REPORT ON

COMPUTERISATION AND DATA

IRON ORE SECTOR

1. INTRODUCTION

1.1. Capital Goods Development Project conducted by SPO in close collaboration with the United Nations Industrial Development Organisation (UNIDO) aims to assist the capital goods manufacturing industries. For planning of the critical industry, demand data collected from the seven sectors of the Government has been computerised according to the methodology for the project detailed in Technical Report No. 1. The sectors selected are given on table I.

1.2. State Institute of Sci. and Tech. at the request of SPO, carried out the computerisation under the guidance of the Capital Goods Project.

1.3. This report gives an account of data and outputs of computerisation in Iron Ore Mining Sector (TOS). Details of the demand for capital goods according to earlier plans and programmes were given in Technical Report No. XV.

1.4. The future plans have been assessed by SPO and indicated in the draft of the Sectoral Investment Plan. Accordingly the demand for capital goods has been calculated on the revised plans. These have been used for this report. This aggregation.

PROGRAMME

IN

TURKEY

Page 2

1.5. The main objective of the computerisation is aggregation of the total national demand for plate fabricated equipment (in terms of permutations and combinations of codified range of weight, types of material and plate thicknesses) and for other machinery in terms of major specifications and nomenclature.

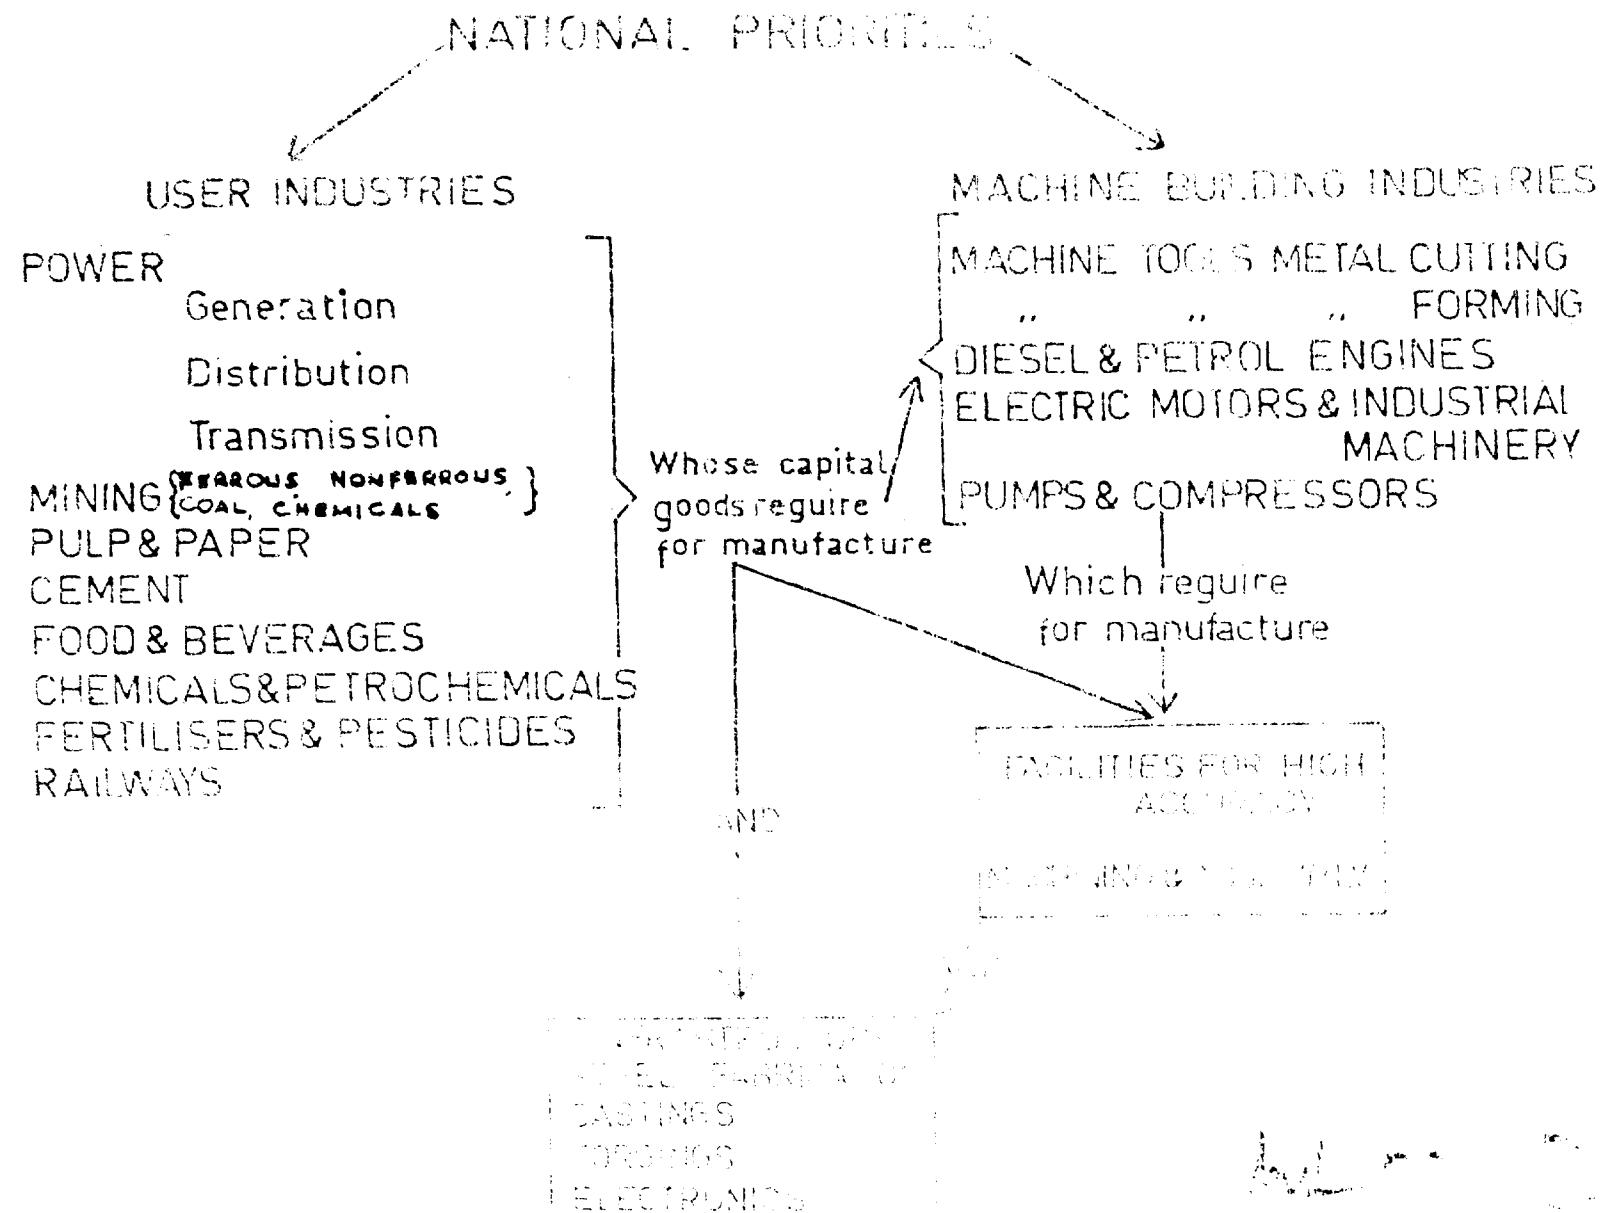

1.6. The study was conducted by Mrs. Emine Abdalai, SPO expert under the direction of Mr. M.M. Luther, Chief Technical Adviser, Capital Goods Project.

1.7. The project management is grateful to SIS President Mr. Nihat Guner, Head of the Technical Department Mr. Sefik Yildizeli and Mr. Erdal Bozkus who carried out the computerisation work.

1.8. Mr. Vahit Erdem, National Project Coordinator of the Capital Goods Development Project and Head of Sectoral Planning Division, SPO, has been associated with the work at all stages.

