## OCCASION

This publication has been made available to the public on the occasion of the 50<sup>th</sup> anniversary of the United Nations Industrial Development Organisation.

**TOGETHER**  
*for a sustainable future*

## DISCLAIMER

This document has been produced without formal United Nations editing. The designations employed and the presentation of the material in this document do not imply the expression of any opinion whatsoever on the part of the Secretariat of the United Nations Industrial Development Organization (UNIDO) concerning the legal status of any country, territory, city or area or of its authorities, or concerning the delimitation of its frontiers or boundaries, or its economic system or degree of development. Designations such as "developed", "industrialized" and "developing" are intended for statistical convenience and do not necessarily express a judgment about the stage reached by a particular country or area in the development process. Mention of firm names or commercial products does not constitute an endorsement by UNIDO.

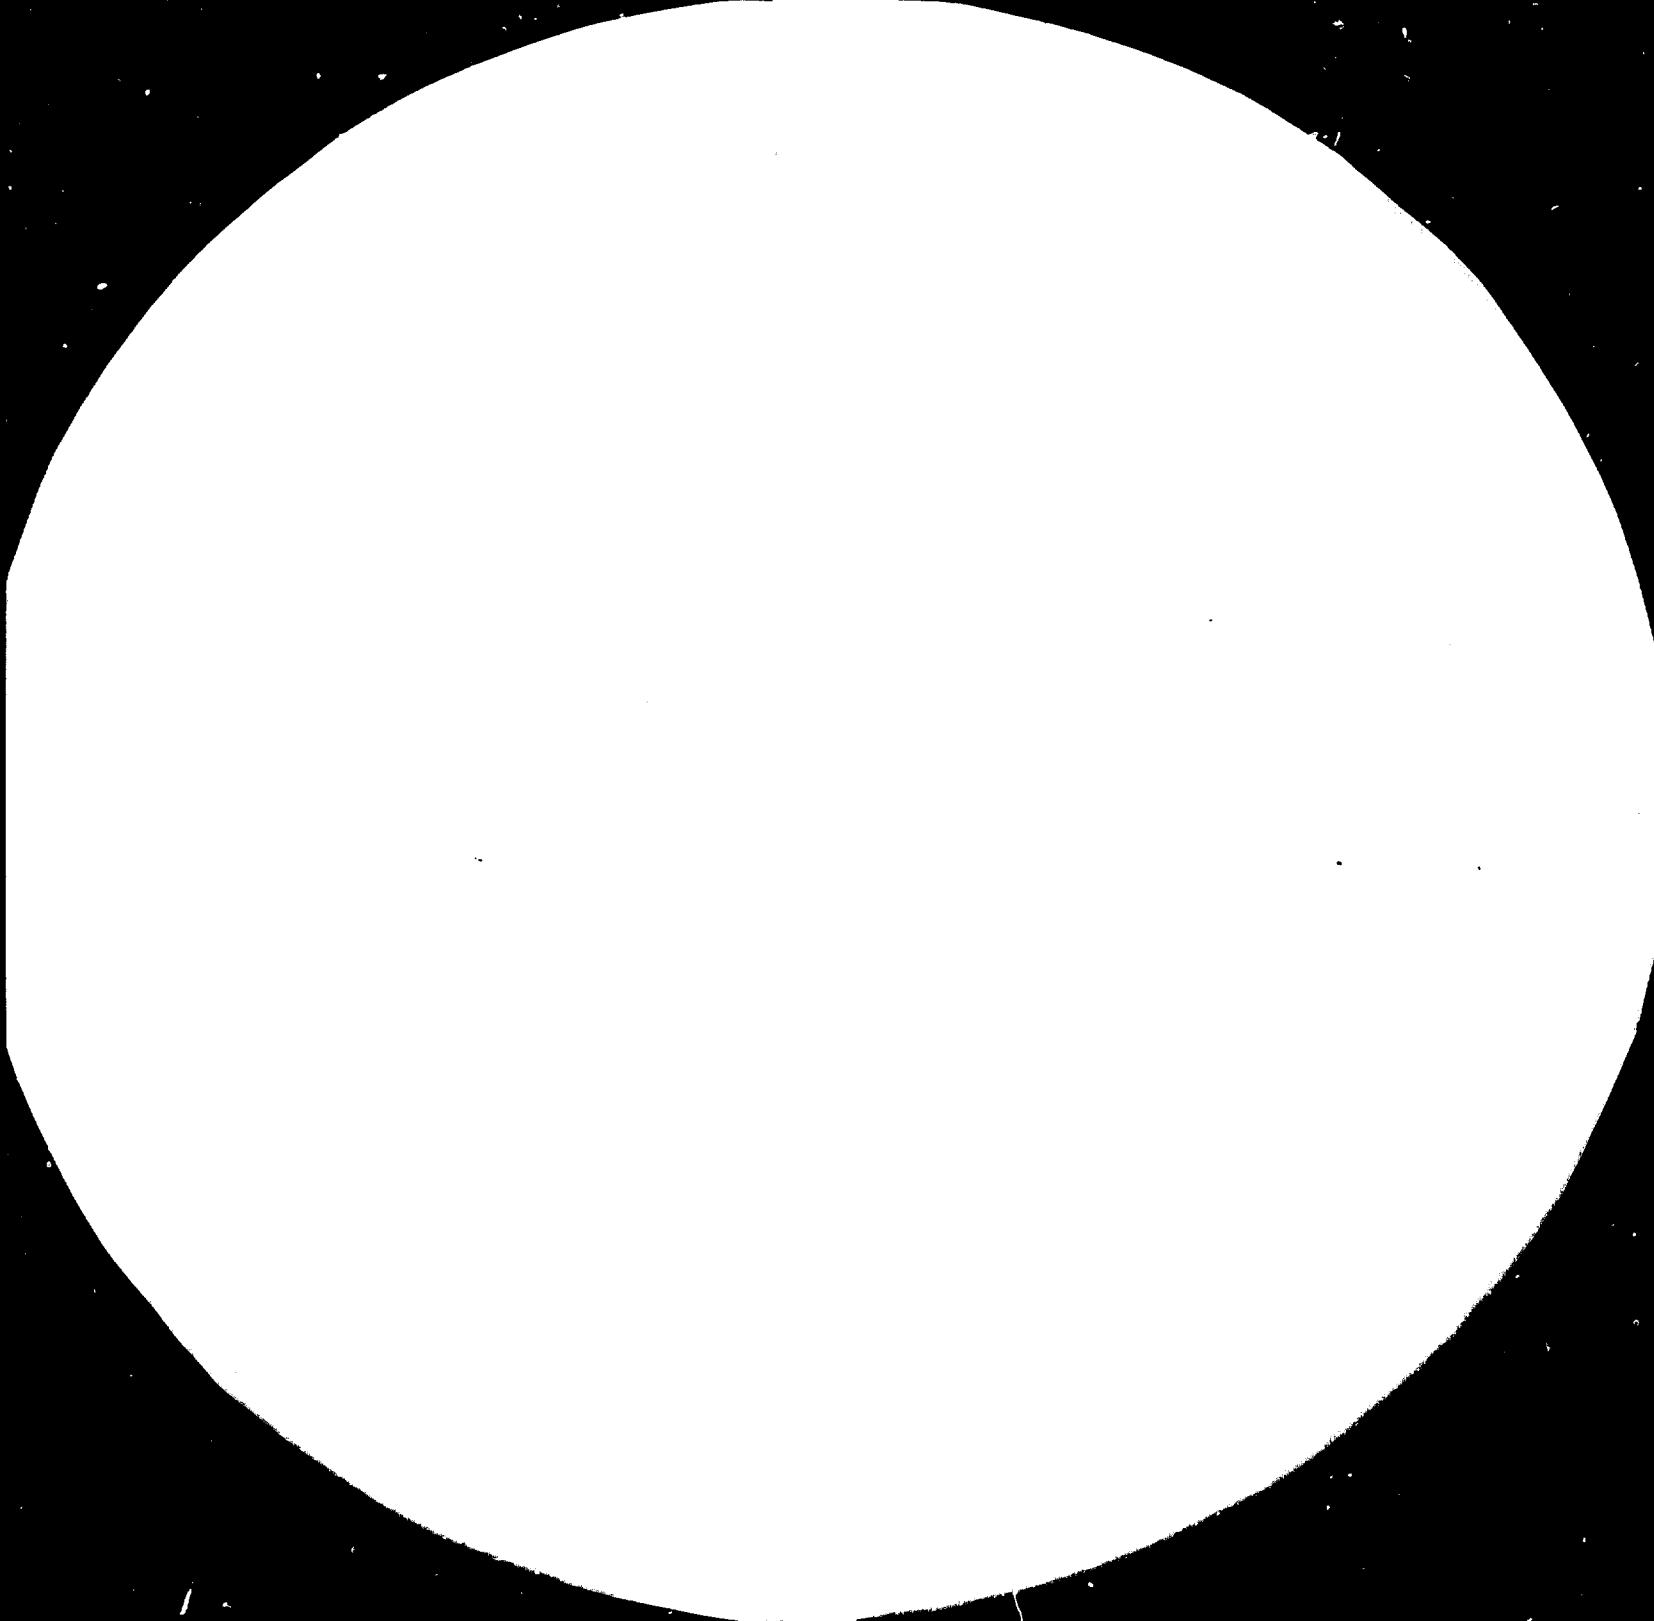

## FAIR USE POLICY

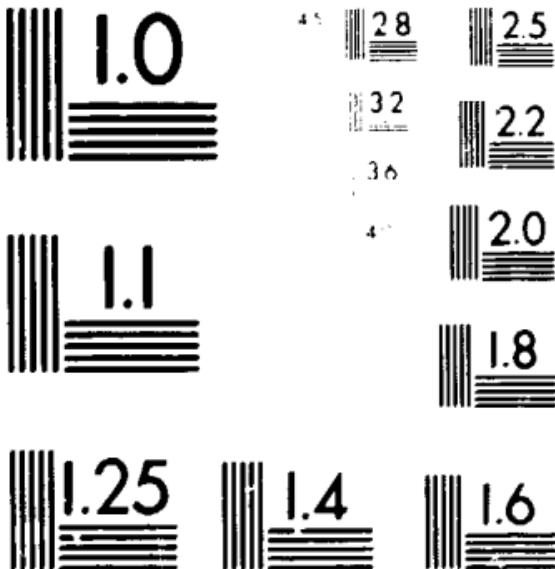

Any part of this publication may be quoted and referenced for educational and research purposes without additional permission from UNIDO. However, those who make use of quoting and referencing this publication are requested to follow the Fair Use Policy of giving due credit to UNIDO.

#### PREFACE

This compilation of industrial training opportunities for personnel from developing countries is the thirteenth edition of a UNIDO publication that first appeared in 1972. It is based on the replies to a questionnaire soliciting information about training facilities, sent to Governments, organizations, institutions and other bodies concerned with industrial training. To reduce the size of this edition, entries listed in earlier issues have not been repeated without a specific request by the organizer to do so. Likewise, a single entry frequently covers several courses given by the same organization. Consequently, the current edition is smaller than earlier ones but contains considerably more information. Its approximately 430 entries cover more than 3,000 training courses. It should be emphasized that while these are but a fraction of the facilities existing globally for industrial training, they are possibilities that Governments and organizations believe are of particular interest to UNIDO.

Reflecting the increasing importance of technical co-operation among developing countries, the number of entries covering training opportunities in those countries continues to grow, and this increase is indicative of the attractiveness and benefit to personnel from developing countries of receiving training in circumstances that are similar to those in their home countries. Moreover, greater use of the facilities in developing countries helps to mitigate the difficulties that sometimes arise in arranging suitable training programmes in industrialized countries, where facilities are often strained.

The Guide is divided into four chapters: (1) training opportunities organized and offered by UNIDO; (2) training opportunities offered by institutions other than UNIDO classified according to A. industrial branches and B. industrial functions, excluding short-term courses of less than half-a-month duration; (3) other courses, and short-term courses that may be of interest as part of longer, more comprehensive training programmes; and (4) fields of training by host country. The training opportunities listed are suitable mainly for technical, managerial and administrative personnel, including entrepreneurs, at the level of engineers (or equivalent) and above, engaged in industry and its development. With a few exceptions, courses in the regular curricula of universities or similar institutions are not included, nor is information on ad hoc training in industry or elsewhere. Part-time courses are also not included.

Chapter (1) follows chronological order, while the entries in chapters (2) and (3) are listed by country in English alphabetical order.

UNIDO is not in a position to give further details on courses offered by other institutions. Readers desiring more information are asked to contact the institutions directly, using the mailing address given in each entry.

The training opportunities listed in the Guide are not limited to holders of UNIDO fellowships. Any qualified individual from a developing country who has not applied for or won a UNIDO fellowship may apply for a course or be nominated to attend. Such applications and nominations may go direct to the organizer of the course. Applicants for UNIDO fellowships, however, must be nominated by their Governments, and the nominations must be sent through the Resident Representative of the United Nations Development Programme (UNDP) to UNIDO. Further information on UNIDO training activities is available from the UNIDO Industrial Training Offer Programme, 1985.

Information on training facilities in a wide range of subjects may be requested from the secretariats of the Economic Commission for Africa (ECA), Addis Ababa; the Economic and Social Commission for Asia and the Pacific (ESCAP), Bangkok; the United Nations Office at Geneva; the United Nations Conference on Trade and Development (UNCTAD), Geneva; the International Labour Organisation (ILO), Geneva; the International Centre for Advanced Technical and Vocational Training in Turin, Italy; the International Maritime Organization (IMO), London; the Food and Agriculture Organization of the United Nations (FAO), Rome; the United Nations Educational, Scientific and Cultural Organization (UNESCO), Paris; the World Intellectual Property Organization (WIPO), Geneva; and other international organizations.

It is hoped that this publication will continue to benefit those in developing countries who are in need of industrial training. The fourteenth edition of the Guide is scheduled to appear in late 1985 and will cover courses to be offered in 1986 and, to the extent possible, 1987.

## PREFACE

Le présent répertoire des possibilités de formation industrielle offertes aux cadres de pays en développement est la treizième édition d'un document de l'ONUDI publié pour la première fois en 1972. Il a été établi d'après les renseignements fournis par un certain nombre de gouvernements, d'organisations et d'institutions s'occupant de formation industrielle en réponse à un questionnaire sur les possibilités de formation qu'ils offraient. Afin de condenser la présente édition, les rubriques qui figuraient déjà dans les éditions précédentes n'ont été réinsérées que sur la demande expresse des organisateurs. Il est également fréquent qu'une rubrique englobe plusieurs stages mis sur pied par une même organisation. En conséquence, la présente édition, moins volumineuse que les précédentes, contient néanmoins beaucoup plus d'informations. Elle compte quelque 430 rubriques concernant plus de 3 000 stages de formation. Il convient de souligner que ces possibilités de formation ne représentent qu'une infime partie de celles qui sont offertes dans le monde entier mais que les organisations et les gouvernements estiment qu'elles présentent un intérêt particulier pour l'ONUDI.

Du fait de l'importance croissante de la coopération technique entre pays en développement, le nombre des possibilités de formation offertes dans ces pays ne cesse d'augmenter, ce qui témoigne des avantages que présente, pour leurs ressortissants, une formation dans des conditions proches de celles de leur pays d'origine. En outre, le recours accru aux moyens dont disposent les pays en développement contribue à atténuer les difficultés que soulève parfois l'organisation de stages de formation appropriés dans les pays industrialisés, où les services compétents ne sont souvent plus en mesure d'accepter un surcroît de travail dans ce domaine.

Le présent répertoire comprend quatre chapitres : 1) possibilités de formation offertes par l'ONUDI elle-même; 2) possibilités de formation offertes par des institutions autres que l'ONUDI, classées par A. secteurs industriels et B. fonctions industrielles, à l'exception des stages de courte durée (moins de 15 jours); 3) stages qui n'entrent pas dans les catégories précitées et stages de courte durée qui peuvent utilement s'insérer dans des programmes de formation plus longs et plus vastes; 4) domaines de formation, par pays. Les possibilités de formation énumérées sont destinées avant tout au personnel technique et administratif (ingénieurs ou équivalents et personnel de rang supérieur) et aux chefs d'entreprise qui travaillent dans l'industrie et participent à son développement. A quelques exceptions près, les matières figurant ordinairement au programme des universités et des établissements similaires n'ont pas été retenues, non plus que les renseignements concernant des programmes spéciaux de formation organisés notamment dans l'industrie. Il en a été de même pour les stages à temps partiel.

Pour le chapitre premier, on a adopté l'ordre chronologique, tandis que dans les chapitres II et III, les possibilités de formation énumérées sont classées dans l'ordre alphabétique anglais des pays hôtes.

Pour obtenir de plus amples renseignements sur les stages autres que ceux organisés par l'ONUDI elle-même, on se mettra en rapport directement avec les institutions intéressées; leurs adresses figurent dans les rubriques consacrées aux stages qu'elles organisent.

Les moyens de formation indiqués ne sont pas réservés exclusivement aux titulaires de bourses de l'ONUDI. S'il remplit les conditions requises, tout ressortissant d'un pays en développement peut demander à participer à l'un de ces stages ou à être désigné pour y participer. Dans le cas des personnes n'ayant pas sollicité ou obtenu une bourse des Nations Unies, les demandes ou les candidatures peuvent être présentées directement à l'organisateur du stage considéré. Les candidats à des bourses de l'ONUDI doivent être désignés par leurs gouvernements et leurs dossiers doivent être soumis à l'Organisation par l'intermédiaire du Programme des Nations Unies pour le développement (PNUD). Pour tous renseignements complémentaires sur les activités de formation de l'ONUDI, prière de consulter la brochure intitulée "Programme de formation industrielle proposé par l'ONUDI pour 1985".

Des renseignements sur les possibilités de formation dans de nombreux domaines peuvent être obtenus auprès du secrétariat de la Commission économique pour l'Afrique (CEA), à Addis-Abeba; de la Commission économique et sociale pour l'Asie et le Pacifique (CESAP), à Bangkok; de l'Office des Nations Unies à Genève; de la Conférence des Nations Unies sur le commerce et le développement (CNUCED), à Genève; de l'Organisation internationale du Travail (OIT), à Genève; du Centre international de perfectionnement professionnel et technique de Turin (Italie); de l'Organisation maritime internationale (OMI), à Londres; de l'Organisation des Nations Unies pour l'alimentation et l'agriculture (FAO), à Rome; de l'Organisation des Nations Unies pour l'éducation, la science et la culture (UNESCO), à Paris; de l'Organisation mondiale de la propriété intellectuelle (OMPI), à Genève; et d'autres organisations internationales.

