocks of finished goods and work in progress.

Value added is defined as the difference between output and the cost of materials, electricity and industrial services rendered. Valuation of output and value added is in producers' prices. However, excise duties are excluded in the case of wine, beer and matches.

**Related national publications:**

Census of Industrial Production (infrequent), published by the Central Statistical Office, Port Louis.

## MEXICO

**Supplier of information:**

National Institute of Statistics, Geography and Information Technology (INEGI) via the Department of Statistics, Aguascalientes.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (supplement 1992: Mexico), OECD, Paris.

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to achieve the best possible correspondence with the ISIC system. Lack of detail in national data, however, result in several cases where correspondence with the current version of the ISIC cannot be achieved.

**Reference period (if not calendar year):****Scope:**

The survey covers only 129 out of 225 categories in the national industrial classification. The 3,218 establishments that were surveyed in these categories accounted for 72% of the total gross output in manufacturing in the 1985 industrial census.

The indices of industrial production cover all manufacturing establishments.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees covers all permanent and temporary workers who, in the course of the reference year, worked within or outside the establishment, and who were managed or supervised by the establishment.

Wages and salaries covers all wages and salaries that the company has paid to staff during the reference year, as well as money in the form of social security benefits, employers' social security contributions and profit-sharing.

Output refers to total gross output. It is calculated as the total value of goods and services produced by a company, whether they are intermediate goods and services used in the production process or intended for final consumption. This heading includes the value of products made by the establishments using its own raw materials, plus income from assembly services, maintenance and other industrial services, rental and leases, technology transfer, other non-industrial services, sale of electric power produced by the establishment, changes in stocks of work in progress, and the value of fixed assets produced by the establishment for its own use.

Value added is obtained by subtracting the value of inputs (goods and services for intermediate consumption) from total gross output.

Gross fixed capital formation includes purchase of new and used fixed assets, fixed assets produced for own use, major improvements, repairs and renovations carried out by third parties on fixed assets belonging to the establishment. VAT is not included.

**Related national publications:**

Estadística Industrial Mensual, published by the Dirección General de Estadística, Secretaría de Programación y Presupuesto, Mexico, D.F.

## MOROCCO

**Supplier of information:**

Direction de la statistique, Secretariat d'Etat au plan et au developpement régional, Premier ministre, Rabat.

**Basic source of data:**

Survey of industrial structure, conducted by the Direction de la statistique in collaboration with two research institutions.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments with 10 or more employees.

**Method of enumeration:**

Establishments with 50 or more employees are covered on a complete enumeration basis, establishments with 10-49 employees are covered by sampling.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries refers to compensation of employees.

**Related national publications:**

Rapports sur l'enquête de structure sur l'industrie, published by the Direction de la statistique, Secretariat d'Etat au plan et au developpement régional, Premier ministre, Rabat.

h/ 385 includes office machines (ISIC 3826)

## MOZAMBIQUE

**Supplier of information:**

Direcção Nacional de Estatística, Maputo.

**Basic source of data:**

Annual inquiries undertaken by government agencies: for peeling and whitening of rice, the Cereals Institute of Mozambique and, for other industrial activities and saltern operations, the Direcção Nacional de Estatística, Maputo.

The data for 1989 are taken from the national publication 'Informação Estatística 1989', issued by the Comissão Nacional do Plano, Direcção Nacional de Estatística and are not found to be comparable with data for the previous years.

**Major deviations from current version of ISIC:**

The following activities are not included in manufacturing: poultry slaughtering, copra drying, tailoring, dressmaking, upholstering, manufacture of underclothes and embroidering.

**Reference period (if not calendar year):****Scope:**

All registered establishments.

**Method of enumeration:**

Questionnaires distributed by mail.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of establishments refers to those in operation on 31 December.

Number of persons engaged relates to 31 December of the year indicated.

Output and value added refer to gross output and total value added, respectively.

**Related national publications:**

Estatística Industriais (annual), published by the Direcção Nacional de Estatística, Maputo.

## NEPAL

**Supplier of information:**

Central Bureau of Statistics, National Planning Commission, Kathmandu.

**Basic source of data:**

For 1986 and 1991 Census of Manufacturing Establishments. For 1987 to 1990 Annual Survey of Manufacturing Establishments.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

Fiscal year beginning 15 July of the year indicated.

**Scope:**

In general establishments with 10 or more persons engaged. The 1991 census data is based on a complete and revised enumeration of manufacturing establishments.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees refers to employment on 15 January. It includes contract workers.

Wages and salaries refers to the compensation of employees, including contributions to insurance, old age benefits, etc.

Output refers to census output and is not adjusted for the cost of goods sold without further processing.

Value added refers to census value added.

**Related national publications:**

Census of Manufacturing Establishments; Annual Survey of Manufacturing Establishments; both published by the Central Bureau of Statistics, Kathmandu.

## NETHERLANDS

**Supplier of information:**

Netherlands Central Bureau of Statistics, Voorburg.  
Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual survey of production and fixed capital formation.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Through 1986, units employing 20 or more persons. Beginning 1987, units employing 10 or more persons.

**Method of enumeration:**

Units with 10 to 20 employees are surveyed on a sample basis, units with 20 or more employees are completely enumerated.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of employees refers to the total number of full-time and part-time employees on 30 September. It includes salaried employees, wage earners and homeworkers.

Wages and salaries paid to employees includes employers' contributions to social security schemes and pension funds, regular and overtime cash payments, bonuses and cost-of-living allowances, vacation pay, taxes and social insurance contributions payable by employees and deducted by employers, payments in kind and allowances. Sick leave pay is not included.

