INTRODUCTION

A Background

UNIDO retained the author as well as five other specialists from outside Russia and one Russian specialists to provide independent expert advice on options to introduce cleaner technologies in pulp mill operations.

The author visited Baikalsk Mill from 14th February until 1st March 1995. During the mission it was expected in close co-operation with Mr. Jalkanen, Mr. McCubbin and mill management to:

- a. evaluate the market for pulp and paper including dissolving in Russia and abroad;
- b. evaluate the actual situation of the mill concerning cost and financial situation;
- c. evaluate the cost and financial aspects of the existing study being proposed by the mill

The details of the mill visit and people met are shown in Appendix I.

The author visited Baikalsk Mill from 24 until 28 September 1995 at the presentation of UNIDO draft report.

B Objectives attained

1. Marketing

During the visits information was received on the development of the marketing volumes and prices as well as price forecasts for the produced grades below:

- dissolving pulp, cord
- dissolving pulp, viscose
- bleached softwood kraft pulp (NBSK)
- semibleached softwood kraft pulp
- unbleached softwood kraft pulp
- wrapping papers.

To have a more detailed view of the market in Russia and in the former Soviet states especially for viscose pulp the author has asked the mill for more information of consumption data and actual production volumes of competitors in Russia.

Information on distribution costs was received.

It should be reviewed if there are allocated enough resources in the cost, financial and market missions to produce adequate report for international financial institutions.

The preliminary findings indicate that the mill would be technically and environmentally viable to continue operation and feasible for operation improvements. The marketing part of the study may require more concern to provide wider view of the domestic and global markets as well as the global competitiveness situation of the Baikalsk Pulp Mill for viscose and kraft pulp. A separate bankable report might be needed to present the mill operation improvement recommendations to financial institutions.

2. Unit prices and costs

The mill management provided adequate information on unit prices and costs covering the development during the past three years.

During the first mission in February the unit costs and prices prevailing in the first quarter of 1995 were received and during the second mission in September the unit costs and prices prevailing in the third quarter of 1995 were received.

3. Manufacturing costs

The mill management provided adequate information on consumption data for the produced grades as well as the details of fixed costs all for the present operation.

4. Tax on uses of natural resources

Details on taxes on uses of natural resources, the government tax on the effluent load to lake Baikal and air emissions, were received.

5. Manufacturing cost and financial assessment of the present operation

The received information covers the manufacturing cost and financial situation of the present operation of the mill.

To provide bankable information for financial institutions a more covering report on the global competitiveness situation of the Baikalsk Pulp Mill for viscose and kraft pulp may be needed.

6. Manufacturing cost and financial assessment of the modernisation of the mill

The manufacturing costs and profitability calculation of the proposed modernisation of mill is included in this report. The capital costs of the modernisation project and the consumption data have been based on mission report of Mr. Jalkanen.

I MARKETING

A Annual production volumes of the mill

The annual production volumes for 1992, 1993, 1994, the plan for 1995 and the modernisation project are shown in Table I-1 and in details in Appendix III.

TABLE I-1
Annual production volumes of pulp and paper

| Year | 1992 | 1993 | 1994 | 1995 | 199 | Project 1999.. |
|------------------|-------|-------|-------|-------|-------|-------------------|
| Domestic market | 158.3 | 128.8 | 126.8 | 84.8 | 100.0 | 130.0 |
| Export market | 34.8 | 28.1 | 26.2 | 66.8 | 60.0 | 100.0 |
| Total 1000 ADt/a | 193.1 | 156.9 | 153.0 | 151.5 | 160.0 | 230.0 |

The prevailing environmental permit is for an annual production of 163,000 ADt/a.

B Production and consumption in Russia

The author has asked the mill for more market information.

The Russian mills producing viscose pulp are shown in Table I-2

TABLE I-2
Annual production of viscose pulp in Russia

| Year | 1993 | 1994 |
|------------------------|--------------|-------------|
| Amursk, viscose | | |
| Baikalsk, cord viscose | 39.8 55.9 | 5.1 74.1 |
| Bratsk | | |
| Kotlask | | |
| Sovjetsk | | |
| Svetogorsk | | |
| Total 1000 ADt/a | | |

C Global dissolving pulp markets and trades

This chapter would be desirable for a bankable report.