L'ONUDI espère que la présente publication sera aussi utile que les précédentes à ceux qui, dans les pays en développement, ont besoin d'une formation industrielle. La quatorzième édition du répertoire, qu'il est prévu de publier à la fin de 1985, indiquera les possibilités de formation offertes pour l'année 1986 et, dans la mesure du possible, pour l'année 1987.

#### PREFACIO

La presente compilación de oportunidades de capacitación industrial para personal de países en desarrollo constituye la décimo tercera edición de una publicación de la ONUDI que apareció por vez primera en 1972. Está basada en las respuestas a un cuestionario enviado a gobiernos, organizaciones o instituciones y otras entidades que se ocupan de capacitación industrial, solicitando información sobre servicios e instalaciones para este objeto. A fin de reducir las dimensiones de esta edición, no se ha repetido ninguna entrada que figurase en ediciones anteriores sin una solicitud expresa de la entidad organizadora. Asimismo, una sola entrada sirve, a menudo, para reseñar diversos cursos impartidos por la misma organización, lo que explica que la presente edición, pese a ser más pequeña, contenga bastante más información que las anteriores. El Repertorio contiene aproximadamente 430 entradas y facilita información sobre más de 3.000 cursos de capacitación. Si bien estas cifras no pasan de ser una fracción de las oportunidades de capacitación industrial existentes en todo el mundo, cabe señalar que se trata de oportunidades consideradas por los gobiernos y las organizaciones competentes como de particular interés para la ONUDI.

Como resultado de la creciente importancia de la cooperación técnica entre países en desarrollo, sigue en aumento el número de entradas sobre oportunidades de capacitación en esos países, lo que denota también el atractivo y los beneficios que presenta para personal de países en desarrollo el recibir capacitación en condiciones similares a las del propio país. Además, el recurrir en mayor medida a los servicios de esta índole existentes en los países en desarrollo contribuye a aliviar las dificultades que a veces entraña la organización de cursos de capacitación adecuados en los países industrializados, cuyos servicios están ya excesivamente recargados.

El Repertorio está dividido en cuatro capítulos: 1) oportunidades de capacitación organizada y ofrecida por la ONUDI; 2) oportunidades de capacitación ofrecidas por instituciones distintas de la ONUDI y clasificadas de la siguiente manera: A. ramas industriales y B. funciones industriales, que no sean cursos cortos, de menos de medio mes de duración; 3) otros cursos, y cursos cortos que puedan ofrecer interés como componentes de programas de capacitación de contenido más amplio y de mayor duración y 4) esferas de capacitación facilitada por el país huésped. Las oportunidades de capacitación aquí compiladas corresponden principalmente a las necesidades del personal técnico, directivo y administrativo, incluidos los empresarios, a nivel de ingenieros (o equivalente) y personal de categoría superior, dedicado a actividades relacionadas con la industria y su desarrollo. Con escasas excepciones, no se han incluido ni los cursos que forman parte de los planes de estudio ordinarios de universidades o instituciones similares, ni la información relativa a la capacitación especial impartida en la industria o en otros centros. Tampoco se han incluido los cursos a tiempo parcial.

En el capítulo 1) se sigue el orden cronológico, mientras que en los capítulos 2) y 3), las entradas se presentan en el orden alfabético inglés de los países en que se ofrece la capacitación.

La ONUDI no está en condiciones de dar más detalles sobre los cursos que ofrecen otras instituciones. Se ruega a los lectores que deseen información adicional al respecto que se dirijan directamente a esas instituciones, cuyas direcciones figuran junto a cada entrada.

Las oportunidades de capacitación compiladas en el Repertorio no se ofrecen sólo a becarios de la ONUDI. Cualquier persona calificada de un país en desarrollo que no haya solicitado u obtenido una beca de la ONUDI puede solicitar su admisión o ser presentada como candidato para participar en uno de estos cursos. Esta solicitud y su candidatura pueden dirigirse directamente al organizador del curso. En cambio, las candidaturas a becas de la ONUDI deben ser presentadas a la Organización por los respectivos gobiernos, por conducto del Representante Residente del Programa de las Naciones Unidas para el Desarrollo (PNUD). En el Programa de Ofertas de Capacitación Industrial, de la ONUDI, para 1985, se ofrece más información sobre las actividades de capacitación de la ONUDI.

Puede solicitarse información sobre servicios de capacitación, en muchas materias, a las secretarías de la Comisión Económica para África (CEPA), Addis Abeba, la Comisión Económica y Social para Asia y el Pacífico (CESPAP), Bangkok, la Oficina de las Naciones Unidas en Ginebra, la Conferencia de las Naciones Unidas sobre Comercio y Desarrollo (UNCTAD), Ginebra, la Organización Internacional del Trabajo (OIT), Ginebra, el Centro Internacional de Perfeccionamiento Profesional y Técnico, de Turín (Italia), la Organización Marítima Internacional (OMI), Londres, la Organización de las Naciones Unidas para la Agricultura y la Alimentación (FAO), Roma, la Organización de las Naciones Unidas para la Educación, la Ciencia y la Cultura (UNESCO), París, la Organización Mundial de la Propiedad Intelectual (OMPI), Ginebra, y otras organizaciones internacionales.

Se espera que esta publicación siga beneficiando a aquellas personas de los países en desarrollo que requieran capacitación industrial. La publicación de la décimo cuarta edición de este Repertorio está prevista para finales de 1985; comprenderá los cursos que se ofrecerán en 1986 y, en la medida de lo posible, en 1987.

#### CHAPTER 1: TRAINING OPPORTUNITIES OFFERED BY UNIDO

UNIDO organizes group training programmes for technical and managerial personnel in industry and industrial institutions in developing countries, in co-operation with Governments, firms and organizations having specialized knowledge and experience in a particular field. Two kinds of training are offered: in-plant training programmes, which last from two to five months, and seminars and other group training programmes, lasting from one to six weeks.

The objectives of the in-plant training programmes are to furnish the participants with intensive practical experience in a relatively short time and to upgrade their theoretical knowledge. The programmes are monitored by experts and usually include four elements: a theoretical introduction, studies, actual in-plant training, and study tours. At the end of each programme, an evaluation session is held, during which participants are provided with the opportunity to assess the value of what they have learned in the light of conditions in their home countries. The seminars and other group training programmes have the same objectives. They offer theoretical instruction and, to the extent feasible, practical work.

At the time of the publication of this Guide, the UNIDO group training programmes shown in the list below are scheduled to take place in 1985. They are all organized subject to the availability of funds and suitable host facilities. The programmes are held on a regional or interregional basis, this being clearly indicated for each of the programmes listed. Please note that the language in which the course will be conducted is shown for each programme; it is essential that participants master that language to obtain maximum results out of the programme.

Formal applications for participation should be submitted to UNIDO through appropriate government channels and UNDP resident representatives only after the official invitation requesting nomination of candidates has been received. Apart from that, however, Governments are asked to notify UNIDO as early as possible of their interest in participating.

The general requirements for admission are an academic degree and several years of practical experience in the particular field.

Further information may be obtained from:

Training Branch, DIO  
United Nations Industrial Development Organization  
P.O. Box 300,  
A-1400 Vienna, Austria

Any query regarding these programmes should however reach UNIDO sufficiently in advance to allow time for the channelling of communications.

## CHAPITRE I : POSSIBILITES DE FORMATION OFFERTES PAR L'ONUDI

L'ONUDI organise, en coopération avec les gouvernements des pays hôtes et avec le concours d'entreprises industrielles et d'instituts spécialisés dans les domaines considérés, des stages de formation en groupe à l'intention du personnel technique et des cadres de gestion des entreprises et instituts industriels des pays en développement. L'Organisation propose deux types de formation : stages de formation collective en entreprise, qui durent de deux à cinq mois, et séminaires ou autres stages de formation collective qui durent de une à six semaines.

Les stages de formation collective en entreprise ont pour objectifs de permettre aux participants d'acquérir, dans un laps de temps relativement court, une solide expérience pratique et de parfaire leurs connaissances théoriques. Ils sont dirigés par des experts et comprennent en général quatre parties, à savoir une introduction théorique, des études, une formation pratique dans des entreprises et des visites d'établissements. Tous les stages se terminent par une session d'évaluation au cours de laquelle les participants évaluent les connaissances qu'ils ont acquises, eu égard aux conditions existant dans leur pays d'origine. Les séminaires et les autres stages de formation collective répondent aux mêmes objectifs et comportent une formation théorique et, dans la mesure du possible, des travaux pratiques.

Au moment de la publication du présent répertoire, les programmes de formation groupés de l'ONUDI mentionnés sont programmés pour être organisés en 1985. Tous sont organisés sous réserve de disposer de fonds nécessaires et de trouver, dans le pays d'accueil, des moyens de formation adéquats. Les programmes sont organisés sur une base régionale ou interrégionale; ceci est clairement indiqué pour chacun des programmes figurant dans la liste. Il est à noter que la langue dans laquelle le cours sera conduit est mentionnée pour chaque programme. Il est essentiel que les participants maîtrisent cette langue pour retirer le maximum de résultats du programme.

Les candidatures ne doivent être présentées à l'ONUDI par l'intermédiaire des services officiels compétents et du Représentant résident du PNUD qu'après réception de l'invitation officielle demandant l'envoi de candidatures; les gouvernements sont en outre priés de faire savoir le plus rapidement possible à l'ONUDI s'ils envisagent de présenter des candidats à tel ou tel stage.

Les conditions générales d'admission sont les suivantes : être titulaire d'un diplôme universitaire (ou l'équivalent) et justifier de plusieurs années d'expérience dans le domaine sur lequel porte la formation.

De plus amples renseignements sur les stages peuvent être obtenus à l'adresse suivante :

Service de la formation  
Division des opérations industrielles  
Organisation des Nations Unies pour le développement industriel  
Boîte postale 300,  
A-1400 Vienne (Autriche)

Toute demande d'information concernant les programmes doit cependant parvenir suffisamment à l'avance à l'ONUDI afin de donner un laps de temps suffisant pour permettre l'échange de communication.

#### CAPITULO 1: OPORTUNIDADES DE CAPACITACION OFRECIDAS POR LA ONUDI

La ONUDI, con la colaboración de diversos gobiernos así como empresas y organizaciones poseedoras de experiencia y conocimientos especializados, organiza programas de capacitación colectiva destinados a personal administrativo y técnico de categoría superior de la industria y las instituciones industriales de países en desarrollo. Se ofrecen dos tipos de capacitación: programas de capacitación colectiva en el trabajo, que duran de dos a cinco meses, y seminarios y otros programas de capacitación colectiva, de una a seis semanas de duración.

Los objetivos de los programas de capacitación colectiva en el trabajo consisten en dar a los participantes, en un espacio de tiempo relativamente corto, la posibilidad de adquirir experiencia práctica intensiva y de ampliar sus conocimientos teóricos. Los programas son supervisados por expertos y, en general, constan de cuatro elementos: una introducción teórica, los estudios, la capacitación misma en el trabajo, y viajes de estudio. Cada programa termina con una sesión de evaluación, en la cual los participantes examinan la utilidad de lo que han aprendido, a la luz de las circunstancias existentes en sus respectivos países. Los seminarios y demás programas de capacitación colectiva tienen los mismos objetivos: ofrecen enseñanza teórica y, en la medida de lo posible, estudios prácticos.

En el momento de publicarse esta Guía, los programas de capacitación colectiva de la ONUDI mencionados en esta lista están programados para llevarse a cabo en 1985. La organización de cada uno de estos programas está sujeta a la disponibilidad de los recursos financieros necesarios así como la disponibilidad de una infraestructura de capacitación adecuada por la entidad huésped. Los programas se celebrarán con carácter regional e interregional, esto está claramente indicado para cada programa anunciado. Por favor, nótese que la lengua en la cual el curso será conducido, será indicado en cada programa. Es esencial que los participantes dominen esta lengua para obtener los mayores resultados del programa.

Las solicitudes oficiales de participación deben presentarse a la ONUDI a través de los conductos gubernamentales apropiados y por medio del Representante Residente del Programa de las Naciones Unidas para el Desarrollo, pero sólo después de recibida la invitación oficial en la que se pide la designación de candidatos. No obstante, se ruega a los Gobiernos que notifiquen a la ONUDI, lo antes posible, su interés por participar en estos programas.

Los requisitos generales de admisión son un título universitario (o su equivalente) y varios años de experiencia práctica en la esfera respectiva.

Puede obtenerse mayor información sobre estos programas escribiendo a:

Subdivisión de Capacitación, DOI  
Organización de las Naciones Unidas para el Desarrollo Industrial  
P.O. Box 300,  
A-1400 Viena (Austria)

Cualquier pregunta concerniente a estos programas deberá ser recibida en la ONUDI con suficiente anticipación a fin de permitir elaborar su adecuada respuesta.

JANUARY - JANVIER - ENERO

Planification industrielle	<p>Ce séminaire s'adresse à des ingénieurs, économistes, agronomes, sociologues, fonctionnaires ayant une expérience dans le domaine de la planification. Il a pour objectif d'une part de passer en revue les différentes stratégies industrielles mises-en oeuvre dans les structures de la planification globale du développement, et d'autre part, d'inciter les participants au partage de leurs expériences respectives en matière de planification industrielle. La finalité est la prise de conscience des difficultés et avantages de la planification régionale.</p>	<p>Agence de Coopération Culturelle et Technique Ecole Internationale de Bordeaux Bordeaux France</p>	07/01-08/02	<p>Programme régionale pour l'Afrique</p> <p>Français</p>	Candidats disposant d'une expérience de plusieurs années et ayant un emploi.
Quality improvement of industrial products	<p>Fundamental concepts and techniques of quality control; quality assurance and inspection; theory on standardization and implementation of quality management; quality planning, quality design, new products development and marketing; practical in-plant training on process improvement, standardization and quality assurance. Plant visits and study tours.</p>	<p>Japanese Association for Overseas Technical Scholarship (AOTS) Tokyo Japan</p>	24/01-22/03	<p>Interregional programme</p> <p>English</p>	<p>University or college graduates in engineering (or equivalent); quality managers, production managers or other managers of an industry with currently more than five years of supervisory experience in production, concerned with problems of quality improvement.</p>
Energy efficiency	<p>Participants from least developed countries will gain from the experience of another developing country and the advances achieved thus providing participants with more working knowledge on the various aspects of energy management and efficiency and equipping them with various tools and techniques in achieving fuel efficiency and in increasing energy productivity.</p>	<p>Technical Assistance Council (TAC) of the Philippines Bureau of Energy Utilization Productivity and Development Centre Manila Philippines</p>	30/01-27/02	<p>Interregional programme</p> <p>English</p>	<p>University degree in mechanical, electrical or chemical engineering (or equivalent) with at least two years of experience in plant or production engineering, or consultancy in energy management at the plant level. Preference will be given to candidates who could generate a "multiplier" effect, provided that such candidates meet the stipulated qualifications.</p>

FEBRUARY - FEVRIER - FEBRERO

Metalworking industry	Planning, executing and supervising of the manufacturing processes of machine parts; design of jigs and mixtures, design and use of cutting tools; operation and maintenance, quality control and economics of metalworking operations, etc. Practical studies in laboratories and in-plant training in metalworking. (13 to 15 big machine producing factories.)	Lumumba University Moscow Union of Soviet Socialist Republics	04/02-01/06	Interregional programme English	A degree in mechanical engineering (or equivalent) with at least three years of practical experience in a supervisory or managerial capacity in metalworking, particularly machine tool operations, planning, manufacture and maintenance and repair.
-----------------------	---	---	-------------	------------------------------------	---

MARCH - MARS - MARZO

Financement et évaluation des projets de développement	Ce séminaire de perfectionnement s'adresse à des responsables du ministère du Plan, ou du Développement rural, ingénieurs économistes chargés de projets. Il a pour objectifs de leur faire acquérir une meilleure vision globale des différentes étapes du développement d'un projet d'investissement depuis l'identification jusqu'à sa réalisation et d'améliorer leur capacité à l'issue de ce séminaire, de participer effectivement à des études de project dans le cadre de leur spécialité.	Agence de Coopération Culturelle et Technique Ecole Internationale de Bordeaux Bordeaux France	04/03-05/04	Programme interregionale Français	Candidats disposant d'une expérience de plusieurs années et ayant un emploi.
Technology and equipment in electric welding	Technology and equipment for electric fusion, resistance, welding processes, modern welding, arc power resources, welding material and structures, constructive technological designing of welded material, etc. In-plant training in plants manufacturing electric welding equipment, metallurgy industry as well as laboratories.	E.O. Paton Electric Welding Institute Kiev Ukrainian Soviet Socialist Republic	15/03-03/07	Interregional programme English	A university degree (or equivalent) in electrical or mechanical engineering with at least three years of practical experience related to electric welding.
Iron and steel industry technology	Theory in technological process of equipment, economic planning, management, maintenance. In-plant training in foundry, blast furnace, sintering plant, open hearth plant, rolling mills, refractory maintenance.	Zaporoz Steel Zaporozhe Ukrainian Soviet Socialist Republic	18/03-17/07	Interregional programme English	Metallurgical, chemical, electrical or mechanical engineering degree and directly engaged in one of the production activities. Technical fields of iron and steel industry. Practical experience should not exceed three years.