Output refers to gross output and includes production of all products, net change of work in progress, work done on own account, services rendered (including non-industrial services), goods shipped in the same condition as received, electricity sold, fixed assets produced for own use, net changes in stocks of finished goods, and goods made by homeworkers and handicraft workers.

Value added, which uses the national accounts concept, is gross output less the value of consumption (including costs of, and receipts for, non-industrial services). The cost of materials, fuels and other supplies, contract and commission work done by others, repair and maintenance work done by others, goods shipped in the same condition as received and electricity purchased are all deducted. Input estimates are on a received basis, adjusted for stock changes.

Gross fixed capital formation is defined, through 1987, as the value of purchases of fixed assets including own-account construction of assets. Beginning 1988, it is defined as the value of the fixed assets that have become available and are ready to use, which results in the inclusion of leased and hired fixed assets. Fixed assets are new and used assets with a productive life of at least one year, plus additions, alterations and improvements to existing assets. Valuation is at full cost incurred, including delivered price, cost of installation and indirect taxes, but excluding fees and VAT. For assets produced by the unit, the cost of work put in progress, including cost of labour, material and other supplies is taken.

**Related national publications:**

Yearly Production Statistics; Yearly Statistics on Fixed Capital Formation in Industry, both published by the Netherlands Central Bureau of Statistics, Voorburg.

## NEW ZEALAND

**Supplier of information:**

Department of Statistics, Wellington.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual enterprise survey and the economy wide census which is carried out every five years.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

Fiscal year beginning 1 April of the year indicated.

**Scope:**

All establishments.

For number of employees, the reference unit is the establishment, for all other variables, it is the accounting unit.

**Method of enumeration:**

Sampling methods are used for some variables.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees is the number of full-time equivalent employees at the end of February of the following year.

Wages and salaries covers all amounts paid to employees, including accident compensation payments.

Output includes a) sales of goods and services produced, including goods shipped in the same condition as received (resales), b) direct government grants and subsidies, excluding those of a capital nature and tax credits/rebates, c) Interest, dividends, royalties, patent fees and insurance claims received, and d) other income, except proceeds from sales of capital assets, exchange gains and extraordinary items.

Value added is the value of output and subsidies received, less the cost of labour and materials used and capital assets used up in producing that output.

Gross fixed capital formation refers to net-paid capital formation.

**Related national publications:**

Census Bulletins (e.g. Manufacturing Series A, B, and C) and Final Report; Annual Enterprise Survey Reports; Annual New Zealand Business Pattern Reports; Economy Wide Census Reports; Monthly Abstract of Statistics, all published by the Department of Statistics, Wellington.

## NORWAY

**Supplier of information:**

Statistisk sentralbyrå (Statistics Norway), Oslo.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual inquiry.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Through 1991 all establishments with 5 or more persons engaged with the exception of a few industrial groups where all establishments are covered, e.g. manufacture of dairy products, margarine, fish oils and fish meal, tobacco products, petroleum refining and manufacture of oil and gas well machinery and tools. Beginning 1992 establishments with 10 or more persons engaged are covered.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees is calculated as the average number of employees throughout the year, whether full- or part-time; homeworkers are not included.

Wages and salaries includes regular and overtime payments, bonuses, cost-of-living allowances, vacation and sick leave pay, allowances (e.g., travelling, clothing expenses) and payments in kind. Beginning 1992, wages and salaries includes supplements, through 1991 supplements are excluded. Supplements are social expenses levied by law.

Output refers to gross output and is valued in producers' prices, excluding all subsidies, and including all indirect taxes but VAT. Included is the value of all products, work done on own account, services rendered, fixed assets produced for own use, waste products and goods produced by homeworkers. Net changes in work in progress and stocks are allowed for.

Value added refers to census value added. The cost of materials, fuels and other supplies, contract and commission work done by others, repair and maintenance work done by others and electricity purchased are deducted from gross output. Cost of non-industrial services and receipts for non-industrial services are included. Input estimates are made on a consumed basis.

Gross fixed capital formation is the value of purchases of fixed assets plus own-account construction, less the value of sales. Fixed assets covered are those with a productive life of at least one year, and include new and used assets, those made by a unit's labour force for its own use, and additions, alterations and improvements to existing assets. Valuation is at full cost incurred, including the delivered price, the cost of installation, and the investment levy. Assets produced by the unit cover the cost of labour, materials and other supplies. The actual amount realized is taken for sales of used assets.

**Related national publications:**

Industristatistikk (annual), published by Statistics Norway, Oslo.

## PAKISTAN

**Supplier of information:**

Federal Bureau of Statistics, Statistics Division, Islamabad.

**Basic source of data:**

Census of manufacturing industries, jointly carried out by the Federal Bureau of Statistics, the provincial Directorates of Industries and Mineral Development and the Provincial Bureau of Statistics.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

Fiscal year ending 30 June of the year indicated.

**Scope:**

All factories with 5 or more persons engaged.

**Method of enumeration:**

Questionnaires distributed by mail with follow-up site visits as required.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of employees refers to average daily employment, including persons employed through labour contractors.

Wages and salaries includes amounts paid to labour contractors.

Output is not adjusted for the cost of purchases of goods for resale without further processing.

The measure used for output and value added is the census concept.

**Related national publications:**

Census of Manufacturing Industries Report, Federal Bureau of Statistics, Islamabad.

## PANAMA

**Supplier of information:**

Dirección de Estadística y Censo, Contraloría General de la República, Panama.

