1.0 INTRODUCTION

With the present document the Contractor wants to describe the works performed at the plant site for the conversion of FARIZ IRAN to phase out the use of CFC-11 in the production of domestic refrigerators and freezers.

The activities performed under this contract are briefly listed hereafter, accordingly to the TOR (Terms of Reference).

2.0 LAY OUT OF THE PLANT, TECHNICAL DOCUMENTATION (STEPS 1 AND 2 OF THE TOR)

After award of the order the Contractor visited the Counterpart in order to verify the conditions of the site and to identify the best engineering solutions for the conversion of the existing foaming lines.

During the visit the Contractor discussed the following main subjects:

- A. Technical details regarding the supply of the equipment; particular care has been pointed on the premix units, the polyol/cyclopentane blend and the isocyanate modules, the safeties of the plant (i.e.: gas sensors, ventilation groups, cyclopentane storage tank and relevant accessories).
- B. The suitable site where the new equipment had to be installed.
- C. The required modification to the new lay-out.

3.0 DELIVERY OF THE EQUIPMENT (STEP 5 OF THE TOR)

The delivery on site and the opening of the crates has been done accordingly to the Progress Report dated 25th of November 1997.

	Job. N.	229622003	Doc. N.	FR00/101/ES
	Customer	U.N.I.D.O.	Rev.	0
	Plant	FARIZ IRAN Co. 25 Taleghani ave., 15918 TEHRAN U.N.I.D.O. PROJECT MP/IRA/96/041 CONTRACT NO. 96/104	Sh	4 / 5

4.0 INSTALLATION AND COMMISSIONING (STEP 6 OF THE TOR)

The Contractor's engineers followed the installation phase by supervising the activities that have been done by the Counterpart.

Following zones of the plant have been inspected many times by the Contractor:

- Cyclopentane storage tank area
- Wet area
- Process chemicals connecting pipes between wet and dry area
- Foaming area

The commissioning and the on-the-job training has been done with D.O.P. as for the acceptance protocol attached to the 2nd progress report dated 30th of November, 1998.

5.0 TRIAL PRODUCTION AND TEST RUN PRODUCTION (STEPS 7 AND 9 OF THE TOR)

After the installation and the D.O.P. commissioning phase the Contractor assisted the Counterpart In the design of the first prototype.

The trial production of the remaining models has been done with cyclopentane as blowing agent while our technicians were on site.

Find attached the acceptance protocol signed by the Counterpart, dated 21st of May, 2000.

6.0 SAFETY CERTIFICATION (STEP 10 OF THE TOR)

The Contractor states that the equipment supplied is in accordance with the standards of quality and safety and the codes in use in the European Countries of origin at the time of purchasing.

Find attached the Safety Statement Form for the above.

7.0 FINAL REPORT (STEP 11 OF THE TOR)

The Contractor, by means of the transmission of this Final Report, carried out all the contractual agreements as for the Terms of Reference.

In data odierna è stato completato il collaudo del macchinario sopra menzionato.
Il macchinario è stato trovato conforme al contratto e se ne accetta il livello funzionale ai fini dell'inizio del periodo di garanzia.

Under today's date, the commissioning of the a.m. machinery has been completed.
The machinery has been found in compliance with the above mentioned contract and the functioning level has been accepted in order to start the guarantee period.

Eventuali osservazioni sono qui di seguito riportate:

Eventual remarks are below reported:

We hereby certify that the above mentioned machines were erected and start up well. But according to TUV report some security job hasn't completed yet and Cannon group should finish the required security job. The security is concerned to gas tank only. Zamani