Grain milling and storage (with aspects of training of trainers).	Phase covers technological aspects: technology and equipment of elevators processing of grain, production of loose and granulated mixed fodders, quality control of grain, flour and mixed fodders, etc. Lecture type instruction, practical studies in laboratories and in-plant training in selected enterprises. Phase II or (trainers training): personnel management concept; management of the training function in the plant; determination and analysis of training needs; concepts of learning psychology; use and development of audio-visual equipment and materials for training; individualized and group training methods; curriculum development; evaluation and follow-up of training; training of managers and workers; practice in conducting training sessions.	Institute for Advanced Training of Managers and Specialists of the USSR Ministry of State Purchases	26/03- 19/07	Interregional programme English	Educational background (University degree or equivalent) related to technological science; managerial or supervisor post in a grain milling enterprise or in a governmental or semi-governmental body dealing with grain milling enterprises and at least three years of practical experience. Candidates are expected to carry out training activities in their home countries upon completion of the programme.
Technology and training methodology in diesel engines	Practical know-how and experience in technological economical and managerial aspects on the utilization, operation and maintenance; design and production of diesel engines and spare parts. In-plant training in the production plants on manufacturing of diesel engines and spare parts or on maintenance operations (with training methodology aspects).	IIS-Institute Prague Czechoslovakia	26/03- 20/06	Interregional programme English	A university degree in mechanical engineering (or equivalent) and a few years of practical experience in a responsible capacity in state-owned or private enterprise in operation and/or overall maintenance and repair of diesel engines, design or production of such engines or spare parts.
Maintenance of gas and oil transportation networks	Theory and practice of designing oil and gas transportation systems. Operation, problems of operation and maintenance, telemetry and remote control of oil and gas pipelines. Technological instrumentation of oil and gas pipelines. Problems of operation and maintenance of remote control, telemetric and instrumentation systems. Telecommunication within the oil and gas pipeline system. Visits to plants and practical training.	Hungarian Gas and Oil Transportation Company's Educational Centre Siofok Siofok Hungary	March/ April 6 weeks	Interregional programme English	Engineers and technicians with experience in the field of maintenance of gas and oil transportation networks and related telecommunications.

Maintenance  
industrielle

Technology of  
mineral fertilizer  
production

Theoretical part covers  
lectures and discussions  
on various subjects of  
nitrogen and phosphate  
fertilizers. Technology and  
planning of mineral fertilizer  
production. Raw material,  
present development prospects  
of world production of mineral  
fertilizers. Key processes and  
operations and their economic  
evaluation. It is followed by  
one month in-plant training at  
nitrogen fertilizer plants in  
the USSR.

Institute of Nitrogen  
Industry

Mars/ avril	Programme national Cameroun  Français	Ingénieurs/techniciens (chef de maintenance, chefs d'exploitation, chef de production, directeurs techniques, chefs d'entreprises).
05/04- 03/07	Interregional programme  English	A university degree (or equivalent) in chemical engineering or chemistry and at least three years of practical experience in a super- visory or managerial capacity in the fertilizer industry.
16/04- 24/06	Español	Pueden participar en este programa candidatos de ambos sexos, que deberán ser graduados universi- tarios o poseer un historial académico equivalente, y tener varios años de experiencia práctica en el campo de la información y/o tecnología, en el funcionamiento de centros de información existentes o en el estable- cimiento de centros nuevos.

Techniques de gestion dans l'industrie manufacturière	Techniques de gestion de la production, notamment normalisation : planification du contrôle de la qualité, eu égard plus particulièrement à la fabrication de produits pour l'exportation. Stages individuels de formation pratique dans l'industrie.	Ecole supérieure des sciences économiques et sociales (ESSEC) Université du Cameroun en coopération avec l'Institut d'administration et de gestion de l'Université de Louvain Douala, Cameroun	Avril/mai	Programme régional pour l'Afrique	Être titulaire d'un diplôme d'ingénieur (ou d'un diplôme équivalent) justifier d'une expérience pratique de trois ans au moins et occuper un poste de responsabilité dans les services de production d'une entreprise industrielle privée ou publique.
Cement Industry technology	The programme concentrates on technical aspects of cement industry and includes technical subjects such as feasibility studies, raw materials, production management technologies, quality control, maintenance, energy conservation, pollution and polluted control.	Cement Research and Development Centre Ankara Turkey	April/May	Interregional programme	Chemical, mechanical, electrical or relevant branch of engineering degree; one to five years practical experience and employed with cement industry.
Industrial planning	Technical aspects of industrial planning at different levels. Uniform systems of industrial planning on national, sectoral and factory level (long-term forecasts, long-term, medium-term and annual plans). Organs of planning co-ordination of the national industrial development plans at international level.	Institute of Economy of Developing Countries Berlin German Democratic Republic	April/May 4 weeks	Interregional programme	Senior positions with government or public enterprises with academic background and/or extensive experience in industrial planning preferably at national, sectoral and branch levels. Good English.
Machine tool programming and operation	Principles and theory of operation, basic components and operation of NC installations; history and development of NC; coding and controlling media; classification of NC; Computerized Numerical Control (CNC) - theory of operation, comparison with conventional NC; block formats and command functions; training operation programming; milling/drilling/boring operation programming; manual and computer assisted part-programming; organizing for numerical control. Plant visits and study tours foreseen.	State Economic Corporation "Machine Tool Plants", Machine Tool Institute, NV/CAM Metalworking Development Centre, Sofia, Bulgaria	April/May 7 weeks	Interregional programme	Production engineers, process planners and intended machine tool operators with knowledge of basic trigonometric functions and co-ordinate geometry.

Design and pattern-making techniques in the shoe and leather goods industries	Traditions and theory of management in leather industry; pattern and creative design; pattern cutting; pattern making; shoe production; leather goods products.	Jesi, Ancona Italy	April/ June 12 weeks	Arab and Asian regions English	Instructors in leather training/research institutes or supervisors/ designers in manufacturing units of leather products industry having at least three years on-the-job practical experience in leather products industry.
---	---	--------------------	-------------------------	-----------------------------------	---

MAY - MAI - MAYO

Industrial project preparation, evaluation and financing	Outline of project development cycle, market analysis and market capacity. Technical analysis of industrial project. Financial analysis and evaluation (compounding and discounting, cash-flow tables, net present value, internal rate of return and other financial ratios, break-even point, sensitivity analysis) sources of financing. Economic analysis (shadow-price method, value added and effects method, OECD and World Bank method). Elements of investment promotion and implementation.	Central School of Planning and Statistics Warsaw Poland	06/05- 21/06	Interregional programme English	University degree in economics, business administration or engineering and at least 2 years of practical experience in project preparation evaluation - English indispensable.
Methods and techniques of pesticide production and formulation	Development of pesticide chemicals, plant design environmental considerations, equipment used in pesticide formulation, testing of products, formulation of granular and wettable powders, dusts, aerosols, baits and emulsifiable compositions, packaging, quality control distribution. Study tours to major pesticide industries.	Karl Marx University Leipzig German Democratic Republic	13/05- 23/06	Interregional programme English	A university degree (or equivalent) in agricultural or chemical engineering or chemistry and at least three years of practical experience in a supervisory or managerial capacity in the production and formulation of pesticides.
Metallurgical Industries	The programme in the field of computerized maintenance systems in metallurgy will be the third in a planned series and designed for maintenance managers, planners, engineers and computer specialists in the principles and techniques of computerized maintenance systems.	Institute for Automation and Industrial Management (INORGA) Prague Czechoslovakia	May/June 3 weeks	Interregional programme to be decided English	Degree in metallurgy mechanical, industrial or management engineering, position related to either maintenance or application computer information systems.

Seminario sobre  
embalaje

Funciones y normalización de  
embalajes y tipos de  
empaqueaduras, costos y  
análisis de valor sobre  
embalajes. Control de calidad.  
Comercio y aspectos administrati-  
vos en la industria del  
embalaje. Cartón ondulado,  
madera, láminas de plástico y  
sus compuestos.

Repair and  
maintenance of  
diesel engines

The basic working principles, construction and general characteristics of high speed diesel engines, the basic work involved in the assembly inspection and adjustment of such engines and the techniques of their installation, maintenance, overhaul and repair.

Ministry of Agricultural  
Machinery, Shanghai  
Diesel Engines Works  
Shanghai  
China

Iron and steel  
industry  
technology

Theory in technological process of equipment, economic planning, management, maintenance. In-plant training in foundry, sintering plant, open hearth plant, rolling mills, refractory maintenance.

Zaporozh-Steel  
Zaporozhye  
Ukrainian Soviet  
Socialist Republic

Design and manu-  
facturing of  
agricultural  
machinery

With emphasis on practical training, the programme will cover operations related to casting, heat treatment, moulding, design, manufacturing processes, construction and operation of agricultural machinery including walking tractors and quality control.

ZHENJIANG Institute of  
Agricultural Machinery  
Zhenjiang  
China

Environmental  
assessment and  
management aspects  
of air and water  
pollution from  
industry

Analysis of air, water and soil pollution and industrial waste. Theoretical instructions and practical exercises in laboratories study visits to purifications plants and environmental control installations.

State University of Ghent  
Ghent  
Belgium

July	Interregional programme	Mechanical engineering degree, three to five years experience with supervisory responsi- bilities in maintenance, repair and overhaul of diesel engines.
26/08- 25/11	Interregional programme	Metallurgical, chemical, mechanical engineering degree and directly engaged in one of the production activities. Technical fields of iron and steel industry. Practical experience minimum three years.
August/ November	Interregional programme	Agricultural or mech- anical engineering with three to five years practical experience in manufacturing or farm machinery imple- ments and industry supervisory responsi- bilities.
August/ September	Interregional programme	Degree either in chemistry, biology, geology, or pharmacy with experience and responsibilities related to environmental pollu- tion problems.

Furniture and  
joinery industries

Based on seminars held yearly in Lahti, Finland, this course will cater for the needs of the least developed countries and is intended to give the participants an insight into efficient industrial serial production and modern techniques of the furniture and joinery industries. Methods for modernization and rationalization of the wood-processing sector will be highlighted and the prerequisites for the establishment of this industry in developing countries on a sound basis will be identified.

Lahti  
Finland

Technology and  
equipment in  
electric welding

Technology and equipment for electric fusion, resistance, welding processes, modern welding, arc power resources, welding material and structures, constructive technological designing of welded material etc. In-plant training in plants manufacturing electric welding equipment, metal-working industry as well as laboratories.

E.O. Paton Electric  
Welding Institute  
Kiev  
Ukrainian Soviet  
Socialist Republic

Repair and  
maintenance of  
medium/small  
ships

Theory in ships, materials, engines, pumps, electronics, electricity, equipment, maintenance. Practical training on a medium ship-wharf; building of small vessels, repairs, ship repair workshop, training on board of the ship in the port.

Antwerp Port Engineeri  
and Consulting (APEC)  
Apec  
Belgium

August  
3 weeks      Interregional programme      English      Technical managers or persons holding a similar position in secondary woodprocessing industries (furniture, joinery, etc.) or planners of the wood industry sector and product designers, though the former will be preferred.

- SEPTIEMBRE

04/09-  
20/12      Interregional programme      English      A university degree (or equivalent) in electrical or mechanical engineering, with at least three years of practical experience related to electric welding.

ng      04/09-  
09/11      Interregional programme      English      Engineers and technicians (or equivalent) having at least three years of practical experience in the field of maintenance and repair of medium/small ships.

Technology and equipment in rice processing industry

The following topics will be covered by the curriculum: major trends in the development of the grain-elevator and rice-processing industry; characteristics and range of rice mill products; modern rice grain and hulled-rice starch technology; modern types of rice granaries; modern technological equipment for rice-processing enterprises; basic flow-charts for rice-processing; preventive maintenance of equipment at rice-processing enterprises; quality control.

Modern foundry technology

The training programme will cover the following topics: the design of modern foundry processes (including economic and technical aspects); foundry materials, melting and casting technologies, pattern making practice, moulding materials and moulding technology, mechanization and automation of foundry processes, quality control and repair of castings, environmental protection including noise control and other safety and pollution problems.

Methods and technology in the printing industry

Production of newspapers, periodicals, books (including text-books and other printed material); planning and design of printing houses; tasks and problems in the training of specialists for the graphic arts industry; standardization and quality control in the graphic arts industry. In addition to theoretical training, study visits, practical training will be arranged to plants manufacturing printing machinery and to printing houses.

Institute for Advanced Training of Managers and Specialists of the USSR Ministry of State Purchases, Moscow (with visits to Kiev, Leningrad, Krasnodar, Slavynsk-na-Kubani and Krasnoarmeiskaya) Union of Soviet Socialist Republics

Foundry Research Institute Kraków Poland

VEB Polygraph Leipzig German Democratic Republic

10/09- 05/12	Interregional programme	Engineers and Techni- cians (a university level degree or equiva- lent) and at least three years of practical experience in a super- visory or managerial capacity in the rice- processing industry.
14/09- 09/11	Interregional programme	Degree in foundry or metallurgy (or equiva- lent) with at least two years practical experi- ence (preferably in a supervisory position) in at least one of the following fields: moulding sands, moulding technologies, melting technologies, pattern- making practice, casting technologies, mechaniza- tion and automatization of foundry processes, quality control.
23/09- 12/10	Interregional programme	A university degree or equivalent in the field of printing industry. Managerial or high level technical positions in the printing industry or senior officials of a public or private print- ing organization with at least two years of practical experience.

Industrial planning and development	Macro-planning and strategy oriented course. Long-term development issues of industrialization, industrial strategies and planning, industrial incentives and promotional policies, issues on technology transfer and labour employment, issues of financing industrial development, project preparation, project appraisal, field trip and workshop.	International Development Centre Tokyo Japan	September/ October	Interregional programme English	Industrial development economists at government organizations and public institutions for industrial development and implementation. Applicants aged between 30 and 45 years. Good English. University or college graduates or equivalent with basic knowledge and more than three years of practical experience in industrial development.
Small-scale foundry operations for LDCs, land-locked and island countries	The following items will be covered by the curriculum; solidification in casting; feeder, riser and gating design; pattern making and pattern material; moulding and moulding materials; cast-iron and its melting and casting; copper alloys and their melting and casting; aluminium alloys and their melting and casting; investment casting, shell moulding, plaster mould casting; casting defects, quality control in foundries, vacuum melting and casting.	Marmara Scientific and Industrial Research Institute Istanbul and Technical Education Faculty Ankara Turkey	September/ November	Interregional programme for LDCs, land-locked and island countries English	Foundry or metallurgy degree, supervisory or planning functions for operating and establishing small-scale foundries with at least one year of practical experience.
Cement industry technology	The programme concentrates on technical aspects of cement industry and includes technical subjects such as feasibility studies, raw materials, production management technologies, quality control, maintenance, energy conservation.	Cement Research and Development Centre Ankara Turkey	September/ November	Interregional programme English	Chemical, mechanical, electrical or relevant branch of engineering degree; one to five years practical experience and employed with cement industry.
Condition based maintenance and technical diagnostics of machines	Fundamentals of condition based maintenance and technical diagnostics with training in measurement for technical diagnostics; practical applications: rotary machines performance monitoring, components performance monitoring (bearings). Practical in-plant training and study tours.	Institute for Developing Countries Zagreb Yugoslavia	September 10 days	Interregional programme English	University degree in physical science or engineering (or equivalent) and at least three years practical experience in techniques of maintenance and technical diagnostics.

**Entretien du matériel ferroviaire**

Le programme portera essentiellement sur les problèmes liés à l'achat et au stockage du matériel, les activités dans les ateliers, la surveillance des travaux, l'utilisation d'ordinateurs, la formation pratique de personnel et les principes économiques fondamentaux de l'entretien et de la réparation du matériel roulant. On prévoit également des visites d'études dans des entreprises spécialisées dans la fabrication de matériel ferroviaire.

**Basic petro-chemicals and appropriate production technologies**

Feedstock for basic petro-chemical plants (ethylene, polyolefins, aromatics, plastics, fibres and yarns production); automation and instrumentation; maintenance and repairing; corrosion prevention, labour protection, pollution and neutralization methods. In-plant training in basic petrochemical plants.

**Iron and steel industry**

The analysis and selection of raw materials, appropriate processes and technologies for iron and steel production; hot and cold rolling mill operations; quality control and testing; organization and management of steel plant maintenances.

Société Nationale des Chemins de Fer Belges (SNCB), Bruxelles Belgique et Régie du Chemin de Fer Abidjan-Niger en collaboration avec l'Union Africaine des Chemins de Fer (UAC) Abidjan, Côte d'Ivoire et Bobo Dioulasso Burkina Faso

Joint UNIDO-Romania Centre Blvd. N. Balcescu 16 70121 Bucharest Romania

Eregli Iron and Steel Plant  
Eregli  
Turkey

Septembre/ novembre	Programme régional pour l'Afrique	Etre titulaires d'un diplôme d'ingénieur (ou d'un diplôme équivalent), justifier d'une expérience pratique de deux ans au moins et occuper un poste de cadre technique ou administratif. Préférence sera donnée aux candidats ayant déjà une expérience pratique de l'entretien et de la réparation du matériel roulant de chemin de fer.
September/ November	Interregional programme	Participants should hold a university or engineer- ing degree in chemical or petrochemical engineering with one to five years' practical experience in petrochemical industry, preferably in the age group of 22 to 35.
September/ November 12 weeks	Interregional programme  English	University degree in chemistry, metallurgy, mechanical or electri- cal engineering (or equivalent) with one to five years practical experience and holding supervisory function.

Management of human resources development for industry	The basic objectives of the programme are to upgrade the knowledge and widen the experience of persons responsible for the planning and co-ordination of training activities in industry in developing countries. Studies of the main topics are complemented by study visits to educational institutions of all levels, round-table discussions, practice orientation, etc.	Institute for the Advanced Training of Managers and Specialists, Ministry of State Purchases Moscow Union of Soviet Socialist Republics	September/October	Interregional programme English	University background oriented to technological or economic sciences. At least three years of practical experience in industrial training. Candidates must be responsible for the planning and co-ordination of training activities at regional or sectoral industrial level or advising the policy making organ dealing with industrial training.
Cotton textile industry	Cotton materials and blends weaving and spinning and knitting processes. Theoretical and practical training will also cover quality control, management, repair and maintenance, pollution and energy saving.	Sumerbank (Textile Training Centre) Bursa Turkey	September/December	Interregional programme English	Textile, chemical or mechanical engineering degree; two to six years' practical experience holding managerial/supervisory position in weaving, spinning and knitting.
Technologies textiles cotton - laine	Le programme traitera au cours d'exposés théoriques, de visites d'entreprises, de cas pratiques et de stages des points suivants : techniques de fabrication, contrôle de qualité, productivité et économie des procédés de fabrication.	Centre de Recherche et de Contrôle Lainier et Chimique et Laboratoire de Meulemeester de Technologie des Matières Textiles Chaineux et Gand Belgique	Septembre/Décembre	Programme interrégional Français	Ingénieur ou technicien responsable de production ou du contrôle de qualité dans une entreprise textile ou travaillant dans un centre de recherches textile
OCTOBER - OCTOBRE - OCTOBRE					
Energy management in the glass industry	Awareness will be created in participants as well as their knowledge broadened as required for the proper management of energy in the glass industry. Problems of energy conservation and efficiency will be explored with also a view to alternative sources of energy available in developing countries. Participants will be encouraged to join in the problem-solving process at the initial stage.	Comitato Nazionale per la Ricerca e per lo Sviluppo dell'Energia Nucleare e delle Energie Alternative (ENEA) Turin Italy	October	Interregional programme English	Personnel in responsible positions in plant operations, production, maintenance, utility control, or plant design and development in the glass industry.

