Governing Bodies

UNIDO has three policymaking organs: the General Conference, the Industrial Development Board and the Programme and Budget Committee.

General Conference

The 171 Member States of UNIDO meet once every two years at the General Conference, the supreme policymaking organ of the Organization. The Conference determines the guiding principles and policies, approves the budget and work programme of UNIDO and appoints the Director-General. It also elects representatives to the Industrial Development Board and the Programme and Budget Committee. The eleventh session of the General Conference took place from 28 November to 2 December 2005.

The twelfth session of the General Conference will take place from 3 to 7 December 2007.

Industrial Development Board

The Industrial Development Board consisting of 53 Members reviews the implementation of the work programme, the regular and operational budgets and makes recommendations to the General Conference on policy matters, including the appointment of the Director-General. The Board meets once in General Conference years, and twice in other years. The thirtieth session of the Industrial Development Board took place from 20 to 23 June 2005.

Board composition as of 2 December 2005

Afghanistan	Guatemala	Russian Federation
Algeria	India	Saudi Arabia
Austria	Indonesia	Senegal
Belgium	Iran (Islamic Republic of)	Slovakia
Bolivia	Ireland	South Africa
Brazil	Italy	Spain
Burkina Faso	Japan	Sri Lanka

Cuba	Netherlands	Turkey
Czech Republic	Nigeria	Ukraine
Egypt	Norway	United Kingdom of Great Britain and Northern Ireland
Ethiopia	Pakistan	Uruguay
France	Paraguay	Zimbabwe
Germany	Poland	
Ghana	Republic of Korea	
Greece		

Programme and Budget Committee

The Programme and Budget Committee consisting of 27 Members is a subsidiary organ of the Board, which meets once a year, and assists the Board in the preparation and examination of the work programme, the budget and other financial matters. The twenty-first session of the Programme and Budget Committee took place from 10 to 12 May 2005.

Committee composition as of 2 December 2005

Algeria	Greece	Republic of Korea
Austria	Guatemala	Russian Federation

France	Peru	
Germany	Poland	

UNIDO at a glance

- **Mission:** UNIDO focuses its efforts on relieving poverty by fostering productivity growth. It helps developing countries and countries with economies in transition in their fight against marginalization in today's globalized world. It mobilizes knowledge, skills, information and technology to promote productive employment, a competitive economy and a sound environment.
- The primary **objective** of the Organization is the promotion and acceleration of industrial development in the developing countries and countries with economies in transition.
- UNIDO was established in 1966 and became a **specialized agency** of the United Nations in 1985.
- UNIDO currently has **171 Member States**.

Policy milestones

- The **Business Plan on the Future Role and Functions of UNIDO**, which was adopted by the Industrial Development Board (IDB.17/Dec.2) and endorsed by the seventh session of the General Conference in 1997 (GC.7/Res.1), continues to provide the basis for UNIDO's organizational and programmatic transformation. It grouped the Organization's activities into two areas of concentration: strengthening industrial capacities, and cleaner and sustainable industrial development. To that end, the Business Plan required UNIDO to undertake both technical cooperation and global forum activities.
- Recognizing the need for UNIDO to adapt its functions and priorities and orient its activities to the new realities and requirements of the changing global economic environment, the **Strategic Guidelines "Towards improved UNIDO programme delivery"** were adopted by the Industrial Development Board at its twenty-sixth session in 2002 (IDB.26/Dec.7). The Guidelines were conceived as an important contribution to the efforts to make UNIDO a more efficient and effective organization; they seek to further sharpen the focus of UNIDO's technical cooperation activities.
- UNIDO responded to the Guidelines by formulating a comprehensive and coherent **corporate strategy "Developing industry: productivity enhancement for social advance"**, which rests on the premise that productivity enhancement, driven by improved skills, increased knowledge and upgraded technology, plays a crucial role in promoting faster growth. The corporate strategy was introduced to the twenty-seventh session of the Industrial Development Board in 2003 and the tenth session of the General Conference took note of this new approach with interest (GC.10/Res.2 and GC.10/14).

- In line with resolution GC.10/Res.2, the Director-General submitted a draft strategic long-term vision statement to the twenty-ninth session of the Industrial Development Board (9-11 November 2004). After consultations with Member States, a revised draft was adopted by the eleventh session of the General Conference (GC.11/Res.4). The **strategic long-term vision statement 2005-2015** sets out a flexible and forward-looking vision for the future of UNIDO with a focus on the three areas of its comparative advantage: poverty alleviation through productive capacities, trade capacity-building, and environment and energy.

UNIDO around the world

- UNIDO maintained its field network of **20 country offices and 9 regional offices** in 2005. In the context of the implementation of the **Cooperation Agreement with UNDP**, signed in September 2004, 12 UNIDO Desks became operational in 2005. UNIDO thus substantially increased its field presence in 2005.
- UNIDO promotes investment and technology flows to developing countries and countries with economies in transition through a worldwide network of **14 Investment and Technology Promotion Offices (ITPOs)** and **5 Investment Promotion Units (IPUs)**.
- UNIDO has a number of other offices worldwide: there are **32 National Cleaner Production Centres (NCPCs)**, established by UNIDO and the United Nations Environment Programme (UNEP), and **9 International Technology Centres** at various stages of development that work closely with the ITPOs.
- UNIDO maintains **Liaison Offices** in New York and Geneva.
- **Staff:** UNIDO employs **647** staff members at Headquarters and other established offices. In addition, UNIDO draws on the services of some 2,854 international and national experts annually who work in project assignments throughout the world. The Director-General of UNIDO, Mr. Carlos Magariños (Argentina), first elected in December 1997 and re-elected for a further four years in 2001, completed his term in office on 7 December 2005. Mr. Kandeh K. Yumkella was appointed Director-General by the eleventh session of the General Conference (28 November-2 December 2005), taking office on 8 December 2005.

Budget and technical cooperation

- **Budget:** The estimated volume of UNIDO operations for the biennium 2004-2005 is **€356 million**.
- The value of UNIDO's ongoing **technical cooperation** programmes and projects totalled **\$441.3 million** as of 31 December 2005.
- In 2005 UNIDO implemented the highest total of **technical cooperation** programmes in the past six years, amounting to **\$112.9 million**. This represented an increase of 64 per cent over the corresponding figure for the year 2000 (\$68.7 million). UNIDO has thus steadily consolidated a growing trend of its technical cooperation services.

Message from the Director-General

The year 2005 can be recorded as one in which the reform efforts of UNIDO bore fruit. The chapters in this report speak for themselves, from the active role of the Organization in the United Nations system, as described in chapter I, to its achievements as measured over a wide range of indicators and summarized in chapter V.

Throughout the United Nations system the effort to reform has become a universal leitmotif. The UNIDO approach to meeting the challenge of measuring its performance can be seen throughout this report, and particularly in chapter V, which also demonstrates the Organization's commitment to results-based management, first introduced in 2004 and developed significantly in 2005.

This report testifies to UNIDO's commitment to improve the lives of people in the countries that it serves. Whether its performance is measured by increased volume, efficiency, effectiveness, the developmental impact of its services, or the increased confidence of the donor community and its strategic partners in a variety of fields, UNIDO is on the right track.

Kandeh K. Yumkella
Director-General

UNIDO in the multilateral setting

As part of the multilateral system of cooperation, UNIDO works closely with all components of the United Nations system in a common endeavour to implement the mandates of Member States. In 2005, the main efforts of the Organization focused on contributing to the comprehensive review of progress reached in implementing the Millennium Declaration at the global, regional and national levels. UNIDO took an active part in the system-wide preparatory process for the 2005 World Summit both at the intergovernmental, i.e. the United Nations General Assembly, and at the inter-agency levels. At the same time, the Organization continued to build and strengthen its partnerships with various organizations of the system to promote synergies and complementary efforts drawing on each other's comparative advantages.

UNIDO provided substantive inputs to the ECOSOC preparatory meeting in March and the special high-level meeting of ECOSOC with the Bretton Woods institutions, UNCTAD and WTO in April, underscoring the important role of productivity enhancement and private sector development for sustained poverty reduction. The visit of ECOSOC President Mr. Munir Akram to UNIDO in May laid the ground for UNIDO's successful participation in the substantive session.

At the ECOSOC High-Level Segment on the theme "Achieving the internationally agreed development goals, including those contained in the Millennium Declaration, as well as implementing the outcomes of the major United Nations conferences and summits: progress made, challenges and opportunities", Mr. Kandeh K. Yumkella, head of the UNIDO delegation, highlighted the contributions of the Organization to achieving the MDGs, particularly in sub-Saharan Africa, as well as its strong commitment to the United Nations reform process.

The participation of UNIDO in the high-level plenary meeting of the United Nations General Assembly in September provided a unique opportunity for the Organization to enhance its visibility, role and positioning in the United Nations system. UNIDO contributed its views on the importance of productivity and industrial development to sustained growth and poverty alleviation. As a result, the Summit Outcome document stressed the need to promote sustained economic growth for poverty eradication and the commitment of Member States "to promoting the development of the productive sectors in developing countries to enable them to participate more effectively in and benefit from the process of globalization"¹—which is at the core of UNIDO's mandate. The Summit Outcome document also contains other important elements directly relevant to UNIDO's programme, including small and medium enterprise development, productive and trade capacity-building, productive employment, investment promotion,

¹ United Nations General Assembly resolution 60/1, "2005 World Summit Outcome", A/RES/60/1, para. 19.

transfer and diffusion of technologies, rural and agro-based development, cleaner production and energy efficiency.

Overall, the 2005 Summit Outcome reaffirmed the relevance and importance of UNIDO's mandate and gave renewed impetus to the work of the Organization.

At the inter-agency level, UNIDO took a significant step towards enhancing its role in the United Nations System Chief Executives Board for Coordination (CEB) and its High-Level Committee on Programmes (HLCP). Advocating the need for a stronger emphasis on economic development and a corresponding strengthening of coordination among the relevant United Nations entities as an essential condition for concrete progress towards achieving the MDGs, UNIDO received the full support of CEB and HLCP to pursue work in this area in cooperation with interested organizations of the system.

UNIDO presented a proposal, "Enhancing the contribution of the United Nations system in the field of economic development to achieve the MDGs" which aimed at bringing together the various organizations of the system working in the field of economic development through a common framework for cooperation. The proposal was geared towards tapping the full potential of the system—through a set of mutually reinforcing actions—to help achieve the MDGs, facilitate a more rational division of work on economic development within the system, encourage further specialization around the core competencies of the relevant organizations, strengthen synergies and enhance the system's collective contribution to economic development.

Within the framework of CEB and HLCP, UNIDO was an active partner in the preparation of the CEB report "One United Nations: catalyst for progress and change", launched as part of a preparatory process for the 2005 World Summit. The report highlights how the Millennium Declaration has brought the system together with a new unity of purpose and reflects the contributions of UNIDO, as part of the system, to achieving the MDGs.

In the context of overall efforts to enhance country-level coordination, UNIDO took part in the work of the United Nations Development Group (UNDG) promoting sector-wide approaches among relevant organizations with special emphasis on the key role of the industrial sector for poverty alleviation and sustainable development. UNIDO was actively engaged in UNDG discussions on issues relevant to the work of the Group, as contained in the report of the Secretary-General "In larger freedom: towards development, security and human rights for all", and on the implications of the High-Level Forum on Joint Progress toward Enhanced Aid Effectiveness, held in Paris in February and March.

UNIDO continued to build and strengthen its partnerships with various organizations of the system to achieve greater synergies and complement each other's core strengths. One such partnership is with the World Trade Organization in the field of technical barriers to trade. As reported in chapter II.D, significant progress has been made in UNIDO-WTO cooperation in this area. UNIDO and UNESCO intensified their dialogue to renew and strengthen their cooperation. A memorandum of cooperation is under preparation with special focus on science and technology for development as a basis for renewed cooperation between the two organizations.

Cooperation with FAO focused on capacity-building in the agro-industrial sector, with ongoing and pipeline projects amounting to more than \$15 million. Another \$15 million worth of joint projects are on the drawing board. Since FAO is the secretariat of several international commodity boards, there is considerable scope for expanding cooperation through projects funded by the Common Fund for Commodities.

In light of their positive experience in working together, complementary mandates and the fact that UNIDO and FAO are the only organizations of the system dealing directly with the productive sector, their executive heads have decided to forge a strategic partnership in order to enhance their contributions to achieving the MDGs. A bilateral consultative group was established to elaborate future working modalities.

Cooperation with UNEP aims at continuing to build national cleaner production capacities in developing countries and transition economies. UNIDO was invited by UNEP to participate in the revitalization of the Environment Management Group, thereby enabling it to become a results-oriented mechanism, which would help the system to craft more coherent, multi-disciplinary approaches and foster coordinated action on specific environment issues.

UNIDO's cooperation with ILO, UNCTAD, UNODC and WHO involved, among others, investment promotion, technology transfer, productive employment, small and medium enterprise development, alternative crops and others.

The year also witnessed intensified implementation of the Cooperation Agreement between UNIDO and UNDP concluded in 2004, as reported in chapter III.H.

Programme development and technical cooperation

UNIDO achieved a record delivery of \$112.9 million in technical cooperation in 2005 (excluding projects financed from Special Resources for Africa). The benefits of three years of business planning resulted in a consistent increase of project implementation. This achievement was largely predicated on efforts made in formulating and submitting sound project proposals, as well as by continuously replenishing the stock of pipeline projects. Thus, sound management of ongoing technical cooperation, balanced by the careful development of a future portfolio, have delivered high operational success.

A. Integrated programmes and country service frameworks

In the course of the year, five integrated programmes (IPs) and country service frameworks (CSFs) entered their second phase. Two new CSFs were approved, bringing the total number of IPs and CSFs to 49, including three for countries in post-crisis situations (Afghanistan, Burundi and Sierra Leone). A total of 20 (41 per cent) were covering countries in sub-Saharan Africa while 21 (43 per cent) of the total number of programmes were covering least developed countries (LDCs).

The total planning figure at the end of 2005 for these UNIDO programmes was \$463 million (excluding programme support costs) of which \$191 million related to programmes in sub-Saharan Africa, and \$175 million to LDCs. At the end of 2005, total funds mobilized for these IPs/CSFs amounted to \$206 million.

The programmes continued to deal with capacity-building and were geared towards increasing competitiveness with an emphasis on SMEs and environmental protection. The five programmes entering their second phase during 2005 and the two new programmes continued to support this thematic direction. While the thematic direction in 2004 in terms of delivery was headed by the projects in the area of poverty reduction through productive activities (PRP), the highest level of delivery in 2005 was related to trade capacity-building (TCB). This was followed by PRP and then energy and environment (EAE).

The integrated programmes and CSFs were under continuous monitoring and review and a series of independent evaluations were carried out covering Colombia, Eritrea, Jordan, Palestine, Tunisia and Viet Nam. The conclusions and recommendations of the evaluation reports continued to provide important inputs for strengthening the programmes and for the preparation of their second phase.

B. Agro-industries and sectoral support

Activities in agro-industries increased significantly, particularly in post-crisis rehabilitation. They had a marked developmental impact, as illustrated by the following examples.