D Price forecasts

The past development and forecast of pulp prices are shown in Table I/D-1.

TABLE I/D-1
Price development and forecast by BPPM

| Year | 1993 | 1994 | 1995 | 1996 | 1997..98 | 1999... |
|------------------------|------|------|----------|------|----------|---------|
| | | | USD/ ADt | | | trend |
| Domestic market | | | | | | |
| cord | 215 | 277 | | | | |
| viscose | 221 | 525 | 1200 | 1075 | 900 | 820 |
| BSKP | 156 | 314 | 830 | 1000 | 800 | 720 |
| Export market | | | | | | |
| viscose | 536 | 643 | 1020 | 1060 | 900 | 820 |
| BSKP | 130 | 554 | 900 | 1000 | 800 | 720 |
| Unbl. kraft | 216 | 454 | 580 | 630 | 630 | 630 |

The development of the real list price CIF Rotterdam of bleached softwood kraft BSKP is shown in Figure I/D1. The forecast of BSKP and the development of the list price of dissolving pulp delivered in USA east coast are shown in Figure I/D2. The price of the viscose pulp obtained by BPPM is shown in Figure I/D3 and compared with the list price of dissolving pulp in US South delivered.

FIGURE I/D1
Price development of BSKP by JAAKKO PÖYRY

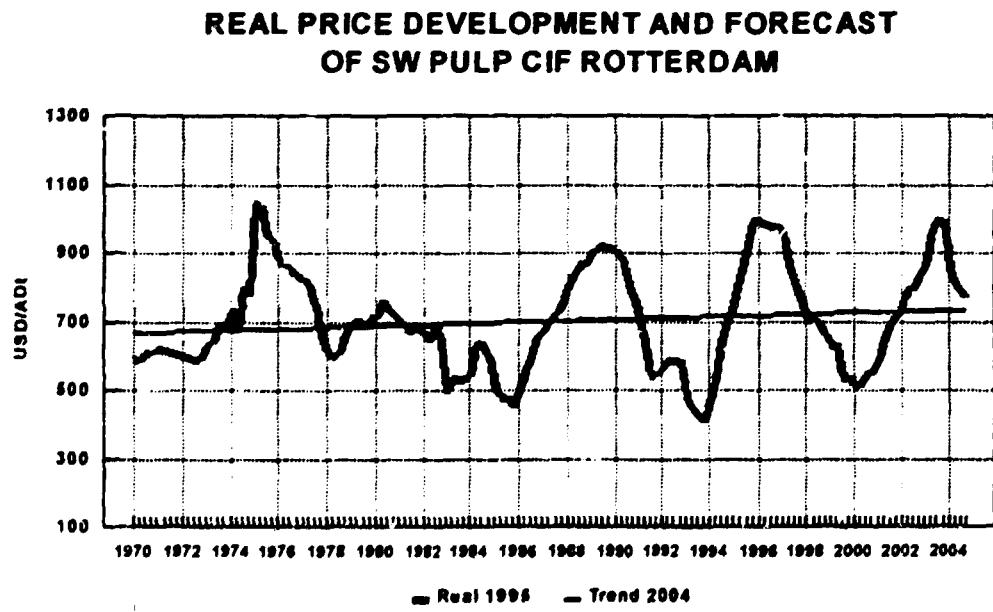

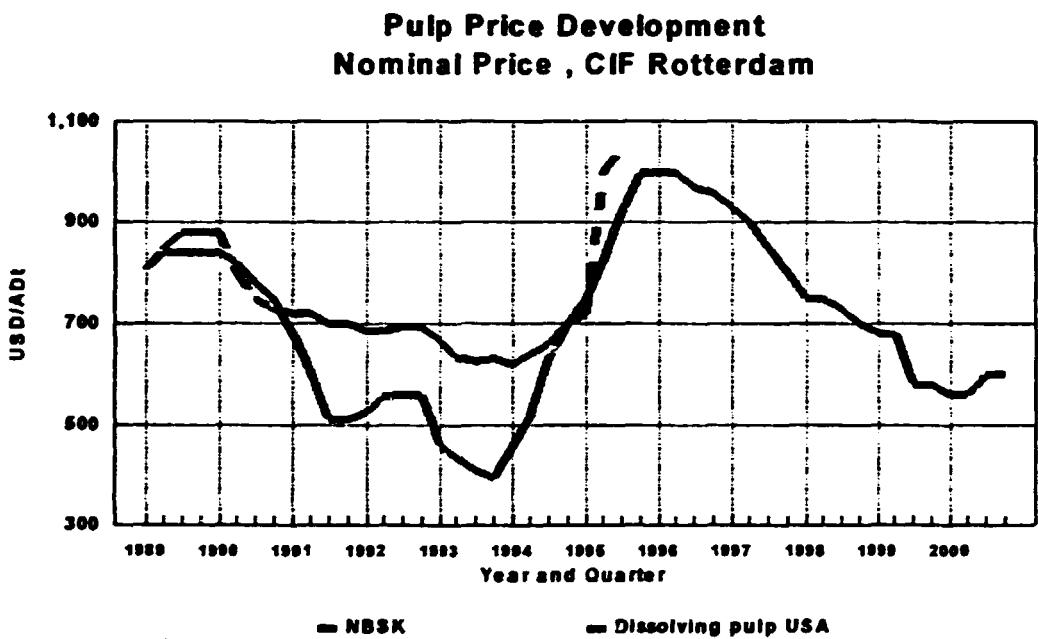

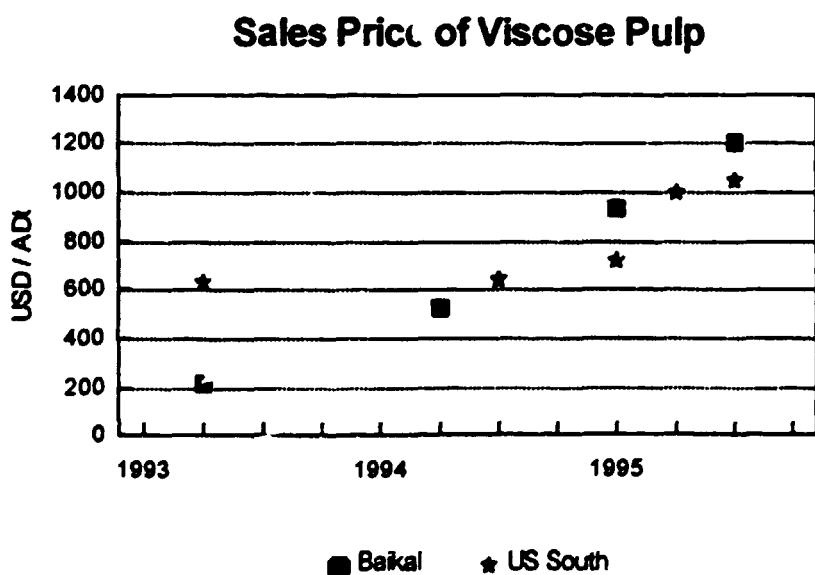

FIGURE I/D2**Price development and forecast by JAAKKO PÖYRY****FIGURE I/D3****Sales price development of viscose pulp obtained by BPPM**