Engineering and industrial design	Theoretical introduction on product design, tool design, production engineering and manufacturing of prototype products and tools. Practical study assignments in design offices and laboratories for metallurgical testing and/or workshops.	Engineering and Industrial Design Development Centre Cairo Egypt	October/ December	Int : regional programme  English	Degree in mechanical engineering or engineering degree with at least three years of experience.
Sugar (beet) production	The programme will be carried out both in sugar plants and a sugar research institute and consists of theoretical and specialized actual practical in-plant training as well as study visits and an evaluation seminar. It will concentrate on both economical and technical aspects, including feasibility studies, raw material surveys, maintenance, production technologies and quality control.	Sugar Research Institute Ankara Turkey	October/ November	Interregional programme  English	Chemical, agricultural, mechanical or electrical engineering with at least two years practical experience and presently employed directly in the production of sugar.
Organization and management of agro-industrial enterprises	Theoretical training on different aspects of agro-industrial enterprises. Organization planning, management financing and investment policy, economic infrastructure. Practical training on organizational aspects of agro-industrial enterprises, separate agro-industrial enterprises and food processing plants, study visits to agro-industrial enterprises.	Federal Centre for Agricultural and Industrial Managers' Training Novi Sad Yugoslavia	October	Interregional programme  English	Engineering degree with managerial experience in food processing of at least three years.

DATES NOT YET SPECIFIED  
DATES NON ENCORE PRECISES  
FECHAS TODAVIA NO DETERMINADAS

Planification industrielle	Le programme couvrira les modules suivants : intérêt d'une planification nationale, cadre institutionnel, planification (prise de décision), instruments de réalisation du plan, mesures correctives, réalisation et suivi du plan, conclusions et recommandations pour les pays en voie de développement.	Ecole centrale de la planification industrielle Varsovie Poland	Programme régional pour l'Afrique Français	Cadres provenant d'institutions concernés par la planification industrielle.
Training of trainers for public enterprises	Training of trainers seminar on implementation of training in public enterprises in developing countries, with particular emphasis on training institutions of the developing countries involved in UNIDO's "Centres of Excellence" programme.	International Centre for Public Enterprises (ICPE) Ljubljana Yugoslavia	Interregional programme English	Top manager of training institutions in developing countries. Extensive experience in the formulation as well as the conduct of training programmes courses designed for the personnel of public enterprises of developing countries.

Application des matières plastiques dans l'emballage et le conditionnement (y compris les tuyaux)	Les polymères utilisables dans le conditionnement et l'emballage ; leur diverses propriétés chimiques, physiques et rhéologiques ; le conditionnement des produits chimiques, bidons, fûts et réservoirs ; le transport des eaux résiduaires, le flaconnage alimentaire et industriel ; travaux de laboratoire ; visites d'usines et d'industries alimentaires ; l'emballage alimentaire ; notions de toxicologie ; l'étude de la migration des adjuvants (méthodes et analyses) ; le transport de l'eau potable (contrôle de migration) ; l'élimination des déchets de l'emballage en matières plastiques (pollution de l'air et du sol - biodégradabilité).	Centre d'Etudes des Matières Plastiques Université de Liège 2, rue Armand-Stevard B-4000 Liège Belgique	Toute l'année sauf juillet et août 6 mois - 1 ans	Ingénieur chimiste, licencié en sciences pharmaceutiques. Français	-	A arranger
Technologies nouvelles	Les technologies nouvelles comportant les technologies de mise en forme des matières plastiques, du moulage des alliages non-ferreux, du travail du verre, de la fabrication des outillages. Conception et dimensionnement de pièces en matériaux nouveaux. Contrôle de qualité - Traitement des données technologiques par l'informatique.	C.R.I.F. 200, rue du Chéra B-4000 Liège Belgique	A arranger 5 mois	Qualifications professionnelles. Français, anglais	-	\$US 5,000
Pharmaceutical technology	Preparation of ampoules and perfusion solutions, ointments, solutions for ophthalmic use. Study of granulation, manufacturing of capsules, tabletting. Control of the production of drugs. Planning for production of antibiotics, sulfonamides, antiseptics. Organization and starting of semi-industrial pharmaceutical plants. Scientific visits to pharmaceutical plants.	Department of Toxicology State University of Ghent Hospitaalstraat 13 B-9000 Ghent Belgium	To be arranged 3 months approx.	Pharmacist, chemist or chemical engineer. English or French	-	BF.40,000 approx.
Chemical analysis of mineral samples	Course and practical training in chemical analysis of ores and mineral samples; titrimetry, electrolysis, polarography, spectrophotometry, atomic absorption, fluorimetry, plasma emission spectrometry, etc.	Université Catholique de Louvain Laboratoire de Traitement des Minéraux 2, place Ste Barbe B-1348 Louvain-la-Neuve Belgique	To be arranged variable	Graduates in chemistry. English, French, Spanish	-	To be arranged

CHEMICAL INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Technologie de fabrication 1) des peintures, 2) des peintures utilisées dans le bâtiment et 3) des peintures utilisées dans l'industrie	Formation professionnelle accélérée.	E.S.C.E.P.E.A. Ecole Supérieure du Cuir et des Peintures Encres et Adhésifs 181-203 av. Jean Jaurès F-69007 Lyon France	1) et 2) Début septembre 8 et 4 mois respect. 3) Début janvier 4 mois	Qualifications professionnelles. Français	-	De FF.25,000 à FF.30,000
Chemistry and plastics	Chemistry including e.g. processing of basic materials and dyes, production of chemical fertilizers, pharmaceutical and cosmetic industry, manufacture of rubber products; plastics processing.	Carl Duisberg-Gesellschaft and Zentralstelle für Arbeitsvermittlung der Bundesanstalt für Arbeit Hohenstaufenring 30-32 D-5000 Cologne 1 Federal Republic of Germany	To be arranged 12-18 months incl.	Technical and management personnel who have completed professional training and have practical professional experience. German	-	To be arranged
Fuels and lubricating oils	A short-term practical demonstration course.	Indian Institute of Petroleum Dehra Dun India	To be arranged 3-4 weeks	Professional qualification. English	-	To be arranged
Polyester fibre technology	Polymer production; fibre extrusion; fibre finishes; filament and staple fibre processing; fibre blends; texturing processes; testing and quality control; colouration; end-uses and markets.	Shirley Institute Didsbury Manchester M20 8RX United Kingdom	May 1985 4 weeks	Professional qualification. English	-	£850

Course or seminar	General description	Organizer; Venue	Commencing date;	Qualifications; Language requirements	Last date for receipt of applications	Fee
<u>ELECTRICAL AND ELECTRONIC INDUSTRIES</u> <u>INDUSTRIES ELECTRIQUES ET ELECTRONIQUES</u> <u>INDUSTRIAS ELECTRICAS Y ELECTRONICAS</u>						
Electrical engineering and energy supply	Construction of electric machines and transformers; construction of electric equipment; projecting and designing, construction and commissioning as well as maintenance, overhaul and inspection of electric installations including equipment for energy generation and distribution; operation of energy generation and distribution equipment; electrical resp. electronic and control in all fields of application.	Carl Duisberg-Gesellschaft und Zentralstelle für Arbeitsvermittlung der Bundesanstalt für Arbeit (Central Office of the Federal Labour Exchange), CDG Postfach 190 325 D-5000 Cologne Federal Republic of Germany	To be arranged	Professional qualification. About 12-18 months	-	To be arranged
Microelectronics, automation and industrialization	(1) The nature, and likely future orientations, of the microelectronics industry and the pattern of diffusion into downstream manufacturing processes and final products; (2) to assess the impact of these new technologies on specific sectors which are of particular relevance to developing countries; (3) to illuminate methodologies whereby this impact can be judged; (4) the implications which these technological developments have on the formulation of industrial policy.	Institute of Development Studies University of Sussex Falmer Brighton BN1 9RE United Kingdom	4 November 1985 6 weeks	Professional qualification. English	-	£190 per week (subject to review)
<u>FOOD PROCESSING INDUSTRIES</u> <u>INDUSTRIE ALIMENTAIRE</u> <u>INDUSTRIAS ALIMENTARIAS</u>						
Marine fishery Pêche maritime	Modern fishing techniques and equipments; planning and management of marine resources; fish industry technologies and quality control; fish marketing organization; production and processing systems; pollution control and energy conservation; transport, distribution and export; research establishments, etc.	International Training and Contact (I.T.C.) Formation et Contact International (F.C.I.) a.s.b.l. Velodroomstr. 68 B-2600 Antwerpen Belgium	13 March + 11 September 1985 3 months	Professional qualification. English or French alternatively	-	To be arranged

## FOOD PROCESSING INDUSTRIES (Cont'd)

### Course or seminar General description

Industrie sucrière de la betterave et technologie de la fabrication du sucre à partir de la betterave sucrière	Au cours de la campagne sucrière, un stage de formation technique orienté vers les aspects chimiques, technologiques et mécaniques de la fabrication du sucre au Centre de documentation technique de l'industrie sucrière : laboratoires d'analyses de contrôle de la fabrication du sucre ; laboratoire de la recherche appliqués ; différentes étapes de la fabrication en sucrerie et raffinerie.
Microbiologie des aliments	Microbiologie des boissons (eaux, bière, jus de fruits), des coquillages et des poissons ; microbiologie des laits et des produits laitiers ; étude systématique des principaux micro-organismes des denrées alimentaires ; influence des traitements sur la microbiologie ; techniques d'analyses, de recherche et de dénombrement ; cours et travaux pratiques.
Techno managerial programme for biscuit and bakery industry	To gain insight into technical and managerial aspects of biscuit and bakery industry; to stimulate thinking on the application of modern managerial techniques in the existing and prospective biscuit and bakery industrial units; to understand the scope for the range of products that can be promoted in biscuit and
Food production	The course will cover the practical and theoretical aspects of processing Indonesian foods (kecap, tempe, tauco, tape, tahu, etc.).
Organización de pequeña y mediana empresa alimentaria	Planeamiento. Proyectos de instalaciones y tecnologías. Management y organización del personal. Programación y estrategias. Manejo de las empresas. Aspectos financieros y contables. Aspectos complementarios. Metodología didáctica.

Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
S.A. Société Sucrière d'Etudes et de Conseils Aandorenstraat 1 B-3300 Tienen Tirlemont Belgique	Octobre à décembre (cette période correspondant à la compagnie sucrière) variable	Diplôme universitaire ou équivalent. Français	-	A arranger
Institut Pasteur de Lille B.P. 245 15, rue Camille Guérin F-59019 Lille Cedex France	Avril-octobre 1985 et 1986 1-4 semaines	Qualifications professionnelles. Français	-	A fixer
Small Industry Extension Training (SIET) Institute Yousufguda Hyderabad 500 045 India	October 1985 8 weeks	Professional qualification. English	-	\$US 2,320
To bakery industry; and to develop skills for preparation of feasibility reports.				
Institute for R + D of Agro-based Industries (IRDABI) Jl.Ir.H. Juanda S-9 Bogor, Java Indonesia	To be arranged 1-2 months	Professional qualification. Indonesian and/or English	-	To be arranged
CORI SpA, Centro Studi Agricoli Borgo a Mozzano Abbadia S. Salvatore I-55060 Mutigliano Lucca Italy	28 enero y 23 septiembre 1985 12 semanas	Calificación profesional. Español	"	A convenir

FOOD PROCESSING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Fish technology and quality control	Fish processing technology, fish handling, salting, drying, freezing and canning. Quality control. Prevention of fish post-harvest losses. Extension.	Fisheries Department Food and Agriculture Organization (FAO) Via delle Terme di Caracalla I-00100 Rome Italy	1985 6 weeks to be determined	Participants should have a university degree or diploma and be working in a government or private institution dealing with fish utilization. Participants to be nominated by government. Course in English reserved for Asian countries. Same course in French reserved for West African countries	-	-
Foodstuff industry	A. Plant design and construction: theoretical and practical training in the design and construction of industrial plant, engineering work, technologies and know-how in the agricultural foodstuff sector; the courses will be held in design and consulting firms, and in agricultural production and foodstuff companies.  B. Production and marketing: training in agricultural production and foodstuff plants and farms, in the problem of linking agriculture and produce processing; and production, marketing and distribution problems relating to industrial agricultural products, and specific aspects of production and marketing technologies.	Istituto per la Ricostruzione Industriale (IRI) Direzione Esteri Ufficio Cooperazione Tecnica Internazionale Via Veneto 89 I-00187 Rome Italy	23 January 1985 5 months	Advanced technical education or university degree and 5 years' experience. Italian, French, English, Spanish	-	To be arranged
Technology of sugar and alcohol production	Cultivation of sugar beet; process and quality control; beet sugar technology; sugar plant engineering.	University of Ferrara Fondazione Serafino Cevasco Via Luigi Borsari 46 I-44100 Ferrara Italy	February 3 months	University degree in engineering, chemistry or agriculture. Italian	-	To be arranged
Industrie sucrière	Cours sur le contrôle chimique des sucreries comprenant une introduction à la production du sucre, l'organisation d'une sucrerie, le rôle du chimiste, les buts et la base du contrôle chimique, définition des termes, la pesée, la mesure de l'eau des condenseurs, les balances; entretien et étalonnage, l'échantillonage, l'organisation d'un laboratoire de sucrerie, préparation des divers bulletins, inventaire des produits sucrés, analyses des divers produits d'une sucrerie, analyses spéciales, contrôle de la qualité des sucres, méthodes de paiement de la canne des planteurs, les principes du management, les sous-produits. Cours théoriques et pratiques avec stages dans divers laboratoires.	Centre Régional de Formation Sucrière pour l'Afrique avec l'Institut de Recherches de l'Industrie Sucrière Maurice comme Agent d'Execution Réduit Maurice	Mai 3 mois	Licence ou diplôme dans un sujet approprié. Français	Fin mars	US\$ 2,500

FOOD PROCESSING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Sugar industry (sugar cane)	Course on the Chemical Control of Sugar Factories covering outline of sugar manufacturing processes, factory organization, duties of chemist, purpose of chemical control, basis of factory control, definition of terms, methods of weighing, scales, condenser water, sampling, sugar laboratory organization, calculation of reports, stock-taking, practical sugar analysis, analysis of all sugar factory products, special analyses, quality control of sugar, planters' cane payment systems, principles of management, by-products. Theoretical, analytical and practical at various factory laboratories.	Regional Sugarcane Training Centre for Africa with Mauritius Sugar Industry Research Institute as Executing Agency Réduit Mauritius	September 3 months	University degree. English	End July	US\$ 2,500
Food industry	Courses on: food contaminant analysis; food microbiology and hygiene; meat processing; fish handling and preservation; cereal technology.	Division for Nutrition and Food Research TNO Utrechtseweg 48 P.O. Box 360 3700 AJ Zeist Netherlands	To be arranged 3-6 weeks	Professional qualification. English	-	To be arranged
Cereal chemistry	Training in cereal laboratory methods; both chemical and physical, and the relation between analytical results and technology; technology of milling for food or feed, baking of bread, biscuits and flour confectionary products, extrusion cooking, roasting, steaming, drum drying, pasta production and pelleting.	Institute for Cereals Flour and Bread TNO P.O. Box 15 6700 AA Wageningen Netherlands	To be arranged	Professional qualification. Dutch, English or German	-	Hfl.5,500 per month
Ciencia y tecnología de alimentos	Fundamentos científicos de la tecnología de alimentos, de sus procesos industriales, de la técnicas de control de fabricación y de los problemas específicos de las principales industrias de alimentación. Comprende cuatro asignaturas generales y una de las asignaturas de tecnología específica, con clases teóricas y prácticas, sesiones de seminario y visitas a fábricas. Además y con objeto de estimular la capacidad creadora y espíritu crítico del alumno cada uno de ellos desarrollará a lo largo del curso, un trabajo de investigación sobre un tema de interés en tecnología de alimentos. Las asignaturas que cursan son las siguientes: química de los alimentos; tecnología de la conservación de alimentos; control analítico y de calidad de alimentos; control microbiológico e higiene en la industria de alimentos. Tecnologías específicas: industrialización de frutas y hortalizas; tecnología postcosecha de los cereales.	Instituto de Agroquímica y Tecnología de Alimentos Jaime Roig 11 Valencia España	Septiembre 10 meses	Título superior por una Universidad o escuela técnica superior. Español	Julio	65,000 Ptas (15,000 Ptas alumno, gasto por trabajo experimental)

FOOD PROCESSING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Especialización en grasas	Características generales de las grasas; análisis de las materias grasas; extracción del aceite de oliva, del aceite de orujo de aceitunas y de los aceites de semillas; transformaciones de grasas comestibles y de grasas industriales.	Instituto de la Grasa y sus Derivados Avda. P. García Tejero 4 Sevilla-12 España	Noviembre 1985 15 semanas	Poseer la formación básica que supone haber cursado estudios de escuelas técnicas de grado medio. Español	Octubre 1985	60,000 Ptas
Sugar technology	Lectures, practical work and field training covering all processes in sugar technology (cane sugar).	Department of Chemical Engineering University of Khartoum Khartoum Sudan	2 calendar years	Professional qualification. English	-	£1,300
Meat industry technology and management	Slaughterhouse, cutting, packing plant, sausage factory, canning, central kitchen, transportation; engineering and technology; administration and management.	Kristianstad-Blekinge Slakteriförening Box 568 S 291 25 Kristianstad Sweden	To be arranged 3-6 months	Basic education in engineering, technology, biochemistry and/or microbiology. Practice in meat plant operations. English or German	-	SKr.6,000 per month
Milling technology	Wheat, rye and maize milling technology (theoretical and practical courses); basic scientific subjects relating to milling technology (theoretical and practical courses); physics and mathematics with the main subunits in electrotechnics and pneumatics; course also covers brewing technology, oat milling technique; oil milling technique; plant management; technical drawing.	The Swiss School of Milling Tellstrasse 2 CH-9000 St. Gallen Switzerland	1st Monday in September each year 10 months	Professional qualification. German or English alternatively	1 year in advance	Sw.F.1,800
Beet sugar technology	The course will cover the whole process i.e. beet storage, juice production, juice purification, evaporation, crystallization, heat economy, microbiological control, pollution control, process control, both theoretically and practically.	Turkish Sugar Co. Sugar Institute Technological Research Division Etimesgut Turkey	Early October 7 weeks	Engineering experience. English	-	To be arranged