Within the framework of its technical assistance programme on linking relief, rehabilitation and development in the post-conflict area of the Nuba Mountains in Sudan, UNIDO helped rural communities increase their food production and reduce post-harvest losses through the application of agricultural implements, simple hand tools and basic food-processing equipment. A mechanical workshop was established to enhance local capacity for the production and repair of hand tools and agricultural implements. In addition, the manufacturing skills of 80 local blacksmiths were improved through training in proper design methodologies. The project served the needs of some 6,000 rural households.

In Iraq, the promotion of cottage and micro-industries supported job creation efforts in the southern governorates of the country. The baseline assessment was completed for the Thi Qar governorate, with 13 cottage industry subsectors identified on the basis of potential viability and sustainability as well as appropriate location. In addition, 40 trainers from three ministries were trained in business management and food and non-food processing technologies. Two vocational training centres in Al-Qorna and Nassiriyah were rehabilitated and will be equipped with pilot plants for food processing (dairy, dates, and fruit and vegetables), and will house several workshops (metal, wood, textile). This project will contribute to training 1,500 youths and generate small industries in the region.

Through UNIDO's intervention in Iraq's dairy sector, a pool of 20 trainers for good hygiene practices, good manufacturing practices and hazard analysis critical control point (HACCP) for dairy plants and dairy staff was created. During the first two months of activities, 144 dairy workers were trained, with the training sessions still ongoing. A curriculum for education of trainers at the University of Baghdad was developed and will be offered as of next semester.

The demonstration centre for bamboo/rattan skills development established in Timor-Leste became fully operational, with a production capacity of 90 m² of bamboo board of 15 mm thickness in an eight-hour shift day, providing direct employment for as many as 20 persons in the pilot facility as well as indirect employment for more than 200 persons in rural communities.

At the request of the Government of Ethiopia, master and business plans were formulated for the leather and leather products industry (LLPI). Adopted as the country's strategic policy, both documents are intended to assist the sector in accessing the global LLPI value chain and have been under implementation since July.

Activities in the textile sector in Ethiopia led to a 50 per cent reduction in waste and a 25 per cent increase in productivity of the units assisted. In the UEMOA countries, cotton quality testing using high volume instrumentation was introduced.

C. Energy and cleaner production

Activities in the field of energy and cleaner production focused on renewable energy technologies, industrial energy efficiency, cleaner production, international waters and biotechnology.

Within the context of the promotion of modern biomass energy technologies and South-South cooperation in Africa, an expert group meeting was held in Bangalore in December in cooperation with the Indian Institute of Sciences. One of the key outputs was to sensitize policy makers and experts from Africa about the present status and opportunities offered by the biomass gasification technologies that generate electricity for rural areas and process heat for industrial applications using local bio-residues on a sustainable basis.

In the field of industrial energy efficiency, the first 38 industrial plant assessments were conducted for developing capacity in China to implement industrial energy efficiency projects, thereby identifying 40 million kilowatts in annual energy savings. Another project to develop a training package for energy efficiency and renewable energy was launched in Africa, which will become a tool for policy makers and energy regulators to build capacities for improved regulation and the promotion of energy efficiency and renewables.

As regards cleaner production, the Internet-based platform of the UNIDO Latin America and the Caribbean cleaner production (CP) programme was finalized, with the regional structures put in place. Network members shared their experiences in CP and environmentally sound technologies (ESTs), and elaborated joint regional projects.

Projects in CP were launched related to the “closing the loops” concepts. These involve assisting chemical companies to adopt chemical leasing business models, as was done by the CP centres in Egypt, Mexico and the Russian Federation, and by enhancing the transfer of ESTs to companies in the food, tourism and metalworking sectors with the support of the National Cleaner Production Centre in Nicaragua.

In addition, joint CP-corporate social responsibility projects were undertaken with the CP centres in Costa Rica, Croatia and Viet Nam, and UNIDO experts took part in the ISO working group for the new social responsibility standard.

New GEF funding was received, including funds for a preparatory phase for the Gulf of Mexico large marine ecosystem, with a transboundary diagnostic analysis and strategic action programme to be prepared for sustainable use of the Gulf’s resources.

Within the framework of the project on establishment and operation of the International Centre for Hydrogen Energy Technology (ICHET) in Turkey, a major international congress and exhibition were held in Istanbul, which brought together some 1,800 participants from over 60 countries. One of the key strategies was the establishment of 14 pilot and demonstration projects in 2005, mainly with partners in developing countries.

**Bwindi Impenetrable National Park goes online
with UNIDO's rural energy strategy**

UNIDO's initiative on rural energy for productive use and sustainable eco-tourism based on renewable energy has transformed a remote village in the western part of Uganda. Bwindi, 635 km from Kampala, is famous for its Impenetrable National Park, its unique wildlife conservation area for the endangered mountain gorillas. With no electricity in the region, communication with the outside world was practically impossible.

UNIDO chose to electrify this area and add its name to the map of modern communication facilities with a first phase featuring a telecentre powered by solar photovoltaic panels. This model project is implemented by working together with an NGO called CTPH (Conservation Through Public Health) and has a community development centre with ICT/internet connectivity and satellite TV facilities. Computer training, high-speed wireless internet access and internet telephony are available via satellite communication. The first set of graduates from the computer centre were awarded course certificates in October 2005, certified by Makerere University.

In the ongoing second phase, UNIDO aims at commissioning a micro hydropower project of 50 kW to provide electricity to Bwindi National Park, to upgrade the educational and tourist facilities in the area, to provide power to tiny industries that would enhance the traditional handicrafts and income-generating activities as well as supporting the telecentre.

The social and economic impact on the local community has been demonstrated by improving access to information, health and education in rural and remote areas. Moreover, the project has empowered women's groups and generated new opportunities to market both eco-tourism and handicrafts.

In order to assess the prospects of the industrial applications of biotechnology, UNIDO convened an expert group meeting with emphasis on the conversion of biomass to fuel and industrial feedstocks. The meeting identified a number of priorities as well as potential areas for intervention at policy and institutional levels.

D. Investment and technology promotion

Trade capacity-building was strengthened and expanded by providing technical assistance at regional, subregional and national levels, mainly in gaining access to international markets. Individual countries, as well as several regional groupings were assisted in establishing and upgrading their standards institutions, metrology and testing laboratories, and supported in the establishment of internationally recognized accreditation schemes. National capacities in ISO 9001, ISO 14001 and HACCP systems and certification were developed and strengthened. As UNIDO's largest, the UEMOA programme was successfully implemented, and a second phase was prepared to consolidate the results achieved and extend the activities to the remaining ECOWAS countries and Mauritania.

In cooperation with WTO, technical assistance project documents responding to the Doha Development Agenda were prepared for nine pilot countries. In this context, UNIDO and WTO held a side event during the sixth WTO Ministerial Conference in Hong Kong. In addition, UNIDO and WTO jointly launched the Cotton Initiative for African Countries. Close consultations were also initiated with the WTO Working Group on Trade and Transfer of Technology and with WIPO.

Furthermore, UNIDO began implementing the new ISO standard on food safety management systems, ISO 22000, to improve productivity and quality in a number of countries and regions.

In the field of investment promotion, major activities focused on Africa. The third Africa foreign direct investment (FDI) survey was conducted in 15 sub-Saharan countries in order to study the impact of different classes of FDI on their economies.

With regard to investment, an investment fund was established as part of the integrated programme for Ecuador. The investment component of the integrated programme for Cuba, concentrating on the biotechnology sector, generated interest in the United Kingdom, and led to the creation of a fund.

The UNIDO delegation to the ninth China International Fair for Investment and Trade presented 380 African investment opportunities, identified and formulated through UNIDO programmes, to potential Chinese investors.

The fifth Asian business mission, arranged by the Asia-Africa Investment and Technology Promotion Centre, was organized to Mozambique and Uganda.

In technology, UNIDO further promoted technology transfer and diffusion, as well as South-South cooperation through technology upgrading and innovation in selected sectors and industries according to the requirements of the beneficiaries. Thus, UNIDO and the Governments of China and India strengthened South-South cooperation in technology transfer for low-cost housing in Africa, Asia and Latin America. Projects worth \$8.2 million were formulated at the request of Governments and donors for self-financing.

In addition, a technology needs assessment training programme, at interregional level, was held in Senegal and, subsequently, national workshops on technology needs assessment were conducted in Indonesia, Kenya, Philippines and the United Republic of Tanzania. Furthermore, a large-scale project dealing with technology transfer, and management and skill development was initiated for the construction material sector in Palestine with Italian financial support.

In relation to the capacity-building component of technology foresight and road-mapping, four training courses were organized in the Czech Republic, Hungary, Iran (Islamic Republic of) and Turkey, attended by 200 participants from 15 countries. The programme was further strengthened with new material and topics for discussion and will continue in the coming biennium.

In October, the UNIDO-Shenzhen International Technology Promotion Centre for Sustainable Development held a workshop on renewable energy technology and investment. For the first time, the "Blue Sky Award" was presented to the global top ten scenarios to stimulate the investment into the application of new technologies for renewable energy utilization.

E. Multilateral environmental agreements

The Montreal Protocol Unit achieved the target of its core activities of implementing \$35.40 million (including trust funds). Further preparation of projects for the pipeline portfolio and their submission to the Executive Committee (ExCom) of the Multilateral Fund of the Montreal Protocol led to 80 projects becoming operational in 2005. UNIDO received a record approval of \$53.81 million from the Multilateral Fund and \$7.58 million from bilateral funds. Negotiations are underway for additional funding from donors. The considerable amount of consultations held and conceptual work done enabled UNIDO to have \$33.36 million for projects approved at the forty-seventh ExCom alone, putting UNIDO close to the level of the World Bank.

Mexico becomes the first developing country to completely phase out CFC production

In 2003 UNIDO received a grant from the Multilateral Fund for the Implementation of the Montreal Protocol at the request of the Mexican Government to assist in the closure of Cydsa, the largest chlorofluorocarbon (CFC) production plant in Latin America and one of the main CFC exporters in developing countries.

This project, which was the largest in budgetary terms (\$31.8 million) in the history of UNIDO, exemplifies how activities implemented under the Montreal Protocol can have a manifold impact:

Government policy and awareness measures were introduced to reduce consumption of ozone-depleting substances (ODSs), control and regulate their internal and external trade, and compensate the enterprise for profits forgone;

Compensations received by Cydsa served to convert facilities that had been used for CFC production into new ones producing chemicals not banned under the Protocol;

Domestic and export markets were reliably supplied with new refrigerants, which in turn maintained employment in the company;

Mexico complied with its international obligation to completely phase out production and consumption of CFCs by 1 January 2010—more than four years ahead of schedule—in August 2005 and thus became the first developing country to completely phase out the production of CFCs;

The closure has also had a significant impact on tightening the global CFC market and thereby accelerating the reduction of ODSs use all over the world.

This result jointly achieved by UNIDO and the Mexican Government was specifically commended by the Executive Committee of the Multilateral Fund as effectively underpinning the international efforts for protecting the environment.

In the field of persistent organic pollutants (POPs), GEF approved three new projects for UNIDO execution in Africa, China and Romania for a value of \$1.05 million. In addition, UNIDO initiated a global programme for promotion and dissemination of non-combustion technologies for destroying POPs in China, Philippines and Slovakia. The Regional Organization for the Conservation of the Environment of the Red Sea and Gulf of Aden also approached UNIDO for technical assistance in developing a GEF project for the elimination of POPs in the Red Sea and Gulf of Aden in order to promote and facilitate development of an action plan and strategy for the introduction of best available technology and best environmental practices in Egypt, Jordan and Yemen.

UNIDO provided 10 sub-Saharan francophone countries with training, advice and assistance to upgrade their knowledge of the potential of the Clean Development

Mechanism (CDM), to promote foreign direct investment and climate-friendly technologies, to improve their capacity to handle the CDM project cycle and to enhance their ability to identify, develop and prepare industrial CDM projects.

A seminar on the linkage between the Kyoto project-based mechanisms and European Union Emissions Trading Scheme (EU ETS) was held in cooperation with the United Kingdom's Trade and Investment Department and the Government of Hungary. This resulted in a valuable networking and knowledge-sharing opportunity for business, industry, government experts and other stakeholders involved in the implementation of EU ETS.

F. Small and medium enterprises

Private sector development remained a key aspect in UNIDO's efforts to reduce poverty and increase industrial productivity for micro and small enterprises, especially those owned by rural and women entrepreneurs, as well as for growth-oriented small and medium enterprises (SMEs).

Enterprise development—A childhood dream

Mrs. Amina Barbara worked as a maintenance manager in one of the general computer and electrical supplies companies in Jordan. Since her childhood she has had the desire of setting up her own company. In 2004 she conducted preliminary research on business opportunities in Jordan and recognized that there was solid demand for oilseed oil in the local market, and in particular oil made of black cumin, grape seeds and almonds. Ms. Barbara purchased an oil press machine in Germany, quit her job and started to work full-time in her new enterprise employing part-time workers. However, she encountered a variety of problems managing her business, including that of market access.

Then she heard about UNIDO's enterprise development programme and enrolled in it. She attended a one-month training programme learning about various aspects of new enterprise creation, such as management skills, entrepreneurial competencies and the question of how to identify business opportunities and assess market potential. After the training UNIDO assisted her in formulating a strategy for better market access, collecting information on the availability of raw materials through site visits and identifying suppliers of packaging machines. Since then she has been able to overcome a problem of fixing the caps on the bottles, which had previously led to a loss of orders.

The entrepreneur presently sells her products locally through different marketing channels and gets regular orders from retail marketing chains, and herbal and cosmetic shops in Jordan. Mrs. Barbara now plans to enter the European market, in particular Germany and Austria, through her newly-established contacts.

- **Rural and women's entrepreneurship development**

In cooperation with UNHCR, skills development programmes were conducted for 300 refugees in Ghana. Building on their success, a comprehensive small business training programme for 82,000 persons is now planned. In Mozambique and Uganda, UNIDO supported government efforts to develop entrepreneurial culture among youth and to increase the knowledge of 54,000 students about business creation and ownership as a career option. The programme is being expanded and extended to include other countries.

- **SME cluster development and export consortia**

A pilot project to upgrade the competitiveness of five Pakistani clusters created a core group of national cluster development experts, generated interest in the approach in many public and private sector institutions and established national training capacity for cluster development agents. As a result, 25 additional clusters are being upgraded, with more to follow.

The programme on export consortia promotion moved beyond the pilot stage and new projects were introduced in several countries. The first expert group meeting on export consortia was organized with representatives from 15 countries. This was a milestone in creating awareness and demand for export consortia promotion projects worldwide.

- **Business partnerships and corporate social responsibility**

In Nigeria, a UNIDO business partnership programme involving a number of private sector partners helped establish a \$8 million low-cost, motorized three-wheel vehicle plant, which employs 80 persons and is expected to grow into a full-scale production unit. In Croatia, a CSR project built the capacity of the Government to promote CSR among enterprises and developed an enterprise-level training programme to improve company performance while complying with environmental and social standards. This also resulted in plans for CSR resource centres in Indonesia, Nicaragua, Tanzania and other countries.