**Basic source of data:**

Survey of manufacturing industries.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments with 5 or more persons engaged.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of persons engaged refers to the average number of employees on the last days of February, May, August and November of the reference year, plus the number of working proprietors, unpaid family and other workers reported for 31 August.

Output is not adjusted for purchases of goods for resale without further processing.

**Related national publications:**

Estadística Panameña: Situación Económica, Industria (Encuesta) (annual), published by the Dirección de Estadística y Censo, Panama.

## PARAGUAY

**Supplier of information:**

Banco Central del Paraguay, Asunción.

**Basic source of data:**

Census of establishments affiliated with the Industrial Association.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All establishments registered in the Industrial Association of Paraguay.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

No. Data cover 321 of 600 registered establishments.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

Censo de Empresas Asociadas a la Unión Industrial, published by the Banco Central del Paraguay, Asunción.

## PERU

**Supplier of information:**

Instituto Nacional de Estadística, Lima.

The indices of industrial production are compiled by the Ministerio de Industria, Turismo e Integración.

**Basic source of data:**

Survey of manufacturing industries.

**Major deviations from current version of ISIC:**

The following industries are omitted from the scope of manufacturing: canning, preserving and processing of fish and crustacea; extraction of fish and other marine animal oils; production of fish meal.

**Reference period (if not calendar year):****Scope:**

Establishments with 5 or more persons engaged.

Estimates of output and value added are derived from national accounts calculations and cover all establishments, including handicrafts.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of establishments refers to those operating during the whole or part of the year.

Wages and salaries relates to payments in cash and kind during the year, excluding bonuses.

Value added represents the contribution of each branch of industry to gross domestic product.

**Related national publications:**

Cuentas Nacionales del Peru, published by the Instituto Nacional de Estadística, Lima.

## PHILIPPINES

**Supplier of information:**

National Statistics Office, Manila.

The indices of industrial production are compiled by the Central Bank of the Philippines, Manila.

**Basic source of data:**

Annual survey and census every five years.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Except for 1987, all data refer to establishments with 10 and more persons engaged. For 1987 data include establishments with average monthly sales or receipts of not less than one million pesos.

**Method of enumeration:**

Establishments with 20 or more workers are completely enumerated; smaller establishments on a sampling basis.

**Adjusted for non-response:**

Yes

**Concepts and definitions of variables:**

Wages and salaries includes severance pay.

Output and value added refer to census output and census value added, respectively.

**Related national publications:**

Annual Survey of Manufactures, published by the National Statistics Office, Manila. Statistical Bulletin (quarterly), published by the Central Bank of the Philippines, Manila.

## POLAND

**Supplier of information:**

Central Statistical Office, Warsaw.

**Basic source of data:**

Annual statistical reports of enterprises of socialized industry.

Socialized industry comprises industrial enterprises (state-owned, co-operative and of social organizations), industrial establishments of non-industrial co-operatives (consumer and horticulture) and budgetary units.

**Major deviations from current version of ISIC:**

None reported

**Reference period (if not calendar year):****Scope:**

Prior to 1991 the data for number of enterprises cover socialized and non-socialized industries, while all other variables relate to the socialized industry only. Beginning 1991 the data cover all enterprises employing 50 or more persons.

**Method of enumeration:**

Data are compiled according to the enterprise and self-financing establishment method.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of establishments refers to 31 December of the year indicated.

Number of employees represents the annual average. For part-time employees figures have been converted to full-time equivalents.

Wages and salaries is computed by UNIDO from reported wages and salaries per employee.

Gross fixed capital formation includes outlays on non-productive investment (training of staff), outlays on capital repairs are excluded. The value of sales of fixed assets is not deducted.

**Related national publications:**

Rocznik Statystyczny Przemysłu (Statistical Yearbook of Industry); Rocznik Statystyczny (Statistical Yearbook); Concise Statistical Yearbook of Poland, all published by the Central Statistical Office, Warsaw.

b/ Enterprises with 50 or more persons engaged

## PORTUGAL

**Supplier of information:**

National Statistical Institute, Lisbon.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual survey of manufacturing industries.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Not reported.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees covers all persons working, on vacation or sick leave, or on strike during the last week of the year.

Output is gross output, defined as the total value of finished goods produced (intermediate goods sold as such are considered as finished products), plus the value of fixed assets produced for own use, industrial work done for others, electricity sold, waste products sold to third persons, less the value of work in progress at the beginning of the year.

Value added is gross output, plus the value of work done in the capacity of sub-contractor, less the value of materials, lubricants and energy consumed, hiring of machinery and contract work done by others, the value of industrial, repair and maintenance work done by others and non-industrial services received, and the value of duties paid for utilisation of manufacturing processes.

**Related national publications:**

Industrial Statistics (Volume I and Volume II), published by the National Statistical Institute, Lisbon.

d/ 361 includes 362 and 369.

## PUERTO RICO

**Supplier of information:**

Puerto Rico Planning Board, Puerto Rico

**Basic source of data:**

Census of manufacturing industries.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

**Scope:**

All establishments with at least one paid employee and operating during a specified week of March.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees refers to persons who worked or received pay for all or any part of the pay period which includes 12 March of the year indicated.

Value added refers to total value added, which is the same as the contribution to gross domestic product.

**Related national publications:**

Census of Manufacturing Industries of Puerto Rico (annual), published by the Puerto Rico Department of Labour and Resources, Puerto Rico.

## QATAR

**Supplier of information:**

Central Statistical Organization (CSO), Qatar.

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Not reported.

**Method of enumeration:**

Establishments with 20 or more employees are completely enumerated.  
Sampling is used for the smaller establishments.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

Industrial Survey, 1987, published by the Central Statistical Organization, Qatar.