FOOD PROCESSING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue
Beet and cane sugar production	Practical and theoretical courses in all aspects of the production of sugar from beet and cane including supervisory skills, industrial safety and management techniques.	BSD Limited (British Sugar plc) P.O. Box 26 Oundle Road Peterborough PE2 9QU United Kingdom
Beet and cane sugar production and technology	Short courses on: process technology; new developments in sugar industry; welding; training of electrical and mechanical engineers for sugar factory; process instrumentation.	BSD Limited (British Sugar plc) P.O. Box 26 Oundle Road Peterborough PE2 9QU United Kingdom
Sugar beet and sugar cane	Practical instruction in all aspects of factory management and field agronomy including: beet delivery and sampling, extension services, field operations from sowing to harvesting, pest and disease control, herbicide application and weed control, complete crop maintenance.	BSD Limited (British Sugar plc) P.O. Box 26 Oundle Road Peterborough PE2 9QU United Kingdom
Basic food microbiology	The principles of food microbiology with particular reference to quality control.	Tropical Development and Research Institute 127 Clerkenwell Road London EC1R 5DB United Kingdom
Post-harvest technology of fruits, vegetables and root crops	The principles of perishable crop handling and their application to commercial operation.	Tropical Development and Research Institute 127 Clerkenwell Road London EC1R 5DB United Kingdom

Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
September- December (operation- al period of beet sugar fac- tories in the UK). Up to 4 months	Professional qualification. English	-	To be arranged
Throughout year 3 days- 10 months	Professional qualification. English	-	To be arranged
Throughout year 3 days- 10 months	Professional qualification. English	-	To be arranged
1 April 1985 12 weeks	Professional qualification. English	-	On applica- tion
12 April 1985 13-15 weeks	Degree or equiva- lent in biological science, agricul- ture or horticul- ture or several years' experience of produce handling. English	-	To be arranged

FOOD PROCESSING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Storage of durable agricultural products in the tropics	Storage of cereals, grain, legumes, oil-seeds, coffee, cocoa, etc., including: storage losses, inspection methods, climate and storage, insect identification, chemical control, fumigation, moisture content, storage systems and structures, rodents, packaging.	Tropical Development and Research Institute 127 Clerkenwell Road London, EC1R 5DB United Kingdom (Slough, near London)	22 February 1985 30 August 1985 4-6 months	Degree or equivalent in biology, agriculture or engineering or some years' experience in produce storage or handling. English	-	To be arranged

GLASS AND OPTICAL INDUSTRIES  
INDUSTRIE DE LA VERRERIE ET DE L'OPTIQUE  
INDUSTRIAS DEL VIDRIO Y OPTICAS

Sciences et techniques verrières	Formation scientifique et technique dans le domaine du verre : enseignement dans les sciences existantes et dans les disciplines ou techniques nouvelles.	Ecole Supérieure du Verre - E.S.V. c/o C.I.F.O.P 1b av. Général Michel B-6000 Charleroi Belgique	A arranger 1-6 mois	Qualifications professionnelles. Français, anglais	-	A arranger
----------------------------------	---	--	------------------------	---	---	------------

LEATHER AND LEATHER PRODUCTS INDUSTRIES  
INDUSTRIE DU CUIR ET DES ARTICLES EN CUIR  
INDUSTRIAS DEL CUERO Y DE LOS PRODUCTOS DE CUERO

Chimie et technologie de la fabrication du cuir	Bases de chimie générale, organique et analytique nécessaires à l'étude de la chimie du cuir et aux travaux de laboratoire, chimie et technologie de la fabrication du cuir : composition et structure de la peau, conservation, défauts, étude détaillée des travaux de rivière ; tannages chrome, végétal, fourrure, etc. ; opérations après tannage ; finissage des cuirs, machines de tannerie, épuration des eaux ; méthodes de fabrication des différents types de cuirs. Laboratoire d'analyses chimiques et d'essais physiques : produits utilisés en tannerie, eaux, cuirs, contrôle des opérations de fabrication des cuirs. Atelier de fabrication des principaux types de cuirs ; préparation d'un mémoire sur une fabrication choisie par le stagiaire.	Ecole Belge de Tannerie Quai Gloesmer 6 B-4020 Liège Belgique	Septembre 9 mois	Qualifications professionnelles. Français	25 juin	BF.80,000
---	--	--	---------------------	--	---------	-----------

LEATHER AND LEATHER PRODUCTS INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
La fabrication du cuir, du brut à l'entrée au finissage	Technologie et applications de fabrication du brut à l'entrée au finissage (stage mi-fini). Bovins, ovins, caprins. Tannages chrome et végétal ; retannages. Teintures, nourritures et sèches.	Ecole Supérieure du Cuir et des Peintures Encre et Adhésifs (ex Ecole Française de Tannerie) 181-203 Av. Jean Jaurès F-69007 Lyon France	Début septembre 14 semaines	Qualifications professionnelles. Français	-	FF.20,000
Le finissage de cuir	Technologie et applications ; matières premières ; construction des finissages, nuancages ; finissages des fleurs corrigées, des pleines fleurs satinées, des pleines fleurs lissées.	Ecole Supérieure du Cuir et des Peintures Encre et Adhésifs (ex Ecole Française de Tannerie) 181-203 Av. Jean Jaurès F-69007 Lyon France	Début janvier 6 semaines	Qualifications professionnelles. Français	-	FF.15,200
Technologie du cuir	Formation professionnelle de niveau moyen destinée à des responsables d'atelier qui cherchent à perfectionner leurs connaissances pratiques et à acquérir les bases théoriques du métier de tanneur.	Ecole Supérieure du Cuir et des Peintures Encre et Adhésifs (ex Ecole Française de Tannerie) 181-203 Av. Jean Jaurès F-69007 Lyon France	Début septembre 9 mois	Qualifications professionnelles. Français	-	FF.30,000
Leather goods manufacture	Pattern cutting and design development; fabrication of leather goods using hand tools and simple machines; fabrication of leather goods using modern machines and improved tools; training on various leather goods machines including shaving machines; training on leather craftwork; theoretical classes on leathers, materials, tools, organization and trade practices and cost estimates. The Institute organizes other courses in leather technology from 3 to 12 months.	Central Leather Research Institute (CLRI) Adyar, Madras 600 020, India	March 1985 48 weeks	University entrance. English	-	Rs.2,000 per month

LEATHER AND LEATHER PRODUCTS INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Leather quality control	Theoretical and practical training in laboratories covering leather and leather goods quality control, physical as well as chemical, and environmental control activities.	Netherlands Organization for Applied Scientific Research TNO, Institute for Leather and Shoe Research 5141 Er Waalwijk Netherlands	Throughout year To be arranged	Engineering or chemistry degree. English	-	To be arranged
Leather technology	Technical training courses for work and departmental managers in leather-producing factories (tanneries). Practical training in the manufacture of the desired types of leather with regard to the chemical-technological part, to the mechanical operations and the environmental problems. Procedures are made available and discussed, attention is given to knowledge of sorting and judging hides, semi-manufactured and finished leather. In the mechanical operations knowledge and maintenance of machines and safety measures are treated. Alternately with the practical part of the training a theoretical course is given.	Netherlands Organization for Applied Scientific Research TNO, Institute for Leather and Shoe Research 5141 Er Waalwijk Netherlands	April and September 1985 and 1986 13 weeks	Professional qualification. English	-	To be arranged
Leather garments manufacturing technology	This course provides practical and critical knowledge in manufacturing technology of leather garments.	Leather Products Development Centre IV-D/14-7 Raza Apartments Hakim Ibn-e-Sina Rd P.O. Box 2375 Nazimabad, Karachi-18 Pakistan	15 July 1 year	Professional qualification. English	-	Rs.1,500 per month
Leather goods manufacturing technology	This course provides practical and critical knowledge in manufacturing technology of leather goods to fresh entrants and technicians.	Leather Products Development Centre IV-D/14-7 Raza Apartments Hakim Ibn-e-Sina Rd P.O. Box 2375 Nazimabad, Karachi-18 Pakistan	15 July 1 year	Professional qualification. English	-	Rs.1,500 per month

LEATHER AND LEATHER PRODUCTS INDUSTRIES

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Basic leather production techniques	Introduction to leather manufacture and the opportunity for course participants to make a number of leathers according to their particular interests e.g. shoe upper leathers; clothing leathers; vegetable tanned leathers; hair on leathers. Chemical suppliers will present information on new products available.	National Leather-sellers Centre Nene College Moulton Park Campus Northampton NN2 7AL United Kingdom	8 July 1985 and 7 July 1986 4 weeks	Professional qualification. English	-	£650 (1985) £750 (1986)
Physical testing and chemical analysis of leathers, chemicals and process liquors	An introduction to testing and analysis in a leather control laboratory based on official methods of analysis of the International Union of Leather Technologists and Chemists Societies. Course will cover sampling, sample preparation, physical and fastness tests on selected leathers. Analysis of chromium and vegetable tanned leathers and chromium and vegetable tanning materials. Analysis of waste tanning liquors.	National Leather-sellers Centre Nene College Moulton Park Campus Northampton NN2 7AL United Kingdom	7 July 1986 4 weeks	Professional qualification. English	-	£750
Tannery effluent treatment and the recycling of process liquors	The course deals with the treatment of tannery waste liquors and current legislation for disposal in various countries. Course participants will have the opportunity to analyse effluents and to carry out small-scale experiments in aeration, coagulation, filtration and recycling of lime sulphide and chrome liquors.	National Leather-sellers Centre Nene College Moulton Park Campus Northampton NN2 7AL United Kingdom	8 July 1985 4 weeks	Professional qualification. English	-	£650

MECHANICAL AND METALWORKING INDUSTRIES  
 INDUSTRIE DE CONSTRUCTION MECANIQUE ET DE TRANSFORMATION DE METAUX  
 INDUSTRIAS MECANICAS Y DE TRANSFORMACION DE METALES

Construction métallique	Evaluation de la formation de base ; répétition éventuelle des connaissances de base ; lecture de plans ; métrologie ; postes de travail ; matériel ; contrôle du matériel ; sécurité ; entretien.	Spoorvegmaateliel en Metaalconstructies, BN Vaartdijkstraat 5 B-8200 Brugge Belgique	A arranger 3 mois approx.	Qualifications professionnelles. Français, anglais ou néerlandais	-	A arranger
-------------------------	--	---	------------------------------	--	---	------------

MECHANICAL AND METALWORKING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Mécanique générale	Large éventail de sujets dans le domaine de la mécanique générale.	Spoorvegmaatier en Metaalconstructies Vaartdijkstraat 5 B-8200 Brugge Belgique	A fixer 3 mois en moyenne	Qualifications professionnelles Français, anglais ou néerlandais	-	A arranger
Shipbuilding and advanced hydrodynamics	Advanced hydrodynamics theory and applications in shipbuilding and hydraulic machines; advanced methods for computer-aided ship design, development and use of computers in shipbuilding; advanced methods and investigations on theoretical and experimental ship hydrodynamics; statistical estimation of the loads acting on the ship structures and their design.	Bulgarian Ship Hydrodynamics Centre in co-operation with other organizations Varna 9003 Bulgaria	Throughout year Variable 2 weeks- 10 months	Professional qualification. English, Russian or French	-	To be arranged
Welding technology	Upgrading skills and knowledge of welding method. Arc and gas welding, shield gas welding ( $\text{CO}_2$ and Argon), joining techniques in maintenance and repairing brazing, soldering and inspection of welds.	Engineering and Industrial Design Development Centre Cairo Egypt	February 1985 and 1986 4 weeks	Professional qualification. English	-	\$US750
La mécanisation agricole pour les gérants de parcs de machines agricoles	Classification et description des principales machines agricoles. Considérations et évaluations économiques sur le choix, l'achat, la gestion, le financement et les charges d'exploitation d'un parc de machines agricoles. Plan de mécanisation de l'exploitation ; calendrier de travail. Eléments de mécanique agricole. La mécanisation des opérations culturales. Exercices de conduite sur route et sur champ au cours des divers travaux agricoles. Gestion du personnel.	CORI SpA, Centro Studi Agricoli Borgo a Mozzano Abbadia S. Salvatore I-55060 Mutigliano Lucca Italie	25 février 1985 14 semaines	Qualifications professionnelles. Français	-	A fixez
Automobile engineering	Advanced practical and diagnostic training involving mechanical and electrical units and components used on motor vehicles and plant. Topics would include: methods of repair and rebuilding of engines and transmission systems; engine and vehicle testing; electrical systems and associated components. Fuel systems servicing and readjustment.	Loughborough Technical College Department of Mechanical Engineering and Construction Radmoor Loughborough Leicestershire LE11 3BT United Kingdom	To be arranged 8 weeks	Professional qualification. English	-	To be arranged

MECHANICAL AND METALWORKING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Fabrication and welding	Practical training involving manufacturing processes, manual metallic electrical arc, TIG, MIG and CO <sub>2</sub> welding.	Loughborough Technical College Department of Mechanical Engineering and Construction Radmoor Loughborough Leicestershire LE11 3BT United Kingdom	September and January 10 weeks	Professional qualification. English	-	To be arranged
Shipbuilding, ship repairs, etc.	In addition to shipbuilding and ship repairs, the Organization can arrange training programmes in port operations, marine engineering and electronics, production planning and control.	International Maritime Organization (IMO) 4 Albert Embankment London SE1 7SR United Kingdom	To be arranged	Professional qualification. English, French, Spanish	-	To be arranged
Welding technology and inspection	Design, metallurgical processes and inspection, aspects of welds.	Scottish School of Non-destructive Testing Paisley College High Street Paisley PA1 2BE United Kingdom	Throughout year 2-4 weeks	Professional qualification. English	-	£290 (2 weeks) £490 (4 weeks)
<u>METALLURGICAL INDUSTRIES</u> <u>INDUSTRIE METALLURGIQUE</u> <u>INDUSTRIAS METALURGICAS</u>						
Iron and steel production	The trainees can specialize in the following fields: ore-dressing; coke-production and by-products; blast furnace; technical knowledge and practical training; steel production; technical knowledge and practical training; continuous casting; rolling processes both hot and cold; manufacture of welded and weldless pipes; steel and pig-iron foundry; quality control; maintenance of the machinery; general factory facilities; latest methods adopted in organization and management.	Istituto per la Ricostruzione Industriale (IRI) Direzione Esteri Ufficio Cooperazione Tecnica Internazionale Via Veneto 89 Rome Italy (Rome and other towns in Italy)	23 January 1985 5 months	Advanced technical education or university degree and 5 years experience. Italian, French, English, Spanish	-	To be arranged

METALLURGICAL INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Foundry-technology	Special aim of the course is to enable the participants to solve the problem of producing modern cast irons within their country's restrictions regarding imports and facilities. Metallurgy; melting units, melting, melt treatment; preparation and control of clay-, cement- and resin-bounded moulding materials; coatings; patterns; casting quality control.	Netherlands Organization for Applied Scientific Research TNO, Metal Research Institute, Technical Foundry Centre P.O. Box 541 7300 AM Apeldoorn Netherlands	Upon request	Professional qualification. English	-	To be arranged
Foundry materials and technologies	Scientific-research works and choice of foundry materials. Determination of possibilities of using local raw materials. Review and choice of foundry technologies adjusted to local conditions. Melting of ferrous and non-ferrous metal alloys; methods for improvement. Moulding and pouring. Knocking out and fettling of castings. Inter-operational control and final inspection. Economics of foundry processes. Methods of professional training of foundrymen.	Foundry Research Institute (FRI) Zakopianska Street 73 Pl-30-418 Cracow Poland	To be arranged	Professional qualification. English, French or German	-	To be arranged
Quality control of foundry moulding materials and sands	Characteristics of moulding materials and their classification. Methods of physical-chemical and technological tests of moulding materials on the common and special-purpose apparatus; interpretation of results. Criteria for the choice of materials for a given moulding technology. Casting defects caused by moulding materials.	Foundry Research Institute (FRI) Zakopianska Str. 73 Pl-30-418 Cracow Poland	To be arranged	Professional qualification. English, French or German	-	To be arranged

PACKAGING INDUSTRIES  
INDUSTRIE DE L'EMBALLAGE  
INDUSTRIAS RELACIONADAS CON EL EMBALAJE

Emballage	Les matières premières ; le carton ondulé et son utilisation ; le carton plat et son utilisation ; les emballages en bois ; les fûts, bidons, jerrycans, boîtes métalliques, rails ; les films en matière plastique et les complexes ; les sacs industriels ; les sollicitations lors du transport ; essais sur emballages ; méthodes d'essais ; appareils, normes, contrôle de la qualité ; les accessoires d'emballages ; le transport des marchandises dangereuses ; la corrosion ; les machines d'emballages ; visites d'usines et canaux de distribution.	Institut Belge de l'Emballage 15, rue Picard B-1020 Bruxelles Belgique	A fixer 3 mois en moyenne	Degré universitaire Français ou anglais	-	A arranger

PACKAGING INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Emballage et conditionnement	Les lignes fondamentales de ce cours consistent en une série d'exposés sur la technologie de l'emballage et les caractéristiques des matériaux mis en oeuvre ; de tables rondes et travaux de groupe avec les professionnels de l'emballage ; work-shop sur des cas précis et analyse des aspects économiques et de marketing (coût, investissement, choix des matériaux, récupération, recyclage) ; visites de laboratoires et d'entreprises, étude de cas et démonstrations ; participation aux expositions internationales et remise des trois tomes du Manuel de l'Emballage.	Institut Belge de l'Emballage 15, rue Picard B-1020 Bruxelles Belgique (avec les instituts de design industriel, contrôle de qualité, marketing)	A fixer 3 mois en moyenne	Qualifications professionnelles. Français	-	A convenir
Les investissements dans l'industrie de l'emballage et du conditionnement pour les PVD	Séminaire organisé avec les producteurs des machines et matériaux, destiné aux industriels producteurs d'emballages de distribution de produits alimentaires ou emballages de contact. Les matériaux discutés seront les : emballages en métal (alu et fer) ; emballages en plastique rigide et souple ; emballages complexes y compris les techniques et technologies pour la fabrication des boîtes, bouteilles, barquettes, bidons, e.a. ainsi que les prescriptions légales et sanitaires. La séminaire sera complété par une visite à une exposition internationale de machines et systèmes d'emballage.	Institut Belge de l'Emballage 15, rue Picard B-1020 Bruxelles Belgique	A fixer 2 semaines	Qualifications professionnelles. Français	-	A convenir
Packaging	All branches of packaging including in-laboratory training.	Indian Institute of Packaging E-2MIDC Area Chakala Andheri (East) Bombay 400 093 India	Throughout year 1 day 2 years	Professional qualification. English	-	To be arranged
Packaging technology	Practical and theoretical training on general and specialized aspects of packaging technology. Packaging specifications, test methods and test equipment featured. Courses purpose-designed to meet individual requirements.	PIRA - The UK Technical Centre for the Packaging Industries Randalls Road Leatherhead Surrey KT22 7RU United Kingdom	To be decided 2-6 weeks on average	Professional qualification. English	-	To be arranged

**Course or seminar General description**

---

Offset printing	Training courses specially designed for developing countries.
Photo composing	Training courses specially designed for developing countries.
Reproduction	Training courses specially organized for developing countries.
Printing industry	Courses on electronic composition (using the latest equipment); colour reproduction and platemaking; microcomputers for printers; bar coding systems; basics of printing and finishing; paper and film assembly; quality control; sheet fed lithography; web offset newspapers, electronic publishing, non-impact systems.

- 40 -

<b>PULP AND PAPER INDUSTRIES</b> <b>INDUSTRIE DE LA PATE A PAPIER ET DU PAPIER</b> <b>INDUSTRIAS DE LA CELULOSA Y EL PAPEL</b>						
Pulpa y papel	Recursos fibrosos y tipos de maderas; control de calidad de la materia prima, del proceso y producto terminado; procesos químicos para la producción de pastas de celulosa; proceso de alto rendimiento para la producción de pastas; blanqueo de pastas celulosicas; fabricación del papel; tratamiento de efluentes; generación y economía de energía en la industria de la celulosa y el papel; manutención y corrosión.	Instituto de Pesquisas Tecnológicas do Estado de São Paulo S/A - IPT P.O. Box 7141 01000 São Paulo, SP Brazil	1 marzo 1985 5.5 meses	Técnicos de nivel universitario que trabajan en la industria de la pulpa y el papel. Portugués/español	-	A convenir
Pulp, paper and board technology	Pulping of raw materials; paper and pulp testing; papermaking technology; organization and management of research; wastepaper recycling; microbiological aspects of paper and board making; water and effluent treatment; energy conservation; water conservation; technical services; automation and computer control.	PIRA, Paper and Board Division Randalls Road Leatherhead Surrey KT22 7UR	To be arranged 2-6 weeks on average	Professional qualification. English	-	To be arranged
<b>TEXTILE INDUSTRIES</b> <b>INDUSTRIE TEXTILE</b> <b>INDUSTRIAS TEXTILES</b>						
Industrie textile	Fabrication : fibres, filature, bonneterie, tissage, examens de laboratoire, contrôle de la qualité en laboratoire, réparation et entretien des machines. Matières premières : fibres naturelles animales, végétales, fibres artificielles, fibres synthétiques.	Centre de Recherche et de Contrôle Lainier et Chimique (CELAC) Zoning de Petit Rechain 694, avenue du Parc B-4655 Chaineux Verviers Belgique	Toute l'année sauf juillet et août	Qualifications professionnelles. Français	-	BF.20,000 par mois

TEXTILE INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Textiles	Métrologie du caractéristiques des fibres, fils et tissus ; filature de coton et de laine, processus de tissage ; procédés de tricotage ; examen de l'évolution des études en cours dans les laboratoires de recherche textile (coton, laine, lin, fibres chimiques) ; aide technique aux moyennes et petites entreprises textiles.	Centexbel 24, rue Montoyer 1040 Bruxelles Belgique	Toute l'année sauf juillet et août 3-6 mois	Qualifications professionnelles. Français, néerlandais	-	A arranger
Textiles	The sizing of spun yarns; card clothing; how to gain the maximum efficiency from metallic card clothing; preparation and weaving of cotton and blended yarns; wet processing of textiles; garment technology; testing methods and testing of fibres, yarns, fabrics, non-woven carpets and quality assurance.	Fibre Research Institute TNO P.O. Box 110 2600 AC Delft Netherlands	To be arranged 4 days - 3 months	Professional qualification. English or German	-	To be arranged
Textile industry	Spinning, weaving including preparation yarn and piece dyeing, finishing, printing, testing.	Ten Cate Consultants Egbert Gorterstraat 3 P.O. Box 58 7600 GD Almelo Netherlands	Throughout year (except July) 4-12 weeks	Graduate of technical school. English/German	-	To be arranged
Textile mill management	Theory and practice of industrial organization and management; costing; maintenance, production control; quality control; statistics; trouble-shooting; operative selection and training. Theory and practice of textile manufacturing processes; cotton and synthetics spinning, weaving, knitting dyeing, finishing and printing. In-plant training; case study.	Ten Cate Consultants Egbert Gorterstraat 3 P.O. Box 58 7600 GD Almelo Netherlands in collaboration with the Textile Engineering College I.H.E.O. "De Maere" P.O. Box 1075 7500 BB Enschede Netherlands	September 4-5 months	Production managers and technical staff; minimum secondary level schooling, 2 years' experience in textile industry. English	July	To be arranged
Textiles	Short courses on: dyeing and printing polyester and polyester cellulose blends; quality control and testing in wet processing; basic work study; production planning and control.	Textile Industry Research and Development Centre (TIRDC) Moulvi Tamizuddin Ahmad Khan Rd Karachi No. 1 Pakistan	To be arranged 6-18 days	Professional qualification. English	-	-

TEXTILE INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Polymer evaluation	The course is designed to produce graduates with a thorough knowledge of polymers and the ability to assess their performance and value. As well as evaluation, students take classes in polymer technology, physics and chemistry; they also undertake project work. Optional subjects can be taken if desired.	Fibre and Textile Research Unit Department of Pure and Applied Chemistry University of Strathclyde Glasgow G1 1XL United Kingdom	October 9 months	Professional qualification. English	-	To be arranged
Polymer science and technology	A short post-experience course designed to enable technologists in the polymer industry to obtain up-to-date advanced training in polymer chemistry, physics and technology.	Fibre and Textile Research Unit Department of Pure and Applied Chemistry University of Strathclyde Glasgow G1 1XL United Kingdom	To be arranged	Professional experience in textiles and/or science degree. English	-	To be arranged
Cotton fibre technology, testing and evaluation	Basic statistics; general fibre technology; fibre structure; fibre properties in relation to end-use; fibre identification; cotton testing and evaluation; testing of cotton in process; analysis and evaluation of test results; cotton marketing.	International Institute for Cotton Kingston Road Didsbury Manchester M20 8RD United Kingdom	July 1985 6 weeks	Education at least up to university entrance level and technical qualifications in either: (a) agricultural subjects, preferably related to cotton production, or (b) textile technology at least up to Higher National Diploma (or equivalent) level. English	February 1984	To be arranged
Cotton knitting: recent developments in technology and quality control	Statistics and computing; general fibre technology; testing and preparation of cotton yarns for knitting; range of knitted fabrics; knitting technology; process control during knitting; fabric finishing; evaluation of end product; manufacture of garments knitted from cotton fabrics; garment testing; fabric and garment faults; quality control laboratory.	International Institute for Cotton Kingston Road Didsbury Manchester M20 8RD (School of Textile and Knitwear Technology of the Leicester Polytechnic)	May 1985 6 weeks	Professional qualification. English	March 1985	£575-£675

TEXTILE INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Cotton textiles: management principles and techniques	Leadership; control data and procedure; work-force potential; selection; communications; training; health and safety.	International Institute for Cotton Kingston Road Didsbury Manchester M20 8RD United Kingdom (Fielden House Productivity Centre)	June 1985 4 weeks	A sound general education at least up to university entrance level; industrial experience in the textile industry. English	April 1985	£600-£650
The sizing and weaving of cotton yarns	Basic statistics; general fibre technology; basic principles of yarn preparation and weaving; theory and practice of warp sizing - sizing agents, size mixes and preparation, sizing machines; weaving technology - factors influencing the choice of ancillary equipment for the loom, techniques to use in warp gaiting, control of weft, choice of drawing-in and denting; type of selvedge construction; techniques of weaving densely set warps; fault identification; fault prevention and correction; testing and quality control.	International Institute for Cotton Kingston Road Didsbury Manchester M20 8RD United Kingdom (Bolton Institute of Higher Education)	April 1985 8 weeks	Professional qualification. English	February 1985	£800-£850
Wet-processing of cotton textiles	The careful preparation of fabric for subsequent processes of dyeing, printing and finishing is essential if the final product is to be competitive in world markets. The purpose of the course is to provide up-to-date information and practical guidance on modern techniques of fabric preparation and easy-care finishing treatments. It will not deal in any detail with the techniques of dyeing and printing.	International Institute for Cotton Kingston Road Didsbury Manchester M20 8RD United Kingdom	April 1985 8 weeks	A sound general education, preferably up to university entrance level; some practical experience in wet processing of textiles is essential. English	February 1985	£900-£1,000
Dyeing and printing	A practical course on dyeing and printing of cotton and man-made fibre fabrics for managers, supervisors and textile chemists. Covers batch and continuous dyeing; roller, flat-screen, rotary screen, and transfer printing; dyes and chemicals; machinery and equipment; faults; testing; quality control; effluent treatment; energy saving.	Shirley Institute Didsbury Manchester M20 8RX United Kingdom	Mid-June 1985 6 weeks	Professional qualification. English	-	£850

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Spinning	An advanced practical course on the spinning of short staple fibres on ring and open-end systems for spinning managers, supervisors and technologists. Emphasis on testing and quality control. Review of new yarn production systems.	Shirley Institute Didsbury Manchester M20 8RX United Kingdom	April 1985 4 week	Professional qualification. English	-	£850
Textile technology	Introductory, intermediate and advanced courses on cotton and man-made fibres, yarns and fabrics; textile processes and machinery for yarn and fabric (woven, knitted, non-woven) production; dyeing, printing; finishing; testing; quality control; working hazards; energy conservation; technical management.	Shirley Institute Didsbury Manchester M20 8RX United Kingdom	Throughout year 1 day- 6 months	Professional qualification. English	-	To be arranged

**WOOD PROCESSING AND WOOD PRODUCTS INDUSTRIES**  
**INDUSTRIE DU BOIS ET DES ARTICLES EN BOIS**  
**INDUSTRIAS DE ELABORACION DE LA MADERA Y DE PRODUCTOS DE MADERA**

Technologie du bois	Panneaux de particules ; utilisation des copeaux ; techniques de fabrication des panneaux de particules ; équipements employés ; contrôle de qualité des panneaux.	Station de Technologie Forestière Avenue Maréchal Juin 1 B-5800 Gembloux Belgique	Toute l'année sauf juillet à septembre 2 mois	Qualifications professionnelles. Français	-	BF.15,000 par mois
Wood working and processing	Wood working: sawmills, veneering and plywood factories, wood fibre and wood fibre board factories; wood processing: industrial production of wood furniture, cabinet making, building joinery, including wood construction elements.	Carl Duisberg-Gesellschaft and Zentralstelle für Arbeitsvermittlung der Bundesanstalt für Arbeit Hohenstaufenring 30-32 D-5000 Cologne Federal Republic of Germany	To be arranged 12-18 months including language training	Executives with completed training and practical experience. German	-	To be arranged

WOOD PROCESSING AND WOOD PRODUCTS INDUSTRIES (Cont'd)

Course or seminar	General description	Organizer; Venue
Timber technology: timber engineering and wood protection	Timber technology; mechanical properties of timber; structural design of solid and glued-laminated beams and columns; structural timber joints; wood-based panels; timber in building; protection by design; protection against natural effects; followed by options in either timber engineering or wood protection.	Department of Civil Engineering and Department of Pure and Applied Biology Imperial College University of London London SW7 2BU United Kingdom
Timber studies	All aspects of timber technology; management; marketing; specialization modules available in a wide range of subjects.	School of Art and Design, Furniture and Timber Buckinghamshire College of Higher Education High Wycombe, Buckinghamshire United Kingdom

Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
October 1985 12 months	Degree or appropriate relevant experience. English	May 1985	£4,475
September 1985 10 months	Professional qualification. English	-	£3,400

CHAPTER 2: TRAINING OPPORTUNITIES OFFERED BY INSTITUTIONS OTHER THAN UNIDO  
CHAPITRE 2 : POSSIBILITES DE FORMATION OFFERTEES PAR DES INSTITUTIONS AUTRES QUE L'ONUDI

AUTOMATION AND DATA PROCESSING  
AUTOMATISATION ET TRAITEMENT DES DONNEES  
AUTOMATIZACION Y PROCESAMIENTO DE DATOS

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Computers and their use	Real-time programming for micro and mini-computers; microprocessor programming - Intel, Motorola; microprocessor technics; digital measuring devices; electrical power measuring devices (watt-hour meters); process control instruments; reliability of process control and measuring instruments.	Institute for Instrument Design Blvd. "Lenin" 7th km Sofia 1184 Bulgaria	1 May and 1 September 1985 1 1/2-3 months	Professional qualification. English, Russian	-	To be arranged
Computer-aided design	Computer-aided design system; hardware; basic system software; application software.	The State Committee for Science and Technical Progress CAD Scientific and Research Laboratory, 55A Chapaev Street, Sofia 1574, Bulgaria	24 March 1986 6 weeks	Professional qualification. English	-	US\$815
Interactive graphic system	Basic principles of the computer graphics; application software; interaction; structure, description and functions of the two-dimensional interactive graphic system.	The State Committee for Science and Technical Progress CAD Scientific and Research Laboratory, 55A Chapaev Street, Sofia 1574, Bulgaria	26 May 1986 3 weeks	Professional qualification. English	-	US\$460
Automation	Integrated systems for complex automation in a process industry (petrochemical, chemical, pulp and paper biochemical).	"Systematics" Joint Venture of the Ministry of Chemical Industry and Honeywell Inc., Blvd. A. Tolstoi, 101 Sofia, Bulgaria	25 March 1986 3 weeks	Professional qualification. English, Russian	-	US\$540
Automatic process control	Pneumatics, oil hydraulics, mechanization, electrical and electronic controls.	Central Institute of Tool Design Balanagar Hyderabad 500 037 (A.P.) India	January 1985 4 weeks	Diploma in engineering and work experience. English	October 1984	\$US 800

AUTOMATION AND DATA PROCESSING (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Information storage and retrieval system	Theoretical basis of information processing and organization; provide necessary tools in the application of information processing techniques, and in the use of information sources and provision of information services; identify information systems and services required for their organization; understanding of the application of modern management ideas and techniques in the management of information systems and services; computer applications in information processing and dissemination.	Small Industry Extension Training Institute Yousufguda Hyderabad 500 045 India	October 8 weeks	University degree. English	-	\$US 2,320
Data processing	Two types of course can be offered. An advanced information systems design, construction and operations course is available covering the full 14-week period, through topic-based seminars and in-house training in selected EDP centres, to analyse the general method used and a number of advanced systems implemented in the sectors of interest to the person concerned (type A course). Persons interested in an advanced course in general purpose minicomputers for specialized uses and their programmes and applications can take shorter courses (2-4 weeks: type B course).	Istituto per la Ricostruzione Industriale Direzione Esteri Ufficio Cooperazione Tecnica Internazionale Via Veneto 89 I-00187 Rome Italy (Rome and other towns in Italy)	23 January 1985 5 months	Professional qualification. English, French, Spanish, Italian	-	To be arranged
Computer technologies and applications	This course is intended to provide quick, but thorough understanding of computer technologies and methods, which currently are becoming increasingly important in various fields of computer applications. Major topics: computer graphics and CAD, and digital image processing of remote sensing data.	Asia Electronics Union 1-4-2 Uchisaicho Chiyoda-ku Tokyo 100 and Kanazawa Institute of Technology 7-1 Ogigaoka Nonoichimachi Ishikawa 921 Japan	September 1985 To be arranged	Professional qualification. English	-	US\$3,700
Computer use in business operations	An intensive instruction module in the essentials of computer programming, systems analysis and specific software designed to solve major problems in accounting, finance, planning, marketing, production and quality control.	International Centre for Quality and Management Sciences P.O. Box 2082 3000 CB Rotterdam Netherlands	March 1985 and 1986 2 months	Professional qualification. English	-	Dfl.6,000

## AUTOMATION AND DATA PROCESSING (Cont'd)

### Course or seminar General description

Information and data processing systems	Courses covering main fields of information systems and training of system analysts.
Computer application development	Training in the development of computer programmes and applications using software packages. Introduction to EDP.
Computer applications and development	Short courses on microcomputer application; database management systems; word and data processing; financial modelling; programming; management information systems; computer hardware/software; evaluation, selection, and systems development, with particular emphasis on Third World agriculture and rural development.
Computing	The aim of this course is to provide an introduction to computing for potential users with little or no previous experience.
Computing strategy	This course is aimed at executives who have been directly involved in computerization and who now wish to develop their knowledge of more up-to-date systems.

Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
CEPECA-International Centre for Management Development and Electronic Data Processing and Consulting Centre Otopeni Soseaua Odai No. 20 Bucharest Romania	March, July, September & December 1985 and 1986 4-10 weeks	Professional qualification. G.A.B. Edwards and Associates Ltd. 38 Station Road Heaton Mersey Stockport United Kingdom	Monthly 12 weeks	Professional qualification. English	-	To be arranged

## AUTOMATION AND DATA PROCESSING (Cont'd)

### Course or seminar General description

Introduction to computers	This short course is suitable for senior employees with little or no experience of computers. The aim is to show how computers may help in their own circumstances.
Analogue electronics, computers, and industrial instrumentation	Short courses on various special fields in computer science.
Computers in management and development	Introduction to electronic data processing concepts; computer hardware; computer software; selection of hardware; systems development; evaluation of software packages; management information systems; quantitative decision-making techniques; manpower planning.
Modern energy	Energy systems for developing countries, energy conservation - renewable energy resources - energy supply - economics of energy - materials recycling.
Energy economy and technology	The segments composing the energy sector; the analysis of the role of the various energy sources in the national energy balance, in the framework of the Brazilian energy policies; the instruments for planning future alternatives for actions in the sector, based on the understanding of its behaviour in a situation of economical crisis, and in comparison with the world perspectives for the sector.