G. Post-crisis programme

The programme for post-crisis industrial rehabilitation and development in Iraq, initiated during 2003-2004, entered its implementation phase with the receipt of the last tranche of \$4 million allocated by the United Nations Development Group Iraq Trust Fund for UNIDO-executed projects. With receipt of these resources, UNIDO's operational activities for Iraq encompassed three projects worth \$14.97 million for the development of agro- and cottage industries rehabilitation of a dairy plant and rehabilitation of a chlorine production facility for water treatment. Additional projects for entrepreneurship development, rehabilitation of production facilities for medical supplies and products and environment were under development. Project implementation was problematic insofar as UNIDO was constrained by insufficient field-level decentralization of project implementation capacity, compounded by frequent changes in decision-making personnel in counterpart institutions.

A programme of support to post-crisis recovery for Haiti was developed in consultation with the transitional Government, United Nations Resident/Humanitarian Coordinator, the donor community, the Haitian private sector and civil society organizations. It entails support for community-based recovery through the development of cottage and agro-industries and the provision of small-scale rural energy through mini-hydro power, as well as improving the Government's trade facilitation and investment promotion efforts.

In the countries affected by the tsunami, support was provided to the formulation of two projects: a project supporting recovery of coastal fisheries in southern India, as part of an overall United Nations effort, and another project undertaken in cooperation with ILO, offering vocational training to tsunami-affected communities in Indonesia.

A consultative meeting convened to examine the role UNIDO could play in the restoration of water supplies in post-crisis situations concluded that the Organization could support industrial capacities in affected regions by supplying essential chemicals or equipment, as well as by providing organizational support to restoring water supplies and advice on assessment of water purification technologies.

The regional dimension

UNIDO continued to concentrate its activities on strengthening its position as a full participatory member in field-level coordination, so as to ensure a coherent regional approach to the delivery of its services and effective responses to country requirements. The focus of UNIDO's participation in the ongoing United Nations reform process was on the implementation of the Cooperation Agreement with UNDP. Aiming at a more coherent and cost-effective approach to its operations at the country level; the Organization concentrated on the provision of support through an increased contribution to an effective joint programming approach, while at the same time ensuring greater outreach to its Member States.

A. Least developed countries

In its quest to improve the overall relevance and the impact of its services UNIDO has always acknowledged the importance of programmes for LDCs as the priority target of its technical assistance services. In line with the Programme of Action for LDCs, the Organization has been expanding its cooperation with this group of countries with special focus on capacity-building, trade facilitation, international market access and private sector development, with a view to achieving the Millennium Development Goals.

In 2005, the process of better targeting, refocusing and transforming existing integrated programmes (IPs) into "successor" phases allowed for a critical reassessment of many ongoing activities in LDCs and an increase in delivery. At the same time, the prospects for expanded UNIDO activities in LDCs have continued to grow. Thus, of a total of 49 UNIDO IPs and country service frameworks (CSFs), 21 are currently under implementation in LDCs: Afghanistan, Bangladesh, Burkina Faso, Burundi, Djibouti, Eritrea, Ethiopia, Guinea, Lao People's Democratic Republic, Madagascar, Mali, Mozambique, Nepal, Niger, Rwanda, Senegal, Sierra Leone, Sudan, Uganda, United Republic of Tanzania and Yemen. Moreover, projects in Angola, Haiti (post-conflict), Timor-Leste (post-conflict) and Togo were under preparation.

A significant characteristic of UNIDO activities in LDCs is the well-targeted client orientation and response to acute or emerging development problems. Thus, in Sierra Leone, UNIDO initiated a post-conflict SME support programme for industrial development and poverty alleviation. In Bangladesh, a CSF with a budget of more than \$16 million is addressing issues ranging from the introduction of cleaner technologies to improving industrial productivity. In Haiti, UNIDO is planning to assist rural community recovery through the development of micro and small enterprises and to support the formal sector through institutional strengthening. In Malawi, a \$1 million two-year

UNIDO project funded by the United Nations Trust Fund for Human Security was launched in August. It will help households in 17 villages in the Salima District to increase their income and well-being by increasing the productivity and diversity of both agricultural and non-agricultural production. Village grass-roots organizations are closely involved in the implementation of the project in order to ensure its sustainability. At the conclusion of the project, these organizations are expected to have the capacity to expand and develop the local activities further.

Further to UNIDO's traditional approach via IPs and CSFs, another *modus operandi* employed links to a wider application of regional programmes, covering a large number of LDCs—especially in Africa. An illustrative example, and at the same time a notable success story, was the European Union-funded UEMOA quality programme (budget of €10.8 million) executed by UNIDO and completed in December. UNIDO provided specific assistance to national institutions and enterprises involved in the fisheries sector in Benin, Côte d'Ivoire and Togo. It may be noted that the fisheries sector in these countries employs thousands of workers and exports more than 100,000 tons of products to the EU annually. UNIDO assistance improved the quality and safety of exported products in conformity with the sanitary requirements of the market. At the request of UEMOA and the EU, UNIDO is preparing a second phase to consolidate the results achieved in UEMOA countries and extend programme activities to other ECOWAS countries and Mauritania.

Moreover, plans for future cooperation look encouraging: Jointly with UEMOA, UNIDO continued to develop a subregional programme for industrial restructuring and upgrading. This programme will contribute to preparing the UEMOA countries for the introduction of liberalized trade arrangements with the EU starting in 2008. The funding will come from the EU and other donors.

Another noteworthy example of inter-agency cooperation was the joint cotton initiative with WTO for African countries, which constitutes a response to the Doha Development Agenda. The overall objective is to assist African cotton producers to improve their capacities to participate in multilateral trade and in turn contribute to poverty alleviation and the overall objectives of the MDGs. The cooperation initiative aspires specifically to enhance the African cotton producing sector's contribution to economic, employment and export growth. The proposal complements other ongoing initiatives and constitutes a promising area for cooperation between specialized agencies, and international and regional donors. The cotton initiative (total budget of €20 million) was furthermore presented to the WTO fifth cotton consultation meeting in Geneva on 28 October, and in side events on the occasion of the General Conferences of UNIDO and WTO.

At a UNIDO-WTO side event at the sixth Ministerial Meeting in Hong Kong, participants expressed their appreciation and support to the efforts deployed by the organizations striving to overcome the supply-side challenges confronting developing countries in general and LDCs in particular.

With regard to UNIDO cooperation with LDCs in Asia, the Organization implemented a cluster of functionally related activities in market access and trade facilitation in Cambodia, Lao PDR and Nepal—similar to projects carried out in Bangladesh, Bhutan and Maldives—in which UNIDO endeavours to strengthen institutional and national capacities related to standards, metrology, testing and quality.

The General Conference, at its last session, underlined the importance of UNIDO's participation in the comprehensive global review of the implementation of the Brussels Programme of Action for the LDCs. Looking at the future, UNIDO will thus continue to play an active role in the LDC context. This will be put into practice at the LDC ministerial meeting in Benin in 2006, which will be a vital step to further synchronize system-wide activities in the implementation of the Brussels Programme of Action.

Ethiopian leather turns the corner

UNIDO's strategy to address a decline in the export performance of the leather and leather products industry (LLPI) focused on a "top-down (pull)" approach to develop leather products in a way that they would "pull" the tanning sector to increase the quality and quantity of finished leather.

Featuring close cooperation with all stakeholders, a UNIDO-developed master plan identified the approach and defined targets in terms of export earnings, employment generated and investments required. Under the chairmanship of Prime Minister H.E. Meles Zenawi, the National Export Coordination Committee adopted the Master Plan as Ethiopia's strategic framework to develop the LLPI. Moreover, the Committee recommended proceeding with the implementation of a UNIDO-prepared Business Plan, in close cooperation with UNIDO.

Encouraging results achieved to date include:

- Subcontracting arrangements with a major Italian footwear manufacturer and a footwear manufacturer in Addis Ababa. As of December, 100,000 pairs of "Made in Ethiopia" shoes were being sold on the Italian market. The Italian subcontractor has already announced that the volume for export to Italy is expected to increase in 2006.
- A renowned United Kingdom tanning group has relocated its production of high-quality sheep and goatskin finished leather for glove production to Ethiopia for likely export to Asian countries, including Japan. The group has also indicated its intention to open a leather garment factory for the up-market segment.
- Based on present export projections, the Ethiopian Leather Industry Association announced to the Ethiopian News Agency that \$103 million is expected to be secured from the export of leather products during this fiscal year, as opposed to some \$66 million secured during the previous one.

B. Sub-Saharan Africa

Resolution 59/249 adopted by the United Nations General Assembly on 22 December 2004 determined to a considerable extent the pace and dimension of UNIDO activities in Africa in 2005. In full compliance with that resolution, UNIDO continued to strongly support NEPAD industrial strategies and initiatives; a strong regional programme emphasis characterized the implementation of the African Productive Capacity Initiative (APCI); at the regional level the Organization took a proactive approach in supporting sectoral initiatives of African Governments and preparing sectoral plans and road maps for subregions. Underlying all these activities was a strategic orientation to pursue UNIDO technical assistance within a system-wide context and within the framework of reform.

Africa, including African Arab States, accounted for 27 per cent of total UNIDO technical cooperation delivery in 2005 (see chapter VB). The share rises to 43 per cent if multilateral funds, ITPOs and similar institutions, as well as Special Resources for Africa, are excluded.

As in previous years, the bulk of technical cooperation was concentrated in sub-Saharan Africa. Thirty-one IPs/CSFs—including 10 moving into their second phase—were under implementation with total estimated budgets of \$191.4 million. Even though the countries covered in 2005 remained the same (Burkina Faso, Burundi, Cameroon, Côte d'Ivoire, Eritrea, Ethiopia, Ghana, Guinea, Kenya, Madagascar, Mali, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, South Africa, Tanzania, Uganda), a critical reassessment—in some cases also on the basis of independent evaluation—allowed UNIDO to initiate successor programmes or second phases. In 2005 this applied to the CSF for Nigeria and the IP for Madagascar. Implementation of second phases for Burkina Faso, Ethiopia, Ghana, Mali, Mozambique, Senegal, Tanzania and Uganda started or reached mid-point.

Regional perspective

In line with the conceptual framework of NEPAD and the APCI, UNIDO continued to boost the regional approach to its technical cooperation. A total of 37 regional projects were under implementation with a financial outlay of \$16 million. Comprising a wide scope of sectoral and cross-sectoral issues, regional projects served as an efficient tool to support regional integration in Africa as well as to address environmental issues.

In addition to a significant number of projects under implementation, a number of new regional initiatives were introduced. These included:

- Training support for science, technology and innovation policy for industrial development in the SADC subregion;
- Enhancing market access through competitive and comprehensive product design in East Africa;
- Capacity-building and promotion of an affordable approach to rural energy development;
- Adaptation to climate change—understanding risks and building capacity in the industrial sector (Kenya, Tanzania, Uganda);
- Formulation of a regional programme for investment promotion in West Africa;
- Multi-skills training and community service facilities for sustainable livelihoods and poverty alleviation in East Africa;
- Establishment of the observatory of competitiveness in West Africa;
- Establishment of the Regional Environmental Information Management Centre at the University of Lagos;
- Assistance to the repatriation, local integration and resettlement of refugees of the UNHCR settlements in Buduburan and Krisan (Ghana) through micro and small-scale enterprise development;
- Demonstration project for 10 African Francophone countries on the Clean Development Mechanism.

The new impetus for regional cooperation activities was secured through the implementation of the APCI plan. A NEPAD/APCI subregional conference convened in October on improving industrial competitiveness and promoting employment in

COMESA agreed to strengthen UNIDO cooperation with COMESA in identifying regional programmes to ensure effective implementation of the APCI objectives and UNIDO industrial development support to the subregion. Similar subregional conferences for Central Africa and Southern Africa are in the final stages of preparation.

Merging development efforts

Implementation of NEPAD and coordination of system-wide activities in Africa were a major issue during the fifty-ninth session of the United Nations General Assembly. In this context, UNIDO took a proactive position on cooperation and coordination of work, especially with UNDP, the implementation of United Nations global programmes on LDCs, small island developing States and South-South cooperation.

During the course of 2005, programmes for Ethiopia, Ghana and Tanzania were developed as a follow-up to the private sector development (PSD) agreement with UNDP. Other pilot countries selected to launch PSD programmes are Nigeria, Rwanda and Sierra Leone, for which preparations are under way. In March UNIDO and UNDP convened a consultative forum on strengthening competencies for governance and economic management in Ghana. Another successful area of joint activities in Africa was the opening of five UNIDO Desks to ensure support to UNIDO operations in the respective countries and synergy of planning with UNDP.

UNIDO actively participated in the international meeting to review the implementation of the Programme of Action for the Sustainable Development of Small Island Developing States (10-14 January, Mauritius). As an outcome, cooperation with the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States has been strengthened and the UNIDO position for follow-up to the Mauritius Strategy for the further implementation of the Programme of Action enhanced.

In the context of its region-wide planning of development assistance, UNIDO further strengthened its coordination activities with UNECA, particularly in the context of the implementation of NEPAD and APCI initiatives. Continued cooperation with the United Nations Office on Drugs and Crime resulted in a joint letter on collaboration with reference to joint projects in selected countries, including several in Africa. Finally, UNIDO's active inter-agency cooperation in support of LDCs and South-South cooperation is described in chapters III.A and III.G.

UEMOA quality programme

UNIDO's recognized expertise in strengthening standards was put to good use in a programme funded by the European Union for UEMOA. Specific assistance within this large-scale project targeted fisheries in Benin, Côte d'Ivoire and Togo, which employ thousands of workers and export more than 100,000 tonnes annually to the EU.

The project, which was completed in 2005, recorded significant achievements in a range of areas, including:

- The establishment of an internationally recognized regional accreditation secretariat;
- The creation of a laboratory network and database on more than 250 laboratories;
- An enhancement of the testing capability of 46 laboratories;
- Assistance provided to 16 laboratories to obtain accreditation;
- The creation of a trained regional pool of technical laboratory assessors to ISO 17025 standard;
- The establishment of a regional documentation centre for standards;
- The establishment of national documentation centres in 8 countries;
- The harmonization of quality promotion policies in all UEMOA countries;
- The introduction of ISO 9001 and HACCP systems in more than 60 enterprises;
- The establishment of national and regional Quality Award systems;
- The creation of a regional pool of auditors trained and qualified for ISO 9001 standard;
- The establishment of a network of quality associations;
- A strengthening of the capacities of consumer organizations.

Testifying to the programme's success, UEMOA and the EU have requested UNIDO to prepare a second phase to consolidate the results achieved in UEMOA countries and extend activities to other ECOWAS countries and Mauritania.

C. Arab region

UNIDO support to the Arab region continued in the pursuit of integrated and sustainable industrial development while addressing the diverse needs of countries characterized by extremely varied economic and developmental conditions. The various subregions (North African Arab, West Asian Arab, Arab LDC and Gulf Cooperation Council countries) witnessed smooth progress with regard to technical cooperation activities. These include 11 IPs, one CSF, and projects related to international protocols and regional projects.

Major efforts in the West Asian Arab countries (Jordan, Lebanon, Syrian Arab Republic) were deployed towards industrial upgrading and governance, as well as quality and consumer protection, while focusing on the agro-food and textile sectors. Following the evaluation of the IP in Jordan, steps were taken to align components and resources around specific value chains in the agro-food sectors with special attention paid to rural development and poverty reduction. Furthermore, a UNIDO Desk in Jordan became operational.

UNIDO's interventions in the African Arab countries (Algeria, Egypt, Libyan Arab Jamahiriya, Morocco, Tunisia) continued to focus on strengthening productivity and competitiveness. This was done in response to a common priority in the subregion to maximize the opportunities provided by regional trade liberalization in view of the establishment of the Euro-Mediterranean free trade area. UNIDO assistance covered a wide range, including support to institutions in policy, SMEs, and trade capacity-building, traceability and investment promotion.

Significant results were achieved also in terms of poverty alleviation, notably in Morocco where groups of women and SMEs assisted by UNIDO developed new lines of production and commercial linkages with domestic and foreign buyers. The year also saw the establishment of National Cleaner Production Centres in Morocco and Egypt.

In the GCC countries (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia and United Arab Emirates) emphasis was given to facilitating the development of privately-led industrial development by promoting governance, technology diffusion, business development services, quality management and continuous improvement. During the implementation of the IP in Saudi Arabia, the close interaction of major public stakeholders led to a consensus on a long-term vision for enhancing industrial competitiveness and diversification.

In special development situations, such as in Iraq, UNIDO's activities involved the coordination with other United Nations organizations on industrial rehabilitation and recovery. Some progress has been made despite difficult conditions. UNIDO support to Palestine progressed through the implementation of an IP largely focusing on industrial upgrading and entrepreneurial training.

In the Arab LDCs, considerable progress was made in Sudan and Yemen where UNIDO's programmatic accent is on creating economically viable communities by promoting community-based sources of sustainable livelihoods. Priority was given to improving the productive capacities of selected agro-industries in rural communities and utilizing renewable energy sources for productive use. In Sudan, through a project funded by the United Nations Trust Fund for Human Security, UNIDO succeeded in eradicating extreme poverty in terms of food security in 83 villages in the Nuba Mountain region. Another significant new project relates to the establishment of a vocational training centre in Malakal. In Djibouti, new funding opportunities and strategic partnerships were explored to implement the IP promoting private investment and sectoral strategies in the fight against poverty.

Fostering cooperation throughout the Arab region was an important goal in UNIDO's strategy. The NEPAD Secretariat and UNIDO thus called for a subregional conference on improving industrial competitiveness and employment creation in North Africa at Tunis in September. Attended by more than 70 high-level public and private sector representatives from the six Northern African countries, the conference adopted the Tunis Declaration through which the participants committed themselves to reinforcing regional integration and cooperation along the principle of the APCI. The event was furthermore instrumental in the preparation of national action plans by the North African Arab countries on priority sectors such as textiles and agro-food. These plans are leading to the formulation of a regional road map for Northern Africa that will be presented for validation to the seventeenth meeting of CAMI in 2006.

Another regional initiative was the launch of the consolidation phase of the Arab-Mediterranean Investment Promotion Network. It aims at facilitating investment and technology flows towards the countries of the subregion by promoting business partnerships and technology transfer between European and Arab countries, integrating technical assistance and capacity-building. Operations of this network are sustained by the Investment Promotion Units in Egypt, Jordan, Tunisia and Morocco and their national counterparts.

D. Asia and the Pacific

Overall cooperation with the European Union and multilateral agencies deepened during the reporting period, leading to significant co-funding. Environmental aspects played an important role in UNIDO programmes in several countries, particularly in China. The trade capacity-building programme gained further momentum in the region. The following subchapter seeks to provide an overview by subregions.

South Asia: All formalities for the implementation of the EU-funded quality support programme in Bangladesh were completed in early December, which will enable full-scale implementation in 2006. This important example of UNIDO-EU cooperation features the largest budget to date in the region (€7.7 million for UNIDO implementation). In Sri Lanka, the second phase of the IP was approved in October, with its launch slightly postponed owing to the November presidential elections. A donor meeting planned for early 2006 aims at mobilizing funds for phase II activities. Success in private sector development cooperation with the Federation of Indian Chambers of Commerce and Industry and the Indian Department of Industrial Policy and Promotion was featured in a special event during the General Conference to present the approach and implementation progress. UNIDO involvement in needs assessment for the early recovery of the severely affected regions in Pakistan after October's disastrous earthquake will enable the Organization to contribute significantly to that endeavour, for which implementation is to start in 2006. Approval of the EU-financed trade-related technical assistance programme for Pakistan of about €2.3 million helped the quality component of the IP gain significant momentum.

Afghanistan was the focus of significant UNIDO efforts, including the establishment of a UNIDO Desk under the cooperation agreement with UNDP, with which a joint programme on private sector development is also under discussion. Other major initiatives for Afghanistan included the preparation of handicraft training workshops and the formulation of a joint programme on sustainable livelihoods with UNODC.

Phase I of the market access and trade facilitation support project for South Asian LDCs with the South Asian Association for Regional Cooperation, with a total budget of over \$1.1 million, has yielded significant results in terms of strengthened capacity to prepare strategies and structures for improving standards development as well as metrology and certification. A number of donors have indicated strong interest in funding the second phase for some \$1.5 million for the participating LDCs.

South-East Asia and the Pacific Islands: As a result of the Cooperation Agreement signed with UNDP, a UNIDO Desk was established in the Lao People's Democratic Republic. A joint programme on private sector development was also formulated in Lao PDR whereby UNIDO contributed \$200,000 and UNDP \$100,000 as seed money for

immediate implementation. Funds mobilization meetings with potential donors were held for a rural energy programme in Lao PDR. In Cambodia, a situation analysis and needs assessment study was conducted in November with a view to developing an integrated programme. UNIDO also provided seed money for technical cooperation to assist Indonesian recovery and rehabilitation efforts in tsunami-affected and conflict-prone provinces. In the Solomon Islands, a project on entrepreneurship development was implemented with UNIDO resources in the amount of \$75,000. Following a successful first phase, phase II of the Viet Nam IP is being finalized. The regional programme for marine current exploitation technology in China and South-East Asia started implementation in China, Indonesia and the Philippines. A workshop on energy efficiency in Bangkok targeted selected ASEAN countries, while Bangkok and Kuala Lumpur each hosted a technology transfer workshop.

North-East Asia: In February UNIDO published its evaluation of the country service framework on the environmentally sustainable development of China, some recommendations of which were implemented in the course of 2005. An increasingly promising UNIDO instrument for reducing regional and social disparities is the subcontracting and partnership exchange (SPX) programme, which progressed countrywide with focal points. A new SPX was approved for Shanghai and the Yangtze River Delta region (phase I), funded by the Shanghai Industrial Investment (Holdings) Co., Ltd., UNIDO's Chinese counterpart agency. Harbin, the capital of Heilongjiang Province (North-East Dongbei region, with relatively low income levels compared to the South-East) also manifested interest in an SPX, and Chongqing is preparing phase II. The SPX programme thus responds to a top priority of the Chinese Government in economic and social development. In this context the Government included some suggestions of the UNIDO report "Western China: Enhancing Industrial Competitiveness and Employment", published in October, as inputs for parts of China's eleventh five-year plan.

The year also saw the approval and implementation of large-scale projects in the phase-out of methyl bromide in the tobacco sector, which will allow closing down UNIDO operations in this sector in 2006. The persistent organic pollutants (POPs) national implementation plan project of \$4 million made significant progress and will be presented in January 2006. In the Democratic People's Republic of Korea, the IP for strengthening the agro-food industry sector made significant progress, with the launching of a project to establish a goat milk processing unit powered by its own hydropower generator, in Songchon County. A fact-finding mission to Mongolia in December triggered an official request for an integrated programme, which is under preparation. The POPs project to facilitate early action on the implementation of the Stockholm Convention came to an end and the Government of Mongolia expressed an interest in UNIDO's participation in the implementation phase.

E. Europe and NIS

As part of its regional technology foresight (TF) programme, UNIDO implemented training programmes in the Czech Republic, Hungary, Russian Federation and Turkey. Targeting organizers, practitioners, decision-makers and corporate foresight specialists, the programmes provided basic knowledge on the application of TF tools in strategic decision-making for technological development, modalities of implementing TF initiatives, available methodologies, and TF experience and prospects in the region.

To support programme implementation, UNIDO launched a regional Virtual Technology Foresight Centre. Organized as a network of institutions and persons, the Centre will advise on and coordinate technology foresight activities, commission studies, organize training programmes and awareness-raising meetings, collect and transmit information, operate an internet portal and database, and provide services to corporate partners.

Projects to promote cleaner production commenced in Armenia, Serbia and Montenegro and The former Yugoslav Republic of Macedonia. They will contribute to strengthened industrial competitiveness and productivity and to promoting sustained social advancement compatible with environmental protection. The projects will foster the diffusion of environmentally sound technologies, provide national industries with the necessary tools to facilitate accession to national and regional markets with environmentally sound products and improve the ability of national enterprises to successfully negotiate their position in global markets.

The country service framework 2003-2005 for the Russian Federation was nearing completion. It has provided valuable contributions to the sustainable development of food processing, technology development, footwear manufacturing, SME development, cleaner production and regional development.

Also in the Russian Federation, UNIDO initiated the implementation of an EU-financed project to develop methodologies of information and communication technology (ICT) statistics. The project aims at ensuring compliance and comparability with international concepts, definitions and methodologies, introducing modern techniques and tools for the collection of ICT statistics, and assisting businesses, ICT users and other economic stakeholders in using statistics to improve their analytical and decision-making skills.

In cooperation with the Government of Hungary and UK Trade and Investment, UNIDO held a seminar on linking the Kyoto project-based mechanisms with the European Emissions Trading Scheme for participants from new EU member States, EU accession and candidate countries, as well as other countries. The seminar provided a forum for business and industry to advance the understanding and operationalization of emissions trading under the Kyoto Protocol to promote the cost-effective reduction of greenhouse gas emissions.

Following UNIDO's assistance to Romania in preparing its national implementation plan to eliminate POPs in compliance with the Stockholm Convention, UNIDO embarked on a GEF-financed project to dispose polychlorinated biphenyl (PCBs) wastes. The project will help to reduce the human health threat from PCBs and avoid future releases of PCBs in Romania.

In Croatia, UNIDO is implementing a project to introduce the production of biodiesel as a renewable source of energy in order to reduce the consumption of fossil fuels, reduce CO₂ emissions, and increase profitability in the agricultural sector. The project evaluated the feasibility of a biodiesel production plant, provided advice to enable an informative decision on the appropriate production chain and economic model to be adopted.

In Ukraine, UNIDO continued to assist the city of Lviv in environmental management and planning of water infrastructure and sewage facilities. Building upon the results achieved during the first phase, the project currently aims at strengthening the Pipe Development Centre, preparing a master plan for rehabilitation of the city water

infrastructure, and demonstrating new approaches and technologies of water pipe rehabilitation for local industries.

The International Centre for Hydrogen Energy Technologies (ICHET), established in Turkey in 2004 with Turkish contributions expected to reach \$40 million over the planned five-year project period, is currently working on a number of projects focusing on the production of hydrogen as a “clean energy carrier”, including small hydropower in China, solar energy in Libyan Arab Jamahiriya, wind energy in Argentina and biomass in India.

A UNIDO Desk, established at Yerevan, Armenia, in cooperation with UNDP, is currently developing UNIDO technical cooperation projects focusing on several strategic areas.

F. Latin America and the Caribbean

As a consequence of the cooperation agreement with UNDP, UNIDO embarked on a new form of representation in Latin America and the Caribbean with the appointment of three Heads of UNIDO Operations at UNIDO Desks in the UNDP offices of Bolivia, Ecuador and Nicaragua, whose main responsibility is programme development.

Memorandums of understanding were also signed in Argentina with the Ministry of Planning, Public Investment and Services concerning technical cooperation; with the province of Cordoba for the establishment of a cooperation framework for the high technology sector; and with the province of Buenos Aires for the provision of UNIDO consultancy services to be funded under a World Bank loan. A memorandum of understanding signed with the Organization of American States (OAS) covered the establishment of a cooperation framework.

Four integrated programmes were active in the region: Colombia, Cuba, Ecuador and Guatemala. Following an independent evaluation, a bridge programme for the design of the second phase of the Colombian IP was approved with the start of activities scheduled for early 2006.

The second phase of the IP for Cuba was signed and activities commenced. Apart from components addressing entrepreneurship development, energy and agro-industrial concerns, a large-scale component dealing with the management of municipal solid waste in Havana, fully financed by Switzerland, is now under implementation.

In Ecuador, the programme continued with active involvement of and co-funding by the Government. In particular, the trade capacity-building component moved ahead by establishing an industrial studies unit in the counterpart ministry. The first phase was close to completion, with an independent evaluation of the results to date and the subsequent design of a second phase expected in early 2006.

In the IP for Guatemala, the handover to the Government of a complete metrology laboratory marked the end of the first phase. Based on the positive evaluation, it is expected that the second phase will be negotiated in early 2006.

The implementation of POPs enabling activities for the development of national implementation plans in Bolivia was successfully finalized and the follow-up project submitted to the Global Environment Facility secretariat.

Programme formulation missions addressed the precarious situation of Haiti, the only LDC in the region, and concrete technical cooperation activities are expected to commence in 2006.

Programming missions were carried out in Bolivia (fruit processing and renewable energy solutions for the Chapare region), Ecuador (fruit processing) and Paraguay (industrial competitiveness).

Throughout the region the UNIDO Montreal Protocol programme continued to be a major part of the technical cooperation portfolio with new approvals reaching record levels.

G. South-South cooperation

The various chapters of this report testify to a wide range of UNIDO activities that feature elements of South-South cooperation. Examples in 2005 include the regional system for accreditation and certification, standardization and quality, in which North African countries provided experts for UEMOA countries in West Africa. Investment promotion activities also featured South-South cooperation elements, as illustrated by the China International Fair for Investment and Trade, which presented 380 African investment opportunities. Together with China and India, UNIDO strengthened South-South cooperation in technology transfer for low-cost housing in Africa, Asia and Latin America. India also hosted an expert group meeting that sensitized African policy-makers and experts about the status and opportunities offered by biomass gasification technologies.

Underlining the importance ascribed by UNIDO Member States to South-South cooperation, the General Conference at its tenth session recommended “Industrial development, trade and poverty alleviation through South-South cooperation” as a theme for the industrial development forum at its eleventh session. In line with that recommendation, the forum at the eleventh session was convened on that subject.

An issue paper for the forum highlighted key South-South cooperation issues covering industrial trade, technology and investment flows, global trade negotiations and a joint response for poverty reduction. Subsequently, the key determinants were expanded in a more detailed report entitled “Industrial development, trade and poverty alleviation through South-South cooperation” as the background document for the forum.

Deliberations continued in two roundtables featuring presentations from both the public and the private sectors on:

- Promotion of trade through industrial capacity-building; and
- Cooperation in technology transfer.

Reversal of roles: South-North cooperation

An interesting opportunity to transfer know-how and technology from developing to developed countries is in the agricultural technique of sod seeding. Argentina and Brazil are world leaders in the application of this technique, developed to improve the use of natural resources in farming. By minimizing the disruption of the soil's structure and composition, this practice also minimizes erosion and water contamination while maintaining revenue levels for farmers. Within the UNIDO programme for the recovery of the Argentinean industrial sector, a mission of Argentinean agricultural machinery producers presented the advantages that sod seeding may offer in Europe. Interest expressed, for example by the Italian Association of Sustainable Soil Management, indicates that the know-how and technology available from Argentina may play a valuable role in covering a gap in developed countries. More than 200 business meetings held were aimed at agreements to transfer the technical solutions developed by Argentinean companies to European counterparts.

H. Field representation

The new initiative launched in 2004 for expanding the UNIDO field network reached its implementation phase during the early part of 2005. The aim of increasing UNIDO outreach to its constituency and improving cooperation within the system, notably with UNDP, through joint programming initiatives at the field level, was being formalized during the year by the physical establishment of the new UNIDO Desks.

Since its inception, this initiative has been the subject of extensive reporting to the policymaking organs. By the end of 2005, a total of 12 new UNIDO Desks had been established (5 in Africa, 1 in the Arab States, 2 in Asia and the Pacific, 1 in Europe and NIS, and 3 in Latin America and the Caribbean). Towards the end of the year, another 5 UNIDO Desks were in the process of being established and becoming operational. As a result, during 2005, UNIDO increased its physical presence in the field by some 40 per cent and was present through offices and Desks in a total of 42 countries. At the level of joint programming, UNIDO initiated or developed a total of 10 joint programmes in private sector development during the same period. Implementation of the entire initiative, including monitoring, evaluation and necessary adjustment, will continue during the biennium 2006-2007.

Regional Bureau staff at Headquarters and UNIDO Representatives in the field continued to maintain their role as team leaders for integrated programmes and country service frameworks. Facilitating the required degree of coordination and monitoring of programmes and projects implemented in their countries of coverage, the increased authority in the field allowed Member States to additionally benefit from a more coherent implementation approach. Increased financial autonomy, through the operation of imprest accounts, also resulted in additional efficiency of field offices, which in turn provided considerable field-level benefits to the project implementation.

Finally, UNIDO also ensured that nearly all its field offices received an upgrade of their facilities and obtained relevant additional security equipment to achieve the required Minimum Operational Security Standards (MOSS) applicable at their respective locations.

IV

Global forum activities

As a specialized agency of the United Nations, UNIDO has a dual responsibility: (a) To provide technical cooperation services which enhance the industrial productivity and growth and (b) to serve as a global forum for generating and disseminating knowledge about industrial development processes and their implications for productivity and economic growth, and to initiate and conduct debates on such development mechanisms.

UNIDO's global forum activities draw upon in-house and collaborative research as well as its extensive knowledge accumulated through its wide-ranging technical cooperation activities. The objective of UNIDO's research is to address specific priority issues and strengthen the analytical foundations of its technical cooperation programme.

The following sections highlight selected activities with a particular focus on the industrial statistics programme, the research programme for the medium-term programme framework 2004-2007 and other research activities including the production of the Organization's flagship publication, the *Industrial Development Report*, and research partnerships.

A. Industrial statistics

UNIDO has been assigned the sole responsibility in the international statistical community for the compilation, storage and dissemination of structural industrial statistics that are global in scope. In this context UNIDO completed the 2005 round of the annual compilation of key industrial statistics in collaboration with OECD. After improving the international comparability of the data reported by countries and incorporating them in the UNIDO databases, the databases were disseminated worldwide in several forms (appendix P refers). In addition, UNIDO updated its unique database on subsectoral manufacturing value added (MVA) at constant prices, which was to serve as the source for cross-country aggregation of detailed MVA. As part of its inter-agency responsibility for the development and promotion of a standard international methodology and practice for statistical operations, UNIDO, together with the United Nations Statistics Division, played the leading role in preparing the report for the United Nations Statistical Commission's 2006 programme review on industrial statistics and for the development of two new United Nations manuals for structural industrial statistics and industrial production indices. UNIDO also carried out technical cooperation activities in capacity-building for industrial statistics operations in Ghana, Saudi Arabia and Sri Lanka.

As part of UNIDO's statistical work, the UNIDO Scoreboard of Industrial Development, which had been published in previous issues of the *Industrial Development Report*, was modified, updated and disseminated as a CD-ROM. The objective of the Scoreboard is to assess and monitor the competitive industrial performance of various countries and provide an international comparison.

B. Research programme for the medium-term programme framework

Significant research outputs have been produced for all four components of the UNIDO research programme presented to the tenth session of the General Conference in 2003 in the context of the medium-term programme framework for 2004-2007.

Research component 1 is intended to provide a comparative analysis of productivity performance in developing countries. To this end a large-scale research project entitled "Productivity performance in 17 countries" was carried out. From its inception in 2004 until 31 December 2005, this project generated a number of research papers and a comprehensive report. The report, which was presented at a side event of the eleventh session of the General Conference, was entitled "Productivity in developing countries: Trends and policies" and dealt mainly with basic country information. This information was derived from cross-country analysis as well as from 15 country case studies spanning four regions: the Arab countries, Asia, Latin America and sub-Saharan Africa. Working papers produced cover productivity concepts and measurements and write-ups of many empirical results. One of the most noteworthy outputs is the world's largest productivity database, which is being hosted by UNIDO's new comprehensive website for productivity.

Research component 2 is intended to assess the role of technology diffusion in productivity enhancement and in environmentally sound industrial development. In 2005 research activities were focused on the latter aspect. A project which examined the adoption of environmentally-sound technologies (ESTs) in nine developing countries identified firm-specific factors as the predominant determinants. Indeed, factors such as environmental commitment, technological capabilities, profitability and ownership structure matter significantly in explaining the adoption of advanced cleaner technologies. Policies seeking to improve industrial environmental management should therefore target some of these key determinants. A final version of the research report including nine country case studies will be issued in early 2006 as a joint UNIDO-Edward Elgar publication.

Research component 3 deals with policy choices in the new economic order. The ongoing research project "Public goods for economic development" provides modern analytical tools for analysing collective problems arising from market failures in such fields as environmental management, market integration, technology transfer and financial stability, and the policy implications of these challenges at national, regional and international levels. The issues arising from this research were discussed at a UNIDO conference held at Harvard University in September. Background papers of this conference are available on the UNIDO website. The first group of publications in this field include: *Regional innovation systems as public goods*, *Capacity-building to meet international standards as public goods*, and *The role of intellectual property rights in*

technology transfer and economic growth: Theory and evidence. A publication entitled *Public goods for economic development* summarizing all findings and giving highlights of the background papers is under preparation.

Research on assessing how global value chains (GVCs) can contribute best to industrial development has resulted in a great number of research papers with a new sector and issue coverage. A comprehensive volume, *Global value chains and production networks: Prospect for upgrading by developing countries*, is under preparation. The volume will provide a full set of information and policy recommendations regarding the analysis of GVCs and its application to various sectors like agrifood, leather, textiles and clothing, wood, automobiles and electronics. New working papers in the same series such as *GVCs in the agrifood sector* and *Decoding organic standard-setting and regulation in Europe* are under preparation.

Research component 4 is covered by one project to examine and assess the importance of CSR strategies and the related challenges faced by SMEs in their efforts to gain access to new markets, as referred to in D (Harvard University) below.

C. COMPID

Combating Marginalization and Poverty through Industrial Development (COMPID), a three-year research programme with a focus on low-income countries that are marginalized from the benefits of globalization, was successfully concluded.

Initiated as part of UNIDO's response to the challenge of achieving the Millennium Development Goals, the key aim of this Danish-funded research programme was to generate information and knowledge that would contribute to the efficacy and impact of the Organization's activities in low-income countries, both in terms of technical assistance and global forum activities. Accordingly, much emphasis was placed on the programme's third and last phase in which implications for UNIDO were derived from the general research results that had been generated in the first two phases. The findings and implications for UNIDO were presented and reviewed at a consultative meeting in April. The foreseen follow-up will include the application of some of the recommendations in UNIDO's technical cooperation activities, seminars, workshops and further research.

D. Research partnerships

Cooperation arrangements have been established with the following leading research institutions with a view to strengthening the Organization's global forum activities.

Complutense University

UNIDO has established a research cooperation programme with Complutense University in Madrid. The objectives were to focus on the present stock of knowledge in the field of public goods and to identify those that are judged most critical to foster economic development in developing countries but are in short supply, thus affecting the speed and quality of these countries' economic development. The ultimate goal was to contribute concrete proposals and recommendations for policymaking at the local,

national, regional and international levels. At the international level, the special focus was on the role of the multilateral system and UNIDO.

Harvard University

A project in cooperation with Harvard University commenced in September 2004 to examine and assess the importance of corporate social responsibility strategies and the related challenges faced by SMEs in their efforts to gain access to new markets. It will also identify those industrial subsectors in which the adoption of CSR practices by SMEs is likely to result in increasing market shares, stemming from consumer preferences for responsible and sustainable consumption. It will also explore the relationship between CSR, business linkages and innovative types of public-private partnerships. The project is expected to be completed in early 2006.

University of California, Berkeley

A memorandum of understanding between UNIDO and the University of California, Berkeley, was signed in March. The programme of cooperative research included in that MOU will contribute to the UNIDO research programme for the medium-term programme framework, 2004-2007. This cooperation programme will be implemented through research projects undertaken by teams of graduate students and faculty members and through conferences and training programmes on technology-related issues.

The second conference, on “Bridging the Divide”, was organized jointly by UNIDO and the University in April. The conference focused on technology, innovation and learning in developing countries and was also an occasion for graduate students to present the results of their research projects implemented under this cooperation programme.

E. Industrial Development Report

The 2005 issue of the *Industrial Development Report* entitled *Capability-building for catching-up: Historical, empirical and policy dimensions* was released in November and focused on capability-building needs of developing countries in order to catch-up on the economic and technological fronts. A special section assesses lessons learned from catching-up experiences throughout modern history. From these experiences it draws a framework for operational policy analysis as well as a methodology for the assessment of capability-building needs, thus filling a gap in the current understanding of economic development. The report also includes a section on monitoring and assessing global industrial trends following the tradition of previous reports.

F. Second international conference on the process of innovation and learning in dynamic city regions

This conference was organized by UNIDO in cooperation with the national and state Governments of India and Karnataka at Bangalore in July. Over 250 delegates looked at systems of governance in dynamic city regions in China, Costa Rica, India, Indonesia, Mexico, Republic of Korea and South Africa. International case studies based on European Union initiatives were presented as a model for developing countries. Based

on presentations and deliberations at the conference, the Bangalore Declaration was adopted. It emphasizes the role of innovation and learning in the development of dynamic city regions. The Declaration furthermore stresses the importance of “technopreneurs” in the dynamic development of cities and the need to continue to explore the process of transforming technology and innovation “know-how” to “show how” for SMEs and other stakeholders.

G. Joint activities with selected multilateral organizations

UNIDO strengthened its cooperation with selected multilateral organizations focusing on the development of strategies in support of the Millennium Development Goals. Special emphasis was placed on Africa with the promotion of the New Partnership for Africa’s Development (NEPAD) and its industrial component, the African Productive Capacity Initiative (APCI), while giving full attention to innovation, value-addition and competitiveness hubs.

The following institutions entered into partnerships with UNIDO: Centre for Research and International Studies of the University of Montreal International, Common Market for Eastern and Southern Africa, International Labour Organization, Organization of African Employers, United Nations Conference on Trade and Development as well as the United Nations University and the Institute for New Technologies.

V

Performance management

Improved performance, as measured against a wide range of indicators, is a fact in which UNIDO can justifiably take pride. The present chapter presents significant examples and also discusses the Organization's approach to meeting the challenge of measuring and improving the impact of its work in support of client countries.

A. Results-based management

Programme and budgets, 2006-2007

Having gradually introduced results-based management (RBM) as a tool to institutionalize performance improvement over the past two years, a significant development in 2005 was the preparation of the programme and budget proposals following the application of RBM principles and concepts. Solid groundwork had been laid during the senior management retreat exclusively devoted to RBM in December 2004, thus paving the way for the preparation of the programme and budget proposals for the next biennium. To ensure staff understanding of the concepts involved and their application, this exercise adopted a participatory approach and entailed the involvement of outside expertise with extensive experience in introducing results-based budgeting (RBB) in the United Nations system.

Following thorough in-house discussion, comprehensive guidelines were issued, setting the stage for a common, interactive approach in preparing programme and budget proposals. The preparation of the proposals thus represented a major step forward in introducing a new management culture that goes beyond the delivery of activities and focuses on results—an achievement recognized by both the governing bodies and the External Auditor.

Implementing RBM in any organization requires the development of a results-oriented organizational culture. This entails that staff at all levels become familiar with the concepts and terms of RBM, and understand the advantages and implications for their work. With this in mind, efforts continued to further institutionalize RBM into all aspects of work. During the latter part of 2005, and with outside expertise, a series of meetings held at Headquarters discussed with all key players, including senior field staff, further requirements to take forward RBM both at Headquarters and in the field. The results featured a number of specific measures established to ensure the reliability of the RBM approach.

Challenges in 2006

RBM is an evolutionary process that takes time to mature to a stage where policy and decision makers can use performance data for decision-making. The Organization is

committed to institutionalizing RBM and work will continue, based on the experience gained, on refining outcomes and performance indicators, specifying sources of data, means of data collection, development of necessary systems, and reporting information that would enable various stakeholders to make informed decisions. The lessons learned during this process will also enable the Organization to improve its submission of the programme and budgets for 2008-2009, the preparation of which will start in late 2006. It is also noted that external factors, such as the availability of information at the country level and the baselines, may influence the reporting at that stage of RBM implementation.

TC guidelines for programmes and projects

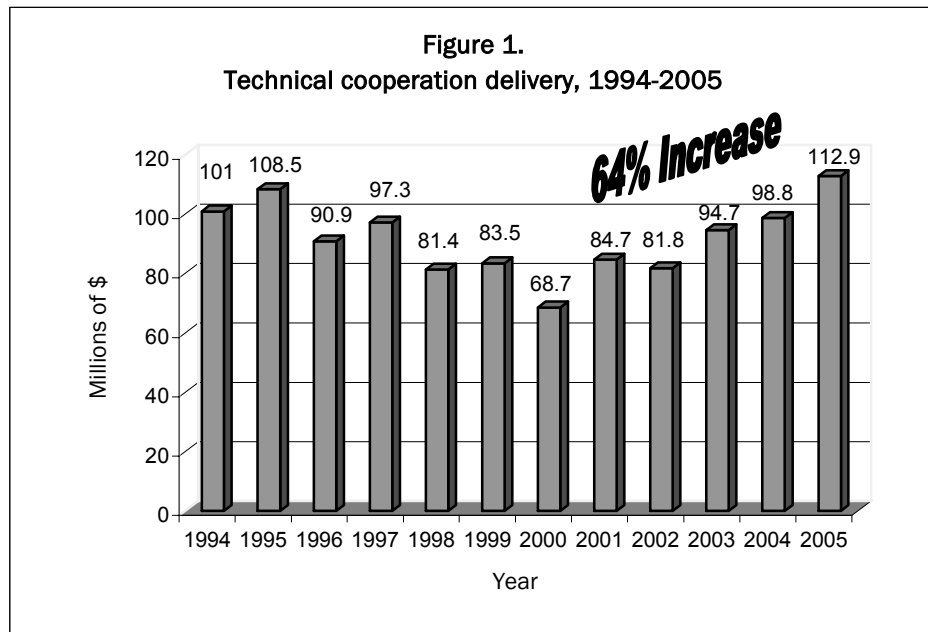

Special steps taken to ensure the full incorporation of RBM principles into the technical cooperation cycle included the development of new TC guidelines. This ensures that internal processes positively influence organizational performance and that financial resources are used efficiently and effectively to fund priority activities and yield clearly identifiable and measurable results. The guidelines also aim to ensure the development and delivery of TC activities that have an impact on economic development through the effective harmonization of UNIDO's overall policies and priorities with the needs and development plans of recipient countries in accordance with the Poverty Reduction Strategies, and interaction with other multilateral and international organizations within the framework of the UNDAFs, as well as with bilateral and national TC agencies and NGOs/CSOs.

Among the subjects discussed at the expanded Board of Directors retreat in December was an initial review of the application of the guidelines some six months after their implementation, following which some adjustments are expected in order to introduce further improvements. The fine-tuned guidelines are scheduled for issuance in the first half of 2006.

B. Performance on the technical cooperation front

Improvement in delivery

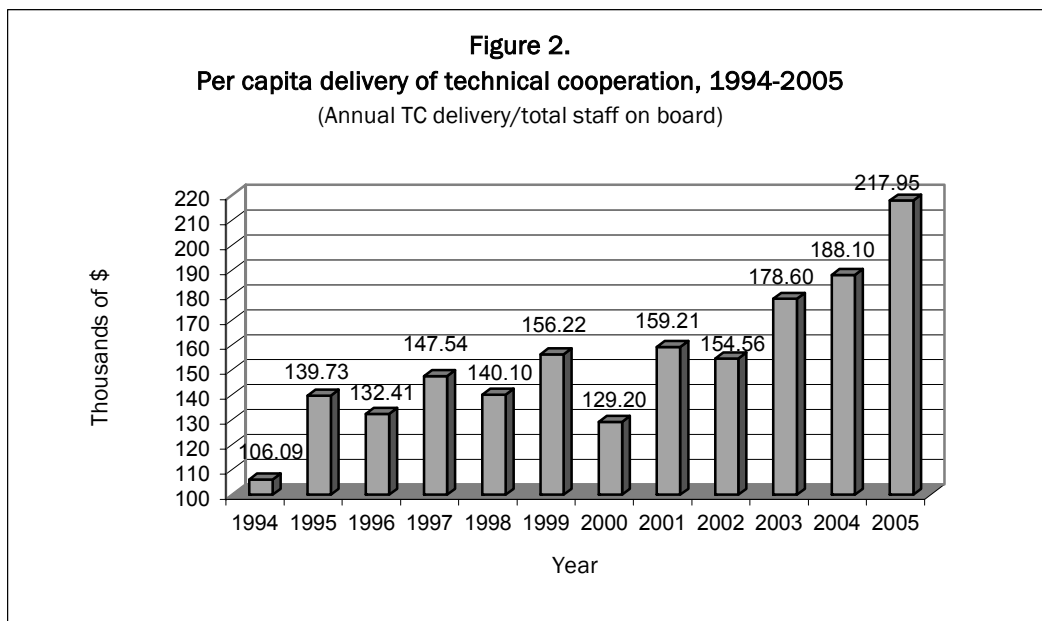

Figure 1 provides a TC delivery analysis from 1994 to 2005. In this context, it is to be noted that the funding pattern of extrabudgetary resources has changed tremendously over the years (for instance, in 1994 projects funded by UNDP amounted to some 26 per cent of total delivery, whereas in 2005 they accounted for only 1 per cent), and that there have been substantial decreases in staffing levels (in 1994, the actual number of staff on board at Headquarters was 952, compared with 517 as of 2005—a decrease of 46 per cent).

TC delivery in 2005 surpassed the previous highest delivery level of 1995, which confirms a turnaround in UNIDO’s TC delivery. It also shows an increase of some 64 per cent over the 2000 delivery. The prospects thus look promising for future years.

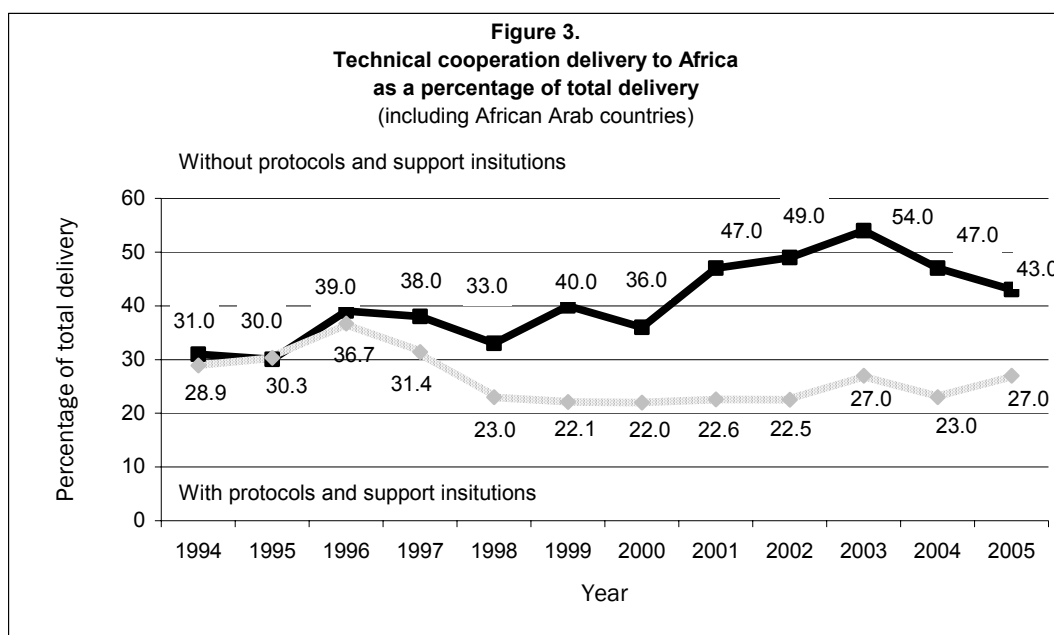

Staff productivity grows

As seen in figure 2, which analyses delivery versus total staff on board (both Professional and General Service), productivity per staff member has increased by 105 per cent since 1994, i.e. more than double. Compared to 1997, productivity has increased by 48 per cent—another demonstration of the continued commitment by management and staff to make the Organization more efficient and effective.

Emphasis on Africa

Figure 3 shows that there has been a continued emphasis on TC delivery in favour of Africa, including African Arab States. Despite the changing funding pattern, delivery in this region has accounted for some 23 to 27 per cent of total delivery since 1998, excluding delivery under the Industrial Development Decade for Africa/Special Resources for Africa.

Delivery in 2005 amounted to \$30.4 million, as compared to \$22.7 in 2004 and \$25.6 million in 2003. However, if multilateral funds, Investment and Technology Promotion Offices and similar institutions are excluded, delivery in favour of Africa, excluding delivery under the regular budget Special Resources for Africa, was 43 per cent in 2005. Although in percentage terms this shows a reduction of 4 per cent as compared to 2004, in dollar terms the delivery in 2005 increased by \$3 million (in 2005: \$17.2 million; in 2004: \$14.2 million; in 2003: \$16.1 million).

Selected technical cooperation achievements

Table 1 provides selected TC achievements in recent years focusing on investment promotion and aspects of environmental and SME activities undertaken. In view of the application of RBM principles in technical cooperation, and in the programme and budgets 2006-2007, it is expected that there will be a gradual shift in the Organization's performance reporting on the regular budget and TC activities.

Table 1.
Selected TC achievements, 2004–2005

	2000	2001	2002	2003	2004	2005
Competitive Economy	\$221 million investment generated	67 projects including 39 for Africa, 39 for SMEs. \$78.6 million generated for Africa	\$304 million investment generated	\$241.2 million investment generated	\$245.44 million investment generated	\$486.3 million investment generated, including \$424.28 million by ITPO network
Sound Environment	4,000 tonnes ODSs eliminated	2,480 tonnes ODSs eliminated	3,370 tonnes ODSs eliminated	5,650 tonnes ODSs eliminated	6,300 tonnes ODSs eliminated	9,385 tonnes ODSs eliminated 50 food processing enterprises introduced cleaner production techniques
Productive Employment	563 SMEs started 1,160 SMEs expanded business activities 1,191 women entrepreneurs assisted Some 5,000 jobs created through investment promotion	428 SMEs started 1,306 SMEs expanded business activities 1,207 women entrepreneurs assisted At least 2,732 jobs created through investment promotion including 1,050 in Africa	512 SMEs started 1,432 SMEs expanded business activities 1,609 women entrepreneurs assisted Some 4,782 jobs created through investment promotion	434 SMEs started 1,844 SMEs expanded business activities 2,003 women entrepreneurs assisted Some 4,551 jobs created through investment promotion	268 SMEs started 3,033 SMEs expanded business activities 3,443 women entrepreneurs assisted Some 5,732 jobs created through investment promotion	296 SMEs started 2,704 SMEs strengthened or expanded business activities 3,359 women entrepreneurs assisted Some 9,199 jobs created through investment promotion, including 8,149 by ITPO network Some 200 agro-industrial centres established or enterprises strengthened Some 1,675 jobs created or secured in agro-industries

Evaluation activities improve technical cooperation

The emphasis placed by UNIDO on evaluating technical cooperation corresponds to the increasing importance of evaluation at the system-wide level. Notably, the 2005 World Summit underlined the importance of continuous improvement in this area. All organizations of the system were encouraged by the United Nations General Assembly to strengthen their evaluation activities and to promote collaborative approaches to evaluation to better assess the impact of the system on development results.

Figures 4 and 5 show the number of stand-alone projects and integrated programmes (IPs) evaluated since 1997, and clearly reflect UNIDO's shift towards IPs as the main delivery mode for technical assistance. In 2005, eight IPs and four stand-alone projects were evaluated.

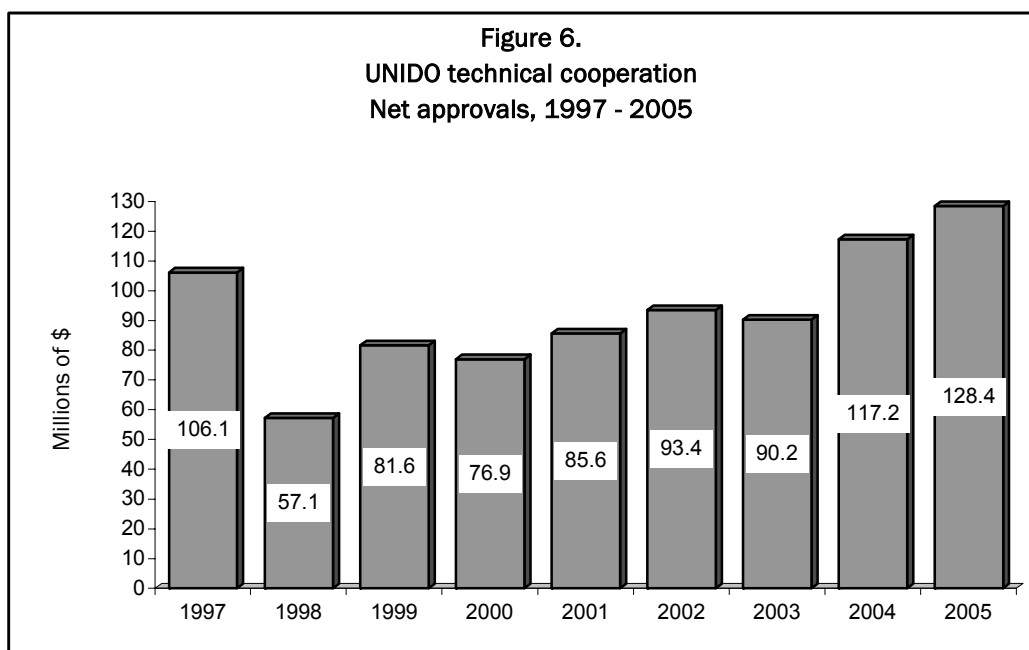

On average, an IP represents a total budget up to several million dollars. With some \$30 million, the country service framework for China is currently the biggest UNIDO programme. As this was one of the programmes evaluated in 2005, the total volume of UNIDO activities evaluated rose to more than \$50 million. The trend towards IPs thus entails a significant increase in evaluation coverage in terms of numbers of projects and financial volume.

Moreover, UNIDO participated in the joint evaluation of the Global Environmental Facility (GEF). This is expected to improve further convergence between UNIDO and GEF procedures, which is vital to increasing the significance of GEF in the UNIDO funding portfolio.

The Evaluation Group (EVG) participated in elaborating the new guidelines on technical cooperation programmes and projects and in the introduction of results-based management. The Group also placed increased emphasis on improving its own evaluation processes and products through its active cooperation under the United Nations Evaluation Group (UNEG); the assumption of a leading role as co-chair of the UNEG task force on the implementation of evaluation quality standards; the publication by UNEG of the evaluation norms and standards for the United Nations system; a draft quality handbook defining EVG quality standards and modes of interaction with the rest of UNIDO. The latter includes the new "IP quality matrix" that will contribute to more transparent evaluations and better guidance of external evaluation consultants.

C. Funding performance

The total of net technical cooperation project and programme approvals from all sources of funds increased to \$128.4 million as compared with \$117.2 million in 2004, an increase of almost 10 per cent (figure 6). This is the highest level of total approvals since 1990. With the approval level exceeding the delivery by some \$16 million, the balance of projects under implementation continues to increase, which should enable the delivery volume to continue to increase as well. To take a longer-term perspective, approvals were over 30 per cent higher than the average of the previous four years.

Funding through the Industrial Development Fund (IDF) and trust funds (almost all from governmental donors) reached \$79.6 million (excluding support costs). The total contribution from these donors including support costs amounted to \$87.8 million, including \$5.6 million trust funds from “recipient” countries. This represents an increase of 23 per cent over the \$62.8 of 2004, and a doubling in four years to the highest level in the history of UNIDO.

The largest contributor continues to be Italy whose contribution (excluding support costs) amounted to \$15.9 million. The second highest contributor in 2005 was Turkey, with a \$9.9 million contribution for the International Centre for Hydrogen Technology, followed by the European Commission with \$8.2 million, Switzerland with \$7.6 million and Austria with \$5 million. Other major governmental donors included Finland, France, India, Japan, Norway and Saudi Arabia, each of which contributed one million dollars or more. India, Saudi Arabia and Turkey also made important contributions, as did other recipient Member States, including China, Egypt, Iran (Islamic Republic of), Nigeria, Russian Federation and Sudan. In addition, about \$5.9 million originated from the United Nations Trust Fund for Iraq, \$0.7 million from post-emergency funding for Afghanistan, and \$3.2 million from three projects funded by the United Nations Trust Fund for Human Security financed by Japan. Appendix B shows the distribution of IDF and trust fund approvals by region and subject.

Funding mobilized from all sources for the integrated programmes and country service frameworks in 2005 amounted to \$39.6 million.

Net approvals under the Multilateral Fund for the Montreal Protocol amounted to \$40 million, the highest level since 1997, demonstrating continued high performance by UNIDO. Together with the fluctuating approval level under the Global Environment Facility, funding from these two dedicated sources is stabilizing at \$40 to \$50 million per year.

As reported for the previous year, the strong focus on global development priorities and the clearer presentation of UNIDO's programmes as our response to these priorities is continuing to have a strong and positive effect on funds mobilization, especially from governmental donors. It is expected that this trend will continue, with closer cooperation on thematic priorities with individual donors, as well as complementary partners strengthening the message further.

In terms of funding by thematic priority, energy and environment attracted the largest share with \$65.1 million, of which \$40 million originated from the Multilateral Fund for the Montreal Protocol; trade capacity-building attracted \$39.2 million, and poverty reduction through productive activities attracted \$15.4 million. Finally the human security programme mobilized \$9.8 million, with most activities under this heading focusing on poverty reduction activities.

Cooperation with the United Nations Trust Fund for Human Security developed further with three new projects approved for Bangladesh, Guinea and Malawi, and other projects in the pipeline for 2006. Cooperation also continues with CFC, with new projects focusing on hides and skins improvement, market-based development with bamboo, and continued work with sisal, all in Africa. Consultation has started with CFC on its participation in the West Africa cotton programme being developed in cooperation with WTO.

D. Internal processes and controls

Administrative support services

Efforts to decrease information and communication management (ICM) costs featured the signing of a major agreement to outsource the maintenance and support of UNIDO's human resource management and payroll systems to UNODC. This is part of a longer-term strategy of UNIDO and the United Nations as a whole to minimize costs by sharing ICT resources and expertise, where possible. It also places UNIDO in a good position for future system-wide developments in enterprise resource planning.

In addition to the ongoing programme of ICM upgrades, a number of innovative improvements were implemented or commenced:

- A web-based virtual private network facility with strong authentication, which allows all Headquarters and field staff to access Headquarters ICT resources in a secure and user-friendly manner from any web browser anywhere in the world;
- A new web-based electronic document management system, using automatic capturing features to minimize user input;
- The Financial Performance Control System was improved and extended, including a new purchase and contracts system and a fixed assets module for inventory;
- Issuance of a comprehensive policy governing the use of all ICT instruments within the Organization with the aim to: provide UNIDO users with a document that clearly explains their rights, responsibilities, limitations and expected conduct pertaining to ICT resources and their access; help ensure safe, reliable, secure and available ICT resources for all staff members at their desks; ensure the security, availability and continuity of all ICT systems supporting the business processes of the Organization; and allow an auditable flow of information and data.

Buildings Management Services (BMS) is managed by UNIDO on behalf of the VIC-based organizations (VBOs). The 2004-2005 budget for this service amounted to some €48 million, shared by all VBOs. Careful management and controls have reduced operational costs while maintaining or improving the quality and/or quantity of services provided. Efficiency savings in the areas of electricity and maintenance costs have also played a major role in reducing costs.

A major activity relates to the asbestos removal programme, the aim of which is to eradicate any possible health hazard related to the asbestos-containing materials in the VIC. The project, which is mostly funded by Austria, entails evacuating office floors, thus providing an excellent opportunity to implement a number of overdue modernization and refurbishment works. These include new cabling for IT and infrastructure, glazing, lighting, flooring, painting and a completely new and full-protection fire alarm and detection system.

From November 2004 through the end of 2005, asbestos removal and accompanying modernization and refurbishment works were completed in 18 floors of two buildings, and the entire project is expected to be completed by mid-2010.

Human resource management

UNIDO continued to provide learning opportunities for staff in the traditional areas of induction programmes, management and executive development training, technical and general competencies upgrading, office software application and language application improvement.

In order to meet the increasing demands of organizational development required by the challenges of achieving the Millennium Development Goals and the strategic long-term goals of the Organization, UNIDO developed and implemented a number of tailor-made workshops and seminars. With the aim of aligning the performance appraisal system with the principles of results-based management, a series of workshops were held for over 60 staff members to help them apply this new system. Other workshops focused on the logical framework approach to improve the quality of programme and project formulation and development, and support the review of the guidelines on project/programme development and the management cycle. A seminar on enhancing

the development and contribution of the private sector focused on the competency edge of UNIDO technical cooperation in the increasingly challenging environment. Another learning event provided a high-level platform for the exchange of views from subject experts from all over the world. Finally, two comprehensive orientation programmes were conducted for the newly-recruited Heads of UNIDO Operations to integrate them into the Organization.

UNIDO's internship programme reached a record high, with the number of interns at 117 for a total of 435 internship months. The good quality of the programme has been manifested by the substantive contribution of these interns to the work of the Organization while at the same time providing the interns with useful exposure for professional development.

Oversight

The External Auditor notes that oversight activities are instrumental in fostering the principles of good corporate governance, with particular emphasis on the concepts of integrity and accountability. In line with the Organization's commitment to those principles, oversight activities covered a range of areas, including:

- **Institutionalizing RBM:** Work continued to institutionalize RBM in all activities of the Organization, such as in the 2006-2007 programme and budgets, technical cooperation activities, training of focal points and other staff, long-term vision and the preparation of an action-oriented plan for the period 2005 to 2007.
- **Finalization and fine-tuning of technical cooperation guidelines:** The TC guidelines covering the entire programme and project cycle were finalized taking into account RBM principles. These have contributed to further improving the management of TC programmes and projects; simplified processes; standardized formats and documents; introduced the logical framework approach; greater delegation of authority and accountability for results. Based on the experience with their implementation, these guidelines are currently being fine-tuned with the support of the Advisory Panel on Programme Approval Committees.
- **Contribution to UNIDO assessment:** Extensive information was provided for the finalization of the report issued in March 2005 on the assessment of UNIDO by the Department for International Development (DFID) of the United Kingdom and work on the areas highlighted for follow-up was continued. Taking into account all the developments and achievements of the Organization, UNIDO was rated best organization within the United Nations standard setting agencies, and emerged from the assessment as one of the most effective of the 23 institutions reviewed by DFID.
- **Preparation and issuance of policy documents:** This entailed preparation of a number of documents, taking into account the best practices both within and outside the United Nations system, and included: fraud awareness and prevention, information and communication technology policy, and risk assessment for internal use.
- **Upholding the single-audit principle:** A considerable amount of work was required to ensure adherence to the single-audit principle, as contained in the UNIDO financial rules and regulations.
- **Advice, monitoring, assessment and reporting:** Reports on a number of assessments and reviews were provided to senior management to facilitate informed decisions.

Monitoring and reporting on the Organization's financial performance, including recommending remedial actions, ensured that the Organization achieved various performance targets.

- **Independent and objective assessment** of the rationale, adequacy, efficiency and effectiveness of various operations. This was achieved through financial compliance and operational audits of Headquarters and field activities, fact-findings and investigative work.
- **Better coordination of activities with external entities and liaison:** To ensure a wide coverage of the Organization's activities and provide effective oversight, activities were carefully coordinated with those of the external audit team. This resulted in improved implementation of the External Auditor's recommendations. Close liaison was also maintained with the Joint Inspection Unit and the Chief Executives Board on the reports issued by the JIU.

UNIDO's performance in 2005 demonstrates that the Organization is on the right track. Its commitment to improving efficiency and the impact of its services has resulted in increased confidence in the donor community, and the future holds promise.

Appendices

CONTENTS

- A. Operational statistics
- B. Project approvals under voluntary contributions
- C. Status of integrated programmes and country service frameworks
- D. Technical assistance to the least developed countries
- E. Regular programme of technical cooperation
- F. Geographical distribution of experts
- G. Training activities
- H. Agreements, memorandums of understanding and joint communiqués concluded in 2005
- I. Country promotion presentations
- J. Procurement
- K. Field representation
- L. Composition of the Secretariat and personnel-related information
- M. Staff development
- N. Selected publications issued
- O. Expert group meetings, symposiums, seminars and other meetings
- P. Industrial statistics

BUILDINGS MANAGEMENT

Expenditure

G BUILDINGS MANAGEMENT

G.1	Common Buildings Management	6,148.5	56.6	0.0	1.6	0.0	16,792.7	22,999.4
G.2	Joint Buildings Management	156.9	0.0	0.0	0.0	0.0	595.2	752.1
	Total expenditures	6,305.4	56.6	0.0	1.6	0.0	17,387.9	23,751.5

Total costs of Buildings Management Services are cost-shared between all users and the above expenditures are being fully recovered. UNIDO's net share is included under programme H above.

Regular budget data excludes supplementary appropriations and related expenditures for security enhancements. This information will be reported in the financial statements for the period 2004-2005.

^a Represents the full 2005 appropriations which have been transferred to the special account for RPTC.

^b As of 1 January 2004, the after-service health insurance (ASHI) is recorded under programme H.1—Indirect Costs. Prior to that date, these costs were distributed to the relevant programmes.

Appendix B

PROJECT APPROVALS UNDER VOLUNTARY CONTRIBUTIONS

B.1 Industrial development fund: net approvals in 2005 (Excluding programme support costs)

B.2 Trust funds: net approvals in 2005^a (Excluding programme support costs)

^a Includes projects financed from the Common Fund for Commodities, European Union, UNFIP, self-financed and third-party trust fund contributions.

^b Includes Associate Expert/JPO programme (\$923,259).

COMFAR III Expert advanced (2 activities)			X	Austria	30	6	5	5
Measuring, benchmarking and managing industrial enterprises with UNIDO business performance management software			X	Austria	20		3	
CDM project cycle		X		Austria	22	16	3	22
HACCP auditing	X			Bangladesh	19	19	3	
Cotton quality			X	Benin	40	40		40
Accreditation		X		Burkina Faso	8			8
Technical barriers to trade: ISO internet site		X		Burkina Faso	21		15	21
Managing a national certification body		X		Burkina Faso	16		15	16
Hand-weaving, textile dyeing and dress-making	X			Burkina Faso	60	60	50	60
Fruit and vegetable drying	X			Burkina Faso	89	89	87	89
Management and accounting	X			Burkina Faso	18	18	16	18
GHP and HACCP	X			Burkina Faso	496	496	334	496
Hides and skins improvement		X		Burkina Faso, Mali, Niger, Senegal	60	60		60
Leather crafts	X			Burundi	15	15	2	15
Tanning technology (effluent treatment)	X			Burundi	5	5		5
Milk processing	X			Cameroon	28			28
Ginger processing	X			Cameroon	36		34	36
Training of trainers for self help groups	X			Cameroon	159		159	159
Administrative environment for micro, small and medium enterprises	X			Cameroon	75		75	75
Competitiveness indicators	X			Cameroon	19		5	19

<i>Field of study</i>	<i>Type of programme</i>			<i>Host country/ territory</i>	<i>Number of participants of which</i>			
	<i>National</i>	<i>Regional</i>	<i>Inter- regional</i>		<i>From all countries</i>	<i>LDCs</i>	<i>Female</i>	<i>African participants^a</i>
Refrigerant recovery	X			Cameroon and Italy	50			50
Cleaner production		X		Costa Rica	17		8	
Cleaner production		X		Cuba	21		9	
Technology foresight for practitioners		X		Czech Republic	18		5	1
Trade-capacity building: Strengthening of National Enquiry Points (NEPs)	X			Ecuador	41		23	
SME cluster development: Training of trainers for facilitators	X			Ecuador	119		42	
SME cluster and network development	X			Ecuador	104		81	
SME clusters: Project design and management	X			Ecuador	84		41	
SME clusters: Technical skills upgrading	X			Ecuador	339		246	
SME clusters: Strategic planning	X			Ecuador	141		62	
Neurotoxicity of mercury			X	Ecuador	2		1	
COMFAR III Expert	X			Egypt	21		10	
Lead auditing	X			Egypt	20			20
Quality management and ISO 9001 certification	X			Egypt	14			14
Practical implementation of the traceability manual	X			Egypt	52		15	
Traceability awareness for farm associations (2 activities)	X			Egypt	105		25	
Traceability for fresh produce exports to the European Union (2 activities)	X			Egypt	50		10	
Cleaner technologies for sustainable chemistry			X	Egypt	300		100	300
Sustainable industrial development: Process simulation, analysis, optimization and control			X	Egypt	25		10	25
Market analysis	X			Egypt	30		8	30
Agricultural engineering	X			Eritrea	16	16	5	16
Women's entrepreneurship development	X			Eritrea	20	20	20	20
Training of trainers on women's entrepreneurship development	X			Eritrea	13	13	10	13
Sewing machine operation	X			Ethiopia	120	120	110	120
Garment production costing	X			Ethiopia	40	40	5	40
Garment marker making and cutting	X			Ethiopia	45	45		45

<i>Field of study</i>	<i>Type of programme</i>			<i>Host country/ territory</i>	<i>Number of participants of which</i>

APPENDIX O

EXPERT GROUP MEETINGS, SYMPOSIUMS, SEMINARS AND OTHER MEETINGS^a

<i>Date</i>		<i>Place</i>
11-14 January	Vibrant Gujarat Global Investor's Summit 2005	Ahmedabad India
24-26 January	Third meeting on harmonization of legal texts and regulations	Ouagadougou Burkina Faso
25 January	UNIDO Leather Day	Nairobi Kenya
28 January- 1 February	Shilpgram during Stonemart 2005	Jaipur India
29 January- 2 February	International buyer-seller meet during India Stonemart 2005*	Jaipur India
12 February	Buyer-seller meet during the international toy fair	Nuremberg Germany
19 February	Seminar on innovative manufacturing solutions and technology trends*	New Delhi India
21-23 February	First meeting of the technical steering committee for the UEMOA quality award	Ouagadougou Burkina Faso
22-25 February	Seminar on standardization, certification, quality and drying technology	Battambang Cambodia
23-25 February	Expert group meeting on potential and synergies for exploitation of marine currents in South-East Asia	Jakarta Indonesia
25-26 February	Workshop on export consortia promotion for support institutions	Hammamet Tunisia
3-4 March	Global Partners Symposium	Vienna Austria
9-11 March	First meeting of the inter-comparison network of laboratories and proficiency testing	Ouagadougou Burkina Faso
11 March	Seminar on business partnership for promoting industrial competitiveness*	New Delhi India
14-16 March	Fifth meeting on coordination of standardization structures	Ouagadougou Burkina Faso
16 March	Stakeholders' meeting/validation workshop on UNDP/UNIDO programme for private sector development	Dar es Salaam UR of Tanzania
16-18 March	Stakeholders' meeting/validation workshop on UNDP/UNIDO programme for private sector development	Managua Nicaragua
21-23 March	Expert group meeting on foreign direct investment in South-East Asia: Experience and future policy implications for developing countries	Bangkok Thailand
23 March	Workshop on new product development for participants from the Bangalore machine tool cluster*	Bangalore India
29 March	Seminar on investment opportunities in Mozambique and Uganda	Jakarta Indonesia
30 March-1 April	First meeting of the regional quality coordination committee	Ouagadougou Burkina Faso
31 March	Seminar on investment opportunities in Mozambique and Uganda	Kuala Lumpur Malaysia
5 April	Seminar on investment opportunities in Mozambique and Uganda	New Delhi India

^a Includes meetings sponsored jointly with other organizations.

