Dear Ms. Koreh,

We are pleased to submit the final report on the implementation of the National Recovery and Recycling Scheme in the Philippines as per UNIDO project No. MP/ PHI/ 97/ 097 and UNIDO Contract No. 99/ 063. This report covers the different activities / task undertaken by TESDA for the project.

In this regard, may we request the release of the funds for the payment of trainer's honoraria and other activities related to the project.

Respectfully yours,

EDICIO G. DELA TORRE
Director General

FINAL REPORT

INTRODUCTION

This final report highlights the conduct of Technician Level Training Program on CFC Recovery and Recycling Scheme for the Philippines. Included in this report are the course description, course schedule and venue, course staff and personnel and course proceedings.

RATIONALE

The discharge of chlorofluorocarbons (CFC) and Hydrochlorofluorocarbons (HCFCs) into the atmosphere causes damages to the ozone layer that protects humans, plants and animals from the harmful effects of the sun's ultra-violet radiation. These compounds are used in aerosols, essential health products, computers, fire extinguishers and insulation products and refrigeration and air-conditioning system.

The training program is very essential to the RAC technicians and practitioners who will enhance their knowledge and skills in the handling of CFC refrigerants and its proper disposal during the repair process.

COURSE OBJECTIVES

It is expected that the one-day Technician training program will provide knowledge, skills and attitude necessary in embarking on a successful Technician training program. Specifically, at the end of the training program it is expected that the participants shall have been able to:

1. Answer Pre.- Test
2. Analyze the cause and effect of ozone depletion and global warming.
3. Identify the properties and hazards of halocarbon refrigerants.
4. Install mini commercial trainer.
5. Connect pipelines of the trainer.
6. Leak tests the trainer.
7. Flush the system
8. Vacuum the system
9. Charge the system
10. Recover and Recycling the refrigerants from the system by using Recovery and Recycling machine.
11. Apply safety precaution in handling refrigerant and RAC equipment.
12. Answer Post Test
13. Evaluate the training program

COURSE CONTENT

The course contained the ff. topics.

1. Cause and effect of ozone depletion
2. Cause and effect of global warming
3. Properties and hazards of halocarbons.
4. Cause of leakage
5. General overview of basic principles
6. Refrigerants and refrigerant handling.
7. Recovery techniques for liquid and vapor
8. Recycling, evaluation and dehydration
9. Construction of low cost recovery machines from recycled materials.
10. Fault finding, diagnostic and repair
11. Laboratory works/ practice/ manipulation of Recovery Recycling units

COURSE PARTICIPANTS

A total of 3,125 technicians from the different regions of Luzon, Visayas and Mindanao are expected to attend this training program. Annex A shows the set target participants to be trained on this activity

COURSE SCHEDULE and VENUE

The Technician Training Program was held in the different cities, TESDA Training Centers and Schools in Luzon, Visayas, Mindanao.

COURSE STAFF and PERSONNEL

The one day training program was conducted by the trainers from TESDA Training Center and Schools who were trained in the 1st phase of the project. They are eligible to conduct the Technician Training in direct coordination with TESDA, UNIDO, DENR and DTI personnel.

COURSE PROCEEDINGS

Registration of participants and other concerns were conducted before the opening program. Annex B presents the one-day activity of the program.

ACCOMPLISHMENT

A. Technician Training

A Regional Coordinating Committee was organized in each region composed of representatives from TESDA, DTI and DENR. This committee assisted in the recruitment of participants for the Technician Training and likewise promoted the project in the region. Trainers for TESDA Training Centers and Schools who were trained in the first phase of the project conducted the Technician Training.

Three thousands two hundred twenty three (3,223) participants have attended the training program. Based on the given table below: Eleven (12) out of the 16 regions have completed the training. While the remaining five (4) regions have yet to complete with their training which is still on-going.

Annex C shows the accomplishment of the different regions nationwide.