Programme concentrates on the design, implementation and evaluation of management education programmes within an international setting.	Centre for the Study of Management University of Lancaster Lancaster LA1 4YX United Kingdom	July 1985 6 weeks	Professional qualification. English	30 April 1985	£2,600 approx.
Management	Organizational audit and management; developing client in-house expertise in the management of development projects; programme design, development, monitoring and control.	Construction Management and Training Ltd. Clair House 55 Perrymount Road Haywards Heath West Sussex United Kingdom	To be arranged	Professional qualification. English	-	To be arranged

**MANAGEMENT AND INDUSTRIAL ADMINISTRATION (Cont'd)**

**Course or seminar General description**

<b>Site management</b>	Communications in the construction industry; industrial relations; working conditions; health and safety; contractual procedures; management planning; productivity techniques; site surveying and levelling.
<b>Supply and materials management</b>	To equip middle and senior management personnel to develop existing supplies procedures, plan new supplies systems and to integrate existing but diversified supply activities.
<b>Basic work study</b>	Gives training in the basic work study techniques. Suitable for people returning to departments where supervision is available for their early projects. Sessions are backed with exercises to illustrate theory and to give practice in its applications.
<b>General management</b>	The course is concerned with the personal development of those in mid-career. Each member is likely to gain significantly in terms of the confidence and assurance with which people are handled and decisions are taken.
<b>Management</b>	The course is intended to bring senior executives up-to-date in important aspects of management appropriate to their level. It culminates in a consideration of the broad perspectives of planning, policy-making and control. It also provides the opportunity for members to evaluate their own experience and approaches against those of similar people working in other enterprises and environments.

QUALITY CONTROL AND STANDARDIZATION (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Quality management	The Japanese approach for company-wide quality control through lectures, plant visits, in-plant exercises and discussions to develop suitable measures for his/her own organization to promote quality and productivity improvement.	The Association for Overseas Technical Scholarship, Japan 30-1, Senju Azuma 1-chome, Adachi-ku Tokyo Japan	June 1985 and 1986 3 weeks	Senior managers of developing countries who are responsible for quality and productivity in his/her organization. English	5 months before commencement of the programme	Y.327,000
Advanced quality control techniques	The techniques are presented in a simple and pragmatic way with the accent being on application rather than theory and on how these techniques compare with the old and well-established ones. Topics covered in the Seminar include: elements of "Qualimetrics" or the measurement of quality, economic design of control charts, modified control limits, multivariate charts, cumulative-sum techniques, evolutionary operations, pre-control, continuous sampling plans, production decisions, equipment decisions, operations research applications in quality control and computer influence on quality control.	International Centre for Quality and Management Sciences P.O. Box 2082 3000 CB Rotterdam Netherlands	3 June 1985 and 2 June 1986 4 weeks	Bachelor degree or equivalent and experience in quality control or a related discipline. English	3 months before commencing date	f.4,000
Management of quality control	The course is divided into three parts: 1. Theoretical; dealing with the basic concepts, quality specifications, organization, policy, planning and motivation, economics of quality, customer service, inspection and sampling, process capability, auditing, reliability and quality improvement. Statistical tools in quality control and standardization are given special attention. 2. Practical; conducted in factories, offices or institutes concerned with quality control. 3. General; spent on transmission of knowledge, studying topics of special interest and visits to industrial plants.	International Centre for Quality and Management Sciences P.O. Box 2082 3000 CB Rotterdam Netherlands	7 January and 26 August 1985 and 1986 6 January and 25 August 1986 4 months	Bachelor degree or equivalent and experience in quality control or a related discipline. English	-	f.13,000
Quality systems installation, auditing and improvement	Various types of control systems are discussed including the organization schemes and cost-reporting methods that go with each type. For existing quality control systems, the Seminar shows systematic methods of auditing and improving the system to make it work more efficiently, hence economically. Topics dealt with include: quality control functions, types of quality control systems, organization for quality assurance, introducing a quality control system, setting-up for inspection, sampling plans and their use, analysing a quality system, quality systems auditing, quality motivation and improvement programmes and quality requirements for export to industrial nations.	International Centre for Quality and Management Sciences P.O. Box 2082 3000 CB Rotterdam Netherlands	2 September 1985 and 3 September 1986 4 weeks	Bachelor degree or equivalent and experience in quality control or a related discipline. English	3 months before commencing date	f.4,000

QUALITY CONTROL AND STANDARDIZATION (Cont'd)

Course or seminar	General description	Organizer; Venue
Statistical quality control, a computer-oriented approach	The emphasis is devoted to the development and applications of various statistical tools underlying the modern methods of controlling the quality of goods and services at an early stage of the production cycle. Topics covered in the course include: the nature and impact of the computer, flow diagrams for statistical analysis, probability and probability distributions, sampling theory experimental design and regression and correlation analysis.	International Centre for Quality and Management Sciences P.O. Box 2082 3000 CB Rotterdam Netherlands
Quality control	Short courses on quality control in weaving mills; textile testing; spinning process and control; batik.	Textile Industry Division Department of Industrial Promotion Soi Kluay Nam Tai Prakanong Bangkok 10110 Thailand
Metrology	A practical course in mass, length, volume and flow measurement for inspectors in legal metrology.	Department of Trade National Weights and Measures Laboratory 26 Chapter Street London SW1P 4NS United Kingdom
Non-destructive testing methods	To provide comprehensive coverage of industrial radiography, surface inspection methods and ultrasonic testing. In addition, manufacturing and joining processes, such as casting, forging and welding will be treated. It is intended that the radiography part of the course will give a coverage similar to that of the Kodak course.	Scottish School of Non-Destructive Testing Paisley College High Street Paisley PA1 2BE Scotland United Kingdom

Audiology, noise and vibration control	Latest audiological and vestibulometric techniques; introduction to fundamentals of vibration and acoustics.	ISVR, Southampton University Southampton United Kingdom	April to September 1985 1 week	Professional qualification. English	-	£300-£350
Business administration	Short courses in operational research; statistics with emphasis on business applications; computer simulation as used in management science; forecasting for government and industry.	LANCORD Ltd University of Lancaster Bailrigg Lancaster United Kingdom	February, March and November 1985 and 1986 1-2 weeks	Professional qualification. English	-	To be arranged

OTHER TRAINING OPPORTUNITIES AND SHORT COURSES (Cont'd)

Course or seminar	General description	Organizer; Venue
Industrial training	Short and long term courses on: automobile engineering; fabrication of steel/sheet metal; welding; engineering production; building construction; glassfibre fabrication; building materials; electrical and electronic engineering; overseas development industrial training for Third World countries; computerization and robotics.	Loughborough Technical College Radmoor Loughborough Leicestershire LE11 3BT United Kingdom
Corrosion	Courses on: stress corrosion in plant and structures; corrosion engineering and control; high temperature corrosion - theory and practice; corrosion and water industry; corrosion monitoring and inspection; novel and exciting methods for investigating anti-corrosive paints.	University of Manchester I.S.T. Manchester M13 9PL United Kingdom
Microprocessors	Intensive course in the specially equipped microprocessor laboratory using Z80 single board, VDU and 380Z development systems. Practical experiments from elementary sequencing to complex problems in control and instrumentation.	Department of Electrical Engineering University of Manchester Dover Street Manchester M13 9PL United Kingdom
Boatbuilding	The techniques of boatbuilding and the skills necessary to organize and administer a boatbuilding company.	Marine Training and Development Limited Harbour Road Oulton Broad Lowestoft, Suffolk United Kingdom
Production technology	Short courses on: applied pneumatics; industrial hydraulics; electronics; foundry appreciation; cupola control; casting defects; electric melting; casting design; practical metallurgy (ferrous and non-ferrous); foundry technology.	Metcon Training 14 Pall Mall London SW1Y 5LZ United Kingdom

Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Throughout year To be arranged	Professional qualification. English	-	To be arranged
Throughout 1985 2 days- 7 days	Professional qualification. English	-	To be arranged
4 times per year 10 working days	Professional qualification. English	-	£425
7 January 1985 To be arranged	Professional qualification. English	-	£3,380
Throughout year 3-10 days	Professional qualification. English	-	To be arranged

OTHER TRAINING OPPORTUNITIES AND SHORT COURSES (Cont'd)

Course or seminar	General description	Organizer; Venue	Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Materials handling	Short courses on: micro-electronics in materials handling; application of micro-electronic control to materials handling system design; redesigning your order picking system; techniques of physical distribution management; warehouse management and industrial relations; warehouse layout and methods; the control of physical distribution; first line supervision in physical distribution; modern warehouse design; unit load handling in manufacture; parts storage system design.	National Materials Handling Centre Cranfield Institute of Technology Cranfield Bedford MK43 0AL United Kingdom	Throughout year 2-4 1/2 days	Professional qualification. English	-	To be arranged
Management	Short courses on: self-management and self-development; and art of management.	P-E Training Services 104a Bartholomew Street Newbury, Berkshire United Kingdom	January and March 1985 1 week	Professional qualification. English	-	£420 excluding accommodation
Industrial tribology	Industrial applications of tribology.	University College of Swansea Department of Mechanical Engineering Swansea SA2 8PP United Kingdom	September 1985 and 1986 To be arranged	Professional qualification. English	-	Approx. £260
Industrial maintenance	Short courses are organized on: planning cost effective industrial maintenance; improving plant performance.	The Wolfson Industrial Maintenance Unit Simon Engineering Laboratories Manchester University Manchester M13 9PL United Kingdom	Easter and Autumn 1985 3 days	Professional qualification. English	-	£300 approx.
Electromagnetic compatibility (E.M.C.)	A short course on the theoretical background of E.M.C. measurements.	The York Electronics Centre University of York York YO1 5DD United Kingdom	To be arranged 2 1/2 days	Professional qualification. English	-	To be arranged
Human-computer interaction	A course on human factors for the computer industry. Subjects covered include human-computer dialogue, design and speech communication.	Department of Psychology University of York Heslington York YO1 5DD United Kingdom	March 1985 3 days	Professional qualification. English	-	£310

OTHER TRAINING OPPORTUNITIES AND SHORT COURSES (Cont'd)

Course or seminar	General description	Organizer; Venue
R & D management	Participants will learn how to apply principles and techniques of productive R & D management in these areas: philosophy of management; planning; organizing; staffing and staff development; directing and leading; evaluating and controlling.	Battelle 505 King Avenue Columbus Ohio 43201 United States of America
Management and communication	Communication and management skills useful on return home to adapt, introduce and effectively implement training acquired abroad. Includes: intro. of change, organizational communication, problem solving, leadership styles, motivation, persuasion, time management, decision making, delegation, developing and maintaining effective working relationships.	Management-Communication Associates P.O. Box 366 East Lansing Michigan 48823 United States of America (training held in various United States cities)
Measurement systems dynamics and engineering	Measuring dynamic mechanical and thermal quantities by electrical means. Electrical measurement of mechanical quantities.	Stein Engineering Services, Inc. 5602 East Monte Rosa Phoenix, Arizona 85018 United States of America
Management	Short courses are organized on: interpersonal communication skills; supervisory skills training; time management; motivation and leadership; training trainers how to train.	Training Services Department UOP Process Division 20 UOP Plaza Des Plaines, Illinois 60016 United States of America

Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
5 August 1985 18 days	Middle manager in R & D. English	1 July 1985	\$US 2,500 for tuition, lunches, 3 dinners, and course material
8 sessions year around 10 days	Professional qualification. English	-	\$US 380 or \$US 725
March 1985 5 days (each course)	BS degree. English	-	\$US 850 each course \$US 1,550 if taken together
To be arranged 2 days- 2 weeks	Professional qualification. English	-	To be arranged

OTHER TRAINING OPPORTUNITIES AND SHORT COURSES (Cont'd)

Course or seminar	General description	Organizer; Venue
Management with special reference to refineries	Short courses on: project management for owners; management systems for refinery and petrochemical plant laboratories; fundamentals of refinery inspection.	UOP Process Division Customer Systems and Service Department 20 UOP Plaza Des Plaines Illinois 60016 United States of America
Refinery corrosion and fouling control	The course is designed for those involved in corrosion and fouling control on the process side of oil refining plants, with emphasis on areas where liquid water exists.	UOP Process Division Customer Systems and Service Department 20 UOP Plaza Des Plaines Illinois 60016 United States of America
Modern management and supervision	Seminar.	Graduate Sc'ool, USDA International Programs 600 Maryland Avenue SW Washington, D.C. 20024 United States of America
Measurement in condition based maintenance of machines, technical diagnostics	Measuring techniques in condition monitoring of machines, etc.	Institute for Developing Countries P.O. Box 303 41001 Zagreb Yugoslavia and IMEKO Secretariat P.O. Box 457 1371 Budapest 5 Hungary

Commencing date; Duration	Qualifications; Language requirements	Last date for receipt of applications	Fee
Throughout year 5 days- 2 weeks	Professional qualification. English	-	US\$2,000- US\$5,000
21 May and 23 Septem- ber 1985 (Des Plaines)	Professional qualification. English	-	US\$2,000
21 October 1985 (Rome Italy) 5 days			
Throughout year 4 days	Professional qualification. English	-	To be arranged
(Hong Kong, Singapore, New Delhi, Manila, Cairo, Abu Dhabi, Abidjan, Paris, Lausanne, Cologne, Rome)			
September 1985 8 days	Professional qualification. English	-	To be arranged

CHAPTER 4: FIELDS OF TRAINING BY HOST COUNTRIES

The following is a list of the host countries included in this Guide. Under each country's name the fields of training are listed in the order in which they appear in the Guide (see table of contents). Distinction is made between training programmes offered by UNIDO (A) and fields of training in which training opportunities are offered by institutions other than UNIDO (B).

AUSTRALIA	B - Management and industrial administration - Trainer development	BULGARIA	A - Mechanical and metalworking industries - Management and industrial administration
AUSTRIA	A - Chemical industries - Environment B - Chemical industries - Industrial information and documentation	CAMEROON	B - Mechanical and metalworking industries - Automation and data processing - Energy - Management and industrial administration
BELGIUM	A - Chemical industries - Textile industries - Maintenance and repair B - Building materials industries - Chemical industries - Food processing industries - Glass and optical industries - Leather and leather products industries - Mechanical and metalworking industries - Metallurgical industries - Packaging industries - Textile industries - Wood processing and wood products industries - Energy - Environment - Industrial planning and programming - Investment promotion and industrial financing - Maintenance and repair - Management and industrial administration - Quality control and standardization - Trainer development	CHILE	A - Maintenance and repair - Management and industrial administration
		CHINA	B - Industrial planning and programming - Management and industrial administration
		CUBA	A - Mechanical and metalworking industries
		CZECHOSLOVAKIA	B - Industrial planning and programming - Quality control and standardization
BRAZIL	B - Pulp and paper industries - Energy - Quality control and standardization	EGYPT	A - Building materials industries - Mechanical and metalworking industries - Metallurgical industries - Maintenance and repair
		FINLAND	B - Industrial design
			A - Wood processing and wood products industries
			B - Management and industrial administration

FRANCE	A	<ul style="list-style-type: none"><li>- Industrial planning and programming</li><li>- Investment promotion and industrial financing</li><li>- Maintenance and repair</li></ul>
	B	<ul style="list-style-type: none"><li>- Chemical industries</li><li>- Food processing industries</li><li>- Leather and leather products industries</li><li>- Energy</li><li>- Industrial information and documentation</li><li>- Management and industrial administration</li><li>- Quality control and standardization</li></ul>
GERMAN DEMOCRATIC REPUBLIC	A	<ul style="list-style-type: none"><li>- Chemical industries</li><li>- Printing industries</li><li>- Industrial planning and programming</li></ul>
GERMANY, FEDERAL REPUBLIC OF, AND BERLIN (WEST)	B	<ul style="list-style-type: none"><li>- Chemical industries</li><li>- Electrical and electronic industries</li><li>- Printing industries</li><li>- Wood processing and wood products industries</li><li>- Management and industrial administration</li><li>- Marketing and export promotion</li><li>- Quality control and standardization</li></ul>
HUNGARY	A	<ul style="list-style-type: none"><li>- Maintenance and repair</li></ul>
	B	<ul style="list-style-type: none"><li>- Maintenance and repair</li><li>- Trainer development</li></ul>
INDIA	B	<ul style="list-style-type: none"><li>- Chemical industries</li><li>- Food processing industries</li><li>- Leather and leather products industries</li><li>- Packaging industries</li><li>- Automation and data processing</li><li>- Energy</li><li>- Environment</li><li>- Industrial information and documentation</li><li>- Industrial planning and programming</li><li>- Maintenance and repair</li><li>- Marketing and export promotion</li><li>- Small-scale industries and entrepreneurship</li><li>- Trainer development</li></ul>

INDONESIA	B	
	-	Food processing industries
IRELAND	B	
	-	Energy
	-	Management and industrial administration
	-	Trainer development
ISRAEL	B	
	-	Small-scale industries and entrepreneurship
ITALY	A	
	-	Glass and optical industries
	-	Packaging industries
	B	
	-	Food processing industries
	-	Mechanical and metalworking industries
	-	Metallurgical industries
	-	Automation and data processing
	-	Energy
	-	Industrial design
	-	Maintenance and repair
	-	Management and industrial administration
JAPAN	A	
	-	Management and industrial administration
	-	Quality control and standardization
	B	
	-	Automation and data processing
	-	Industrial design
	-	Management and industrial administration
	-	Quality control and standardization
MALAYSIA	B	
	-	Management and industrial administration
MAURITIUS	B	
	-	Food processing industries
NETHERLANDS	B	
	-	Food processing industries
	-	Leather and leather products industries
	-	Metallurgical industries
	-	Textile industries
	-	Automation and data processing
	-	Energy
	-	Industrial planning and programming
	-	Management and industrial administration
	-	Marketing and export promotion