## REPUBLIC OF KOREA

**Supplier of information:**

National Bureau of Statistics, Economic Planning Board, Seoul.  
The indices of industrial production are compiled by the Bank of Korea, Seoul.

**Basic source of data:**

Annual survey and the Census of Mining and Manufacturing.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC.

**Reference period (if not calendar year):****Scope:**

Establishments with 5 or more persons engaged with the following exceptions: (a) establishments under construction as of 31 December of the reference year; (b) establishments operated directly by the Government Armed Forces and allied forces; (c) workshops operated by public occupation guidance centres; (d) experimental stations or laboratories attached to public organizations and schools. With respect to production indices: all establishments with 5 or more persons engaged.

**Method of enumeration:**

During census years all establishments with 5 persons or more engaged are completely enumerated.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of employees is the average over the year. Homeworkers are included.

Wages and salaries includes payments to homeworkers.

Output does not include goods bought and resold without further processing.

Gross fixed capital formation relates to the cost of new and used fixed assets acquired.

**Related national publications:**

Report on Industrial Survey (Census), Vol I and II (annual); Korea Statistical Yearbook, both published by the National Bureau of Statistics, Economic Planning Board, Seoul. Economic Statistics Yearbook; Monthly Economic Statistics, both published by the Bank of Korea, Seoul.

## REPUBLIC OF MOLDOVA

**Supplier of information:**

State Department of Statistics of the Republic of Moldova, Chisinau.

**Basic source of data:**

Not reported.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Self-sustained establishments.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

## ROMANIA

**Supplier of information:**

National Commission for Statistics, Bucharest.

**Basic source of data:**

Statistical reports on industrial production.

**Major deviations from current version of ISIC:**

The concepts, definitions and classification by branches of industry are in keeping with the prevailing national methodology for the period 1986-1990. Beginning 1991 they are according to the standards of the new National Activities Classification.

**Reference period (if not calendar year):****Scope:**

The data cover about 80% of enterprises and of industrial production.  
Prior to 1991, the data cover only state enterprises under the direction of the central government.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries is computed by UNIDO from reported wages and salaries per employee.

**Related national publications:**

Anuarul Statistic al Romaniei, published by the National Commission for Statistics, Bucharest.

## RUSSIAN FEDERATION

**Supplier of information:**

Russian Federation State Committee on Statistics, Moscow.

**Basic source of data:**

Not reported.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All enterprises having independent financial accounts.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

## SAUDI ARABIA

**Supplier of information:**

Saudi Arabian Government.

**Basic source of data:**

Industrial Statistics Bulletin.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

**Scope:**

All licensed and producing factories.

**Method of enumeration:**

The inquiry is based on a complete enumeration.

**Adjusted for non-response:**

Response rate = 100 per cent.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

Industrial Statistics Bulletin.

## SENEGAL

**Supplier of information:**

Direction de la statistique, Ministère de l'économie et des finances, Dakar.

**Basic source of data:**

Survey of industrial activities.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to achieve the best possible correspondence with the current version of the ISIC. Lack of detail in national data, however, results in several cases where correspondence with the ISIC cannot be achieved.

It should be noted that the data for food products (ISIC 311/2) excludes the processing of fish.

**Reference period (if not calendar year):****Scope:**

All establishments excluding handicrafts.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees and number of persons engaged cover regular and seasonal workers.

Output represents the total value of turnover adjusted for changes in the value of stocks of finished goods and work in progress.

Value added is the balance remaining from output after deduction of the value of purchases of goods and services, adjusted for the net change in stocks of inputs.

**Related national publications:**

Comptes économiques (annual) published by the Direction de la statistique, Ministère de l'économie et des finances, Dakar.

## SINGAPORE

**Supplier of information:**

Research and Statistics Unit, Economic Development Board, Singapore.

**Basic source of data:**

Annual census of industrial production.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC.

**Reference period (if not calendar year):**

Establishments with financial years ending on or before 31 March are allowed to report on a financial year basis.

**Scope:**

All establishments in the private sector with 10 or more persons engaged.

**Method of enumeration:**

The census is primarily conducted by mail.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Persons engaged is the number reported during the pay period nearest to 30 June of the reference year.

Wages and salaries includes employers' contributions to the provident fund, pensions and other funds.

Output relates to the total value of all commodities produced and industrial services rendered to others. In cases where proper records of production are not available, the value of output is calculated from the value of sales after adjusting for changes in stocks during the year. Output does not take into account goods sold without further processing.

**Related national publications:**

Report on the Census of Industrial Production (annual), published by the Economic Development Board, Singapore. Yearbook of Statistics, Singapore, published by the Department of Statistics, Singapore.

## SLOVENIA

**Supplier of information:**

National Statistical Office, Ljubljana.

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

All registered establishments.

**Method of enumeration:**

Individual site visits by enumerators.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

## Slovenia

## SOUTH AFRICA

**Supplier of information:**

Central Statistical Service, Pretoria.

**Basic source of data:**

Monthly surveys and periodic censuses.

**Major deviations from current version of ISIC:**

Manufacture mainly for consumption on premises, grain mills and sawmills operated by farmers for and at their own convenience, and custom milling by retail stores are excluded from manufacturing activity.

**Reference period (if not calendar year):****Scope:**

All private manufacturing establishments.

For the number of establishments and wages and salaries, some government establishments are included.

**Method of enumeration:**

Monthly surveys are conducted on a sample basis.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees is the number on the last day of June.

