PREFACE

The United Nations Industrial Development Organization (UNIDO) promotes the use of industrial information in developing countries by giving guidance in improving local information facilities. As one of the means of promotion UNIDO compiles directories and guides to selected information sources on branches of industry of primary concern to developing countries. The present guide, dealing with industrial training is the thirty-seventh guide in the series of *UNIDO Guides to Information Sources* (UNIDO/LIB/SER.D). A list of the guides published to date appears at the end of this guide; more are planned for the series.

The directories and guides are not intended to be exhaustive, nor are they intended to be research tools; rather, they present sources considered to be of practical value to users. The data have been compiled so as to facilitate rapid access to the bodies referred to and the acquisition of the publications listed.

Industrial training ranks high in the efforts to increase the share of the developing countries to 25 per cent of total world industrial production by the year 2000 set down by the Lima Declaration and Plan of Action on Industrial Development and Co-operation.

UNIDO has deployed a considerable effort in industrial training. It has organized industrial training field operations, fellowship training and study tours for more than 5,000 engineers and other personnel, and many seminars, workshops and conferences. These activities have produced a rich documentation and full reference is made to it here.

This guide deals only with industrial training as such. Information on training in specific industries is included in UNIDO guides on the subjects. Since UNIDO is concerned with the training of engineers and other personnel at the management level already employed in industry and related institutions, only information on industrial training at this level is given. For information on industrial training at the vocational or undergraduate level the reader is referred to "Bibliographical sources used in compiling the present guide", following the last section.

Although entries are world-wide in coverage, priority has been given to information sources in the developing countries themselves.

EXPLANATORY NOTES

The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries.

Publications listed in this guide have been selected mainly from literature in the official languages of the United Nations; when appropriate, publications in other languages have also been included.

The names of organizations and publications are given in their original languages, wherever available; for those listed in languages other than the official languages of the United Nations, a translation of the title into English is included.

Where available, the date and the number of pages of the most recent known edition are given as well as the address of the issuing organization or publisher. In the case of United Nations sales publications the year of publication is indicated as part of the sales number.

Requests for non-sales items that are issued by the United Nations and related bodies should be made direct to the issuing bodies. Sales publications should be ordered by sales number from an authorized distributor or from:

PREFACE

Pour faciliter la diffusion et l'exploitation de l'information industrielle dans les pays en développement, l'Organisation des Nations Unies pour le développement industriel (ONUDI) aide ces pays à améliorer leurs moyens d'information, notamment en établissant des répertoires et des guides des principales sources d'information sur les secteurs industriels qui présentent pour eux un intérêt majeur. Le présent guide, qui concerne la formation industrielle, est le trente-septième de la série des *Guides des sources d'information* (UNIDO/LIB/SER.D). On trouvera en fin de volume la liste des guides déjà parus. D'autres doivent suivre.

Les ouvrages de cette série ne prétendent pas être exhaustifs; ce ne sont pas non plus des instruments de recherche, mais de simples guides des sources d'information considérées comme présentant un intérêt pratique pour les utilisateurs. Les données sont présentées de manière à permettre à ceux-ci de se mettre rapidement en rapport avec les sources d'information mentionnées et d'obtenir les publications auxquelles ils s'intéressent.

La formation industrielle joue un rôle de tout premier plan dans les efforts déployés pour porter la part des pays en développement à 25 % de la production industrielle mondiale d'ici à l'an 2000, conformément à la Déclaration et au Plan d'action de Lima concernant le développement et la coopération industriels.

L'ONUDI est très active dans le domaine de la formation industrielle. Elle a déjà réuni des stages de formation hors siège, octroyé des bourses et mis sur pied des voyages d'étude pour plus de 5 000 ingénieurs et techniciens, organisé une formation en groupe dans l'entreprise pour quelque 3 000 ingénieurs, cadres et autres responsables d'entreprises et convoqué de nombreux séminaires, journées d'étude et conférences. Ces efforts ont permis d'établir une abondante documentation, à laquelle il est fait référence dans les pages qui suivent.

Le présent guide ne traite que de la formation industrielle en général. Pour ce qui est de la formation dans les divers secteurs de l'industrie, on est prié de se reporter aux guides de l'ONUDI concernant ces secteurs. L'Organisation s'occupe de la formation d'ingénieurs et de cadres déjà en poste dans l'industrie et les institutions connexes, cet ouvrage donne seulement des renseignements sur la formation industrielle à ce niveau. Les lecteurs désireux de se renseigner sur la formation scolaire ou universitaire professionnelle sont invités à consulter la section du présent guide intitulée "Bibliographical sources used in compiling the present guide", qui suit le dernier chapitre.