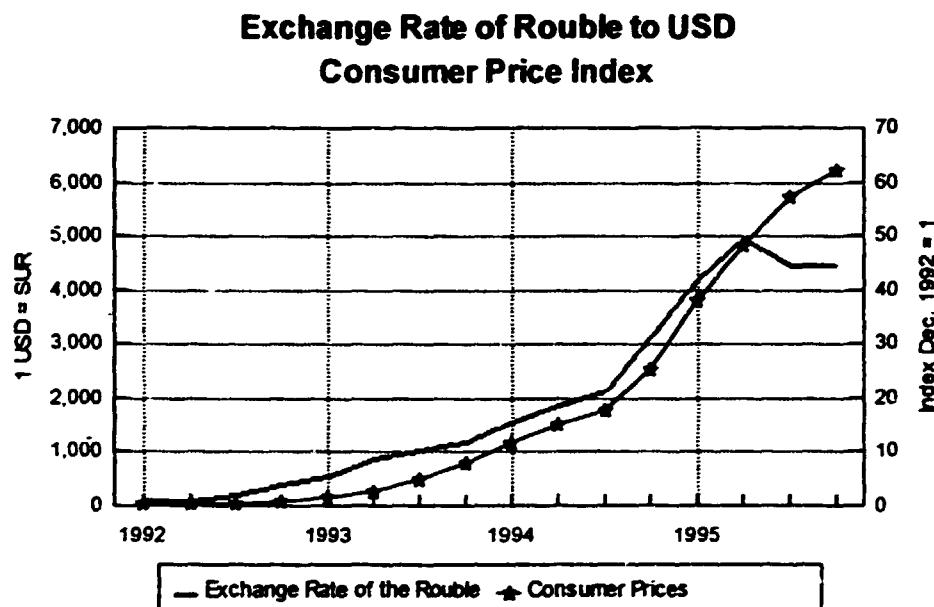

II ECONOMIC ASSESSMENT OF PRESENT OPERATION

A Prices and costs

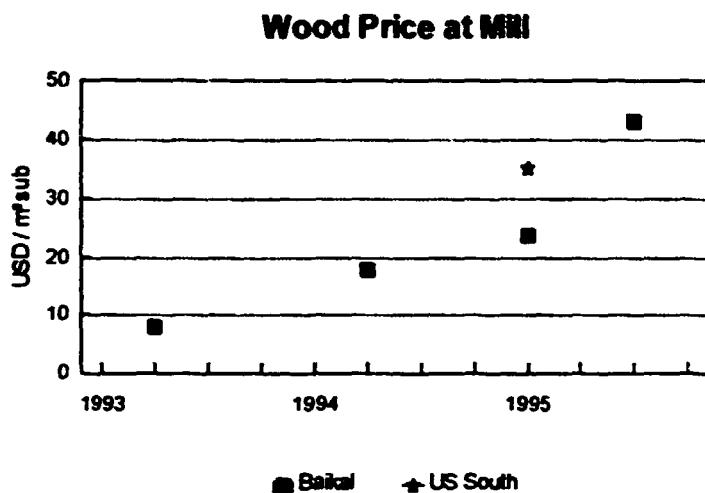

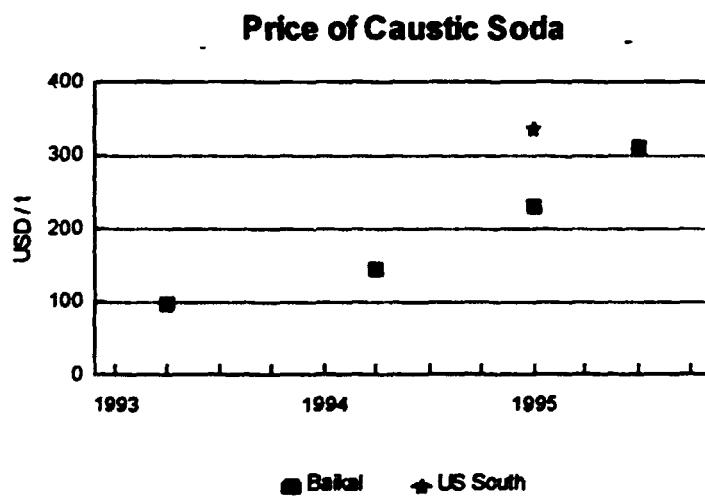

The prices and unit costs as provided by the mill during the mill visit are shown in Appendix II in Roubles and converted to US dollars with average exchange rate.

The development of the average exchange rate the Rouble to US dollar and the development of consumer price index in Russia are shown in Figure II/A1.

FIGURE II/A1

The development of the wood price is shown in Figure II/A2. The price of caustic soda, which represents with chlorine the most part of the cost of chemicals, is shown in Figure II/A3. In the figures is shown the recent price prevailing in US South.

