Terminal Report  
on UNDP Assisted Project CPR/79/020

1. Objectives of the Project

The development objectives of this project are:

- a) To find a better way for China to use computers in industry.
- b) To provide professional knowledge and technical training in order to improve the efficiency and productivity in industry.

The immediate objectives of this project are:

- a) One expert to visit China providing the technical training on microcomputers and the consultation on establishing a microcomputer laboratory in China.
- b) Three fellowships trained abroad for 6 month in computer software.
- c) Equipment for establishing the microcomputer laboratory in China.

2. Activities and Outputs

The major activities carried out are as follows:

- a) Mr. Sunming Cheung, an outstanding expert dispatched to CIRE in 1980, gave a series of lectures on microcomputers and provided the useful consultation.

- b) Three technical persons, Mr.Fengman Zhang from CIRE and Mr.Xilin Zhou and Mr.Xin Li from the computer Research Institute of Northern China, were sent to the Training Center of Honeywell in the U.S. in 1981 to be trained in computer software.
- c) Equipments worth \$56,970 have been purchased.
- d) One technical person, professor Chinte Liu from CIRE was assigned to study tour in the U.S. for about 3 months in 1983 in order to keep abreast of current products and technology in the field of microcomputer.

The arrival of the expert was on time according to the schedule. The dispatch of three trainees was postponed about one year because they had to pass the restricted language examination. Most of equipment for microcomputer laboratory was ordered and delivered on time, except one of them, the Motorola microcomputer development system EXORciser which was not delivered until 1983. This delay is due the difficults in obtaining an export license from the U.S.government. The study tour of prof. Liu suggested by UNDP officer was carried out after his one year advanced study at U.C., Berkeley.

### 3. Achievement of Immediate Objective

The major achievements are:

- a) A small microcomputer laboratory has been set up in CIRE that is enough for making the ball start rolling.
- b) 64 technical persons, including 30 staff members of CIRE, have learned how to use microprocessors and microcomputers and became the early birds in the field of microcomputer application.
- c) 3 technical persons have learned the software of Honeywell computer systems .

### 4. Utilization of Project Results

- a) Based on the establishment of the microcomputer laboratory, a microcomputer development and training centre has been set up by the succeeding UNDP assisted project CPR/80/050.
- b) A microcomputer-based temperature control system has been developed by the staff members in CIRE in cooperation with the Research Institute of Magnetic Material, Mainyay, Sichuan. This system has worked successfully since 1981 for magnetic material smelting. Its control was so precise and reliable that the project was received an award from the Ministry

of Electronic Industry this year. This system has been in small scale production since last year.

- c) A 68000 single board microcomputer has been developed in cooperation with Nanfeng factory in Guizhou, and will be in production.
- d) More than 500 engineers and technicians from factories and research fellows from research institutes were taught to understand how to use microcomputers in industry by the staff members in CIRE ( see Annex E ), who have attended the course given by the UN expert Mr. Sunming Cheung.

#### 5. Conclusion

The UNDP assisted project CPR/79/020 is a farseeing one. It is four years ahead in pointing out that the best way for China to promote computer application in industry is to use microcomputers extensively. This idea is now generally accepted in China. Furthermore, the pioneers in the field of microcomputer applications are brought up and the required tools are acquired. Therefore, this project just likes a seed in the soil which is not big but it becomes fully blooming flower shrubs when spring comes.

#### 6. Recommendations

For the sake of further promoting the microcomputer application in industry, we have suggested the expansion of the microcomputer laboratory in CIRE to a microcomputer development and training centre. This proposal was accepted and granted by UNDP and our Government that causes the project CPR/80/050 comes up.

ANNEX A

International Project Staff

| Name of Expert/<br>Consultant | Country of<br>Origin | Post or Field of<br>Specialization | Duration of Service<br>From | To                 |
|-------------------------------|----------------------|------------------------------------|-----------------------------|--------------------|
| Sunming Cheung                | U.S.A.               | Microcomputer                      | July 15, 1980               | to<br>Sept 5, 1980 |

ANNEX B

National Project Staff

| Name       | Position Held  | Full-time/<br>Part-time |  | Data of Service |      |
|------------|--|-------------------------|--|-----------------|------|
|            |  |                         |  | From            | To   |
| Lansu Ye   | Liaison Officer,<br>Officer of Ministry<br>of Electronic<br>Industry | Part-time               |  | 1979            | 1983 |
| Chinte Liu | National Project<br>Director, Profes-<br>sor of CIRE                 | Part-time               |  | 1979            | 1984 |

