a/ 1511 includes 1512 and 1513.

b/ 1542 includes 1543.

## FIJI

**Supplier of information:**

Bureau of Statistics, Suva.

**Basic source of data:**

Annual Census of Industries.

**Major deviations from ISIC (Revision 2):**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with ISIC(Rev.2).

**Reference period (if not calendar year):****Scope:**

All establishments. However, household industrial units are not fully covered due to the difficulties involved in identifying these units. As a result figures for handicraft industries are considerably underestimated.

**Method of enumeration:**

Questionnaires are distributed by mail with follow-up site visits as required.

**Adjusted for non-response:**

Except for number of establishments and for output, the data do not include estimates for non-response.

**Concepts and definitions of variables:**

Wages and salaries is compensation of employees.

Output is gross output.

Value added is total value added.

**Related national publications:**

Census of Industries (annual), published by the Bureau of Statistics, Suva.

b/ 341 includes 342.

c/ Tyre and tube industries only.

d/ Cement only.

## FINLAND

**Supplier of information:**

Statistics Finland, Helsinki.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO.

**Basic source of data:**

Data for the years 1992, 1993, 1994 are national accounts estimates. Data for 1995 are industrial survey results.

**Major deviations from ISIC (Revision 3):**

Data have been converted from NACE Revision 1 to ISIC (Rev.3).

**Reference period (if not calendar year):**

The survey covers chiefly the calendar year, however, in some cases establishments are allowed to report using their own financial year.

**Scope:**

All units employing five or more persons are surveyed.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees, defined as "wage earners and salaried personnel", covers salaried employees, wage earners and all full- and part-time employees. It is based on the average number of employees throughout the year.

Output is the gross value of production including the value of all products, allowing for net change of work in progress, goods shipped in the same condition as received, net changes in stocks of finished goods, services rendered and electricity sold. Valuation is in basic values.

Value added uses the national accounting concept up to 1994. It is gross output less the value of materials, fuels and other supplies, contract and commission work done by others, repair and maintenance work done by others, and electricity purchases. Input estimates are on a received basis. Valuation is in basic value. Data for 1995 refer to census value added.

Gross fixed capital formation is expenditure on the purchase of fixed assets plus own-account construction of assets, less sales of fixed assets. Fixed assets are those with a productive life of at least one year, and include assets made by a unit's labour force for its own use; additions, alterations, improvements and repairs to existing assets; new assets (whether or not in use) and used assets. Valuation is at full cost incurred, including delivered price, cost of installation and fees and taxes.

**Related national publications:**

## FRANCE

**Supplier of information:**

*For data based on ISIC (Revision 2):* Institut National de la Statistique et des Etudes Economiques (INSEE), Paris.

*For data based on ISIC (Revision 3):* Ministry of Industry, Post and Telecommunications and Foreign Trade, and Ministry of Agriculture, Fishing and Food.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO.

**Basic source of data:**

*Data based on ISIC (Revision 2):* National accounts compilations.

*Data based on ISIC (Revision 3):* Data are based on two different surveys. The industry survey, which comes under the Ministry of Industry, Post and Telecommunications and Foreign Trade, covers enterprises with 20 or more employees. The agro-food survey, undertaken by the Ministry of Agriculture, Fishing and Food, covers enterprises with 10 or more employees.

**Major deviations from ISIC:**

*For ISIC (Revision 2):* None reported.

*For ISIC (Revision 3):* Data were originally classified according to the NAF (Nomenclature d'Activités Française), which is compatible with NACE Revision 1. All data have been converted from the national classification to ISIC (Revision 3).

**Reference period (if not calendar year):****Scope:**

*For data based on ISIC (Revision 2):* All establishments.

*For data based on ISIC (Revision 3):* Kind-of-activity units with 20 or more employees for the industry survey; Kind-of-activity units with 10 or more employees for the agro-food survey.

**Method of enumeration:**

Sampling of all units.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees refers to the average number of employees throughout the year. Both full- and part-time employees are included.

Output is gross output in basic values.

Value added, also in basic values, is calculated as gross output, less the cost of materials, fuels and other supplies; contract, commission, repair and maintenance work done by others; goods shipped in the same condition as received; and electricity purchased. Inputs are calculated on the basis of the amount consumed.