Wages and salaries includes some employer's contributions to some pension, holiday and medical aid funds. Unemployment insurance, workmen's compensation and payments in kind are excluded.

Output is the value of goods manufactured and work done.

Value added relates to the contribution of each branch of industry to gross domestic product.

Gross fixed capital formation is derived from national accounts calculations.

**Related national publications:**

South African Statistics (biennially); Bulletin of Statistics (quarterly), both published by the Central Statistical Service, Pretoria.

## SPAIN

**Supplier of information:**

Instituto Nacional de Estadística, Ministerio de Economía y Hacienda (Spanish National Institute of Statistics), Madrid.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual statistical inquiry.

**Major deviations from current version of ISIC:**

ISIC 321 includes design of models and patterns and other services related to the clothing industry: Mattresses (part of ISIC 332) are included in ISIC 321; ISIC 322 does not include belts, straps and other accessories made of leather and similar materials, except leather gloves: Umbrellas, sunshades, fans and canes (part of ISIC 390) are included in ISIC 322: Orthopaedic footwear (part of ISIC 385) is included in ISIC 324: Wooden venetian blinds (part of ISIC 332) are included in ISIC 331: Synthetic glycerin, synthetic tanning materials, auxiliary chemicals for the textile, leather and rubber industries, products derived from natural waxes and wood tar and other chemicals derived from wood (part of ISIC 351) are included in ISIC 352: Bituminous products, and residual products and by-products derived from petroleum refining (part of ISIC 354) are included in ISIC 353: Mica and asbestos products and other non-metallic mineral products (part of ISIC 369) are included in ISIC 354: ISIC 372 does not include the units for which the main activity is the extraction and processing of uranium poor in U235, thorium and its alloys: Extinguishers and sprayers (part of ISIC 390) and munitions for light arms (part of ISIC 352) are included in ISIC 382: ISIC 390 includes photographic studios and exclude the manufacture of metal signs and panels.

**Reference period (if not calendar year):****Scope:**

All units employing five or more persons.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

**Number of employees** is calculated as the mean of the number on four dates during the survey (in March, June, October, December) and includes both paid and unpaid staff and office staff as well as operatives.

**Wages and salaries** paid to employees comprises gross salary, wages and payments in kind to the paid staff, excluding employer's social security contributions.

**Output** follows the Spanish definition of gross output, this being the aggregate total of: a) the output of goods and services for sale, including payments received for services and work performed by others and the value of electricity sold; b) goods resold in the same condition as received; c) payments for services rendered (rental of machines, technical assistance, etc.); d) products and work in progress; e) capital formation for own account (fixed assets produced for own use and the value of major repairs and improvements to own capital assets using own resources).

**Value added** is calculated as the difference between the value of gross output and intermediate consumption in purchaser prices. Intermediate consumption includes the cost of a) raw materials and consumables; b) energy consumed for power and heating, steam, electricity, gas, etc., c) purchases of industrial and non-industrial services; and d) goods purchased for resale in the same condition as received.

**Gross fixed capital formation** is calculated by subtracting the value of sales of own fixed assets from the value of purchases of new and used fixed assets, major repairs and improvements to fixed assets performed by others, construction of assets for own account and major repairs and improvements to fixed assets carried out using own materials and labour.

**Related national publications:**

Encuesta Industrial (annual), published by the Instituto Nacional de Estadística, Madrid.

## SRI LANKA

**Supplier of information:**

Department of Census and Statistics, Colombo.

**Basic source of data:**

Annual Survey of Industries.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments with five or more persons engaged.

**Method of enumeration:**

Questionnaires distributed by mail with follow-up site visits as required.

**Adjusted for non-response:**

No

**Concepts and definitions of variables:**

Output refers to census output. The data are not adjusted for the cost of purchases of goods for resale without further processing.

Gross fixed capital formation refers to capital expenditure.

**Related national publications:**

Annual Survey of Industries - 1989 (Report 1), published by the Department of Census and Statistics, Colombo.

## SURINAME

**Supplier of information:**

Algemeen bureau voor de statistiek, Paramaribo.

**Basic source of data:**

Quarterly industrial survey.

**Major deviations from current version of ISIC:**

Manufacturing data are available only for selected industries.

**Reference period (if not calendar year):****Scope:**

All industrial establishments.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

## SWAZILAND

**Supplier of information:**

Central Statistical Office, Mbabane.

**Basic source of data:**

Annual industrial census.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments with 10 or more persons engaged and establishments with less than 10 persons engaged whose structure and accounting practices allow them to complete the questionnaire without difficulty.

**Method of enumeration:**

Questionnaires distributed by mail with follow-up site visits as required.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Wages and salaries includes employers' contribution to pension and other social insurance schemes.

Output refers to gross output and value added to total value added.

**Related national publications:**

Census of Industrial Production (annual); Annual Statistical Bulletin, both published by the Central Statistical Office, Mbabane.

## SWEDEN

**Supplier of information:**

Statistiska Centralbyran (Statistics Sweden), Stockholm.  
Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual manufacturing inquiry.

**Major deviations from current version of ISIC:**

Until 1988, ISIC 342 (printing and publishing) did not include publishing, since this activity was not included in the annual inquiry. From 1989, this activity is included.

**Reference period (if not calendar year):****Scope:**

Through 1990, all establishments employing five or more persons were covered, and estimates were made for units not covered by the survey. From 1991, the survey covers those manufacturing establishments (with five or more persons) of manufacturing enterprises that employ ten or more persons and those manufacturing establishments of non-manufacturing enterprises that have ten or more employees.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Both the number of persons engaged and the number of employees are computed using the average number of wage earners throughout the year plus the number of salaried employees at a certain date. Persons engaged include working proprietors, active business partners, self-employed persons, salaried employees and wage earners. All full- and part-time employees are included, as well as clerical workers and supervisory personnel performing functions closely related to the production process.