FIGURE II/A2**FIGURE II/A3**

B Variable costs

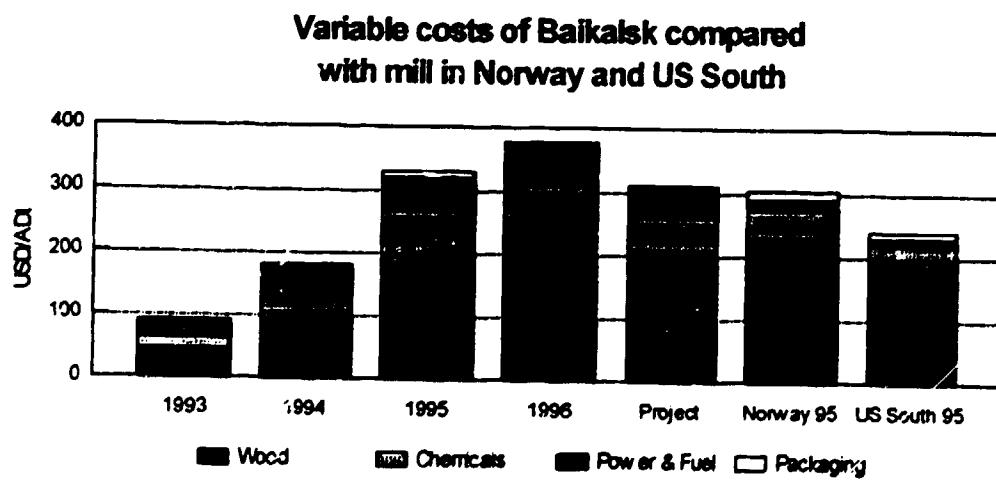

The calculated variable costs have been based on the consumption data and unit prices provided by the mill during the mill visits. The unit prices and costs used for 1995 are the average of those in the first and third quarter of 1995. For years 1996...2000 the unit prices and costs prevailing in the third quarter of 1995 have been used. The variable costs are shown in Appendix IV in Roubles and converted to US dollars with average exchange rate.

The development of the variable costs in US Dollars is shown in Table II/B-1 and in Figure II/B1.

TABLE II/B-1
Variable costs

| | 1993 | 1994 | 1995 | 1996 | Project | Norway 95 | US South 95 |
|--------------|------|------|------|------|---------|-----------|----------------|
| USD/ADt | | | | | | | |
| Wood | 47 | 103 | 184 | 221 | 206 | 229 | 180 |
| Chemicals | 20 | 31 | 83 | 88 | 56 | 45 | 40 |
| Power & Fuel | 22 | 43 | 54 | 65 | 44 | 18 | 10 |
| Packaging | 3 | 5 | 7 | 5 | 3 | 10 | 10 |
| Total | 92 | 182 | 328 | 379 | 310 | 302 | 240 |

FIGURE II/B1
Variable costs

C Fixed costs

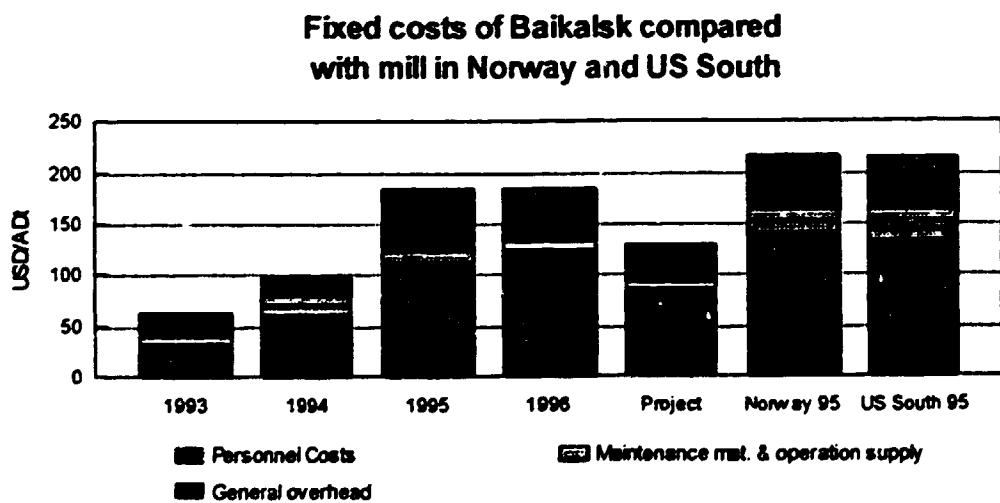

The fixed costs shown in Appendix IV in Roubles and converted to US dollars with average exchange rate.

The development of the fixed costs in US Dollars is shown in Table II/C-1 and in Figure II/C1.

TABLE II/C-1
Fixed costs

| | 1993 | 1994 | 1995 | 1996 | Project | Norway 95 | US South 95 |
|------------------------------------|------|------|------|------|---------|-----------|----------------|
| USD/ADt | | | | | | | |
| Personnel costs | 32 | 60 | 122 | 123 | 85 | 140 | 133 |
| Maintenance mate- rials | 7 | 20 | 11 | 11 | 7 | 23 | 30 |
| General overhead | 24 | 19 | 60 | 51 | 36 | 51 | 52 |
| Total | 63 | 99 | 183 | 185 | 128 | 215 | 215 |

FIGURE II/C1
Fixed costs

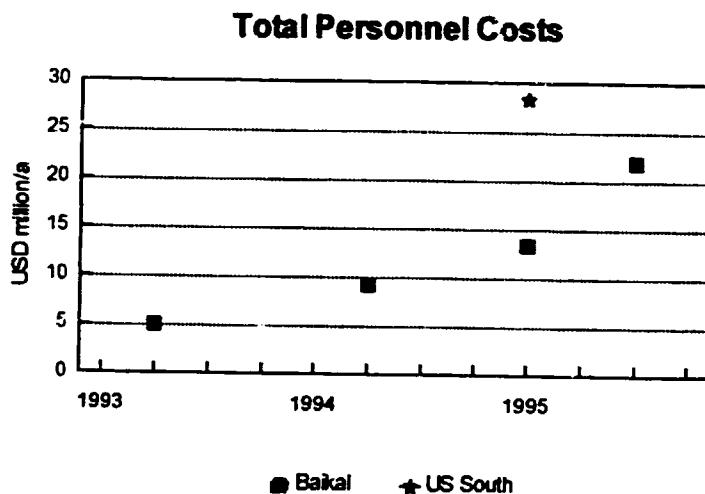

The total number of personnel is shown in the Table II/C-2 and in details in Appendix V. The personnel in the infrastructure is included in numbers below. The non-industrial personnel is 13 % of the total personnel.

TABLE II/C-2
Number of Personnel

| | 1993 | 1994 | 1995 |
|-----------------|-------|-------|-------|
| Total Personnel | 4,115 | 3,512 | 3,600 |

FIGURE II/C2
Total personnel costs

D Tax on uses of natural resource:

The determination of taxes on effluent loads to lake Baikal are shown in Appendix V. As the level of the calculated taxes for Baikalsk Pulp and Paper Mill are unreasonable high the actual payments are annually negotiated with authorities of Irkutsk region and settled at about of 10 % of the operating profit.

TABLE II/D-1
Environmental protection payment

| | 1993 USD/ADt | 1994 USD/ADt | 1995 USD/ADt |
|---|-----------------|-----------------|-----------------|
| Environmental protection payment | 1.1 | 6.9 | 17.5 |

E Cash flow analysis

The calculated cash flows are shown in Table II/E-1 in Roubles and in Table II/E-2 in US Dollars and in details in Appendix VI in Roubles and converted to US dollars with average exchange rate.

TABLE II/E-1
Annual cash flows in Roubles

In Figure II/E1 is shown the sensitivity of Net Profit to the total production volume in 1995.