Gross fixed capital formation is the value of acquisitions of fixed capital (plus own-account construction) less the value of sales of own account construction. Fixed assets covered are those with a productive life of more than one year and include assets made by a unit's labour force for its own use; additions, alterations, improvements, and repairs; new assets not yet in use and used assets. Valuation for new assets is the full cost incurred, including delivered price and installation charges, but excluding fees and taxes. Assets produced by the unit are valued at the cost of work put in progress, while for sales of used assets, the actual amount realized is taken.

## GERMANY

### Supplier of information:

Federal Statistical Office (Statistisches Bundesamt), Wiesbaden.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO. The notes appearing here are based on information in the OECD publication *Industrial Structure Statistics* (annual), OECD, Paris.

### Basic source of data:

Monthly inquiry.

### Major deviations from ISIC (Revision 2):

The data have been converted from the national classification (Systematik für die Statistik im Produzierenden Gewerbe - SYPRO) to ISIC (Rev. 2), in so far as details permit. However, it should be noted that: prefabricated building materials, publishing (ISIC 342) and manufacture of natural stone products (ISIC 369) are not covered; manufacture of mattresses (ISIC 332) is included in ISIC 321; manufacture of umbrellas (ISIC 390) in ISIC 322; manufacture of fur wearing apparel (ISIC 322) in ISIC 323; bookbinding (ISIC 342) in ISIC 341; manufacture of mixed lubricating oils and greases (ISIC 353, 354) in ISIC 351 and 352 combined; manufacture of unprocessed plastic pipes and tubes (ISIC 351) in ISIC 356; surface refinement and hardening plants (ISIC 381) in ISIC 371; manufacture of drawn steel wire and forged steel chains (ISIC 371), washing machines (ISIC 382) and assembly and repair of ventilation, heating and sanitary systems (ISIC major division 5) in ISIC 381; manufacture of lighting glassware (ISIC 362), recording of master tapes and records (ISIC major division 9) and manufacture of electric and electronic measuring instruments and meters (ISIC 385) in ISIC 383. Quarrying is included in ISIC 369, erection of structural steel is included in ISIC 381 and the difference in respect of assembly and repair of ventilation, heating and sanitary systems has been adjusted.

### Reference period (if not calendar year):

### Scope:

Local units belonging to enterprises with 20 or more persons engaged including production handicrafts and the industrial units of non-industrial establishments.

### Method of enumeration:

Complete enumeration.

### Adjusted for non-response:

Not reported.

### Concepts and definitions of variables:

Number of persons engaged refers to annual averages of all persons engaged at month's end. Included are working proprietors, active business partners, unpaid family workers, provided they are working for at least one third of the usual working time. Part-time and temporary employees are covered as well as apprentices. Homeworkers are excluded.

Wages and salaries covers gross wages and salaries paid excluding employer's contributions to social security. Notably all payments for interim employed persons are included, and contributions to company old-age pensions institutions are excluded.

Output relates to turnover from own production based on invoice values. It includes proceeds from goods sold as purchased and from the sale of waste, power and similar items. Proceeds from non-industrial activities (e.g., interest payments, rentals, dividends) are excluded. The value of shipments also excludes value added or turnover taxes but includes excise duties, costs for freight packing, postage and other changes.

### Related national publications:

Fachserie 4, Reihe 4.1.1., *Beschäftigung, Umsatz und Energieversorgung der Unternehmen und Betriebe im Bergbau und im Verarbeitenden Gewerbe*, published by Statistisches Bundesamt, Wiesbaden.

## GUATEMALA

**Supplier of information:**

Instituto Nacional de Estadística, Ministerio de Economía, Guatemala.

**Basic source of data:**

Quarterly survey of the manufacturing industry.

**Major deviations from ISIC (Revision 2):**

None reported.

**Reference period (if not calendar year):****Scope:**

Establishments with 20 or more persons engaged.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of persons engaged is the average of the numbers at the end of each quarter.

Wages and salaries includes severance and termination pay and refers to administrative workers only.

Output includes the value of (a) goods produced, (b) work performed for others, (c) gross revenues from goods shipped in the same condition as received, (d) electricity sold and (e) other receipts.

**Related national publications:**

Encuesta Industrial (quarterly), Unidad Industria Energía y Minas EAEF (annual), published by the Instituto Nacional de Estadística, Guatemala. Boletín Estadístico (quarterly), published by the Banco de Guatemala, Guatemala.

## HAITI

**Supplier of information:**

Institut haïtien de statistique et d'informatique, Port-au-Prince.

**Basic source of data:**

Not reported.

**Major deviations from ISIC (Revision 2):**

None reported.

**Reference period (if not calendar year):**

Fiscal year from 1 October to 30 September.

**Scope:**

Not reported.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

a/ 321 includes 322, 323 and 324.

b/ 351 includes 352, 355 and 356.

c/ 390 includes part of metall processing.

## HONDURAS

**Supplier of information:**

Banco Central de Honduras, Tegucigalpa.

**Basic source of data:**

Annual industrial survey.

**Major deviations from ISIC (Revision 2):**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with ISIC(Rev.2).

**Reference period (if not calendar year):****Scope:**

Registered establishments with 5 or more persons engaged.

**Method of enumeration:**

Individual sites are visited by enumerators.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of persons engaged includes homeworkers.

Output is gross output and includes gross revenues from goods shipped in the same condition as received.

Value added is total value added.

Gross fixed capital formation excludes outlays for land and land improvements.

**Related national publications:**

## HUNGARY

**Supplier of information:**

Hungarian Central Statistical Office, Budapest.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO.

**Basic source of data:**

Annual industrial inquiry. The employment data result from the Annual Employment and Earnings Survey, which covers enterprises with 20 or more employees.

**Major deviations from ISIC (Revision 3):**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with ISIC (Rev.3).

**Reference period (if not calendar year):****Scope:**

All enterprises where two of three criteria are met in two consecutive years - over 100 employees, over 300 million HUF annual turnover, 150 million HUF of total assets - are covered. Only investments above 10 million HUF are reported.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries excludes gratuities, certain subsidies, family allowances, and housing allowances.

Output does not include net revenues from goods shipped in the same condition as received. Valuation is net of turnover taxes and includes price supplements granted by the State on individual products.

Gross fixed capital formation relates to actual expenditure on new and used fixed assets. The corresponding value of sales is not deducted.

**Related national publications:**

Munkaügyi statisztika and Beruházásstatisztika, both published by the Hungarian Central Statistical Office, Budapest.

## INDIA

**Supplier of information:**

Central Statistical Organisation, Department of Statistics, Ministry of Planning and Programme Implementation, New Delhi.

**Basic source of data:**

Annual Survey of Industries.

**Major deviations from ISIC (Revision 2):**

The Indian industrial classification system is based on the preceding version of the ISIC, but the data have been adjusted by the national authorities to correspond with ISIC(Rev.2);, with three exceptions: the manufacture of inedible oils (part of ISIC 3115) is included in ISIC 352; the manufacture of prime movers, boilers, etc. (part of ISIC 3813) is included in ISIC 382 and the manufacture of electronic computers (part of ISIC 3825) is included in ISIC 383.

**Reference period (if not calendar year):**

From 1 April of the year indicated to 31 March of the following year. However, individual factory returns for an accounting year ending on any day during the reference period are accepted.

**Scope:**

Factories using power and employing 10 or more workers on any day of the reference period and all factories employing 20 or more workers. The indices of industrial production for some industries cover only establishments employing plant and machinery worth two million rupees or more.

**Method of enumeration:**

Factories employing 100 or more workers are completely enumerated. For factories with less than 100 workers, stratified unistage sampling is used.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of persons engaged is derived by dividing the person days (paid or unpaid) by the number of days during which the factory was either in operation or repair, maintenance and construction activity was carried out. The number of person days for each category is obtained by summing up the number of persons attending each shift over every shift worked on all days (working and non-working).

Wages and salaries is compensation of employees. It includes payments to contract labourers and excludes payments in kind.

Output is gross output and includes gross revenues from goods shipped in the same condition as received.

Value added is total value added and is net of depreciation.

**Related national publications:**

Annual Survey of Industries - Summary Results for Factory Sector; Supplement to Annual Survey of Industries - Summary Results for Factory Sector by State Industry, all published by Central Statistical Organisation, Department of Statistics, Ministry of Planning and Programme Implementation, New Delhi.

## INDONESIA

**Supplier of information:**

Central Bureau of Statistics, Jakarta.

**Basic source of data:**

Annual industrial survey.

**Major deviations from ISIC (Revision 2):**

None reported.

**Reference period (if not calendar year):****Scope:**

Large establishments (with 100 or more persons engaged) and medium scale establishments (with 20-99 persons engaged). Until 1993 ISIC 353 and manufacturing activities on agricultural estates producing tea, tobacco and rubber are excluded.

**Method of enumeration:**

Establishments are completely enumerated. For provinces where establishments are concentrated, the enquiry is carried out by field enumerators through direct interviews, elsewhere it is carried out by mail.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Wages and salaries is compensation of employees.

Output is gross output and includes: (a) value of all products of the establishment; (b) net change in the value of semi-finished goods and work in progress during the year; (c) receipts from industrial and non-industrial services rendered to others; (d) the value of goods shipped in the same condition as received; and (e) the value of electricity sold.

Value added is total value added.

Gross fixed capital formation represents the value of acquisitions of new and used fixed assets; sales are not taken into account.

**Related national publications:**

Industrial Statistics (Survey of Manufacturing Industries) Volumes I and II (annual), published by the Central Bureau of Statistics, Jakarta.

## IRAN (ISLAMIC REPUBLIC OF)

**Supplier of information:**

Statistical Centre of Iran, Plan and Budget Organization, Teheran. The index numbers of industrial production are compiled by the Statistics Division, Ministry of Industry and Mines, Teheran.

**Basic source of data:**

Annual industrial survey.

**Major deviations from ISIC (Revision 3):**

The indices of industrial production are compiled according to ISIC (Rev.1). Where possible, adjustments have been incorporated to convert them to ISIC(Rev.2).

**Reference period (if not calendar year):**

Iranian year beginning 21 March of the year indicated.

**Scope:**

Not reported.

**Method of enumeration:**

Individual sites are visited by enumerators.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees is the average of the quarterly numbers.

**Related national publications:**

Large-scale Industrial Establishments (annual), available only in the national language, published by the Statistical Centre of Iran, Teheran.

## IRELAND

**Supplier of information:**

Irish Central Statistics Office, Dublin.

Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO.

**Basic source of data:**

Annual census of industrial establishments.

Data are provisional.

**Major deviations from ISIC (Revision 3):**

All data have been converted from NACE Revision 1 to ISIC (Revision 3).

Not covered are: Part of textile fibre preparation and textile weaving (ISIC 1711); part of other textiles n.e.c. (ISIC 1729); part of knitted and crocheted fabrics and articles (ISIC 1730); part of other wood products and articles of cork/straw (ISIC 2029); part of pulp, paper and paperboard (ISIC 2101); and part of other articles of paper and paper board (ISIC 2109).

**Reference period (if not calendar year):****Scope:**

All establishments engaged in industrial activity which have on average three or more persons engaged during the year. The majority of the industrial establishments covered are individual factories. However, where two or more distinct activities are conducted at the same location each is distinguished, in principle, as a separate establishment. The extent to which separate returns are obtained for each individual establishment, however, depends on the scale of the different activities involved and the availability of separate records in the business for the different establishments. Any sizeable non-industrial activity is excluded.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

An establishment is defined as a single economic activity conducted at a particular location. Number of establishments includes all the separate production locations of multi-location enterprises even if separate details are not provided by the respondent.

Number of employees refers to number of persons who are paid a fixed wage or salary. Persons at work or temporarily absent because of illness, holidays, strikes, etc. are included, as are part-time workers. Homeworkers are excluded. The numbers given for each year refer to a week in September.

Wages and salaries represents the gross amount paid to employees before deduction of income tax, employees' contributions to social security etc. Overtime pay, bonuses, commissions, holiday pay and sick pay are included. Payments to working proprietors and home workers are excluded. Output represents the net selling value of all goods manufactured in the year, whether sold or not, and the value of work done. In general, for establishments working on commission on materials supplied to them by other firms, only the payments received by them for the work done are included. Since 1991, the definition of output is amended to include the value of capital work done on own account. Operating subsidies related to the production or sales of the output are included in the value of output; excise duty and VAT are excluded.

Value added is the difference between the value of output and industrial input. Industrial input consists of the industrial materials, industrial services, fuel and power used in the production of the output. Industrial materials and services comprise materials for processing and ancillary goods and services, i.e. packing materials, repairs and the cost of contract work done by other firms on materials supplied by the establishment. Valuation is exclusive of deductible VAT.

Gross fixed capital formation is the difference between acquisitions and sales of capital assets. Capital assets (land, buildings, plant and equipment) are defined as goods with an expected useful life of more than one year intended for use by the establishment itself. Acquisitions include purchases from other establishments and production by the establishment itself of capital goods for its own use. Major alterations, improvements and repairs that extend the useful life of an asset or increase its productivity are included. The value of work put in place during the year is included whether or not completed. Acquisitions are valued at total cost including installation charges and fees or duties but excluding deductible VAT and financial costs. Sales are valued at the actual price received excluding VAT.

**Related national publications:**

Census of Industrial Production (annual), published by the Central Statistics Office, Dublin.

f/ 371 includes 372.

## ISRAEL

**Supplier of information:**

Central Bureau of Statistics, Jerusalem.

**Basic source of data:**

Annual industry and crafts survey.

**Major deviations from ISIC (Revision 2):**

The national classification follows ISIC(Rev.2):. However, (a) manufacture of knitted goods, except fabrics (part of ISIC 321) is included in ISIC 322 and, for estimates other than those obtained from the industry and crafts survey, ISIC 3513 is included in ISIC 321, and (b) the diamond industry (part of ISIC 390) is not included in manufacturing.

**Reference period (if not calendar year):****Scope:**

All establishments with 5 or more persons engaged and operating during any part of the survey year, except (a) non-profit establishments (such as workshops for training or rehabilitation purposes) and (b) auxiliary industrial units in kibbutz establishments where the bulk of their production is consumed by the kibbutz itself. The survey covers about 95 per cent of employees in the industrial sector. The indices of industrial production cover all industrial establishments and workshops with at least one employee.

**Method of enumeration:**

Establishments are sampled.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees is the average of the numbers for four selected months of the reference year.

Wages and salaries covers all payments appearing on the pay-roll on which income tax is due, including basic salary, cost-of-living and other allowances (except child allowance), premiums, bonuses, payments for overtime, leave, sickness etc., bus fare, professional literature, thirteenth month salary, maintenance of vehicles, telephone, clothing, lodging and other payments in kind, such as meals, presents, and housing. Since 1990, it includes certain labour expenses that do not appear on payrolls, such as payments for national insurance and pension fund.

Output does not include net revenues from goods shipped in the same condition as received.

Gross fixed capital formation excludes outlays for land progress payments made for fixed assets on order but not yet completed. Fixed capital formation in new establishments not yet in operation is also excluded. Sales of used fixed assets are not deducted.

**Related national publications:**

Industry and Crafts Survey (annual); Statistical Abstract of Israel (annual); Monthly Bulletin of Statistics, all published by the Central Bureau of Statistics, Jerusalem.

## ITALY

**Supplier of information:**

Istituto Nazionale di Statistica (National Institute of Statistics), Rome.  
Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO.

**Basic source of data:**

Annual surveys of gross output and capital investments of the industrial sector.

**Major deviations from ISIC (Revision 3):**

The national NACE-related classification system is not fully convertible to ISIC (Rev. 3).

**Reference period (if not calendar year):****Scope:**

All enterprises with 20 or more persons engaged. The enterprise, classified by kind of activity, is the basic reference unit. Multi-unit enterprises with more than 250 persons engaged are required to furnish data separately for each unit.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees refers to the average number over the year.

Wages and salaries relates to gross earnings of employees and includes basic wages and salaries, cost-of-living allowances, overtime and vacation pay, bonuses and payments in kind. Output is gross output. It is net of indirect taxes and subsidies and is calculated on a shipment basis. It covers the values of goods produced, receipts for work done for others, fixed assets produced for own use, sales of goods purchased and resold without further processing, and receipts for non-industrial services rendered. The valuation is at selling prices, excluding VAT.

Value added is the value of gross output less the cost of the following inputs: materials and supplies purchased (adjusted for the net change in the value of their stocks), products bought and shipped without further processing, and industrial work done by others. The valuation excludes all indirect taxes and subsidies.

Gross fixed capital formation represents the value of the acquisition of new and used fixed assets with an expected productive life of one year or more, including own-account construction. Also included are investments of a social nature and costs of major repairs and other expenditures on fixed assets. Sales of fixed assets are not deducted.

a/ 321 includes 322.

b/ 341 includes 342.

c/ 351 includes 352, 354, 355 and 356.

d/ 361 includes 362 and 369.

e/ 371 includes 372, 381, 382, 383, 384 and 385.

## JAPAN

**Supplier of information:**

Ministry of International Trade and Industry (MITI), Tokyo.  
Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO.

**Basic source of data:**

Annual census of manufactures.

**Major deviations from ISIC (Revision 3):**

All data have been converted from the Japanese Standard Industrial Classification to ISIC (Revision 3).

**Reference period (if not calendar year):****Scope:**

All establishments classified under manufacturing except those belonging to the government and public service corporations. Since 1981 surveys cover all such establishments only in years where the last digit is 0, 3, 5 or 8. In all other years, the survey is limited to those establishments with four or more employees. Investment figures cover establishments with 30 or more persons engaged.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Persons engaged refers to the number at the end of the year, full- or part-time. Persons engaged comprises employees (including apprentices and temporary workers, meeting minimum time requirements), working proprietors and unpaid family workers. Temporary and daily workers are excluded, though their remuneration is included in wages and salaries.

Wages and salaries relates to total cash payments, including basic wages, bonuses and other premiums, allowances and employees' retirement and termination allowances.

Output represents the value of shipments of finished goods, adjusted for changes in stocks of finished goods and work in progress. Receipts for contract and repair and maintenance work are included. The value of goods shipped in the same condition as received is excluded.

Value added is output less the cost of materials and fuels consumed, electricity purchases, contract work and indirect taxes, depreciation, and purchases of non-industrial services. Receipts for non-industrial services performed for others are excluded. Input estimates are made on a received basis, not allowing for changes in stock levels.

Gross fixed capital formation is defined as the value of purchases of fixed assets, including own account construction, less the value of sales. Fixed assets covered are those with a productive life of more than one year and include repairs to existing assets, new assets whether not yet in use, unused, or previously used abroad, and used assets. Valuation is at full cost incurred, including delivered price, cost of installation and fees and taxes. For own-produced assets, the cost of work put in progress covers labour costs, materials and supplies and includes an allocation for overheads. The amount realized is taken for sales of used assets.

## KENYA

**Supplier of information:**

Central Bureau of Statistics, Ministry of Planning and National Development, Nairobi.

**Basic source of data:**

Annual survey of industrial production and, every five years, census of industrial production.

**Major deviations from ISIC (Revision 2):**

Manufacture of metal furniture and fixtures (part of ISIC 381) is classified under ISIC 332, and ISIC 384 includes repair of motor vehicles (part of ISIC major division 9).

**Reference period (if not calendar year):****Scope:**

All establishments.

**Method of enumeration:**

The survey is conducted by mail.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees is the average of the numbers at the beginning and end of the reference year.

Wages and salaries is compensation of employees. It is computed as 12 times the value of wages and salaries for June of the reference year.

Output is gross output and includes gross revenues from goods shipped in the same condition as received.

All value data presented are in Kenya pounds (1Kenya pound = 20 Kenya shillings).

**Related national publications:**

Statistical Abstract (annual), published by the Central Bureau of Statistics, Ministry of Economic Planning and Development, Nairobi.

## KUWAIT

**Supplier of information:**

Central Statistical Office, Ministry of Planning, Safat.

**Basic source of data:**

Annual industrial survey.

**Major deviations from ISIC (Revision 2):**

None reported.

**Reference period (if not calendar year):**

The reference period is the calendar year, but data reported for the financial year are accepted and incorporated in the calendar year in which the major part of the financial year falls. For establishments in the petroleum sector, estimates for the calendar year are made on the basis of the average of the two fiscal years.

**Scope:**

All industrial establishments in the private and public sectors, including establishments with joint private and public ownership.

**Method of enumeration:**

Establishments are covered on a census-cum-sample basis as follows: a) census coverage of all establishments with 10 or more employees as well as establishments in those activities (as defined by a 5-digit code based on the ISIC) containing less than 20 establishments; b) sample coverage of all establishments not covered by the census. These establishments are divided into two groups according to employment levels 1-4 and 5-9 and samples are taken from both groups. Data are collected by trained field enumerators using specially designed questionnaires.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

Annual Survey of Establishments (Industry) and Statistical Abstract (annual), both published by the Central Statistical Office, Ministry of Planning, Safat.

## KYRGYZSTAN

**Supplier of information:**

National Statistical Commission of the Kyrgyz Republic, Bishkek City.

**Basic source of data:**

Annual industrial survey.

**Major deviations from ISIC (Revision 3):**

Data collected under the national classification system have been reclassified by the national authorities to correspond with ISIC (Rev. 3). Lack of detail in national data, however, results in several cases where exact correspondence with the ISIC cannot be achieved.

**Reference period (if not calendar year):****Scope:**

All enterprises operating under an independent regime and enterprises operating under a non-industrial organization regime.

**Method of enumeration:**

Not reported.

**Adjusted for non-response:**

Data refer to all surveyed enterprises.

**Concepts and definitions of variables:**

No deviations from the standard UN concepts and definitions are reported.

**Related national publications:**

## MACAU

**Supplier of information:**

Direcção de Serviços de Estatística e Censos, Macau.

**Basic source of data:**

Annual industrial census.

**Major deviations from ISIC (Revision 2):**

ISIC 383 includes manufacture of electrical office computing and accounting equipment, which is not shown on the detailed industry level. ISIC 390 includes manufacture of toys, which is not shown on the detailed industry level.

**Reference period (if not calendar year):****Scope:**

All legal establishments.

**Method of enumeration:**

The inquiry is carried out through field interviews by enumerators, mail returns and through respondents personal delivery of questionnaires.

**Adjusted for non-response:**

No.

**Concepts and definitions of variables:**

Number of employees is the average of the quarterly numbers.

**Related national publications:**

Inquerito Industrial (annual), published by the Direcção de Serviços de Estatística e Censos, Macau.

## MALAYSIA

**Supplier of information:**

Jabatan Perangkaan (Department of Statistics), Kuala Lumpur.

**Basic source of data:**

Annual Survey of Manufacturing Industries.

**Major deviations from ISIC (Revision 2):**

Data collected under the national classification system have been reclassified by the national authorities to correspond approximately with ISIC (Rev. 2).

**Reference period (if not calendar year):**

Basically, the calendar year. Some establishments, however, report for accounting years not coinciding with the calendar year.

**Scope:**

All establishments registered under the Industrial Coordination Act (I.C.A.) 1975.

**Method of enumeration:**

Establishments are completely enumerated. The annual survey is reviewed after each census to ensure that it covers about the same percentage of manufacturing output, value added and employment in each year. The annual survey is conducted both by mail and through field contacts.

**Adjusted for non-response:**

Yes.

**Concepts and definitions of variables:**

Number of employees includes workers paid through labour contractors.

Output includes gross revenues from goods shipped in the same condition as received.

**Related national publications:**

Survey of Manufacturing Industries (annual); Industrial Surveys, Malaysia (annual); Annual Statistical Bulletin, Malaysia; Monthly Statistical Bulletin, all published by the Jabatan Perangkaan (Department of Statistics), Kuala Lumpur.

## MALTA

**Supplier of information:**

Central Office of Statistics, Valletta.

**Basic source of data:**

Annual census of production.

**Major deviations from ISIC (Revision 2):**

Data concerning ship-repairing activities are excluded because of disclosure rules.

**Reference period (if not calendar year):****Scope:**

All manufacturing establishments.

**Method of enumeration:**

Questionnaires are distributed by mail.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees is the average of the numbers for the last week of each month of the year.

Wages and salaries excludes employees' insurance contributions. Employers' contributions to the national insurance scheme are included.

Output is the value of sales and the net change between the beginning and the end of the year in value of stocks of goods produced. Valuation is at establishment price, excluding any discounts, commissions or rebates, but including charges for delivery.

Value added is output less the cost of materials and fuels used, transport expenses, payments to homeworkers and the value of work given out. Output and value added exclude net revenues from goods shipped in the same condition as received.

Gross fixed capital formation is valued before the addition of legal charges, stamp duties, agent's fees, etc.

**Related national publications:**

Industry Statistics; Annual Abstract of Statistics, both published by the Central Office of Statistics, Valletta.

## MEXICO

**Supplier of information:**

National Institute of Statistics, Geography and Information Technology (INEGI) via the Department of Statistics. Industrial statistics for the OECD countries are compiled by the OECD secretariat, which supplies them to UNIDO.

**Basic source of data:**

*For data based on ISIC (Revision 2):* Annual industrial survey, monthly industrial survey.

