V.85-28984

The purpose of this document is to draw together the various types and versions of the clauses contained in drafts and precedents of the contract under consideration. It is essentially a research document, drawing on existing material and not seeking to furnish any new ideas on the possible approaches to issues in contractual relations.

The headings of the contract clauses dealt with in this document appear in the middle column of the "Contents" on the next page. The clause numbers are given in the right hand column. Reference is then made in the left hand column to the "Status" of the clauses considered. The letters "N", "R" and "O" stand for "Necessary", "Recommended" and "Optional" respectively. This classification indicates the degree of importance attached to the inclusion in the contract of a clause dealing with the issue raised in the corresponding clause heading. Thus, it is felt, a clause whose heading is assigned the status "Necessary" should appear in some form in the contract, even if it is not included in terms of any of the examples provided in this document.

On the page following the "Contents" there is an example of the preamble sometimes included in contracts. The recitals contained in a preamble serve to describe, if very briefly, the setting and conditions in which the agreement between the parties has been concluded. Under legal systems which take preambles into account, these can be of assistance in interpreting the clauses of contracts should a dispute later arise. Some legal systems, however, ignore the recitals contained in the preamble to a contract.

The major part of this document is given over to samples of the clauses which can be included in the contract under consideration. The examples appear in tabulated form. In some instances only one example is given of the possible terms of a clause dealing with the issue raised in the clause heading (left hand column of the table), in others two or three examples are provided. The fifth column, headed "Additions", contains extra material which supplements rather than replaces the examples given of a particular clause. The last column of the tables indicates, in abbreviated form, the sources from which the examples and additions have been generally drawn. The sources referred to above are set out in full in the last page of this document.

As recommended by the Second Consultation on the Agricultural Machinery Industry, the sources drawn from include the documentation considered by that Consultation, the views expressed on it, other relevant national and international material, the views of the participants in the Consultation and other interested parties and the experience gained by the Secretariat in work on contractual agreements.

(know-how)

THIS AGREEMENT is made BETWEEN _____ of _____ (hereinafter
called the "transferee") and _____ of _____ (hereinafter
called the "transferor") this _____ day of _____ .

WHEREAS: -

1. The transferee is desirous of erecting a facility for the manufacture, supply, maintenance, repair and use of agricultural machinery in his/her own country;

2. The transferor has, for a considerable number of years, been a manufacturer of agricultural machinery, and -

(a) has acquired a substantial amount of know-how embodied in the design of the agricultural machinery specified in Appendix _____ hereof and utilized by him/her in the manufacture thereof;

(b) has developed certain processes, methods, formulae and techniques used in the manufacture of the said agricultural machinery;

(c) possesses substantial valuable knowledge of a specialized nature relating to basic operational technical aspects of such processes, methods, formulae and techniques and continues to acquire information, skills, expertise and reputation relative to the manufacture of agricultural machinery;

(d) owns and maintains various letters patents of inventions, utility models, industrial designs and applications thereof relating to the said agricultural machinery and has the right to grant to others the licence to make, use or sell the said agricultural machinery and exploit the industrial property rights therein and has developed know-how related to such patents, utility models and industrial designs;

(e) is the owner of the trademark(s) _____ in _____ (country) used to designate the said products of agricultural machinery according to the letters patent hereinbefore mentioned.

3. The transferee desires to acquire and have the advantage of all the transferor's said and future technical knowledge, information, expertise, techniques and know-how in the manufacture, supply, maintenance, repair and use of agricultural machinery and desire to obtain a licence for the use and exploitation of the industrial property rights owned, maintained and which may be acquired by the transferor;

4. The transferor is mindful that the transferee has available to him/her in his/her own country a far lesser tradition in industry than has the transferor and that the consummation of this agreement is intended to aid and be in the interests of the industrial and economic development of the transferee's country.

Now, in CONSIDERATION of the premises and of the mutual covenants and conditions herein contained, the parties hereto have agreed and do by these presents agree as follows: -

- "know-how" - all the manufacturing knowledge, written or oral, whether in the form of patented or unpatented inventions, formulae, procedures and methods, or current and accumulated skills or experience which the transferor has acquired or may hereafter acquire, in so far as may be necessary to the transferee in the design of the products, in the design of the equipment for the manufacture of the products, in the manufacture of the products or in the operation, maintenance, use, sale or other disposition of the products;

- "net selling price" - the invoice price of the transferee of any product sold, leased or otherwise disposed of by the transferee to any third person in nominal arm's length trade, during the term of this contract; such price shall not include normal discounts actually granted by the transferee, the f.o.b. value of raw materials, intermediate goods, parts or other components supplied, directly or indirectly, by the transferee nor standard bought-out components used in the products manufactured by the transferee, insurance fees and packing and transportation charges as invoiced separately to customers, and duties and taxes actually incurred and paid by the transferee in connection with the delivery of the products.

- "plant" - the plant constructed hereunder in (country) for the manufacture of the products;

- "process" the entire process devised for and utilized to manufacture the products;

- "products" - those products and components listed in Appendix of this contract which are manufactured, assembled, used or sold under this licence/transfer and in accordance with the know-how, technical information or technical services and assistance furnished pursuant to this contract and identified by any trademark covered by this licence/transfer including the existing and new products as follows: -

"existing products" - the products that are now or have been in the past manufactured or assembled and offered and sold commercially by the transferor in (country/ies);

"new products" - all the products and components other than the existing products hereafter manufactured and hereafter sold commercially by the transferor in (country/ies) during the term of this contract.

(iii) limit access to such technical information to those of its employees as may reasonably require the same for use under this contract;

(iv) not use any of such technical information for any purpose other than for the manufacture of the products and for the design, installation, operation and maintenance of the plant;

(v) not make or cause to be made known to any third person any correlation or identity which may exist between, on the one hand, technical information supplied by the transferor pursuant to this contract and, on the other hand, any other technical information now or hereafter made available by third persons.

8.2. The obligation under sub-paragraph 1 hereof shall cease on the publication by the transferor or any third person of information comprising or being part of the technical information to the extent of such publication or of the agreement by both parties that such information or part thereof is, or has become, a part of the public domain.

8.3. Nothing contained herein shall in any way restrict or impair the transferee's right to use, disclose or otherwise deal with any technical information received, directly or indirectly, from the transferor which:-

(i) at the time of its receipt is, or which thereafter becomes, part of the public domain by publication or otherwise; or

(ii) the transferee can show was in its possession at the time of receipt and was not acquired, directly or indirectly, from the transferor; or

(iii) is independently made available to the transferee, after the time of receipt from the transferor, by a third person as a matter of right and which did not originate with the transferor.