Wages and salaries paid to employees includes regular and overtime cash payments, bonuses and cost-of-living allowances, vacation and sick leave pay, taxes and those social insurance contributions that are payable by employees and deducted by employers and payments in kind. Social security costs are not included.

Output is in factor values. Certain food subsidies are not included. The value of all products, net change of work in progress, services rendered and products and goods made by homeworkers are included. Until 1990, value added, in factor values, was calculated as the value of output less the cost of materials, fuels and other supplies, contract and commission work done by others and electricity purchased, excluding the cost of, and receipts for, non-industrial services. Since 1991, it has been calculated as output less total costs except wages and salaries (including social costs). Input estimates are on a consumed basis.

**Related national publications:**

Official Statistics of Sweden, published by Statistics Sweden.

## SWITZERLAND

**Supplier of information:**

Office fédéral de la statistique (OFS), Berne.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual survey of manufacturing.

**Major deviations from current version of ISIC:**

Data have been converted from the national classification system to the current version of the ISIC. However, the following should be noted: (a) ISIC 3213 (knitting mills) is included in ISIC 322-324 (wearing apparel, leather and footwear) combined; (b) ISIC 33 (wood products and furniture) includes ISIC 39 (other manufacturing) except ISIC 3901 (jewellery); (c) ISIC 36 (non-metallic mineral products) includes ISIC 2 (mining and quarrying); (d) ISIC 37 (basic metal industries) includes ISIC 3813 (structural metal products); (e) ISIC 382 (non-electrical machinery) includes ISIC 384 (transport equipment) and ISIC 3851 (professional equipment); (f) ISIC 383 (electrical machinery) includes ISIC 3852 (photographic and optical goods); (g) ISIC 3853 (watches and clocks) includes ISIC 3901 (jewellery).

**Reference period (if not calendar year):****Scope:**

All establishments.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of persons engaged refers to the average number throughout the year. It includes working proprietors, active business partners, unpaid family workers, salaried employees, wage-earners, and full- and part-time employees.

Output is production measured in producers' prices. It refers to the value of all products.

Value added, also in producers' prices, uses the national accounting concept of value added.

**Related national publications:**

## SYRIAN ARAB REPUBLIC

**Supplier of information:**

Central Bureau of Statistics, Office of the Prime Minister, Damascus.

**Basic source of data:**

Annual survey of industrial establishments.

**Major deviations from current version of ISIC:**

Manufacturing estimates include repair services for the general public (part of ISIC major division 9).

**Reference period (if not calendar year):****Scope:**

The data cover all establishments in the public sector and establishments with 10 or more persons engaged in the private sector. However, the directory of establishments used in the annual industrial survey has not been brought up to date and consequently does not strictly reflect the situation of existing establishments.

**Method of enumeration:**

Individual site visits by enumerators

Establishments with 10 or more persons engaged are completely enumerated, while those with fewer than 10 persons engaged are covered on a sample basis.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Value added refers to the net domestic product.

**Related national publications:**

Statistical Abstract (annual), published by the Central Bureau of Statistics, Office of the Prime Minister, Damascus.

## THAILAND

**Supplier of information:**

National Statistical Office, Bangkok.

**Basic source of data:**

Annual survey.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC.

**Reference period (if not calendar year):****Scope:**

All establishments with 10 and more persons engaged.

**Method of enumeration:**

Questionnaires distributed by mail with follow-up site visits as required.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of employees is the number reported as of 31 December or the last pay period of the year indicated.

Output is census output and is not adjusted for the cost of goods sold without further processing. Output includes the net change in stocks of raw materials, fuels and supplies.

Value added is census value added.

**Related national publications:**

Report of the Industrial Survey (annual), published by the National Statistical Office, Bangkok.

## THE FORMER YUGOSLAV REPUBLIC OF MACEDONIA

**Supplier of information:**

Statistical Office of the Former Yugoslav Republic of Macedonia, Skopje.

**Basic source of data:**

Annual report on industrial activity.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):**

**Scope:**

Not reported.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries represents the compensation of employees.

Value added refers to social product and is calculated as the difference between the value of the production, including turnover tax, and material expenditure.

**Related national publications:**

## TONGA

**Supplier of information:**

Statistics Department, Nuku'alofa.

**Basic source of data:**

Quarterly Survey of Industrial Production, Employment and Wages and Salaries.

**Major deviations from current version of ISIC:**

The data are available only by broad groupings of industries corresponding to the current version of the ISIC.

**Reference period (if not calendar year):****Scope:**

All registered manufacturing establishments.

**Method of enumeration:**

Individual site visits by government enumerators.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees refers to the average of two pay periods nearest to 30 June and 31 December of the year indicated.

Output and value added are at producers' prices, although there are neither indirect taxes nor subsidies in Tonga.

**Related national publications:**

## TRINIDAD AND TOBAGO

**Supplier of information:**

Central Statistical Office, Port-of-Spain.

**Basic source of data:**

Annual survey of establishments

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC.

**Reference period (if not calendar year):**

The reference period is basically the calendar year, but data reported for the financial year is accepted and is incorporated into the calendar year in which the major part of the financial year falls.

**Scope:**

For industries dominated by one or two establishments, the survey covers all activity; for those with several establishments, the coverage accounts for about 70 per cent of employment.