Le présent guide s'étend aux sources d'information de tous les pays, mais la priorité y est donnée à celles que l'on trouve dans les pays en développement eux-mêmes.

NOTES EXPLICATIVES

Les appellations employées dans cette publication et la présentation des données qui y figurent n'impliquent de la part du Secrétariat de l'Organisation des Nations Unies aucune prise de position quant au statut juridique des pays, territoires, villes ou zones, ou de leurs autorités, ni quant au tracé de leurs frontières ou limites.

Les publications énumérées dans le présent volume sont pour la plupart rédigées dans les langues officielles de l'Organisation des Nations Unies; toutefois, certains documents publiés dans d'autres langues ont aussi été mentionnés.

Les noms des organisations et les titres des publications sont donnés le plus souvent possible dans la langue originale; les noms des organisations et les titres des publications libellés dans les langues autres que les langues officielles de l'Organisation des Nations Unies ont été traduits en anglais.

Nous avons, aussi souvent qu'il était possible, précisé la date et le nombre de pages de l'édition la plus récente ainsi que l'adresse de l'éditeur ou de l'organisation qui a publié le document. Lorsqu'il s'agit de documents de l'Organisation des Nations Unies, l'année de publication est indiquée avec le numéro de vente.

Les documents de l'Organisation des Nations Unies et des organismes qui lui sont rattachés qui ne portent pas de numéro de vente doivent être demandés directement à l'organisation qui les a publiés. Ceux qui portent un numéro de vente peuvent être commandés à un distributeur autorisé ou à l'une des adresses suivantes, en mentionnant le numéro :

ПРЕДИСЛОВИЕ

Организация Объединенных Наций по промышленному развитию (ЮНИДО) содействует использованию промышленной информации в развивающихся странах, направляя деятельность по улучшению местных информационных центров. В качестве одного из направлений этой деятельности ЮНИДО составляет пособия и справочники по отдельным источникам информации по отраслям промышленности, имеющим первостепенное значение для развивающихся стран. Настоящий справочник по вопросам подготовки кадров в области промышленности является тридцать седьмым справочником серии *Справочники ЮНИДО по источникам информации* (UNIDO LIB SER. D). Перечень опубликованных до настоящего времени справочников содержится в конце настоящего справочника; в будущем планируется дополнять эту серию новыми публикациями.

Пособия и справочники не претендуют на исчерпывающий характер, как не претендуют они и на использование их в качестве средств проведения исследований; они служат скорее источниками, представляющими практическую ценность для пользователей. Данные составлялись таким образом, чтобы облегчить поиск соответствующих материалов и приобрести перечисленные публикации.

Подготовка промышленных кадров занимает важное место в усилиях развивающихся стран, направленных на увеличение доли развивающихся стран в общем промышленном производстве до 25% к 2000 году в соответствии с целью, поставленной в Лимской декларации и Плане действий по промышленному развитию и сотрудничеству.

ЮНИДО развернула широкую деятельность в области промышленной подготовки кадров. Она организовала промышленную подготовку кадров на местах, подготовку стипендиатов и организацию учебно-ознакомительных поездок более чем для 5000 инженеров и специалистов-технологов, групповую подготовку кадров на предприятиях примерно для 3000 главных инженеров, руководителей и других должностных лиц и провела много семинаров, коллоквиумов и конференций. В результате этого был получен богатый документальный материал, полная библиография которого приводится в настоящем справочнике.

Справочник касается только вопросов подготовки промышленных кадров в целом. Информация же о подготовке кадров в отдельных отраслях промышленности содержится в справочниках ЮНИДО по конкретным отраслям. Поскольку ЮНИДО занимается главным образом подготовкой инженеров и других кадров управленческого уровня, уже работающих в промышленности и в связанных с нею учреждениях, справочник содержит только информацию о подготовке промышленных кадров на этом уровне. За информацией о подготовке промышленных кадров на начальных уровнях читатель может обратиться к «Библиографическим источникам, использовавшимся при составлении настоящего справочника», прилагаемым в конце последнего раздела.

Хотя указанная информация охватывает соответствующие учреждения во всем мире, в первую очередь указываются информационные источники, имеющиеся в самих развивающихся странах.

ПОЯСНИТЕЛЬНЫЕ ЗАМЕЧАНИЯ

Обозначения и изложение материала в настоящей публикации ни в коей мере не являются выражением точки зрения Секретариата Организации Объединенных Наций относительно правового статуса какой-либо страны, территории, города или области или их властей, а также относительно прохождения их границ или пределов.

Перечисленные в настоящем руководстве публикации в основном являются образцами из литературы, изданной на официальных языках Организации Объединенных Наций; в соответствующих случаях были включены также публикации, изданные на других языках.