FIGURE II/E1
Sensitivity of Operating Margin and Net Profit

III ECONOMIC ASSESSMENT OF THE MODERNISATION OF THE MILL

The technical design of the modernisation of the is presented in the mission report of Mr. Jalkanen. The modernisation has been assumed to include:

- the woodhandling will be totally rebuild as a single line drum debarking
- the fibre line will include new digester plant and oxygen delignification
- the bleaching will be rebuild to ECF bleaching
- the drying machines can be substantially as they presently are
- the recovery, caustisizing and lime kilns requires some modifications

The capital costs have been estimated at USD 150 million by Mr. Jalkanen. This fixed investment has been used in the calculations.

The manufacturing cost calculations have been based on design data of Mr. Jalkanen and a total pulp capacity of 230,000 Adt/a has been used. The unit prices and costs are those of the third quarter of 1995. For sales prices estimated trend prices as shown in previous chapters have been used.

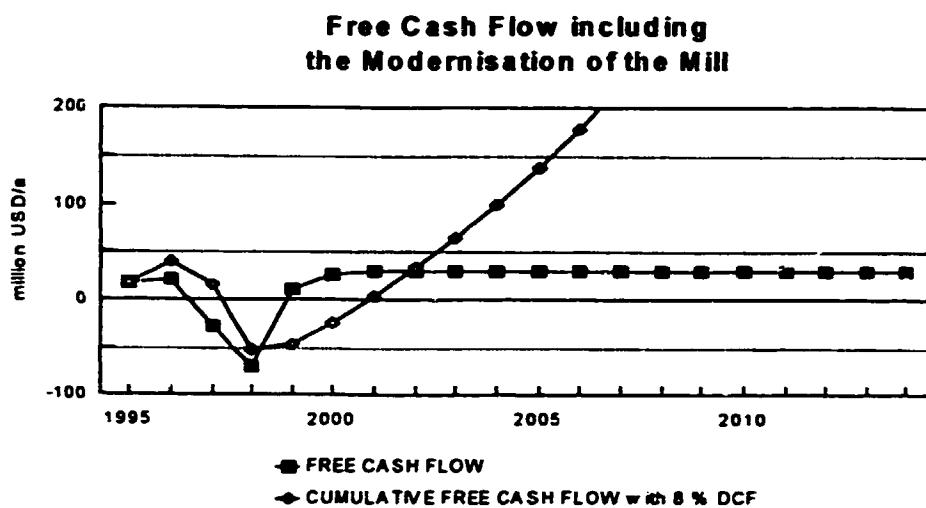

The manufacturing costs and cash flow calculations are shown in the Appendix VIII.

For the assessment of the profitability of the modernisation a **Free Cash Flow before financial Charges** has calculated As follows:

| | |
|--|-------|
| Sales income | (+) |
| Manufacturing cost | (-) |
| | <hr/> |
| Operating Margin | |
| Tax Depreciation | (-) |
| | <hr/> |
| Earnings before taxes | |
| Taxes | (-) |
| | <hr/> |
| Net Income | |
| Tax Depreciation | (+) |
| Capital expenditures | (-) |
| (Fixed Investment and Replacements) | |
| Change in Working Capital | (-) |
| | <hr/> |
| Free Cash Flow before financial Charges | |

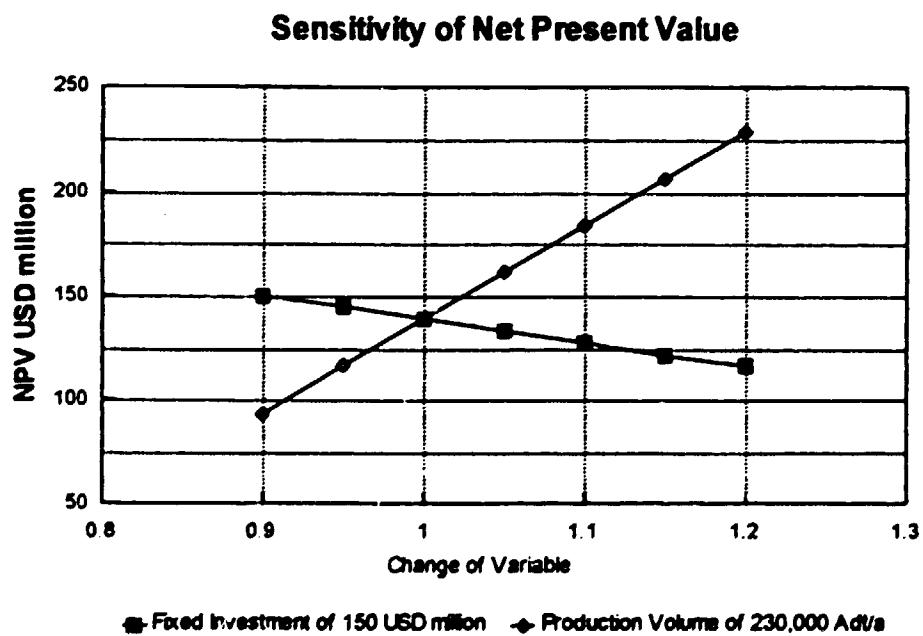

The development of the free cash flow and the cumulative cash flow with a annual DCF rate of 8 % is presented in the Figure III/1

FIGURE III/1
Free cash flow and the cumulative cash flow

As the profitability criteria for the mill operation with the modernisation plan Net Present Value (NPV) of the Free cash Flow has been used. In the Figure III/2 the sensitivity of the NPV against the fixed investment and the production volume is shown.

FIGURE III/2
Sensitivity of the NPV in USD Dollars

The mill is at present operating and financially performing good. Also the mill modernisation program as presented in the report of Mr. Jalkanen indicates a good profitability.

Even the calculation indicates a good profitability of the mill modernisation project the calculations should be reviewed by mill personnel. In the calculations it has been assumed that there are no other funds out which has to be reviewed.

To ascertain the financial analysis an incremental profitability calculation should be carried out, which has not been possible within this mission report.

Risto Salama

Espoo, 7 March 1995

Appendix I**Baikalsk Pulp and Paper Mill****Details of visit and people met**

- 14 Feb** Olli Jalkanen, Neil McCubbin and Risto Salama were met in Moscow by
Sergey U. Slobodskiy, Foreign economical connection department chief
- 15 Feb** The mill was introduced by
Valery V. Glazirin, General director
The company was 1993 formed to a Joint stock company, 51 % owned by the employees and 49 % by the state, Ministry of Finance
and the counterparts of the mission were introduced:
Anatoliy V. Steinberg, Vice president
Rem L. Latipov, Chief of conversion division
Sergey V. Semiletko, Chief engineer
Raisa M. Zaikova, Deputy chief on environmental protection
Alexsandra V. Afanasieva, Chief economist
Mikhail Trufanof, Interpreter
Albert Beim, General director Institute of ecological toxicology
Andrei Beim, Interpreter Institute of ecological toxicology
The town was introduced by **Alexandr Sukhodolov**, Irkutsk
The town was build 1964 at the begin of the construction of the pulp mill. The town has 17 000 citizens, 4 000 in the pulp mill. Other enterprises are construction company, prefabricated concrete, food processing and dairy. Strawberry crowing is becoming commercial. The living standard is higher than average. The town has schools, kindergarten, sport centre, culture house, ski resort, theatre, peoples club.
- 16 Feb** **Sergey V. Shapkin**, Production chief introduced woood room, chip storages, digesters, washing, screening, bleach plant and drying machines. The mill visit gave overall information of the design data, equipment physical dimensions, number and type of equipment and impression of physical condition.
- 17 Feb** **Raisa M. Zaikova** introduced the effluent treatment and sludge handling.

20to24 Feb **Gennady P. Tikhonov**, Chief technologist:

- introduced evaporation and recovery plant
- supplied design data of all departments
- supplied consumption data of all departments

Alexsandra V. Afanasieva supplied unit prices, unit costs and details of fixed costs.

Sergey U. Slobodskiy and **Rem L. Latipov** supplied market data.

Uriy N. Ribin, Deputy manager for timber supply described wood supply and wood costs.

27to28Feb **Alexsandra V. Afanasieva** supplied financial data, distribution costs and reinvestments.

Tamara N. Irtegova, Deputy chief technologist, introduced power boilers.

Rem L. Latipov supplied additional market data and information on development options for wood room, paper machine and fibre line.