*For data based on ISIC (Revision 3):* Economic census conducted approximately every 5 years.

**Major deviations from ISIC:**

*For ISIC (Revision 2):* Industrial-survey data collected under the national classification system have been reclassified by the national authorities to achieve the best possible correspondence with ISIC (Revision 2).

*For ISIC (Revision 3):* Census data collected on ISIC (Revision 2) basis have been converted to ISIC (Revision 3) using equivalence tables.

**Reference period (if not calendar year):****Scope:**

*For data based on ISIC (Revision 2):* The survey covers the largest establishments for selected industries.

*For data based on ISIC (Revision 3):* All establishments are covered.

**Method of enumeration:**

*For data based on ISIC (Revision 2):* The annual industrial survey covers 129 types of economic activity in the manufacturing sector, comprising 3218 establishments, which in turn represent 72% of the statistical range used to calculate total gross output, based on the 1985 industrial census.

The monthly industrial survey covers 205 types of economic activity in the manufacturing sector.

*For data based on ISIC (Revision 3):* The census covers data from all economic units located in towns with 2500 inhabitants or more. Sample surveys for the non-covered areas complemented the census.

**Adjusted for non-response:**

Not reported.

**Concepts and definitions of variables:**

Number of employees covers all permanent and temporary employees who, in the course of the reference year, worked within or outside the establishment, and who were managed or supervised by the establishment.

Wages and salaries covers all wages and salaries that the company has paid to staff during the reference year, as well as money in the form of social security benefits, employers' social security contributions and profit-sharing.

Output refers to total gross output. It is calculated as the total value of goods and services produced by a company, whether they are intermediate goods and services used in the production process or intended for final consumption. This heading includes the value of products made by the establishments using its own raw materials, plus income from assembly services, maintenance and other industrial services, rental and leases, technology transfer, other non-industrial services, sale of electric power produced by the establishment, changes in stocks of work in progress, and the value of fixed assets produced by the establishment for its own use.

Value added is obtained by subtracting the value of inputs (goods and services for intermediate consumption) from total gross output.

Gross fixed capital formation includes purchase of new and used fixed assets, fixed assets produced for own use, major improvements, repairs and renovations carried out by third parties on fixed assets belonging to the establishment and sale of fixed assets. VAT is not included.

**Related national publications:**

*For ISIC (Revision 2):* Estadística Industrial Mensual and Estadística Industrial Anual; both published by the Dirección General de Estadística, Secretaría de Programación y Presupuesto, Mexico.

a/ Data are preliminary results from a monthly survey.

b/ 3131 includes 3132.

c/ 3211 includes 3212.

d/ 3412 includes 3419.

e/ 3823 includes part of 3824 (manufacture, assembly and repair of machinery and equipment, including tractors for the construction, extraction and other industries) and parts of 3849.

f/ 3843 includes parts of 3849.

## Mexico

a/ Data are preliminary results from a monthly survey.

b/ 3131 includes 3132.

c/ 3211 includes 3212.

d/ 3412 includes 3419.

e/ 3823 includes part of 3824 (manufacture, assembly and repair of machinery and equipment, including tractors for the construction, extraction and other industries) and parts of 3849.

f/ 3843 includes parts of 3849.

## Mexico

h/ 381 includes 382, 383, 384 and 385.

## MONGOLIA

**Supplier of information:**

State Statistical Office of Mongolia, Ulan-Bator.

**Basic source of data:**

1991-93 regular reports and sample survey. For 1994 Census of industrial establishments.

**Major deviations from ISIC (Revision 2):**

None reported.

**Reference period (if not calendar year):****Scope:**

*All establishments covered by the report.*

**Method of enumeration:**

The inquiry is carried out through questionnaires.

**Adjusted for non-response:**

Adjustments are made.

**Concepts and definitions of variables:**

Output is different from the standard definition in the accounting of the value of the shipments and receipt from the sale of products. In the present accounting practice, products are shipped out, but not paid off from the stock of shipped products. Therefore, the calculation of the value of goods produced during the reference period on the shipment basis requires two types of stock adjustments: change in stock of shipped goods and change in stock of finished goods.

**Related national publications:**

Report on the Census of Industrial Establishments, 1994, published by the State Statistical Office of Mongolia, Ulan-Bator, in cooperation with UNIDO.