Названия организаций и публикаций даны на языке оригинала в тех случаях, когда они имелись в наличии; названия, представленные на языках, не являющихся официальными языками Организации Объединенных Наций, включены в перечень в переводе на английский язык.

В зависимости от наличия указаны год издания и количество страниц самого последнего из известных изданий, а также адрес организации, выпускающей публикацию, или издателя. Если публикации Организации Объединенных Наций предназначены для продажи, год издания указывается как часть номера, под которым они продаются.

Заказы на публикации, не предназначенные для продажи, издаваемые Организацией Объединенных Наций и связанными с ней учреждениями, должны направляться непосредственно в учреждения, выпускающие эти публикации. Предназначенные для продажи публикации следует заказывать по соответствующему номеру, под которым они продаются, у должным образом уполномоченных агентов по продаже или заказать в:

PREFACIO

La Organización de las Naciones Unidas para el Desarrollo Industrial (ONUDI) promueve la utilización de información industrial en los países en desarrollo proporcionando orientación para el mejoramiento de los servicios locales de información. Uno de los medios de promoción que emplea la ONUDI consiste en compilar repertorios y guías de fuentes básicas de información sobre ramas de la industria de especial interés para los países en desarrollo. La presente guía, que trata de la capacitación industrial, es la trigésimo séptima de la serie *Guías de Fuentes de Información (UNIDO/LIB/SER.D)* que publica la ONUDI. La lista de las guías publicadas hasta la fecha figura en el anverso de la contratapa de la presente guía; se prevé la publicación de muchas guías más en esta serie.

Estas guías no pretenden ser exhaustivas ni están destinadas a servir de instrumentos de investigación; presentan, más bien, una selección de fuentes que se consideran de valor práctico para los usuarios. Los datos se han recopilado de modo que faciliten el rápido acceso a las entidades mencionadas y la adquisición de las publicaciones que se indican.

La capacitación industrial ocupa un lugar destacado en los esfuerzos por aumentar hasta un 25% para el año 2000 la participación de los países en desarrollo en la producción industrial mundial total, según se estableció en la Declaración y Plan de Acción de Lima en materia de desarrollo industrial y cooperación.

La ONUDI ha desplegado considerables esfuerzos en la esfera de la capacitación industrial. Ha organizado operaciones de capacitación industrial sobre el terreno, capacitación mediante becas y viajes de estudios para más de 5.000 ingenieros y técnicos, capacitación colectiva en el trabajo para unos 3.000 ingenieros, gerentes y otro personal clave, y muchos seminarios, cursos prácticos y conferencias. Estas actividades han producido una abundante documentación, a la cual se hace frecuente referencia en el presente volumen.

La presente guía se ocupa únicamente de la capacitación industrial propiamente dicha. La información sobre capacitación en industrias concretas se incluye en las guías de la ONUDI sobre los temas correspondientes. Como la ONUDI se ocupa de la capacitación de ingenieros y de otro personal de nivel directivo ya empleado en la industria y en instituciones conexas, sólo se facilita información sobre la capacitación industrial a ese nivel. Si se desea información sobre capacitación industrial al nivel de formación profesional o de estudios universitarios, se remite al lector a las fuentes bibliográficas utilizadas para compilar la presente guía ("Bibliographical sources used in compiling the present guide"), que figuran a continuación de la última sección.

Aunque las entradas abarcan todo el mundo, se ha dado prioridad a las fuentes de información de los propios países en desarrollo.

NOTAS EXPLICATIVAS

Las denominaciones empleadas en esta publicación y la forma en que aparecen presentados los datos que contiene no implican, de parte de la Secretaría de las Naciones Unidas, juicio alguno sobre la condición jurídica de ninguno de los países, territorios, ciudades o zonas citados o de sus autoridades, ni respecto de la delimitación de sus fronteras o límites.

Las publicaciones que aquí se indican se han seleccionado principalmente de entre la literatura publicada en los idiomas oficiales de las Naciones Unidas; cuando procede, también se mencionan publicaciones aparecidas en otros idiomas.

Los nombres de las organizaciones y publicaciones aparecen en su idioma original, cuando así constan; cuando se dan en idiomas no reconocidos como oficiales dentro de las Naciones Unidas, se incluye la traducción al inglés del título correspondiente.

Se indican la fecha y el número de páginas de la edición más reciente, así como la dirección de la organización que la publica o de la casa editora, cuando tales datos se conocen. En el número de venta de las publicaciones de las Naciones Unidas destinadas a la venta se indica el año de su publicación.

Los documentos no destinados a la venta, publicados por las Naciones Unidas y organismos conexos, deben pedirse directamente a la organización respectiva. Los pedidos de publicaciones destinadas a la venta han de hacerse, indicando el número de venta, por conducto de distribuidores autorizados, o haciendo un pedido a:
