UNIDO’s Flagship Programme in Peru

Programme for Country Partnership (PCP)

Towards modern, competitive and inclusive industry

Launched in mid-2014, UNIDO’s Programme for Country Partnership (PCP) is an innovative partnership model for advancing Inclusive and Sustainable Industrial Development (ISID) on the national level. The first countries to embark on this partnership with UNIDO are Ethiopia, Senegal and Peru.

The key features of the PCP are strong government ownership of the programme; alignment with national industrialization strategies, targets and priorities; a multi-stakeholder partnership from design until implementation and the mobilization of joint broad-based investments. UNIDO’s role is to facilitate overall coordination and provide technical assistance with a multidisciplinary team of experts.

Joint broad-based investments

A Partner and Donor Working Group (PDWG) will mobilize funds and establish new partnerships to foster ISID. The PDWG will be led by the Ministry of Production, Ministry of Economy and Finance and the Ministry of Foreign Affairs. UNIDO will act as a technical advisor to PDWG to create synergies with ongoing and planned programmes, as well as develop new partnerships for greater development impact.

Government leadership

Leadership comes from the highest political level, with commitment and coordination provided by all relevant partners through a national steering committee.

Steering towards industry

Under the leadership of the Ministry of Production, the National Steering Committee is responsible for providing strategic guidance and direction to the PCP, aligning programmes to the priorities of the Government of Peru and the PCP partners.
Projects under each component are currently being developed together with national partners. For instance, in September 2016, to advance the “Quality and Innovation” component, a 3-day quality workshop was organized with the National Institute for Quality and the results of an assessment of three Innovation & Technology Centres (CITES) were presented in a separate workshop to foster innovation. Under the “Sustainable Industrial Parks” component, an assessment of the master plan for a new industrial park in Ancón was carried out, and a Global Environment Facility (GEF) funded project on sustainable industrial zones is being developed in Callao.

The first phase of the PCP Peru – the identification phase – began in December 2015, with the objective of discerning the developmental needs of Peru in terms of infrastructure, partnerships, strategies and policies. Meetings with diverse stakeholders scoped out strategic priorities for industrial development and UNIDO’s main areas of intervention.

### PCP Peru in four components

During the identification phase, four components were defined for the programme with a view to foster a modern, competitive and inclusive industry in Peru.

- **Quality and Innovation**
- **Value Chain and Enterprise Development**
- **Sustainable Industrial Parks**
- **Industrial Resource and Energy Efficiency and Renewable Energy**

For more information, please visit the Inclusive and Sustainable Industrial Development Operational Platform. Here you can also find information on PCP Ethiopia and PCP Senegal.