**Method of enumeration:**

Questionnaires distributed by mail with follow-up site visits as required.  
Some questionnaires are hand delivered.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of establishments refers to both producing and distributing units.

Number of employees relates to the last week in November of the reference year.

Wages and salaries includes employers' contributions to pension funds.

**Related national publications:**

Quarterly Economic Report; Annual Statistical Digest; Business Surveys (annual), all published by the Central Statistical Office, Port-of-Spain.

## TURKEY

**Supplier of information:**

State Institute of Statistics, Ankara.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual manufacturing survey.

**Major deviations from current version of ISIC:**

National classification scheme follows the current version of the ISIC.

**Reference period (if not calendar year):****Scope:**

All manufacturing establishments in the public sector and manufacturing establishments with 25 or more persons engaged in the private sector. These establishments cover approximately 85 per cent of output.

**Method of enumeration:**

Complete enumeration.

**Adjusted for non-response:**

Yes

**Concepts and definitions of variables:**

**Establishment** is a work-place where single ownership or controlling status is established and generally where one type of economic activity occurs and which has the register and accounting sources necessary to fill in the questionnaires.

**Number of employees** is calculated as the average of the number of production workers and other employees in February, May, August and November. Apprentices are included. Homeworkers are excluded. **Number of persons engaged** relates to the number of employees plus the number of active owners, partners and unpaid family workers active in November.

**Wages and salaries** relates to gross payments made for work done, including bonuses, social security and pension fund premiums and payments in kind.

**Output**, calculated on a shipment basis, covers the value of goods and electricity produced, receipts for services rendered to others, fixed assets produced for own use, sales of goods purchased and resold without further processing, and of miscellaneous receipts. Valuation includes excise and production taxes and any charges for delivery performed by the establishment.

**Value added** is output less the costs of materials and supplies in production (adjusted for the net change in the value of their stocks), products bought and resold without further processing, and payments for industrial work done by others.

**Gross fixed capital formation** represents the value of acquisitions of new and used fixed assets (including produced for own use). Fixed assets are those with an expected productive life of one year or more. Costs of major repairs and other expenditures on fixed assets are included. Sales are not generally deducted.

## UGANDA

**Supplier of information:**

Statistics Division, Ministry of Planning and Economic Development, Entebbe.

**Basic source of data:**

Annual survey of industrial production.

**Major deviations from current version of ISIC:**

The national classification is not strictly comparable with the current version of the ISIC. For this reason, some activities are only shown in total manufacturing.

**Reference period (if not calendar year):****Scope:**

The survey covers registered establishments with an average of 10 or more employees engaged in industrial production. The survey excludes government departments and East African Community departments engaged in industrial production, except the Printing Department in Entebbe.

**Method of enumeration:**

Questionnaires distributed by mail with follow-up site visits as required.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

Survey of Industrial Production (annual), published by the Statistics Division, Ministry of Planning and Economic Development, Entebbe.

## UKRAINE

**Supplier of information:**

Ministry of Statistics of the Ukraine, Kiev.

**Basic source of data:**

Annual statistical reports of enterprises.

**Major deviations from current version of ISIC:**

The data are based on the national classification scheme.

**Reference period (if not calendar year):**

**Scope:**

All enterprises.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries is computed by UNIDO from reported wages and salaries per employee.

**Related national publications:**

## UNITED KINGDOM

**Supplier of information:**

Department of Trade and Industry, London.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

**Basic source of data:**

Annual census of production.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments employing 20 or more persons

**Method of enumeration:**

A sampling scheme established in the 1980 census was repeated from 1981 to 1983, and from 1985 to 1987. In these years forms were despatched to all establishments employing 100 persons or more and, in general, to samples of 1 in 2 of those employing 50 to 99, as well as 1 in 4 of those employing 20 to 49. 1984 was a benchmark census and forms were despatched to all establishments with 20 or more employed except for those in the 20 to 49 employment size band located in England, where, in general, a sample of 1 in 2 was taken. The statistical unit is the establishment.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Wages and salaries includes all overtime payments, bonuses, commissions, holiday pay and redundancy payments less any amounts reimbursed from government sources. No deduction is made for income tax, insurance, contributory pensions, etc. Payments in kind, travelling expenses, lodging allowances, etc. are excluded.

Output relates to gross output and is calculated by adjusting the value of total sales, work done and services rendered, by the net changes during the year of work in progress and stocks of finished goods. Total sales represents deliveries on sale of goods produced by establishments and includes sales of goods made from materials given out by them to other organizations or to outworkers. The value of sales is the amount charged to customers. Where products attract excise duty, the value is inclusive of duty if goods are sold "duty-paid", and exclusive of duty if goods are sold in bond or exported. Sales of fixed assets are excluded.

Value added represents gross value added in factor values and is defined as the value of gross output less the cost of purchases of materials for use in production and packaging, fuels, goods for merchandising or factoring and the cost of industrial and non-industrial services received. The value of purchases is adjusted for changes in stocks of materials, stores and fuel.

Gross fixed capital formation is the value of purchases of fixed assets less the value of sales of such assets. Valuation is at full cost incurred, including the cost of installation and certain fees and taxes (namely legal fees, stamp duty, agents' commissions, etc.), and is inclusive of any amounts received or expected to be received in grants and/or allowances from government sources, statutory bodies or local authorities. The value of capital goods produced for own use are included. The value of any assets acquired in taking over an existing business are excluded. The figures include non-deductible VAT but exclude deductible VAT.

## UNITED STATES OF AMERICA

### Supplier of information:

The Bureau of the Census, Department of Commerce, Washington, D.C. Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

### Basic source of data:

Census of Manufactures (every five years) and Annual Survey of Manufactures.