  
M.M. LUTHER,  
C.ENG.F.I.MECH.E. (LOND), F.I.PROD.E. (LOND)

DEVELOPMENT PROGRAMME IN TURKEY

Page 4

CHAPTER II

2.1. Objectives of the Capital Goods Development Project and computerisation

2.1.1. The main objective of the Capital Goods Development Project is to plan the long range development of capital goods industry in Turkey through identification of requirements of machinery and plate fabricated equipment of industrial plants planned to be constructed up to 2000. and prepare plans for their manufacture by expansion/modernisation/rehabilitation of existing units, modification of new units being set up and if still necessary by new investments.

2.1.2. The demand for capital goods for process industries has been determined by following the methodology presented in Technical Report No. I. Methodology for Planning of Capital Goods Industries by CTA, UNIDO. It deals with the details of equipment and machinery in terms of their specifications as well as manufacturing characteristics.

2.1.3. A 15 digit system based on the 5 digit SITC code has been evolved to cover all capital goods expected to be used in sectors considered by the Capital Goods Development Project in Turkey. The first 5 digits are the SITC codes and classify machines and equipment according to their functions.

The next 9 digits have been allocated for definition of nomenclature, specifications and manufacturing characteristics, and the last digit is used for information on whether it is imported or manufactured in Turkey. This system is schematically shown on Page 7

Birleşmiş Milletler Kaikinma Programı

UNITED NATIONS

NATIONS UNIES

DEVELOPMENT PROGRAMME IN TURKEY

Page 1

2.1.4. The capital goods requirement up to 2000 by the Iron and Steel Mining (T.D.C.I.) have been determined and codified under 15 digit codes. The information gathered are transferred on to a computer programme and data aggregated. The computer outputs give the total requirement for capital goods both by weight and cost, yearwise, on the basis of anticipated year of commissioning of user plants. The results are analysed with respect to existing manufacturing capacity for different types of capital goods at different specifications so that additional manufacturing facilities where necessary can be planned in time.

2.1.5. The computer outputs are mainly of three types, the first one shows the equipment requirement by 5 digits, the second one shows the demand for plate fabricated equipment in terms of weight, material and plate thickness. The third one is the 15 digit aggregation of machinery.

2.2. The capital goods requirement of Iron and Steel Mining Sector (T.D.C.I.) mentioned in the related technical report Report have been updated on the basis of the draft 5th Five Year Plan and data computerised. The updated project list is on table 10.

CHAPTER XII

CONCLUSIONS

3.1. CONCLUSIONS

3.1.1. The demand for capital goods for five years  
in the period 1981-1986 is as follows:

1. Industrial sector

Fabricated equipment	1331.0
Machinery	26227.4
Grand total	27558.4

3.1.2. The demand for capital goods for five years  
in the period 1986-2000 is as follows:

2. Non-industrial sector

Fabricated equipment	1830.6
Machinery	1830.6
Grand total	3661.2

1966-1967  
SCHOOL YEAR  
REPORT OF  
THE SUPERINTENDENT  
TO THE BOARD OF TRUSTEES  
OF THE  
UNIVERSITY HIGH SCHOOL  
OF THE  
CITY OF PORTLAND

ITEM	AMOUNT	ITEM	AMOUNT
Salaries and Wages	\$1,100,000	Supplies	\$100,000
Utilities	250,000	Equipment	100,000
Transportation	100,000	Books	50,000
Postage	10,000	Printing	20,000
Telephone	20,000	Other	10,000
Total	\$1,470,000		

The school year 1966-1967 has been one of great change and growth. The enrollment has increased from 1,100 to 1,400 students. The faculty has increased from 45 to 55 members. The building program has been completed with the addition of the new science building and the completion of the new gymnasium. The school has been renamed "University High School". The school has been accredited by the Northwest Association of Secondary Schools and Colleges.

The school has been involved in the "Oregon Project" which has resulted in the construction of a new science building and the completion of the new gymnasium.

The school has been involved in the "Oregon Project" which has resulted in the construction of a new science building and the completion of the new gymnasium.