<i>Date</i>		<i>Place</i>
6-7 April	Meeting on combating marginalization and poverty through industrial development (COMPID)	Vienna Austria
7 April	Seminar on investment opportunities in Mozambique and Uganda	Mumbai India
8 April	Inaugural meeting of the Small and Medium Enterprises Promotion and Development Committee	Vientiane Lao PDR
14 April	Interaction meeting with agro-food cluster*	Shimla India
18-20 April	Regional workshop on pre-slaughter defects of hides and skins and intervention options in East Africa: Harnessing the leather industry to benefit the poor	Addis Ababa Ethiopia
19 April	Seminar on investment opportunities in Mozambique and Uganda	Shanghai China
21 April	Seminar on investment opportunities in Mozambique and Uganda	Wenzhou China
25-26 April	Round table on manufacturing and application of kobold turbine systems for energy production	Guangzhou China
25-27 April	Second meeting of the inter-comparison network of laboratories and proficiency testing	Ouagadougou Burkina Faso
26 April	Seminar on investment opportunities in Mozambique and Uganda	Tokyo Japan
27-28 April	Meeting of the steering committee of the GEF-UNDP first regional mini/micro-hydro capacity-development initiative and investment in rural electricity access	Vienna Austria
28-29 April	Round table on manufacturing and application of kobold turbine systems for energy production	Manila Philippines
29 April	Seminar on investment opportunities in Mozambique and Uganda	Seoul Republic of Korea
2-4 May	Second meeting of the technical steering committee for the UEMOA quality award	Ouagadougou Burkina Faso
2-5 May	Regional technical and scientific working group and project steering committee meeting on reduction of environmental impact from coastal tourism through introduction of policy changes and strengthening public-private partnerships	Mahé Seychelles
3 May	Seminar on investment opportunities in Mozambique and Uganda	Daegue Republic of Korea
6-8 May	First machine tool industry summit*	Goa India
9-13 May	International workshop on removal of barriers to the introduction of cleaner artisanal gold mining and extraction technologies	Kadoma Zimbabwe
10-12 May	Programme and Budget Committee, twenty-first session	Vienna Austria
11-12 May	Industrial Development Report 2005 workshop	Vienna Austria
18-20 May	Expert group meeting on a private sector development policy toolbox	Vienna Austria
18-20 May	Fourth meeting on harmonization of legal texts and regulations	Ouagadougou Burkina Faso
20-23 May	Global Subcontracting and Partnership Exchange supply chain conference	Beijing China
23-25 May	Second meeting of the regional quality coordination committee	Ouagadougou Burkina Faso

<i>Date</i>		<i>Place</i>
25 May	Stakeholders' workshop on information support for MSMEs	Dar es Salaam UR of Tanzania
25-26 May	Second regional conference of the technology foresight study on the productive chain of the fishery industry in the South American Pacific coast	Manta Ecuador
27 May	Stakeholders' workshop on information support for MSMEs	Zanzibar UR of Tanzania
1 June	Workshop on city management decision-making and informatization indexes	Shanghai China
1-3 June	Seventh internal technical coordination workshop	Ouagadougou Burkina Faso
1-4 June	Workshop on fishery resources survey planning and methodologies	Accra Ghana
4 June	Awareness seminar on industrial subcontracting and partnership exchange	Muscat Oman
5 June	Awareness seminar on industrial subcontracting and partnership exchange	Abu Dhabi UAE
6-7 June	Sixth meeting of the regional committee	Ouagadougou Burkina Faso
9 June	Round table on the new role of government in fostering competitiveness in the global industrial setting	Moscow Russian Federation
9-11 June	International conference on the role of organizations of the private sector and civil society in promotion, transfer, adaptation and diffusion of new technology and innovation	Moscow Russian Federation
14 June	Workshop on SME promotion and development fund	Vientiane Lao PDR
16 June	Workshop on cost management and business planning for machine tool units*	Bangalore India
20-23 June	Industrial Development Board, thirtieth session	Vienna Austria
20-23 June	Meeting of the consultative accreditation committee of the West African Accreditation System (SOAC)	Ouagadougou Burkina Faso
27-28 June	High-level expert group consultation meeting on new forms of industrial governance	Riyadh Saudi Arabia
27-29 June	Second meeting on comparative analysis relating to standards needed for trade exchanges	Ouagadougou Burkina Faso
30 June-1 July	Asia-Africa Investment and Technology Promotion Centre project: Fifth Asian business mission	Maputo Mozambique
4-5 July	Asia-Africa Investment and Technology Promotion Centre project: Fifth Asian business mission	Kampala Uganda
4-6 July	Third meeting of the regional committee on quality coordination	Ouagadougou Burkina Faso
7 July	International workshop on removal of barriers to the introduction of cleaner artisanal gold mining and extraction technologies	Jakarta Indonesia
9-11 July	Buyer-seller meet with toy units during ToyBiz 2005	New Delhi India
13-15 July	Second international conference on the process of innovation and learning in dynamic city regions	Bangalore India
15-16 July	International seminar on machining technologies*	Bangalore India
18-20 July	Sixth meeting on regional coordination of standardization structures	Ouagadougou Burkina Faso

<i>Date</i>		<i>Place</i>
18-21 July	Second regional technical working group and project steering committee meeting on enhancing conservation and rationale utilization of medicinal, aromatic and pesticidal plants through sustainable land management	Abuja Nigeria
25-27 July	Third meeting on comparative analysis relating to standards needed for trade exchanges	Ouagadougou Burkina Faso
18 August	Workshop on intellectual property rights in the machine tool sector	Bangalore India
22-24 August	Third meeting of the inter-comparison network of laboratories and proficiency testing	Ouagadougou Burkina Faso
22-24 August	Fourth meeting on comparative analysis relating to standards needed for trade exchanges (cotton)	Ouagadougou Burkina Faso
22-26 August	Regional workshop on methods for the estimation of maximum sustainable yield	Accra Ghana
23-26 August	Regional meeting of the UNIDO network of cleaner production in Latin America	Guatemala City Guatemala
24 August	Stakeholders' meeting/validation workshop on UNDP/UNIDO programme for private sector development	Vientiane Lao PDR
26 August	International workshop on removal of barriers to the introduction of cleaner artisanal gold mining and extraction technologies	Vientiane Lao PDR
29-31 August	Fifth meeting on comparative analysis relating to standards needed for trade exchanges (shea butter)	Ouagadougou Burkina Faso
29-31 August	Technical meeting on the validation of the comparative study on the use of standardization and conformity assessment of public markets	Ouagadougou Burkina Faso
1-3 September	Technology seminar on maximizing productivity of CNC machining centres*	Bangalore India
7-8 September	Conference on international public goods for economic development	Boston USA
8-11 September	Ninth China International Fair for Investment and Trade (CIFIT)	Xiamen China
10-14 September	Fifteenth session of the UNIDO Leather and Leather Products Industry Panel	León Mexico
12-16 September	Experts workshop on plankton and benthos analyses	Accra Ghana
14 September	BAMTECH 2005 (Bamboo technology seminar)	Accra Ghana
15-16 September	Conference on exploitation of marine currents for energy production	Messina Italy
15-16 September	Seminar on linking the Kyoto project-based mechanisms with the European Union emissions trading scheme	Vienna Austria
20 September	Chemical management side event during the third Preparatory Committee for the Development of a Strategic Approach to International Chemicals Management	Vienna Austria
21-23 September	Regional technical and scientific working group and project steering committee meeting on reduction of environmental impact from coastal tourism through introduction of policy changes and strengthening public-private partnerships	Mombassa Kenya
21-23 September	Expert group meeting on transforming industrial energy efficiency markets in South-East Asia	Pattaya City Thailand
22-24 September	Expert group meeting on SME export consortia promotion	Olbia Italy

<i>Date</i>		<i>Place</i>
23 September	Round table on sustainable competitiveness and growth: Relevance of the Slovak economic reform for emerging economies	Bratislava Slovakia
26-28 September	Global task force meeting on the global mercury project	Salvador da Bahia Brazil
26-28 September	Eighth internal technical coordination workshop	Ouagadougou Burkina Faso
26-28 September	APCI subregional conference on improving industrial performance and promoting employment in Northern Africa	Tunis Tunisia
28-30 September	Meeting of the jury of the UEMOA quality award	Ouagadougou Burkina Faso
29 September	Launch of workshop on unleashing the potential of MSMEs in Ethiopia	Addis Ababa Ethiopia
29 September	Stakeholders' meeting/validation workshop on UNDP/UNIDO programme for private sector development	Addis Ababa Ethiopia
29-30 September	Seventh meeting of the regional committee	Ouagadougou Burkina Faso
3-5 October	Regional technical and scientific working group and project steering committee meeting on reduction of environmental impact from coastal tourism through introduction of policy changes and strengthening public-private partnerships	Banjul Gambia
5 October	Stakeholders' workshop on corporate social responsibility	Dar es Salaam UR of Tanzania
8 October	Workshop on machine tool units—decision-making in complex situations*	Bangalore India
10-14 October	Regional workshop on validation of the results from the Guinea Current Large Marine Ecosystem and other assessment surveys	Accra Ghana
13-14 October	Expert group meeting on promoting youth entrepreneurship development in East Asia	Nairobi Kenya
15-16 October	International workshop on renewable energy technology and investment and BlueSky award presentation ceremony	Shenzhen China
19-20 October	Stakeholders' workshop on corporate social responsibility	Managua Nicaragua
21 October	IETA/CTI/UNIDO joint forum on project formation	Madrid Spain
26-28 October	APCI subregional conference on improving industrial performance and promoting employment in COMESA	Lusaka Zambia
7 November	Stakeholders' meeting/validation workshop on UNDP/UNIDO programme for private sector development	Bujumbura Burundi
7-8 November	Review meeting "Support for the development and uptake of CDM projects in the industrial sector" (Pilot project in cooperation with Austrian industry)	Vienna Austria
7-9 November	International expert group meeting on appropriate technologies for sustainable building in developing countries*	Bangalore India
8-9 November	Conference on raising competitiveness of enterprises by using management systems	Moscow Russian Federation
16 November	Conference on economic development and national security: The case of India	Washington D.C. USA
22-23 November	Expert group meeting on youth entrepreneurship development through renewable energy in Central America and the Caribbean	Mexico City Mexico

<i>Date</i>		<i>Place</i>
23-24 November	National workshop on technology needs assessment	Cebu City Philippines
28 November	Forum on industrial development, trade and poverty alleviation through South-South cooperation	Vienna Austria
28 November- 2 December	General Conference, eleventh session	Vienna Austria
29 November	Round table on promotion of trade through industrial capacity development	Vienna Austria
29 November	Round table on cooperation in technology transfer	Vienna Austria
29 November	Presentation on productivity in developing countries: Trends and policies	Vienna Austria
29-30 November	National workshop on technology needs assessment	Jakarta Indonesia
30 November	Presentation on trade-capacity building—The UEMOA experience	Vienna Austria
30 November	Round table on trade-capacity building—The UNIDO-WTO joint programme	Vienna Austria
30 November	Presentation on activities in the field of multilateral environmental agreements	Vienna Austria
1 December	Presentation on a business partnership programme	Vienna Austria
4-5 December	Expert group meeting for GCC members to enhance technology transfer operations for the benefit of the private sector in response to the Stockholm Convention on POPs	Manama Bahrain
4-9 December	Regional technical seminar on assistance to the agricultural machinery sector of the Maghreb region	Algiers Algeria
5-6 December	Business forum on Kenya and Uganda	Vienna Austria
5-6 December	National workshop on technology needs assessment	Nairobi Kenya
5-9 December	Second regional technical and scientific working group and project steering committee meeting on reduction of environmental impact from coastal tourism through introduction of policy changes and strengthening public-private partnerships	Calabar Nigeria
6 December	Workshop on technology trends*	Rajkot India
12 December	Stakeholders' workshop on corporate social responsibility	Jakarta Indonesia
12 December	Expert group meeting for setting up the Toy Design and Development Institute under the national programme for the development of the Indian toy industry	New Delhi India
12-16 December	Expert group meeting on metrological traceability	Vienna Austria
12-16 December	Regional workshop on integrated coastal area management	Calabar Nigeria
14 December	Workshop on product development and marketing for the Ethiopian leather industry	Addis Ababa Ethiopia
14 December	Workshop on enforcement of the code of good practice and standards in the Ugandan leather industry	Kampala Uganda
14-16 December	Expert group meeting on industrial biotechnology and biomass utilization—Prospects and challenges for the developing world	Vienna Austria

<i>Date</i>		<i>Place</i>
14-16 December	Expert group meeting on relevance of modern biomass technologies in Africa	Bangalore India
15 December	UNIDO/WTO joint programme "Pilot joint projects and the cotton initiative" (Side event organized during the sixth Ministerial Meeting of the WTO)	Hong Kong SAR China
15-16 December	Global stone technology forum*	Jaipur India
15-16 December	Global technology meet on stone industry technology	Jaipur India
19 December	Stakeholders' meeting/validation workshop on UNDP/UNIDO programme for private sector development	Abuja Nigeria
21-23 December	Meeting on technology capacity-building programme for building a knowledge-based economy	Bangkok Thailand
27-29 December	Meeting on technology capacity-building programme for building a knowledge-based economy	Kuala Lumpur Malaysia

* ICAMT meeting (International Centre for Advancement of Manufacturing Technology).

APPENDIX P

INDUSTRIAL STATISTICS

<i>Title</i>	<i>Description</i>
The International Yearbook of Industrial Statistics 2005	This annual commercial publication (Edward Elgar Publishing Ltd., Cheltenham, UK) provides worldwide statistics on current structure, performance and trends in the manufacturing sector and facilitates detailed international comparisons relating to the manufacturing sector.
UNIDO Industrial Statistics Database at the 3-digit level of ISIC (Revision 2) (INDSTAT3), 2005 edition	CD-ROM sales version of the UNIDO database on selected key industrial statistics at the 3-digit level of revision 2 of ISIC (comprising 28 industrial branches) with user-friendly interfaces for data search, exporting and manipulation. For a summary description please consult the UNIDO website.
UNIDO Industrial Statistics Database at the 4-digit level of ISIC (Revisions 2 and 3) (INDSTAT4), 2005 edition	CD-ROM sales version of the UNIDO database on selected key industrial statistics at the most detailed level of ISIC (comprising 128 industries) with user-friendly interfaces for metadata reference, data search, exporting and manipulation. For a summary description please consult the UNIDO website.
UNIDO Industrial Demand-Supply Balance Database at the 4-digit level of ISIC (Revisions 2 and 3) (IDSB), 2005 edition	CD-ROM sales version of the UNIDO database on production, trade and consumption, in United States dollars, at the most detailed level of ISIC (comprising 128 industries) with user-friendly interfaces for data search, exporting and manipulation. For a summary description please consult the UNIDO website.