ANNEX C

Project Study Tours

| Name of Participant | Place and Institute visited | Field of study   | Period of study | tour |
|---------------------|-----------------------------|------------------|-----------------|------|
|                     |                             |                  | From            | to   |
| Chinte Liu          | IMAG Industries, Inc.,      | Microcomputer    | Jan 16, 1983    |      |
|                     | U.S.A.                      | CAD 85/88        | Feb 21, 1983    |      |
|                     |                             | and IME 11/23    |                 |      |
|                     | Digital World, Inc.,        | Microcomputer    | Feb 22, 1983    |      |
|                     | U.S.A.                      | Dual system 83   | March 31, 1983  |      |

|                     | Rockwell Inter-             | Microcomputer    | April 16, 1983  |      |
|                     | national, U.S.A.            | system 65 and    | April 21, 1983  |      |
|                     |                             | other products   |                 |      |

ANNEX D  
Project Fellowships

| Name of Fellow | Field of Study | Place of Study   | Period of Study<br>from | to          |
|----------------|----------------|------------------|-------------------------|-------------|
| Fengman Zhang  | Software       | Honeywell,U.S.A. | Dec 1,1981              | May 31,1982 |
| Xilin Zhou     | Software       | Honeywell,U.S.A. | Dec 1,1981              | May 31,1982 |
| Xin Li         | Software       | Honeywell,U.S.A. | Dec 1,1981              | May 31,1982 |

Annex E List of nonexpendable equipment provided by  
UNDP for CPR/79/020

---

| No. | Description                   | Qty. |
|-----|-------------------------------|------|
| 1.  | 1607A Logic State Analyser    | 1    |
| 2.  | 546A Logic Pulser             | 1    |
| 3.  | 547A Current Tracer           | 1    |
| 4.  | 548A Logic Clip               | 1    |
| 5.  | LP3 Logic Probe               | 1    |
| 6.  | 203A Breadboard               | 2    |
| 7.  | UVS-11 EPROM Eraser           | 1    |
| 8.  | M43 KSR Teletype              | 1    |
| 9.  | 1520 CRT Terminal             | 1    |
| 10. | 4850-16 Logic Analyser        | 1    |
| 11. | 1632 Channel Expansion Probe  | 1    |
| 12. | 702 Centronics Printer        | 1    |
| 13. | Soldering Tools DC075         | 1    |
| 14. | Motorola EXORciser, including | 1    |
|     | M6800 EXOR32u x1              |      |
|     | N68DSK2-2 x1                  |      |
|     | MEX6832-2 x2                  |      |
|     | M68FTNR012M x1                |      |
|     | MEX 68PI2 x1                  |      |

Annex F  
Training Programme  
Given by CIRE

| Date                    | Place     | Name of Course  | Lecture Hours | Attendance |
|-------------------------|-----------|---|---------------|------------|
| Jan. 1981               | Zhongqing | M6800 Microprocessor<br>Family and Its Appli-<br>cation       | 160           | 70         |
| July 1981               | Mianyuan  | ditto   | 100           | 50         |
| Mar.-April<br>1982      | Chengdu   | ditto   | 200           | 80         |
| May 1982                | Chengdu   | AIM 65 Microcomputer<br>and Its Application                   | 160           | 70         |
| July 1982               | Chengdu   | Z80 Microprocessor<br>and Its Application                     | 30            | 40         |
| Oct. 1982               | Chengdu   | ditto   | 100           | 40         |
| Dec. 1982-<br>Jan. 1983 | Chengdu   | AIM65 Microcomputer<br>and Its Application                    | 150           | 60         |
| Mar. 1983               | Chengdu   | AIM65 Microcomputer<br>and Its Monitor                        | 20            | 50         |
| May 1983                | Chengdu   | 6502 Microprocessor<br>and Its Application<br>in CRT Terminal | 70            | 50         |

Annex G  
Government Inputs (in RMB Yun) Implemented  
for CPR/79/020

| Budget                  | 1980-1982 |
|-------------------------|-----------|
| I. Project Personnel    |           |
| Project director        | 10,800    |
| Chinese experts         | 108,000   |
| Support staff           | 30,000    |
| Subtotal                | 148,800   |
| II. Training            |           |
| Subtotal                | 12,000    |
| III. Equipment          |           |
| Nonexpendable           | 131,500   |
| Expendable              | 20,000    |
| Building reconstruction | 50,000    |
| Subtotal                | 201,500   |
| IV. Miscellaneous       |           |
| Subtotal                | 15,000    |
| Grand Total             | 377,300   |