### Major deviations from current version of ISIC:

The following are excluded from the national concept of manufacturing: (a) small-scale processing activities carried out as a secondary activity in agriculture; (b) custom work to the individual order of household consumers; (c) some repair activities and repair shops of railroads; (d) production of coke for own use by public utility companies; (e) manufacturing by retail establishments selling most of their products on their premises to household consumers; (f) manufacturing by construction contractors at the site.

### Reference period (if not calendar year):

### Scope:

All manufacturing establishments with at least one employee.

### Method of enumeration:

The Census of Manufactures is carried out for years ending in 2 and 7. The annual survey takes a sample of around 55 000 establishments, representing a coverage of about two-thirds of total manufacturing employment.

### Adjusted for non-response:

Yes

### Concepts and definitions of variables:

Number of employees refers to all full- and part-time employees on the payrolls of operating establishments. An average of four quarterly observations (taken on 12 March, May, August and November) is taken for production workers (operatives) and combined with the figure for all other employees that is taken on 12 March.

Wages and salaries covers gross earnings, including wages, salaries and employers' contributions to pension funds and social security schemes. Regular and overtime cash payments, bonuses and cost of living allowances are included, as are vacation and sick leave pay, taxes and social insurance contributions payable by employees and deducted by employers, payments in kind and allowances. Also included are payments for health insurance, life insurance, pension plans and stock purchase plans. Wages and salaries are based upon the remuneration minus supplemental labour costs.

Output is measured as deliveries in terms of shipments, fob, adjusted for change in inventory for work-in-process and finished goods. Goods shipped include goods produced in the establishments, those shipped in the same condition as received, and receipts for industrial work done on materials owned by others or industrial services rendered to others. The value of goods shipped is in producer prices. In industries where the product is typically delivered, the value of shipments is in delivered prices.

Value added is based on the census concept and is calculated as output less the cost of materials, fuels and other supplies, goods shipped in the same condition as received, contract and commission work done by others, and electricity purchased. Input estimates are on a consumed basis. Valuation is the same as for output.

Gross fixed capital formation relates to the value of new plant and equipment purchased and constructed by the unit's own labour force for its own use. Used plant and equipment purchases are excluded. Fixed assets are defined as those with a productive life of more than one year. The valuation of new fixed capital formation is at full cost and includes the value of additions, alterations, improvements and repairs to existing assets (if capitalized). Purchased new assets are at delivered prices and include the cost of installation but exclude fees and taxes.

### Related national publications:

Census of Manufactures; Annual Survey of Manufactures, both published by the Bureau of the Census, Department of Commerce, Washington, D.C.

a/ 323 includes leather gloves  
c/ 369 includes 361

b/ 390 includes dressing and dyeing of furs, mortician's goods, matches and candles  
d/ 382 includes electrical measuring instruments

## URUGUAY

**Supplier of information:**

Dirección General de Estadísticas y Censos, Secretaría de Planeamiento, Coordinación y Difusión, Montevideo.

The index numbers of industrial production are compiled by the Departamento de Investigaciones Economicas del Banco Central del Uruguay.

**Basic source of data:**

Annual survey of the manufacturing industry.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments with 5 or more persons engaged.

The index numbers of industrial production cover, in principle, all industrial establishments with a gross value of output of more than 20,000 pesos in 1956.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Value added is net of non-industrial costs.

**Related national publications:**

Encuesta Anual de Producción, Sector Industrial (annual), published by the Dirección General de Estadísticas y Censos, Secretaría de Planeamiento, Coordinación y Difusión, Montevideo.

## VENEZUELA

**Supplier of information:**

Oficina Central de Estadística e Informática (OCEI), Presidencia de la República, Caracas.  
The index numbers of industrial production are compiled by the Banco Central de Venezuela.

**Basic source of data:**

Annual industrial survey.

**Major deviations from current version of ISIC:**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments with 5 or more persons engaged.

**Method of enumeration:**

Individual site visits by enumerators. Establishments with more than 50 persons engaged are completely enumerated; sampling is used for the smaller establishments.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Both output and value added exclude goods bought and resold without further processing.

**Related national publications:**

Anuario Estadístico; Encuesta Industrial (annual), both published by the Oficina Central de Estadística e Informática (OCEI), Presidencia de la República, Caracas.

## ZIMBABWE

**Supplier of information:**

Central Statistical Office, Harare.

**Basic source of data:**

Annual census of production.

**Major deviations from current version of ISIC:**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with the current version of the ISIC. It should be noted that: footwear made of vulcanized or moulded rubber, (part of ISIC 355) and footwear made of plastic (part of ISIC 356) have been included in ISIC 324.

**Reference period (if not calendar year):**

Fiscal year beginning 1 April of the year indicated.

**Scope:**

All public and private establishments engaged in manufacturing. Establishments with an annual output of less than 2,000 dollars and establishments mainly in the nature of "self-employed", such as dressmakers, tailors, cabinet makers etc. are not included.

**Method of enumeration:**

Questionnaires distributed by mail with follow-up site visits as required.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees relates to the annual average number of persons on the payroll, including working proprietors and family members if they are paid a definite wage or salary.

Wages and salaries includes employers' contributions to pension, medical aid or similar schemes.

Output refers to census output and is not adjusted for the cost of purchases of goods for resale without further processing.

Gross fixed capital formation includes progress payments for fixed assets on order.

**Related national publications:**

The Census of Production (annual); Monthly Digest of Statistics, both published by the Central Statistical Office, Harare.