B. Distribution of Equipment

Each Regional Training Center received a set of CFC recovery unit and a set of mini-commercial trainer to be used in the delivery of a one-day technician training course and in refrigeration and air-conditioning courses. Annex B, illustrates the distribution of these equipment to the different regions initiated by TESDA.

C. PROMOTION and ADVOCACY

In order to give strong impact on the National CFC Recovery/Recycling Scheme, The Promotion and Advocacy of this program was initiated by TESDA Regional Offices. Press releases and other media promotion activities were undertaken in the regions.

EVALUATION of TRAINERS and TRAINING PROGRAM CONDUCTED

A. Profile of Trainees.

There were 3,223 participants who attended the Technician Training Program . The trainees came from various Institution /Agencies /Industries or Companies from all over the Philippines. They are other RAC trainers, technicians, owner proprietor, supervisor or foreman. The mean age of participants is 41. There are 3,148 or 97.7 percent male and 75 or 2.3 percent female participants. 1.4 percent or 45 participants are with Doctoral Units, 135 or 4.2 percent with Masteral Degree , 196 or 6.1 percent with Masteral Units, 1,221 or 37.9 percent with Bachelor Degree holders and 1,624 or 50.4 percent are TECH. VOC graduates.

B. Trainers Performance

The trainers in all training programs conducted were assessed by the participants. The areas evaluated were as follows: Organization and Preparations; Presentation of Subject Matter; Clarity of Instructions; Appropriate Transitions/ Summaries; Discussion and Questioning Techniques and Enthusiasm.

As reflected in Appendix A, Table 5 the instructors were rated “Very Good” in this categories.

C. Evaluation of Training Programs

In relation to the length of the program relative to the objectives and needs of the groups, Appendix A, Table 7 shows 2183 or 82.3 percent said it is just right, 363 or 13.6 percent rated it as too short and 108 or 4.1 percent said that it is too long.

In case of whether the expectation of the participants were met by the training program, Table 8 shows 318 or 12 percent said it was “Exceeded”, 2,060 or 77.6 percent said it “Was Met”, 259 or 9.8 percent answered it was “Partially Met”, and 17 or 0.6 percent said it was “Not Met”.

With regard to the expectation of participants on the relevance of the course content to their job, Table 9 shows 21 or 7.9 percent said “None”, 136 or 5.1 percent said “Very Little”, 1,246 or 46.9 percent said “About 50%”, 687 or 25.9 percent said “Almost All”, and 564 or 21.2 percent said “All”.

In case whether the expectation of the participants with regard to the amount of the Program Content New to the trainees, Table 10 indicates 39 or 1.5 percent said it was “None”, 247 or 9.3 percent said it was “Very Little”, 1,478 or 55.6 percent said it was “Almost All”, and 320 or 12.1 percent said it was “All”.

With regard to the question, how would you rate your level of skills and knowledge before the program, Table 6 indicates that the participants answered “Good” and “Very Good” after the program.

PROBLEMS, CONCERNS AND RECOMMENDATION

As expected, there are some problems that beset the implementation of the training program. These problems hopefully would not be a hindrance for TESDA, DTI, DENR Administration in turning into reality the future activities, projects/plans that could redound to the ultimate attainment of its goals and objectives.

A. PROBLEMS and CONCERNS

1. Lack of participation from the representatives of other agencies who were in charge in the recruitment of participants in the Training Program. There must be an active participation of all agencies involve in this activities.
2. Lack of information - dissemination drive in the region where there are seldom takers of the training program. Press releases and symposium should be undertaken to energize takers.
3. The late release of budget somehow affects the implementation of the project. It is hoped that in the future, constant follow-up of the release from agencies concerned shall be done. .

B. RECOMMENDATION

1. Conduct an impact evaluation as to the effectiveness of the CFC Recovery and Recycling Scheme for the Philippines Technician Level Training Program.
2. Integrate principles and practices of Recycling and Recovery in TESDA'S Refri-geration and Airconditioning related skills, and other development programs.