NETHERLANDS	B	<ul style="list-style-type: none"><li>- Quality control and standardization</li><li>- Small-scale industries and entrepreneurship</li></ul>
PAKISTAN	B	<ul style="list-style-type: none"><li>- Building materials industries</li><li>- Leather and leather products industries</li><li>- Maintenance and repair</li><li>- Management and industrial administration</li><li>- Textile industries</li></ul>
PERU	B	<ul style="list-style-type: none"><li>- Investment promotion and industrial financing</li></ul>
PHILIPPINES	A	<ul style="list-style-type: none"><li>- Energy</li></ul>
POLAND	A	<ul style="list-style-type: none"><li>- Metallurgical industries</li><li>- Industrial planning and programming</li><li>- Investment promotion and industrial financing</li></ul>
	B	<ul style="list-style-type: none"><li>- Metallurgical industries</li><li>- Industrial planning and programming</li></ul>
ROMANIA	A	<ul style="list-style-type: none"><li>- Chemical industries</li></ul>
	B	<ul style="list-style-type: none"><li>- Automation and data processing</li><li>- Management and industrial administration</li><li>- Trainer development</li></ul>
SPAIN	B	<ul style="list-style-type: none"><li>- Food processing industries</li></ul>
SUDAN	B	<ul style="list-style-type: none"><li>- Food processing industries</li><li>- Management and industrial administration</li></ul>
SWEDEN	B	<ul style="list-style-type: none"><li>- Food processing industries</li><li>- Management and industrial administration</li></ul>
SWITZERLAND	A	<ul style="list-style-type: none"><li>- Chemical industries</li></ul>
	B	<ul style="list-style-type: none"><li>- Food processing industries</li><li>- Management and industrial administration</li></ul>

THAILAND	B	- Automation and data processing - Environment - Quality control and standardization
TURKEY	A	- Building materials industries - Food processing industries - Glass and optical industries - Metallurgical industries - Textile industries
	B	- Food processing industries
UKRAINIAN SOVIET SOCIALIST REPUBLIC	A	- Mechanical and metalworking industries - Metallurgical industries
UNION OF SOVIET SOCIALIST REPUBLICS	A	- Chemical industries - Food processing industries - Mechanical and metalworking industries - Industrial information and documentation - Trainer development
UNITED KINGDOM OF GREAT BRITAIN AND NORTHERN IRELAND	B	- Building materials industries - Chemical industries - Electrical and electronic industries - Food processing industries - Leather and leather products industries - Mechanical and metalworking industries - Packaging industries - Printing industries - Pulp and paper industries - Textile industries - Wood processing and wood products industries - Automation and data processing - Environment - Industrial design - Industrial planning and programming - Investment promotion and industrial financing - Maintenance and repair - Management and industrial administration - Quality control and standardization - Small-scale industries and entrepreneurship - Trainer development

UNITED REPUBLIC  
OF TANZANIA

- B  
- Management and industrial administration

UNITED STATES  
OF AMERICA

- B  
- Automation and data processing  
- Energy  
- Management and industrial administration  
- Marketing and export promotion

YUGOSLAVIA

- A  
- Maintenance and repair  
- Management and industrial administration

ZAMBIA

- B  
- Management and industrial administration

UNITED NATIONS AND RELATED ORGANIZATIONS

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS (FAO)

- Food processing industries  
- Wood processing and wood products industries

INTERNATIONAL MARITIME ORGANIZATION (IMO)

- Mechanical and metalworking industries

WORLD INTELLECTUAL PROPERTY ORGANIZATION (WIPO)

- Industrial information and documentation

CHAPITRE 4: DOMAINES DE FORMATION PAR PAYS

On trouvera, ci-après, une liste des pays d'accueil figurant dans l'Aperçu. Pour chacun de ces pays on a indiqué, dans le même ordre que dans l'Aperçu (voir la table des matières), les domaines sur lesquels porte la formation, en distinguant selon que les possibilités de formation sont offertes par l'ONUDI (A) ou par d'autres institutions (B).

ALLEMAGNE, REPUBLIQUE FEDERALE D', ET BERLIN-OUEST	B	BELGIQUE	B
			<ul style="list-style-type: none"><li>- Energie</li><li>- Entretien et réparation</li><li>- Environnement</li><li>- Gestion et administration industrielle</li><li>- Perfectionnement du personnel enseignant</li><li>- Planification et programmation industrielles</li><li>- Promotion des investissements et financement industriel</li></ul>
AUSTRALIE	B	BRESIL	B
	<ul style="list-style-type: none"><li>- Gestion et administration industrielle</li><li>- Perfectionnement du personnel enseignant</li></ul>		<ul style="list-style-type: none"><li>- Industrie de la pâte à papier et du papier</li><li>- Contrôle de la qualité et normalisation</li><li>- Energie</li></ul>
AUTRICHE	A	BULGARIFF	A
	<ul style="list-style-type: none"><li>- Industrie chimique</li><li>- Environnement</li></ul>		<ul style="list-style-type: none"><li>- Industrie de construction mécanique et de transformation des métaux</li><li>- Gestion et administration industrielle</li></ul>
	B		B
	<ul style="list-style-type: none"><li>- Industrie chimique</li><li>- Information et documentation industrielles</li></ul>		<ul style="list-style-type: none"><li>- Industrie de construction mécanique et de transformation des métaux</li><li>- Automatisation et traitement des données</li><li>- Energie</li><li>- Gestion et administration industrielle</li></ul>
BELGIQUE	A	CAMEROUN	A
	<ul style="list-style-type: none"><li>- Industrie chimique</li><li>- Industrie textile</li><li>- Entretien et réparation</li></ul>		<ul style="list-style-type: none"><li>- Entretien et réparation</li><li>- Gestion et administration industrielle</li></ul>
	B	CHILI	B
	<ul style="list-style-type: none"><li>- Industrie alimentaire</li><li>- Industrie du bois et des articles en bois</li><li>- Industrie chimique</li><li>- Industrie du cuir et des articles en cuir</li><li>- Industrie de l'emballage</li><li>- Industrie des matériaux de construction</li><li>- Industrie de construction mécanique et de transformation des métaux</li><li>- Industrie métallurgique</li><li>- Industrie textile</li><li>- Industrie de la verrerie et de l'optique</li><li>- Contrôle de la qualité et normalisation</li></ul>		<ul style="list-style-type: none"><li>- Gestion et administration industrielle</li><li>- Planification et programmation industrielles</li></ul>
		CHINE	A
			<ul style="list-style-type: none"><li>- Industrie de construction mécanique et de transformation des métaux</li></ul>
		CUBA	B
			<ul style="list-style-type: none"><li>- Contrôle de la qualité et normalisation</li><li>- Planification et programmation industrielles</li></ul>

EGYPTE	A	- Design industriel
	B	- Industrie de construction mécanique et transformation des métaux
		- Design industriel
ESPAGNE	B	- Industrie alimentaire
ETATS UNIS D'AMERIQUE	B	- Automatisation et traitement des données
		- Energie
		- Gestion et administration industrielle
		- Marketing et promotion des exportations
FINLANDE	A	- Industrie du bois et des articles en bois
	B	- Gestion et administration industrielle
FRANCE	A	- Entretien et réparation
		- Planification et programmation industrielles
		- Promotion des investissements et financement industriel
	B	- Industrie alimentaire
		- Industrie chimique
		- Industrie du cuir et des articles en cuir
		- Contrôle de la qualité et normalisation
		- Energie
		- Gestion et administration industrielle
		- Information et documentation industrielles
HONGRIE	A	- Entretien et réparation
	B	- Entretien et réparation
		- Perfectionnement du personnel enseignant
INDE	B	- Industrie alimentaire
		- Industrie chimique
		- Industrie du cuir et des articles en cuir
		- Industrie de l'emballage
		- Automatisation et traitement des données
		- Energie
		- Entretien et réparation

INDE	B	- Environnement - Information et documentation industrielles - Marketing et promotion des exportations - Perfectionnement du personnel enseignant - Petites industries et entrepreneurs - Planification et programmation industrielles
INDONESIE	B	- Industrie alimentaire
IRLANDE	B	- Energie - Gestion et administration industrielle - Perfectionnement du personnel enseignant
ISRAEL	B	- Petites industries et entrepreneurs
ITALIE	A	- Industrie de l'emballage - Industrie de la verrerie et de l'optique
	B	- Industrie alimentaire - Industrie de construction mécanique et de transformation des métaux - Industrie métallurgique - Automatisation et traitement des données - Design industriel - Energie - Entretien et réparation - Gestion et administration industrielle
JAPON	A	- Contrôle de la qualité et normalisation - Gestion et administration industrielle
	B	- Automatisation et traitement des données - Contrôle de la qualité et normalisation - Design industriel - Gestion et administration industrielle
MALAISIE	B	- Gestion et administration industrielle
MAURICE	B	- Industrie alimentaire

PAKISTAN	B	<ul style="list-style-type: none"><li>- Industrie des matériaux de construction</li><li>- Industrie du cuir et des articles en cuir</li><li>- Entretien et réparation</li><li>- Gestion et administration industrielle</li><li>- Industrie textile</li></ul>
PAY-BAS	B	<ul style="list-style-type: none"><li>- Industrie alimentaire</li><li>- Industrie du cuir et des articles en cuir</li><li>- Industrie métallurgique</li><li>- Industrie textile</li><li>- Automatisation et traitement des données</li><li>- Contrôle de la qualité et normalisation</li><li>- Energie</li><li>- Gestion et administration industrielle</li><li>- Marketing et promotion des exportations</li><li>- Petites industries et entrepreneurs</li><li>- Planification et programmation industrielles</li></ul>
PEROU	B	<ul style="list-style-type: none"><li>- Promotion des investissements et financement industriel</li></ul>
PHILIPPINES	A	<ul style="list-style-type: none"><li>- Energie</li></ul>
POLOGNE	A	<ul style="list-style-type: none"><li>- Industrie métallurgique</li><li>- Planification et programmation industrielles</li><li>- Promotion des investissements et financement industriel</li></ul>
	B	<ul style="list-style-type: none"><li>- Industrie métallurgique</li><li>- Planification et programmation industrielles</li></ul>
REPUBLIQUE DEMOCRATIQUE ALLEMANDE	A	<ul style="list-style-type: none"><li>- Industrie chimique</li><li>- Industries graphiques</li><li>- Planification et programmation industrielles</li></ul>
REPUBLIQUE SOCIALISTE SOVIETIQUE D'UKRAINE	A	<ul style="list-style-type: none"><li>- Industrie de construction mécanique et de transformation des métaux</li><li>- Industrie métallurgique</li></ul>
REPUBLIQUE UNIE DE TANZANIE	B	<ul style="list-style-type: none"><li>- Gestion et administration industrielle</li></ul>

ROUMANIE

- A
  - Industrie chimique
- B
  - Automatisation et traitement des données
  - Gestion et administration industrielle
  - Perfectionnement du personnel enseignant

ROYAUME-UNI DE  
GRANDE-BRETAGNE ET  
D'IRLANDE DU NORD

- B
  - Industrie alimentaire
  - Industrie du bois et des articles en bois
  - Industrie chimique
  - Industrie des matériaux de construction
  - Industrie de construction mécanique et de transformation des métaux
  - Industrie du cuir et des articles en cuir
  - Industries électriques et électroniques
  - Industrie de l'emballage
  - Industries graphiques
  - Industrie de la pâte à papier et du papier
  - Industrie textile
  - Automatisation et traitement des données
  - Contrôle de la qualité et normalisation
  - Design industriel
  - Entretien et réparation
  - Environnement
  - Gestion et administration industrielle
  - Perfectionnement du personnel enseignant
  - Petites industries et entrepreneurs
  - Planification et programmation industrielles
  - Promotion des investissements et financement industriel

SOUDAN

- B
  - Industrie alimentaire
  - Gestion et administration industrielle

SUEDE

- B
  - Industrie alimentaire
  - Gestion et administration industrielle

SUISSE

- A
  - Industrie chimique
- B
  - Industrie alimentaire
  - Gestion et administration industrielle

TCHECOSLOVAQUIE	A	- Industrie des matériaux de construction - Industrie de construction mécanique et de transformation des métaux - Industrie métallurgique - Entretien et réparation	UNION DES REPUBLIQUES SOCIALISTES SOVIETIQUES	A	- Industrie alimentaire - Industrie chimique - Industrie de construction mécanique et de transformation des métaux - Information et documentation industrielles - Perfectonnement du personnel enseignant
THAILANDE	B	- Automatisation et traitement des données - Contrôle de la qualité et normalisation - Environnement			
TURQUIE	A	- Industrie alimentaire - Industrie des matériaux de construction - Industrie métallurgique - Industrie textile - Industrie de la verrerie et de l'optique	YUGOSLAVIE	A	- Entretien et réparation - Gestion et administration industrielle
	B	- Industrie alimentaire	ZAMBIE	B	- Gestion et administration industrielle

NATIONS UNIES ET ORGANISATIONS APPARENTÉES

ORGANISATION DES NATIONS UNIES POUR L'ALIMENTATION ET L'AGRICULTURE (FAO)

- Industrie alimentaire
- Industrie du bois et des articles en bois

ORGANISATION MONDIALE DE LA PROPRIÉTÉ INTELLECTUELLE (OMPI)

- Information et documentation industrielles

ORGANISATION MARITIME INTERNATIONALE (OMI)

- Industrie de construction mécanique et de transformation des métaux

CAPITULO 4: ESFERAS DE CAPACITACION POR PAISES HUESPEDES

A continuación figura una lista de los países huéspedes incluidos en la presente Guía. Debajo del nombre de cada país figuran las esferas de capacitación en el orden en que aparecen en la Guía (véase el índice). Se hace una distinción entre los programas de capacitación que ofrece la ONUDI (A) y las esferas de capacitación en que instituciones diferentes de la ONUDI (B) ofrecen oportunidades de formación.

ALEMANIA, REPUBLICA FEDERAL DE, Y BERLIN (OESTE)	B	BELGICA	B
			<ul style="list-style-type: none"><li>- Control de calidad y normalización</li><li>- Desarrollo de profesionales de capacitación</li><li>- Energía</li><li>- Gestión y administración industrial</li><li>- Mantenimiento y reparación</li><li>- Medio ambiente</li><li>- Planeamiento y programación industrial</li><li>- Promoción de las inversiones y financiación industrial</li></ul>
AUSTRALIA	B	BRASIL	B
	<ul style="list-style-type: none"><li>- Desarrollo de profesionales de capacitación</li><li>- Gestión administración industrial</li></ul>		<ul style="list-style-type: none"><li>- Industrias de la celulosa y el papel</li><li>- Control de calidad y normalización</li><li>- Energía</li></ul>
AUSTRIA	A	BULGARIA	A
	<ul style="list-style-type: none"><li>- Industrias químicas</li><li>- Medio ambiente</li></ul>		<ul style="list-style-type: none"><li>- Industrias mecánicas y de transformación de metales</li><li>- Gestión y administración industrial</li></ul>
	B		B
	<ul style="list-style-type: none"><li>- Industrias químicas</li><li>- Información y documentación industriales</li></ul>		<ul style="list-style-type: none"><li>- Industrias mecánicas y de transformación de metales</li><li>- Automatización y procesamiento de datos</li><li>- Energía</li><li>- Gestión y administración industrial</li></ul>
BELGICA	A	CUBA	B
	<ul style="list-style-type: none"><li>- Industrias químicas</li><li>- Industrias textiles</li><li>- Mantenimiento y reparación</li></ul>		<ul style="list-style-type: none"><li>- Control de calidad y normalización</li><li>- Planeamiento y programación industrial</li></ul>
	B	CHECOSLOVAQUIA	A
	<ul style="list-style-type: none"><li>- Industrias alimentarias</li><li>- Industrias del cuero y de los productos de cuero</li><li>- Industrias relacionadas con el embalaje</li><li>- Industrias de elaboración de la madera y de productos de madera</li><li>- Industrias de los materiales de construcción</li><li>- Industrias mecánicas y de transformación de metales</li><li>- Industrias metalúrgicas</li><li>- Industrias químicas</li><li>- Industrias textiles</li><li>- Industrias del vidrio y ópticas</li></ul>		<ul style="list-style-type: none"><li>- Industrias de los materiales de construcción</li><li>- Industrias mecánicas y de transformación de metales</li><li>- Industrias metalúrgicas</li><li>- Mantenimiento y reparación</li></ul>
		CHILE	B
			<ul style="list-style-type: none"><li>- Gestión y administración industrial</li><li>- Planeamiento y programación industrial</li></ul>

<b>CHINA</b>	A	- Industrias mecánicas y de transformación de metales
<b>EGIPTO</b>	A	- Diseño industrial
	B	- Industrias mecánicas y de transformación de metales
		- Diseño industrial
<b>ESPAÑA</b>	B	- Industrias alimentarias
<b>ESTADOS UNIDOS DE AMÉRICA</b>	B	- Automatización y procesamiento de datos
		- Comercialización y promoción de las exportaciones
		- Energía
		- Gestión y administración industrial
<b>FILIPINAS</b>	A	- Energía
<b>FINLANDIA</b>	A	- Industrias de elaboración de la madera y de productos de madera
	B	- Gestión y administración industrial
<b>FRANCIA</b>	A	- Mantenimiento y reparación
		- Planeamiento y programación industrial
		- Promoción de las inversiones y financiación industrial
	B	- Industrias alimentarias
		- Industrias del cuero y de los productos de cuero
		- Industrias químicas
		- Control de calidad y normalización
		- Energía
		- Gestión y administración industrial
		- Información y documentación industriales
<b>HUNGRIA</b>	A	- Mantenimiento y reparación

HUNGRIA	B	- Desarrollo de profesionales de capacitación - Mantenimiento y reparación
INDIA	B	- Industrias alimentarias - Industrias del cuero y de los productos de cuero - Industrias relacionadas con el embalaje - Industrias químicas - Automatización y procesamiento de datos - Comercialización y promoción de las exportaciones - Desarrollo de profesionales de capacitación - Energía - Información y documentación industriales - Mantenimiento y reparación - Medio ambiente - Pequeñas industrias y los empresarios - Planeamiento y programación industrial
INDONESIA	B	- Industrias alimentarias
IRLANDA	B	- Desarrollo de profesionales de capacitación - Energía - Gestión y administración industrial
ISRAEL	B	- Pequeñas industrias y los empresarios
ITALIA	A	- Industrias relacionadas con el embalaje - Industrias del vidrio y ópticas
	B	- Industrias alimentarias - Industrias mecánicas y de transformación de metales - Industrias metalúrgicas - Automatización y procesamiento de datos - Diseño industrial - Energía - Gestión y administración industrial - Mantenimiento y reparación

JAPON	A	<ul style="list-style-type: none"><li>- Control de calidad y normalización</li><li>- Gestión y administración industrial</li></ul>
